35. You are to give Orders forthwith that every Orthodox Minister within Your Government be one of the Vestry in his respective parish, and that no Vestry be held without him, except in Case of Sickness or after Notice of a Vestry Summoned he omit to come—

36. And to the End that the Ecclesiastical Jurisdiction of the Lord Bishop of London may take place in Our Province under your Government as far as conveniently may be, We do think fit that You give all Countenance and Encouragement to the Exercise of the same, excepting only the collating to Benefices, granting Licences for Marriage and probates of Wills which We have reserved to You our Governor and to the Commander in Chief of Our said province for the time being—

37. And We do further Direct that no Schoolmaster who shall arrive in Our said Province from this Kingdom, be henceforward permitted to keep School, without the Licence of the said Lord Bishop of London, and that no other person now there or that shall come from other parts shall be admitted to keep School in Your Government without Your Licence first obtained.

38. And You are to take Especial Care, that a Table of Marriages, established by the Cannons of the Church of England be hung up in all places of Publick Worship according to the Rites of the Church of England.

39. And it is Our further Will and Pleasure, that in Order to Suppress as much as in You lies, every Species of Vice and Immorality, You forthwith do cause all Laws already made against Blasphemy, Prophaneness, Adultry, Fornication, Polygamy, Incest, profanation of the Lords Day, Swearing and Drunkenness to be rigorously put in Execution in every part of

Your Government, and that You take due care for the punishment of these, and every other Vice and Immorality by presentment upon Oath, to be made to the Temporal Courts by the Church Wardens of the several parishes, at proper times of the Year to be appointed for that Purpose; and for the further Discouragement of Vice, and Encouragement of Virtue and good living (that by such Examples the Infidels may be Invited and persuaded to Embrace the Christian Religion,) You are not to admit any persons to publick Trusts and Employments in the Province under Your Government whose ill Fame and Conversation may Occasion Scandal—

p. 799

40. And it is Our further Will and Pleasure, that all and every the French Inhabitants in Our said Province who are now possessed of Lands within the said Province in Virtue of Grants or Concessions made before the Signing of the preliminary Articles of Peace on the 3rd Day of Nov^r, 1762, within such Limited time as You in Your Discretion shall think fit, Register the several Grants or other Deeds, or Titles, by which they hold or Claim such Lands, in the Secretarys Office which said Grants, Deeds or other Titles, shall be Entered at large in the said Office, so that the particular Quantity of Land, it's Scite and Extent, the Conditions upon which it is Granted, either as to Rents, Services, or Cultivation, may appear fully and at length—

41. And in Case it shall Appear, upon a Strict and Accurate Examination of the said Grants and Title Deeds, to be taken in such manner as You shall think proper, that any of the Grantees or Persons claiming Lands under such Grants and Title Deeds, are in Possession of more Land than is contained within such Grants or other Concessions, or that the Terms and Conditions upon which the Lands were Granted have not been complied with agreeable to what is Stipulated in such Grants or Concessions, It is Our Will and Pleasure, that You forthwith represent the same to Us, by One of Our principal Secretaries of State to the End You may receive such Directions thereupon as the nature and circumstances of the Case shall appear to require, and You are to send a Duplicate of such Representation to Our Commissioners for Trade and plantations for their Information—

42. And Whereas it is necessary in Order to the advantageous and Effectual Settlement of Our said province, that the true State of it should be fully known; You are therefore as soon as conveniently may be, to cause an Accurate Survey to be made of the said Province, by such Able and Skilful person as is or shall be appointed for that Service, who is to Report to You in Writing for Your Judgment in the measures which You may in General pursue for the making of Settlements, not only the Nature and Quality of the Soil and Climate, the Rivers Bays and Harbours, and every other

Circumstance attending the Natural State of it; but also his opinion in what manner it may be most conveniently laid out into Counties, and to annex to his Report a Map of such Survey, with the several Divisions proposed marked upon it, But as the making such Survey, with the several Divisions proposed will be a Work of Great Length, You are in the mean time to carry on Settlements upon that plan, which shall appear to you to be most Expedient from the best Information You can collect—

43. And Whereas it has been found by Experience, that the Settling Planters in Townships hath very much redounded to their Advantage, not only with respect to the Assistance they have been able to Afford each other in their Civil Concerns, but likewise with regard to the Security they have thereby acquired againsy[sic] the Insults and Incursions of neighbouring[sic] Indians or other Enemies; You are therefore to lay out Townships of a Convenient

p. 800

Size and Extent in such places as You in Your Discretion shall Judge most proper; And it is Our Will and Pleasure that each Township do consist of about twenty thousand Acres, having as far as may be natural Boundaries, extending up into the Country, and comprehending a necessary part of the River St Lawrence where it can be conveniently had—

44. You are also to cause a proper place in the most convenient part of each Township to be marked out for building a Fort sufficient to contain such a Number of Families as You shall judge proper to Settle there, with Town and Pasture Lots convenient to each Tenement, taking Care that the said Town be laid out upon, or as near as conveniently may be to some Navigable River or the Sea Coast, and You are also to reserve to Us proper Quantities of Land in each Township for the following purposes, Viz^t For Erecting Fortifications and Barracks where necessary or for other Military or Naval Services, and more particularly for the Growth and Produce of Naval Timber, if there are any Wood Lands fit for that purpose
—

45. And it is Our further Will and Pleasure that a particular Spot in or as near each Town as possible be set apart for the Building a Church, and four hundred Acres adjacent thereto, allotted for the Maintenance of a Minister and two hundred Acres for a Schoolmaster.

46. And You are to give Strict Orders to the Surveyors whom You shall Employ to mark out the said Townships and Towns, to make returns to you of their Surveys as soon as possible with a particular Description of each Township, and the Nature of the Soil within the same.

47. And You are to oblige all such persons, as shall be appointed to be Surveyors of the said Lands in each Township, to take an Oath for the due performance of their Offices and for obliging them to make exact Surveys of all Lands required to be set out—

48. And Whereas nothing can more effectually tend to the Speedy settling our said Colony, the Security of the property of Our Subjects and the advancement of Our Revenue than the disposing of such Lands as are our property upon Reasonable Terms, and the establishing a regular and proper method of proceeding with respect to the passing of Grants of such Land; It is therefore Our Will and Pleasure that all and every person and persons who shall apply to you for any Grant or Grants of Land shall previous to their obtaining the same make it appear before You in Council, that they are in a Condition to Cultivate and Improve the same by setting thereon in proportion to the Quantity of Acres desired, a sufficient Number of white persons and Negroes; and in Case You shall upon a Consideration of the Circumstances of the person or persons applying for such Grants, think it adviseable to pass the same, in such Case You are to cause a Warrant to be drawn up, directed to the Surveyor General or other proper Officers, empowering him or them to make a faithful and Exact Survey of the Lands so petitioned for, and to return the said Warrant within six

p. 801

Months at furthest from the Date thereof, with a plot or Description of the Lands so Surveyed thereunto annexed, provided that You do take Care, that before any such Warrant is Issued as aforesaid, a Docquet thereof be entered in the Auditors and Registers Office, and when the Warrant shall be returned by the said Surveyor or other proper Officer, the Grant shall be made out in due form, and the Terms and Conditions required by these Our Instructions be particularly and Expressly mentioned in the respective Grants: And it is Our Will and pleasure, that the said Grants shall be registered within Six Months from the Date thereof in the Registers Office there, and Docquet thereof be also entered in Our Auditors Office there, in case such Establishment shall take place in Our said Province, or that in Default thereof such Grant shall be Void, Copies of all which Entries shall be returned regularly by the proper Officer to our Commission of Our Treasury and to Our Commissioners for Trade and plantations within six Months from Date thereof.

49. And Whereas great Inconveniences have arisen in many of Our Colonys in America from the granting excessive Quantities of Land to particular persons who have never cultivated or Settled it, and have thereby Prevented others more Industrious from Improving the same; in Order therefore to prevent the like Inconveniences for the future, You are to

take especial Care, that in all Grants to be made by You, by and with the Advice and Consent of Our Council, to persons applying for the same, the Quantity be in proportion to their Ability to Cultivate: And You are hereby directed to observe the following Directions and Regulations in all Grants to be made by You Viz:

That One hundred acres of Land be granted to every person being Master or Mistress of a Family for himself or herself and fifty Acres for every White or Black Man Woman or Child of which such persons Family shall consist, at the Actual time of making the Grant, and in Case any Person applying to You for Grants of. Land shall be desirous of taking up a larger Quantity than the Actual Number of Persons in his or her Family would Intitle such persons to take up, It is Our Will and Pleasure and You are hereby allowed and permitted to grant unto every such person or persons such further Quantity of Land as they may desire, not exceeding one thousand Acres over and above what they are entitled to, by the number of persons in their respective Families, provided it shall appear to you that they are in a Condition and Intention to Cultivate the same; and provided also that they do pay to the Receiver of Our Quit rents or to such other Officer as shall be appointed to receive the same the Sum of five Shillings only for every 40 fifty Acres so Granted on the Day of the Date of the Grant.—

That all Grantees be Subject to the payment of two Shillings Sterling for every hundred Acres to commence at the expiration of two Years from the Date of such Grant and to be paid Yearly and every Year, or in Default of such payment the Grant to be void—

That every Grantee upon giving proof that he or she has fulfilled the

Terms and Conditions of his or her Grant, shall be Entitled to another Grant in the proportion and upon the Conditions above mentioned.—

That for every fifty Acres of Land accounted plantable each patentee shall be Obligated within three Years after the Date of his patent to clear and Work three Acres at the least in that part of his Tract which lie shall Judge most Convenient and Advantageous, or else to clear and drain three Acres of Swampy or sunken Grounds or drain three Acres of Marsh if any such be within the Bounds of His Grant—

That for every fifty Acres of Land accounted Barren every patentee shall be obliged to put and keep on his Land within three years after the Date of his Grant three neat Cattle which number shall be obliged to continue on his Land until three Acres for every fifty be fully cleared and Improved

That if any person shall take up a tract of Land wherein there shall be no part fit for present Cultivation without manuring and improving the same every such Grantee shall be obliged within three years from the Date of his Grant, to Erect on some part of his Land one Good Dwelling House to contain at least twenty feet in length and Sixteen Feet in Breadth and also to put on his Land the like Number of three neat Cattle for every fifty Acres—

That if any person who shall take up any Stony or Rocky Grounds not for planting or pasture shall, within three years after the passing of his Grant begin to Employ thereon, and so continue to work for three years then next ensuing in Digging any Stone Quarry or other Mine one good able Hand for every hundred Acres of such Tract, it shall be accounted a sufficient Cultivation and Improvement.

That every three Acres which shall be Cleared and Worked as aforesaid, and every three Acres which shall be Cleared and Drained as aforesaid, shall be accounted a sufficient Seating, plantation, Cultivation and Improvement to save for ever from Forfeiture fifty Acres of Land in any part of the Tract contained within the same patent; and the patentee shall be at Liberty to withdraw his Stock, or to forbear working in any Quarry or mine, in proportion to such Cultivation and Improvement, as shall be made upon the Swamps, sunken Grounds and Marshes which shall be Included in the same patent—

That when any person who shall hereafter take up and patent any Lands, shall have seated planted and Cultivated, or Improved the said Land or any part of it according to the Directions and Conditions above mentioned such patentee may make proof of such Seating planting Cultivation and Improvement in the General Court, or in the Court of the County, District or precinct where such Lands shall lie, and have such proof certified to the Registers Office and there entered with the Record of the said patent, a Copy of which shall be admitted on any Trial to prove the Seating and

planting of such Land.

And Lastly to ascertain the true Quantity of Plantable and Barren Land contained in each Grant hereafter to be made within Our said province You are to take especial Care that in all Surveys hereafter to be made every Surveyor be required and enjoyned to take particular Notice according to the best of his Judgment and understanding how much of the Land so Surveyed is plantable and how much of it is Barren and unfit for Cultivation,

p. 803

and accordingly to Insert in the Survey and plot to him to be returned into the Registers Office the true Quantity of each kind of Land.

50. And Whereas it hath been represented to Us that the Governors of several of Our Colonies in America have Granted Lands away close to the Forts belonging to Us by which means the Garrisons of such Forts have been obliged to pay the proprietors of those Lands extravagant prices for Wood cut for a necessary supply of Fuel, and thereby a great and Unreasonable Expense has been brought upon the Military Contingencies It is Our Express Will and Pleasure that You do take Especial Care, that in all Warrants for Surveying of Lands adjacent or Contiguous to a Fort or Fortification, whether such Warrant be Granted upon an Original Petition to you in Council, or upon Our Order in Our privy Council there be an Express Direction to the Surveyor that he do reserve to Us Our Heirs and Successors for the Use of the Fort, near to which the Lands shall lye such a part of the Land petitioned for (being Woodland) and in such a situation as the Commander in Chief of the said Fort (with whom he is required to Consult and Advise in all such Cases) shall Judge Convenient and sufficient for a permanent and Certain Supply of Fuel for such a Garrison as the said Fort may be able to Contain. And it is Our further pleasure, that a regular plot of such reserved Land, describing the Bounds, expressing the Quantity of Acres, and properly signed and attested by such Surveyor, be delivered to the Commanding Officer of each Fort, to be there publickly hung up and a Duplicate thereof also Recorded in the Secretary's Office or other proper Office of Record in Our province under Your Government; and as we judge the due Execution of this Our Order to be essential to Our Service, You are hereby required to take Care, that the Regulations above prescribed be duly entered upon the Council Books of Our said Province, as a Standing Order to all persons, who may be Intrusted with the powers to which they referr—

51. And it is Our further Will and Pleasure that in all Grants of Lands to be made by You as aforesaid, regard be had to the profitable and unprofitable Acres so that each Grantee may have a proportionable Number of One Sort and the other; as likewise that the Breadth of each Tract of Land to be hereafter

Granted be one third of the Length of such Tract, and that the Length of each Tract do not Extend along the Banks of any River but into the Main Land that thereby the said Grantees may have each a Convenient Share of what accommodation the said River may Afford for Navigation or otherwise—

52. And Whereas it hath been represented to Us, that many Parts of the Province under your Government are particularly adapted to the Growth and Culture of Hemp and Flax, It is therefore Our Will and pleasure that in all Surveys of Land for Settlement, the Surveyor be directed to Report whether there is any or what Quantity of Lands contained within such Survey, fit for the production of Hemp and Flax and you are to take particular Care to insert a Clause in every Grant of Land where any part thereof is fit for such

p. 804

production, obliging the Grantee annually to sow a proportionable part of his Grant with Hemp or Flax Seed—

53. And Whereas it hath been further represented to Us that a great part of the Country in the Neighbourhood of Lake Champlain, and between that Lake and the River S^t Lawrence, abounds with Woods, producing Trees fit for nesting for Our Royal Navy, and other Useful and necessary Timber for naval Construction; You are therefore expressly directed and required to cause such parts of the said Country or any other within Your Government, that shall appear upon a Survey to abound with such Trees and shall lye convenient for Water Carriage, to be reserved to Us, and to Use Your best Endeavour to prevent any Waste being Committed upon the said Tracts by punishing in due Course of Law any persons who shall Cut Down or Destroy any Trees growing thereon, and You are to Consider and advise with Our Council, whether some Regulation that shall prevent any Saw Mills whatever from being Erected within your Government without a Licence from you or the Commander in Chief of Our said Province for the time being, may not be a means of preventing all Waste and Destruction in such Tracts of Land as shall be reserved to Us for the purposes aforesaid—

54. And whereas it appears from the Representations of Our late Governor of the District of Trois Rivieres that the Iron Works at S^t Maurice in that District are of great Consequence to Our Service; It is therefore Our Will and Pleasure that no part of the Lands, upon which the said Iron Works were carried on, or from which the Ore Used in such Works was procured, which shall appear to be necessary and Convenient for that Establishment, either in respect to a free passage to the River S^t Lawrence, or for producing a necessary Supply of Wood, Corn and Hay, or for pasture for Cattle, be Granted to any private person whatever, and also that as large a District of Land, as conveniently may be adjacent to and lying round the

said Iron Works, over and above what may be necessary for the above purposes be reserved for Our Use to be disposed of in such manner as We shall hereafter direct and appoint—

55. And Whereas it is necessary that all Persons who may be desirous of Settling in Our said province, should be fully Informed of the Terms and Conditions upon which Lands will be granted in Our province, You are therefore as soon as possible to cause a publication to be made by proclamation or otherwise as you in Your Discretion shall think most adviseable of all and every the foregoing Terms, Conditions and Regulations of every kind respecting the Grants of Lands, in which proclamation it may be Expedient to add some short Description of the natural Advantages of the Soil and Climate, and its peculiar Advantages for Trade and Navigation; and you are to take such Steps as You shall think proper for the publishing such proclamation in all the Colonies in North America—

56. And it is Our further Will and Pleasure that all the foregoing Instructions to You as well as any which You may hereafter receive relative to the

p. 805

form and method of passing Grants of Lands, and the Terms and Conditions to be annexed to such Grants be entered upon Record with the Grants themselves for the Information and Satisfaction of all parties whatever that may be concerned therein.

57. And it is Our further Will and Pleasure that You do consider of a proper and Effectual Method of Collecting receiving and accounting for Our Quit Rents whereby all Frauds Concealment Irregularity or Neglect therein may be prevented and whereby the Receipt thereof may be Effectually chequed and Controlled, and if it shall appear necessary to pass An Act for the more effectually ascertaining and the more speedily and regularly collecting Our Quit Rents, You are to prepare the Heads of such a Bill, as you shall think most Effectually conduce to the procuring the good Ends proposed, and to Transmit the same to Us by one of Our principal Secretaries of State, for Our further Directions therein, and You are also to Transmit a Duplicate thereof to Our Commissioners for Trade and plantations for their Information

58. And it is Our further Will and Pleasure that the Surveyor General or such other person or persons as you shall think proper to Appoint, do, once in every Year or oftener, as Occasion shall require, inspect the State of all Grants of Land made by you, and make Report thereof to You in Writing, Specifying whether the Conditions therein contained have or have not been complied with, or what Progress has been made

towards fulfilling the same; and you are annually to transmit Copies of such Reports to Us by One of Our principal Secretaries of State, and Duplicates thereof to Our Commissioners. for Trade and Plantations for their Information—

59. And Whereas Our Province of Quebec is in part Inhabited and Possessed by several Nations and Tribes of Indians, with whom it is both necessary and Expedient to cultivate and maintain a Strict Friendship and good Correspondence, so that they may be Induced by Degrees not only to be good Neighbours to Our Subjects, but likewise to be good Subjects to Us, You are therefore as soon as You conveniently can, to appoint a proper person or persons to Assemble and treat with the said Indians, promising and Assuring them of Protection and Friendship on our part and delivering them such presents as shall be sent to You for that purpose—

60. And You are to Inform yourself with the greatest Exactness of the Number, Nature and Disposition of the several Bodies or Tribes of Indians, of the manner of their Lives, and the Rules and Constitutions by which they are governed and regulated, and You are upon no Account to molest. or disturb them in the possession of the said province as they at present Occupy, or Possess, but to Use the best means You can for Conciliating their Affections and Uniting them to Our Government, reporting to Us, bar One of Our principal Secretaries of State, and to Our Commissioners for Trade and Plantations whatever Information You can collect with respect to these people, and the whole of Your proceedings with them.—

p. 806

61. Whereas We have by Our proclamation dated the 7th day of October in the 3^d Year of Our Reign, strictly forbid, on pain of Displeasure, all our Subjects from making any purchases or Settlements whatever, or taking possession of any of the Lands reserved to the several Nations of Indians, with whom we are connected, and who live under our protection without our especial leave for that purpose first obtained It is Our Express Will and Pleasure that you take the most Effectual Care, that Our Royal Directions herein be punctually complied with, and that the Trade with such of the said Indians as depend upon Your Government be carried on in the manner and under the Regulations prescribed in Our said proclamation—

62. You are to use Your best Endeavours in Improving the Trade of those parts by settling such Orders and Regulations therein, with the Advice of our said Council as may be most acceptable to the Generality of the Inhabitants. And it is Our Express Will and Pleasure, that You do not upon any pretence Whatever, upon pain of Our Highest Displeasure, give Your

Assent to any Law or Laws for setting up any Manufactures and carrying on any Trades which are hurtful and prejudicial to this Kingdom, and that You do use Your Utmost Endeavours to discourage, discountenance and restrain any Attempts which may be made to set up such Manufactures or establish any such Trades—

63. And it is Our Will and Pleasure, that You do not dispose of any Forfeitures or Escheats to any Person, until the Sheriff or other proper Officer have made Enquiry by a Jury upon their Oaths, into the true Value thereof, nor until You have transmitted to Our Commissioners of Our Treasury a particular Account of such Forfeitures and Escheats, and the Value thereof. And You are also to take Care that the produce of such Forfeitures and Escheats, in Case We think proper to give You Directions to dispose of the same, be duly paid to Our Treasurer or Receiver General of Our said province, and a full Account transmitted to Our Commissioners of Our Treasury, or Our High High Treasurer for the Time being with the Names of the persons to whom disposed.

64. And Whereas Commissions have been Granted unto several persons in Our Respective Plantations in America for the Trying of pirates in those parts pursuant to the Acts for the more Effectual Suppression of Piracy. And by a Commission already sent to Our province of New York Our Governor there is Impowered together with others therein mentioned to proceed accordingly in Reference to Our said Province; Our Will and pleasure is that you do Use Your best Endeavours to apprehend all persons whatever who may have been guilty of Piracy within Your Government or who having Committed such Crimes at other places may come within your Jurisdiction; and until we shall think proper to direct the like Commission to be Established for Our Government of Quebec, You are to send such pirates with what proofs of their Guilt You can procure or Collect, to Our Governor of New York to be tryed and punished under the Authority of the Commission established for those parts—

65. And Whereas You will Receive from our Commissioners for Executing the Office of High Admiral of Great Britain, and of Our Plantations, a Commission constituting You Vice Admiral of Our said Province, You are hereby required and Directed Carefully to put in Execution the several powers thereby Granted you—

66. Whereas great Inconveniences have happened heretofore by Merchant Ships and other Vessels in the Plantations, wearing the Colours born by Our Ships of War under pretence of Commissions granted to them by the Governors of the said plantations, and by trading under those Colours not only amonst[sic] Our Own Subjects, but also those of other princes and States, and committing divers Irregularities, they may very much dishonor Our Service; For preventing thereof You are to oblige the Commanders of all such Ships, to which You shall grant Commissions, to wear no other Colours than such as are described in an Order of Council of the 7th of January 1730 in relation to Colours to be Worne by all Ships and Vessels, Except Our Ships of War.

67. And Whereas there have been some great Irregularities in the manner of Granting Commissions in the plantations to private Ships of War, You are to govern yourself, whenever there shall be Occasion according to the Commission and Instructions granted in this Kingdom but You are not to grant Commissions of Marque or Reprisal against any prince or State or their Subjects in Amity with Us to any person whatsoever without Our Especial Command.

68. Whereas We have been Informed that during the time of War Our Enemys have frequently got Intelligence of the State of our plantations by Letters from private persons to their Correspondence in Great Britain, taken on Board Ships coming from the plantations, which has been of Dangerous Consequence; Our Will and Pleasure therefore is, that You signify to all Merchants, Planters and others, that they be very Cautious in time of War whenever that shall happen in giving any account by the Letters of the publick State and Condition of Our province under your Government; And You are further to give directions to all masters of Ships or other persons to whom you may Entrust Your Letters, that they put such Letters into a Bag, with a Sufficient Weight to sink the same Immediately in case of Imminent Danger from the Enemy, and You are also to let the Merchants and Planters know, how greatly it is for their Interest that their Letters should not fall into the Hands of the Enemy; and therefore that they should give like Orders to Masters of Ships in Relation to their Letters; and You are further to advise all Masters of Ships that they do sink all Letters in Case of Danger in the manner before mentioned—

69. And Whereas the Merchants and Planters in Our plantations in America have, in time of War, Corresponded and traded with our Enemies, and carried Intelligence to them, to the great Prejudice and Hazard of Our

p. 808

said plantations; You are therefore by all possible Methods, to endeavour to hinder such Trade and Correspondence in time of War—

70. And You are to Report to Us, by one of Our principal Secretaries of State; What is the Nature of the Soil and Climate of the province under your Government, if it differs in those Circumstances from Our other Northern Colonies, in what that Difference consists, and what beneficial Articles of Commerce the different parts of it are capable of producing?—

What Rivers there are, and of what extent and convenience to the planters?

What are the principal Harbours, how situated, of what extent, and what is the Depth of Water and Nature of the Anchorage in each of them?

What Quantity of Land is now under actual Improvement and Settlement? what are the chief Articles of produce and Culture, the annual amount of the Quantity of each, and upon what Terms and Conditions the Inhabitants hold their Lands, either of Cultivation Rent, or personal Service?—

What is the Quantity, Nature and property of the Land uncultivated, how much of it is capable of Culture, and what part thereof is private property?—

What is the number of Inhabitants, Whites and Blacks distinguishing each; what number of the former is capable of bearing Arms, and what number of the latter is annually necessary to be supplied in proportion to the Land Cultivated.

What was the nature, form and Constitution of the Civil Government; what Judicatures were there Established, and under the Regulations did the french Inhabitants carry on their Commerce; and You are to transmit a Duplicate of such Account to Our Commissioners for Trade and plantations for their Information.

71. You are from time to time to send unto Us by One of Our principal Secretaries of State as aforesaid; An account of the Increase and Decrease of the Inhabitants, Whites and Blacks; And also an Account of all persons, Born, Christened and Buried and You are to Transmit duplicates of such Accounts to Our Commissioners for Trade and plantations for their Information.

72. Whereas it is absolutely necessary that We be exactly Informed of the State of Defence of all our plantations in America, as well in Relation to the Stores of War that are in each plantation, as to the Forts and Fortifications there, and what more may be necessary to be built for the Defence and

Security of the same, You are as soon as possible to prepare an Account thereof with Relation to Our said province in the most particular manner, and You are therein to Express the present State of the Arms, Ammunition, and other Stores of War, belonging to the said Province, either in publick Magazines, or in the Hands of private persons; together with the State of all places, either already forfeited or that you Judge Necessary to be for-

p. 809

feited for the Security of Our said province; and You are to transmit the said Accounts to Us by One of Our Principal Secretaries of State, and also Duplicates thereof to Our Commissioners for Trade and Plantations, for their Information, and also a Duplicate thereof to Our Master General or Principal Officers of Our Ordnance; which Accounts are to Express, the particulars of Ordnance, Carriages, Balls, Powder, and other Sorts of Arms, and Ammunition in Our publick Stores, and so from time to time of what shall be sent to you, or bought with the publick Money, and to Specify the time of the disposal and the Occasion thereof ; and You are half yearly to transmit a General Account of the State of the Fortifications and Warlike Stores, specified in the manner above mentioned—

73. You are from time to time to give an Account what Strength your Neighbours have by Sea and Land, and of the Condition of their plantations, and what Correspondence You keep with them—

74. And in case of any Distress of any other of Our plantations, You shall, upon application of the respective Governors thereof unto you, assist them with what aid the Condition and Safety of Our province under Your Government can spare.

75. If any thing shall happen which may be of advantage or Security to Our province under Your Government, which is not herein, or by Your Commission provided for, We do hereby allow unto You with the Advice and Consent of Our Council, to take Order for the present therein, giving unto Us by One of Our Principal Secretaries of State Speedy Notice thereof, that You may receive Our Ratification, if We shall approve the same; Provided always that You do not, by Colour of any power or Authority hereby given You, Commence or Declare War without Our Knowledge and particular Commands therein; and you are also to Transmit duplicate of such Notice, as aforesaid, to Our Commissioners for Trade and plantations for their Information.—

76. And whereas We have by the first Article of these Our Instructions to You directed and Appointed, that Your Chief Residence shall be at Quebec, You are nevertheless frequently

to Visit the other parts of Your Government, in Order to Inspect the Management of all publick Affairs and thereby the better to take care, that the Government be so administered, that no disorderly practice may grow up contrary to Our Service and the welfare of Our Subjects—

77. And Whereas great Prejudice may happen to Our service, and the security of the Province by Your absence from those parts, You are not upon any pretence whatsoever to come into Europe, without having first obtained leave for so doing from Us under Our Sign Manual and Signet or by Our Order in Our privy Council; Yet nevertheless in Case of Sickness, You may go to South Carolina, or any other of Our Southern plantations, and there Stay for such Space as the Recovery of Your Health may absolutely require—

p. 810

78. And Whereas We have thought fit by Our Commission to direct, that in Case of Your Death or absence from Our said province, and in Case there be at that time no person within Our said province Commissionated or Appointed by Us to be Our Lieutenant Governor or Commander in Chief that the Eldest Councillor, who shall be at the time of Your Death or absence residing within Our said Province under Your Government, shall take upon him the Administration of Government, and execute our said Commission and Instructions, and the several powers and Authorities therein directed It is nevertheless Our Will and Pleasure that in such Case the said President shall forbear to pass any Act or Acts but what are immediately necessary for the peace and Welfare of the said Province, without our particular Orders for that purpose, and that he shall not remove or Suspend any of the Members of Our Council, nor any Judges, Justices of the peace, or other Officers Civil or Military, without the advice and consent of at least Seven of the Members of Our said Council, nor even then without good and sufficient Reasons for the same which the said President is by the first Opportunity to transmit Signed by himself and the rest of Our said Council, to Us by One of Our principal Secretaries of State, and he is also to transmit a Duplicate of such Reasons to Our Commissioners for Trade and plantations for their Information.—

79. And Whereas We are willing in the best manner to provide for the Support of the Government of Our Province aforesaid, of which You are Governor, by setting apart sufficient allowances to such as shall be Our Governor or Commander in Chief residing for the time being within the same, Our Will and Pleasure is, that when it shall happen, that You shall be Absent from Our said Province, One full Moiety of the Salary and all perquisites and Emoluments whatsoever, which would otherwise become due unto you, shall during the time of Your absence, be paid and satisfied unto Our Commander in Chief, who shall be resident within our said

province for the time being, which we do hereby Order and allot to him for his Maintenance and for the better Support of the Dignity of that Our Government.

80. And You are upon all Occasions to send unto Us by One of Our principal Secretaries of State a particular Account of all Your proceedings, and of the Condition of Affairs within Your Government, and also a Duplicate thereof to Our Commissioners for Trade and plantations, for their Information, except in cases of a Secret Nature—

MEMORANDUM—The Instructions relative to the Acts of Trade and Navigation for Gov^r Carleton are the same with those given to Gov^r Shirley for the Bahama Islands—

Plantation Book, 1767-1771 Privy C. O.

Quebec. General Instructions, Gov. Carleton, approved by His Majesty in Council the day of 1768.

No. 189.

COMMISSION PASSED UNDER THE GREAT SEAL OF GREAT BRITAIN APPOINTING SIR GUY CARLETON

TO BE CAPTAIN AND GOVERNOR IN CHIEF OF THE PROVINCE OF QUEBEC.

PATENT ROLL, 15 GEO. 3. PART II. NO. 13.

Guy Carleton Esqr. }
Governor of Quebec }

also omitted in Sir Guy Carleton's Commission of 22 April 1786

omitted in Haldimand's Commission of 18 Sep^r. 1777

George the third by the Grace of God of Great Britain France and Ireland King Defender of the Faith etc^a [To Our Trusty and Wellbeloved Guy Carleton Esquire Greeting Whereas Wee did by Our Letters patent under our Great Seal of Great Britain bearing date at Westminster the Twelfth day of April in the Eighth Year of Our Reign Constitute and Appoint you to be our Captain General and Governor in Chief in and over our province of Quebec in America bounded on the Labrador Coast by the River Saint John and from thence by a Line drawn from the Head of that River through the Lake Saint John to the South East of Lake Nipissin from whence the said Line crossing the River Saint Lawrence and Lake Champlin in forty five Degrees of Northern Latitude passes along the High Lands which divide the Rivers that empty themselves into the said River Saint Lawrence from those which fall into the Sea and also along the North Coast of the Bay des Chaleurs and the Coast of the Gulph of Saint Lawrence to Cape Roziers and from thence Crossing the Mouth of the River Saint Lawrence by the West End of the Island of Anticosti terminates at the aforesaid River Saint John together with all the Rights Members and appurtenances whatsoever thereunto belonging for and during our Will and pleasure as by the said Recited Letters patent (Relation being thereunto had) may more fully and at large appear And Whereas We did also by Our Letters patent under our Great Seal of Great Britain bearing date at Westminster the Sixteenth day of March in the Twelfth Year of Our Reign Constitute and Appoint Molineux Shuldam Esquire to be Our Governor and Commander in Chief in and over our Island of Newfoundland all the Coast of Labrador from the entrance of Hudsons Streights to the River Saint John which discharges itself into the Sea nearly Opposite the West End of the Island of Anticosti including that Island with any other small Islands on the said Coast of Labrador and also the Islands of Modelaine in the Gulph of Saint Lawrence as also of all Our Forts and Garrisons erected and established in our said Islands of Newfoundland Antiscotti and Madelaine or on the Coast of Labrador within the Limits aforesaid for and during

and at large appear Now know you that We have revoked and determined and do by these presents Revoke and determine the said Recited Letters patent granted to you the said Guy Carleton as aforesaid and every Clause Article and thing therein contained and We have also Revoked and determined and do by these presents Revoke and determine so much and such part of the said recited Letters patent granted to Molineux Shuldham Esquire as aforesaid as relates to the Coast of Labrador including the Island of Anticosti with any other the said small Islands on the said Coast of Labrador and every Clause Article and thing therein contained so far as the same relates to the said Coast of Labrador and the Islands therein before recited] And further know you that We reposing especial Trust and Confidence in the prudence Courage and Loyalty of You the said Guy Carleton of our especial Grace certain knowledge and meer motion have thought fit to constitute and appoint you the said Guy Carleton our Captain General and Commander in Chief in and over Our Province of Quebeck in America comprehending all our Territories Islands and Countries in North America bounded on the South by a Line from the Bay of Chaleurs along the Highlands which divide the Rivers that empty themselves into the River Saint Lawrence from those which fall into the Sea to a point in fforty five degrees of Northern Latitude on the Eastern Bank of the River Connecticut keeping the same Latitude directly West through the Lake Champlain until in the same Latitude it meets with the River Saint Lawrence from thence up the Eastern Bank of the said River to the Lake Ontario thence through the Lake Ontario and the River commonly called Niagara and thence along by the Eastern and South Eastern Bank of Lake Erie following the said Bank until the same shall be intersected by the Northern Boundary Granted by the Charter of the province of Pensylvania in case the same shall be so intersected and from thence along the said Northern and Western Boundaries of the said Province until the said Western Boundary strikes the Ohio but in Case the said Bank of the said Lake shall not be found to be so intersected then following the said Bank until it shall Arrive at that point of the said Bank which shall be nearest to the North Western Angle of the said Province of Pensylvania and thence by a Right Line to the said North Western Angle of the said Province and thence along the Western Boundary of the said Province untill it Strikes the River Ohio and along the Bank of the said River Westward to the Banks of the Mississippi and Northward along the Eastern Bank of the said River to the Southern Boundary^{1]}

¹ This portion of the boundary description as varied in the Commission of the 22nd April, 1786, appointing Sir Guy Carleton to be Captain General and Governor in Chief of the Province of Quebec, reads as follows:

"from those which fall into the Atlantic Ocean, to the north Westmost

head of Connecticut River, thence down along the middle of that River to the forty fifth Degree of North Latitude, from thence by a line due West on said latitude until it strikes the River Iroquois or Cataraqui thence along the middle of the said River into Lake Ontario through the middle of said Lake until it strikes the communication by water between that lake and Lake Erie through the Middle of said Lake until it arrives at the water communication between that Lake and Lake Huron thence along the middle of said water communication into the Lake Huron thence through the Middle of said Lake to the water communication between

p. 813

of the Territory granted to the Merchants Adventurers of England trading to Hudsons Bay and also all such Territories Islands and Countries which have since the Tenth of february One thousand Seven hundred and Sixty three been made part of the Government of Newfoundland as aforesaid together with all the Rights Members and Appurtenances whatsoever thereunto belonging And we do hereby require and Command You to do and execute all things in due manner that shall belong to your said Command and the Trust that We have reposed in you according to the several powers and directions granted or Appointed You by this present Commission and the Instructions and Authorities herewith given unto you or by such further powers Instructions and Authorities as shall at any time hereafter be granted or appointed you under our Signet and Sign Manual or by Our Order in Our Privy Council and according to such Ordinances as shall hereafter be made and Agreed upon by you with the Advice and Consent of the Council of our said province under Your Government in such manner and form as is hereinafter expressed And Our Will and pleasure is that you the said Guy Carleton do after the publication of these Our Letters patent in such manner and fform as been heretofore accustomed to be used on like Occasions in the first place to take the Oaths appointed to be taken by an Act passed in the ffirst year of the Reign of King George the first Intituled (An Act for the further Security of his Majestys person and Government and the Succession of the Crown in the Heirs of the late Princess Sophia being Protestants and for Extinguishing the hopes of the pretended prince of Wales and his open and secret Abettors) And by an Act passed in the Sixth Year of Our Reign Intituled (An Act for Altering the Oath of Abjuration and the Assurance and for Amending so much of an Act of the seventh Year of her late Majesty Queen Anne intituled an Act for the improvement of the Union of the two Kingdoms as after the time therein limited requires the Delivery of certain Lists and Copies therein mentioned to persons Indicted of High Treason or Misprision of Treason) as also that you make and Subscribe the Declaration mentioned in an Act of Parliament made in the Twenty fifth Year of the Reign of King Charles the Second Intituled (An Act for preventing Dangers which may happen from Popish Recusants) And likewise that you take the Oath Usually taken by Govenors in the plantations for the due Execution of the Office and Trust of Our Captain General and

has

Governor in and over our said province and for the due and impartial Administration of Justice and further that you take the

that Lake and Lake Superior thence through Lake Superior northward of the Isles Royal and Phillipeaux to the Long Lake thence through the middle of said Long Lake and the water communication between it and the Lake of the Woods to the said Lake of the Woods thence through the said Lake to the Most Northwestern point thereof and from thence on a due west course to the River Mississippi and northward to the Southern boundary" . . .

The foregoing variation of the boundary description was made in consequence of the Treaty of Versailles, 1783, between Great Britain and the United States of America, signed at Paris the 3rd September, 1783. By this Treaty His Britannic Majesty acknowledged the United States to be free, sovereign and independent states, and Article II fixed the boundaries between the British and United States territories in North America.

p. 814

Oath required to be taken by Governors of the plantations to do their utmost that the several Laws relating to Trade and the plantations be duly observed which said Oaths and Declaration Our Council of Our said province or any three of the Members thereof have hereby full power and Authority and are required to tender and Administer to you all which being duly performed you shall Yourself Administer to each of the Members of Our said Council (Except as herein after Excepted) the said Oaths mentioned in the said Acts Intituled (An Act for the further Security of his Majestys person and Government and the Succession of the Crown in the Heirs of the late Princess Sophia being Protestants and for Extinguishing the hopes of the pretended Prince of Wales and his open and secret Abettors) And (An Act for Altering the Oath of Abjuration and the Assurance and for Amending so much of an Act of the Seventh Year of her late Majesty Queen Anne Intituled An Act for the Improvement of the union of the two Kingdoms as after the time therein Limited requires the delivery of certain Lists and Copies therein mentioned to persons Indicted of High Treason or Misprision of Treason) as also cause them to make and Subscribe the afore mentioned Declaration and to Administer unto them an Oath or Oaths for the due Execution of their places and Trusts And Whereas Wee may find it expedient for Our Service that our Council of Our said province should be in part composed of Such of Our Canadian Subjects or their Descendants as remain within the same under the ffaith of the Treaty of Paris and who may profess the Religion of the Church of Rome It is therefore Our Will and pleasure that in all Cases where such persons shall or may be Admitted either into Our said Council or into any other offices they shall be exempted from all Tests and from taking any other Oath than that prescribed in and by an Act of Parliament passed in the ffourteenth Year of Our Reign Intituled (An Act for making more Effectual provision for the Government of the province of Quebec in North America) And also the usual Oath for the due Execution of their places and

*Addition to Sir Guy
Carleton's
Commission of 22
April 1786

By Writ of Privy Seal

(Patent roll 29 April 16 Geo. III., Part 4, N° 17, contains

Carleton's Commission as Commander in Chief and revokes that to Gage.)

Patent roll 17 Geo. III., Part 5, N° 6, contains Haldimand's Commission as Governor of the Province of Quebec, &c., dated 18th September, 1777. This Commission is in the same terms as Carleton's of 27 Dec^r 1774,—certain omissions and additions are noted in the margin.

Haldimand's Commission as Commander in Chief (Pat. 17, Geo. III., Part 5, N° 5 (18 Sept^r, 1777) revokes Carleton's of 29 April, 1776.

No. 190.**INSTRUCTIONS, PASSED UNDER THE ROYAL SIGN
MANUAL AND SIGNET, FOR GUY CARLETON**

AS CAPTAIN GENERAL AND GOVERNOR IN CHIEF OF THE PROVINCE OF
QUEBEC AND THE TERRITORIES DEPENDENT THEREUPON.¹

Instructions to Our Trusty and Welbeloved Guy Carleton
Esquire, Our Captain General and Governor in Chief
in, and over Our Province of Quebec in America and
of all Our Territories dependent thereupon. Given at
Our Court at S^t James's the Third Day of January
1775. In the Fifteenth year of Our Reign.

First, With these Our Instructions you will receive Our
Commission under Our Great Seal of Great Britain,
constituting you Our Captain General and Governor in Chief
in, and over Our Province of Quebec in America, and all Our
Territories thereunto belonging, as the said Province and
Territories are bounded and described in, and by the said
Commission. You are therefore to take upon you the Execution
of the Office and Trust We have

[¹ Canadian Archives, M 230, p. 116*****On Dec. 5, 1774, the Board of Trade submitted to the King the draught of a new Commission for Governor Carleton with such formal changes only, as compared with the last, as were required by the terms of the Quebec Act. On Dec. 22nd, the Board of Trade laid before the King the draught of the General Instructions for Governor Carleton. "This draught," they say, "contains not only such Instructions as are usually given to other governors, so far as the same are applicable to this Province under its New Constitution of Government; but also such other directions for the establishment of Judicature; the reform and regulation of Ecclesiastical matters; and the arrangements proper to be made in respect to the Coast of Labrador, and the interior Country, as appear to us to be necessary in consequence of the Act passed in the last Session of the late Parliament; it also contains an appointment of the Council conformable to that Act, and directs the provisions to be made for the support of the Civil Establishment of Government."

"We also humbly beg leave to lay before your Majesty a draught of such Instructions to your Majesty's Governor of Quebec as are usually given to the governors of your Majesty's other Colonies respecting the observance and the execution of the Laws for regulating the Plantation Trade."

"All which is most humbly submitted, Whitshed Keene, C. F. Greville, Soame Jenyns, W. Joliffe." Q 18 B., p. 108.

On Jan. 7th, 1775, Dartmouth sent a despatch to Carleton enclosing his Commission and Instructions. After repeating the statements of the Board of Trade, given above, he adds, "These documents contain such arrangements, in consequence of the Act of the 14th of his present Majesty, for providing for

the more effectual Government of the Province of Quebec, as were necessary to accompany the new Commission, & also the outlines of that System of Judicature, & general Regulation of Ecclesiastical Affairs, which the King thinks fit should be provided for by Ordinances of the Legislative Council." Q 11, p. 59.]

p. 821

reposed in you, and the Administration of the Government, and to do and execute all things in due manner, that shall belong to your Command according to the several Powers and Authorities of our said Commission under Our Great Seal of Great Britain, and these Our Instructions to you, or according to such further Powers and Instructions, as shall at any time hereafter be granted or appointed you under Our Signet and Sign Manual, or by Our Order in Our Privy Council; and you are to call together at Quebec, (Which We do hereby appoint to be the place of your ordinary Residence, and the principal Seat of Government,) the following persons whom We do hereby, with the Advice of Our Privy Council, constitute and appoint to be Our Council for the Affairs of Our said Province of Quebec, and the Territories thereunto belonging; Viz. Hector Theophilus Cramahé Esquire, Our Lieutenant Governor of Our said Province or Our Lieutenant Governor of Our said Province for the time being, Our Chief Justice of Our Province for the time being, Hugh Finlay, Thomas Dunn, James Cuthbert, Colin Drummond, Francis Les Vesques; Edward Harrison, John Collins, Adam Mabean,—De Lery,—St Ours, Picodyde Contrecoeur, Our Secretary of Our said Province for the time being, George Alsopp,—De La Naudière, La Corne St Luc, Alexander Johnstone, Conrad Guky,—Bellestres,—Rigauville, and John Fraser Esquires; All and every of which Person and Persons shall hold and enjoy his & their Office and Offices of Councillor or Councillors for Our said Province of Quebec, for and during Our Will and Pleasure, and his or their Residence within Our said Province, and not otherwise.

2. It is Our further Will and Pleasure, that any five of the said Council shall constitute a Board of Council for transacting all Business, in which their Advice and consent may be requisite, Acts of Legislation only excepted, (in which Case you are not to act without a Majority of the whole,) And it is Our further Will and Pleasure, that the Members of Our said Council shall have and enjoy all the Powers, Privileges, and Emoluments enjoyed by the Members of Our Councils in Our other Plantations; and also such others as are contained and directed in Our said Commission under Our Great Seal of Great Britain, and in these Our Instructions to you ; and that they shall meet together at such time and times, place and places, as you in your discretion shall think necessary, except when they meet for the purpose of Legislation, in which Case they are to be assembled at the Town of Quebec only.

3. And You are with all due and usual Solemnity to cause Our said Commission to be read and published at the said Meeting of Our Council, which being done, you shall then take

and also administer to each of the Members of Our said Council, (not being a Canadian, professing the Religion of the Church of Rome,) the Oaths mentioned in an Act passed in the first year of the Reign of His Majesty King George the first, intituled, "An Act for the further Security of His Majesty's Person, and Government, and the Succession of the Crown in the Heirs of the late Princess Sophia, being Protestants; and for extinguishing the hopes of the pretended Prince of

p. 822

Wales, and his open and secret Abettors," as altered and explained by an Act passed in the sixth year of Our Reign, intituled, "An Act for altering the Oath of Abjuration, and the Assurance; and for amending so much of an Act of the seventh year of Her late Majesty Queen Anne, intituled, An Act for the Improvement of the Union of two Kingdoms, as, after the time therein limited, requires the delivery of certain Lists and Copies, therein mentioned, to persons indicted of High Treason, or Misprision of Treason;" as also make and subscribe, and cause them to make and subscribe the declaration mentioned in an Act of Parliament made in the twenty fifth Year of the Reign of King Charles the second, intituled, "An Act for preventing Dangers, which may happen from Popish Recusants;" and you and every one of them are likewise to take an Oath for the due Execution of your and their Places and Trusts, with regard to your and their equal and impartial Administration of Justice; and you are also to take the Oath required by an Act passed in the seventh and eighth years of the Reign of King William the third, to be taken by Governors of Plantations to do their utmost, that the Laws relating to the Plantations be observed.

4. And Whereas by an Act passed in the fourteenth year of Our Reign, intituled, "An Act for making more effectual provision for the Government of the Province of Quebec in North America," it is enacted and provided, that no person, professing the Religion of the Church of Rome, and residing in the said Province, shall be obliged to take the Oath of Supremacy required by an Act passed in the first year of the Reign of Queen Elizabeth, or any other Oaths substituted by any other Act in the place thereof; but that every such Person, who by the said Statute is required to take the Oaths therein mentioned, shall be obliged, and is thereby required, under certain Penalties, to take and subscribe an Oath in the form and Words therein prescribed, and set down; It is therefore Our Will and Pleasure, that you do administer to each and every Member of Our said Council, being a Canadian, and professing the Religion of the Church of Rome, and cause each of them severally to take and subscribe the Oath mentioned in the said Act passed in the fourteenth year of Our Reign, intituled; "An Act for making more effectual provision for the Government of the Province of Quebec in North America;" and also cause them severally to take an Oath for the due Execution of their

places and Trusts, and for their equal and impartial administration of Justice.

5. And that We may be always informed of the Names and Characters of Persons fit to supply the Vacancies, which may happen in Our said Council, You are from time to time to transmit to Us, by one of Our Principal Secretaries of State, the names and Characters of such persons, Inhabitants of Our said Colony, whom you shall esteem the best qualified for that Trust; And you are also to transmit a duplicate of the said Account to Our Commissioners for Trade and Plantations, for their Information.

6. And if it shall at any time happen, that by the death or departure out of Our said Province, of any of Our said Councillors, there shall be a

p. 823

Vacancy in Our said Council, Our Will and Pleasure is; that you signify the same to Us by one of Our Principal Secretaries of State, and to Our Commissioners for Trade and Plantations, by the first Opportunity, that we may by Warrant under Our Signet and Sign Manual, and with the Advice of Our Privy Council, constitute and appoint others in their stead.

7. You are forthwith to communicate such and so many of these Our Instructions to Our said Council, wherein their Advice and Consent are mentioned to be requisite, as likewise all such others from time to time, as you shall find convenient for Our Service to be imparted to them.

8. You are to permit the Members of Our said Council to have and Enjoy Freedom of Debate and vote in all Affairs of Public Concern, that may be debated in Council.

9. And whereas by the aforesaid Act passed in the fourteenth year of Our Reign, intituled, "An Act for making more effectual Provision for the Government of the Province of Quebec in North America," It is further enacted and Provided, that the Council for the Affairs of the said Province, to be constituted and appointed in Manner therein directed, or the Major Part thereof, shall have power and Authority to make Ordinances for the peace, Welfare, and good Government of the said Province with the Consent of Our Governor, or, in his absence, of the Lieutenant Governor, or Commander in Chief for the time being; provided, that no Ordinance shall be passed, unless upon some urgent Occasion at any Meeting of the Council, except between the first day of January and the first day of May. *(And Whereas the State and condition of Our said Province do require, that immediate provision should be made by Law for a Great Variety of Arrangements and Regulations essentially necessary to the Government thereof; It is therefore Our Will and Pleasure, that you do within a

convenient time issue Summons for the Assembling of our said Council in their Legislative Capacity either on the first day of April next, or as soon after as may be convenient, in Order to deliberate upon, and frame such Ordinances, as the Condition of Affairs within Our Said Province shall require, and as shall, in your and their judgement, be fit and necessary for the Welfare of Our said Province, and the Territories thereunto belonging.)¹

10. You are nevertheless to take especial Care,

That no Ordinance be passed at any Meeting of the Council, where less than a Majority of the Council is present, or at any time, except between the first day of January and the first day of May, as aforesaid, unless upon some urgent Occasion; in which Case every Member thereof resident at Quebec, or within fifty Miles thereof shall be personally summoned to attend the same.

[* The latter part of this section (in bracket) omitted in the instruction to Haldimand.

¹ The first session of the Legislative Council was convened 17 August, 1775. Two other brief meetings were held Sept. 2nd and 5th but no legislative results were accomplished before Jan., 1777, when the Council resumed its sessions.]

p. 824

That no Ordinance be passed for laying any Taxes or Duties, such Rates and Taxes only excepted, as the Inhabitants of any Town or District may be authorized to assess, levy, and apply within the said Town or District, for the making Roads, erecting and repairing public Buildings, or for any other purpose respecting the Local Convenience and Oeconomy of such Town or District.

That no Ordinance touching Religion, or by which any punishment may be inflicted greater than Fine or Imprisonment for three Months, be made to take effect, until the same shall have received Our Approbation.

That no Ordinance be passed relative to the Trade, Commerce, or Fisheries of the said Province, by which the Inhabitants thereof shall be put upon a more advantageous footing, than any other His Majesty's Subjects either of this Kingdom, or the Plantations.

That no Ordinance respecting private property be passed without a Clause suspending its Execution, until Our Royal Will and Pleasure is known; nor without a saving of the Right of Us, Our Heirs, and Successors, and of all Bodies, politic and corporate, and of all other persons, except such as are mentioned in the said Ordinance, and those claiming by, from, and under them; And, before such Ordinance is passed, proof must be made before you in Council, and entered in the Council-Books, that public Notification was made in the Party's Intention to apply for such Ordinance in the several Parish Churches, where the Lands in Question lye, for three Sundays at least successively, before any such Ordinance shall be proposed; and you are to transmit and annex to the said

Ordinance a Certificate under your hand that the same passed through all the Forms abovementioned.

That no Ordinance shall be enacted for a less time than two years, except in Cases of imminent Necessity, or immediate temporary Expediency; and you shall not reenact any Ordinance, to which Our Assent shall have been once refused, without express leave for that purpose first obtained from Us, upon a full Representation by you to be made to Us by one of Our Principal Secretaries of State, and to Our Commissioners for Trade and Plantations, for their Information, of the Reasons and Necessity for passing such Ordinance ; nor give your Assent to any Ordinance for repealing any other Ordinance, which bath passed in your Government, and shall have received Our Royal Approbation, unless you take Care, that there be a Clause inserted therein suspending and deferring the Execution thereof, until Our Pleasure shall be known, concerning the Same.

That in all Ordinances imposing Fines, Forfeitures, or Penalties, express Mention be made, that the same is granted or reserved to Us, Our Heirs, and Successors for the public Uses of the said Province, and the Support of the Government thereof, as by the said Ordinance shall be directed; and that a Clause be inserted declaring, that the Money, arising by the Operation of the said Ordinance, shall be accounted for unto Us in this Kingdom, and to Our Commissioners of Our Treasury for the time being; and audited by Our Auditor General of Our Plantations, or his Deputy.

That all such Ordinances be transmitted by you within six Months

after their passing, or sooner, if opportunity offers, to Us by One of our Principal Secretaries of State, and Duplicates thereof to Our Commissioners for Trade and Plantations, for their Information; that they be abstracted in the Margents, and accompanied with very full and particular Observations upon each of them, that is to say, whether the same is introductive to a new Law, or does repeal a Law then before in being; and you are also to transmit in the fullest manner the Reasons and Occasions for enacting such Ordinances, together with fair Copies of the Journals of the proceedings of the Council, which. you are to require from the Clerk of the said Council.

11. In the Consideration of what may be necessary to be provided for by Law within Our said Province, as created and established by the aforesaid Act, intituled, "an Act for making more effectual Provision for the Government of the Province of Quebec in North America," a Great Variety of important Objects hold themselves forth to the Attention of the Legislative Council.

12. The Establishment of Courts, and a proper Mode of administering Civil and Criminal Justice throughout the whole Extent of Our Province, according to the Principles declared in the said Act "for making more effectual Provision for the Government thereof," demand the greatest Care and Circumspection; for, as on the one hand it is Our Gracious purpose conformable to the Spirit and Intention of the said Act of Parliament, that Our Canadian Subjects should have the benefit and use of their own Laws, Usages, and Customs in all Controversies, respecting Titles of Land, and the Tenure, descent, Alienation, Incumbrances, and Settlement of Real Estates, and the distribution of the personal property of Persons dying intestate; so on the other hand, it will be the duty of the Legislative Council to consider well in framing such Ordinances, as may be necessary for the Establishment of Courts of Justice, and for the better Administration of Justice, whether the Laws of England may not be, if not altogether, at least in part the Rule for the decision in all Cases of personal Actions grounded upon Debts, Promises, Contracts, and Agreements, whether of a Mercantile or other Nature; and also of Wrongs proper to be compensated in damages; and more especially where Our natural-born Subjects of Great Britain, Ireland, or Our other Plantations residing at Quebec, or who may resort thither, or have Credits, or Property within the same, may happen to be either Plaintiff or defendant in any civil Suit of such a nature.¹

[¹ This and the following article with reference to the writ of Habeas Corpus, form the first step in that piecemeal process of impairing the complete restoration of the French Canadian civil law granted by the Quebec Act, particularly the 8th clause of it. As may be seen from several subsequent documents, this was the basis of continued conflict in the Council and in the

Courts until 1791, when the controversy took another turn. In a document in the Dartmouth papers, endorsed "Extract from the Instructions to the Governor of Quebec, so far as relates to the Establishment of Courts of Law," this clause appears in the following form:—"The Legislative Council are to frame the Ordinances for the Establishment of Courts of Justice, and for the administration of Justice, so as that the Laws of England, if not altogether, may be as nearly as possible the Rule of Decision in all personal Actions, grounded upon Debts, Contracts, &c., and especially where the natural-born subjects are concerned." M 385, p. 485.]

p. 826

13. Security to personal Liberty is a fundamental Principle of Justice in all free Governments, and the making due provision for that purpose is an object the Legislature of Quebec ought never to lose Sight of; nor can they follow a better Example than that, which the Common Law of this Kingdom hath set in the Provision made for a Writ of Habeas Corpus,¹ which is the Right of every British subject in this Kingdom.

14. With Regard to the Nature and number of the Courts of Justice, which it may be proper to establish, either for the whole Province at large, or separately for its dependencies, and the times and places for holding the said Courts, no certain Rule can be laid down in a Case, in which the Judgment must in many Respects at least be altogether guided by Circumstances of local Convenience and Consideration.

15. In General it may be proper, that there should be a Superior or Supreme Court of criminal Justice and Jurisdiction for the Cognizance of all Pleas of the Crown, and for the Trial of all manner of Offences whatsoever, to be held before the Chief Justice for the time being at such times and places, as shall be most convenient for the due and speedy Administration of Justice, and the preventing long imprisonments; the said Court to be called and known by the name of the Court of King's Bench; That for the more orderly establishment and Regulation of Courts of Civil Jurisdiction, the Province of Quebec, as limited and bounded by the aforesaid Act of Parliament "for making more effectual Provision for the Government of the Province of Quebec in North America," be divided into two Districts by the names of Quebec and Montreal, each district to be limited and bounded in such manner, as shall be thought best adapted to the Object of the Jurisdiction to be established therein; That there be established in each of the said Districts a Court of Common pleas to be held at such times and places, as shall be judged most convenient, and to have full power, Jurisdiction and Authority to hear and determine all Civil Suits and Actions cognizable by the Court of Common Pleas in Westminster Hall, according to the Rules prescribed by the said Act of Parliament "for making more effectual Provision for the Government of the Province of Quebec in North America," and according to such Laws and Ordinances, as shall from time to time be enacted by the Legislature of the said Province in

manner therein directed; That there be three Judges in each of the said Courts of Common Pleas, that is to say, two of Our natural-born Subjects of Great Britain, Ireland, or Our other Plantations, and one Canadian; and also one Sheriff appointed for each district; That besides the foregoing Courts of Criminal and Civil Jurisdiction for the Province at large, there be also an Inferior Court of Criminal and Civil Jurisdiction in each of the Districts of the Illinois, St Vincenne, Detroit, Missilimakinac, and Gaspée, by the Names

[¹ Yet when this was most vigorously contended for at the passing of the Quebec Act it was absolutely denied by the Government. In the document referred to in the previous note, this article reads as follows,—"Security to personal Liberty to be provided for: And the Writ of Habeas Corpus, as a part of the criminal Law, to be adopted in its full Extent." M 385, p. 485.]

p. 827

of the Court of King's Bench for such district. to be held at such times, as shall be thought most convenient, with Authority to hear and determine in all Matters of Criminal Nature according to the Laws of England, and the Laws of the Province hereafter to be made and passed; and in all Civil matters according to the Rules prescribed by the aforesaid Act of Parliament "for making more effectual Provision for the Government of Quebec in North America;" That each of the said Courts shall consist of one judge, being a natural-born Subject of Great Britain, Ireland, or Our other Plantations, and of one other Person, being a Canadian, by the name of Assistant or Assessor, to give advice to the Judge in any Matter, when it may be necessary; but to have no Authority or Power to attest or issue any Process, or to give any Vote in any order, Judgement, or decree; That the said Judges, so to be appointed, as aforesaid, for each District, shall have the same power and Authority in Criminal Cases, as is vested in the Chief Justice of Our said Province; and also the same Power and Authority in Civil Cases, as any other Judge of Common Pleas within Our said Province, excepting only that, in Cases of Treason, Murder, or other Capital Felonies, the said Judges shall have no other Authority, than that of Arrest and Commitment to the Goals of Quebec, or of Montreal, where alone Offenders in such Cases shall be tried before Our Chief Justice; That a Sheriff be appointed in each of the said Districts for the Execution of Civil and Criminal Process; That the Governor and Council (of which, in the absence of the Governor and Lieutenant Governor, the Chief Justice is to be President,) shall be a Court of civil Jurisdiction for the hearing and determining all Appeals from the Judgement of the other Courts, where the matter in dispute is above the value of Ten Pounds; That any Five of the said Council, with the Governor, Lieut' Governor, or Chief Justice, shall constitute a Court for that purpose; and that their Judgement shall be final in all Cases not exceeding the value of £500 sterling, in which Cases an Appeal from their Judgement is to be admitted to Us in Our Privy Council. It is however Our Will and Pleasure, that no Appeal be

allowed, unless security be first duly given by the Appellant, that he will effectually prosecute the same, and answer the Condemnation, as also pay such Costs and Damages, as shall be awarded by Us, in case the Sentence be affirmed; Provided nevertheless, where the matter in question relates to the taking or demanding any Duty payable to Us, or to any Fee of Office, or annual Rents, or other such like matter or thing, where the Rights in future may be bound, in all such Cases appeal to Us, in Our Privy Council is to be admitted, tho' the immediate sum or value appealed for be of less value.—And it is Our further Will and Pleasure, that in all Cases, where Appeals are admitted unto Us in Our Privy Council, execution be suspended until the final determination of such Appeal, unless good and sufficient security be given by the Appellee to make ample restitution of all, that the Appellant shall have lost by means of such decree or judgement, in case, upon the determination of such Appeal, such decree or judgement should be reversed, and restitution awarded to the Appellant. Appeals unto Us in Our Privy Council are also to be

p. 828

admitted in all cases of Fines imposed for misdemeanors; Provided the fines, so imposed, amounted to, or exceed the sum of £100 sterling, the Appellant first giving good Security, that he will effectually prosecute the same and answer the Condemnation, if the sentence, by which such Fine was imposed in Quebec, be affirmed.

16. It is Our Will and Pleasure, that all Commissions to be granted by you to any person or persons to be Judges or justices of the peace, or other necessary Officers, be granted during pleasure only.

17. You shall not displace any of the Judges, Justices of the peace or other Officers or Ministers without good and sufficient cause, which you shall signify in the fullest and most distinct manner to Us by one of Our principal Secretaries of State, and to Our Commissioners for Trade and Plantations, for their information.

18. And whereas frequent complaints have heretofore been made of great delays and undue proceedings in the Courts of Justice in several of Our Plantations, whereby many of Our good Subjects have very much suffered; and it being of the greatest importance to Our Service, and to the welfare of Our Plantations, that Justice be every where speedily and duly administered; and that all disorders, delays, and other undue Practises in the administration thereof be effectually prevented; We do particularly require you to take especial Care, that in all Courts, where you are or shall be authorized to preside, justice be impartially administered; and that in all other Courts established, or to be established within Our said Province, all Judges, and other Persons therein concerned do likewise

perform their several Duties without any delay or partiality.

19. You are to take care, that all Writs be issued in Our Name throughout the Province under your Government.

20. The establishment of proper regulations in matters of ecclesiastical concern is an Object of very great importance, and it will be your indispensable duty to lose no time in making such arrangements in regard thereto, as may give full satisfaction to Our new Subjects in every point, in which they have a right to any indulgence on that head; always remembering, that it is a toleration of the free exercise of the religion of the Church of Rome only, to which they are entitled, but not to the powers and privileges of it, as an established Church, for that is a preference, which belongs only to the Protestant Church of England.

21. Upon these principles therefore, and to the end, that Our just Supremacy in all matters ecclesiastical, as well as civil, may have its due scope and influence, it is Our Will and Pleasure,——

First, that all Appeals to, or correspondence with any foreign ecclesiastical jurisdiction, of what nature or kind so ever, be absolutely forbidden under very severe Penalties.

p. 829

Secondly, That no Episcopal or Vicarial Powers be exercised within Our said Province by any Person professing the Religion of the Church of Rome, but such only, as are essentially and indispensably necessary to the free exercise of the Romish Religion; and in those cases not without a Licence and Permission from you under the Seal of Our said Province, for, and during Our Will and Pleasure, and under such other limitations & restrictions, as may correspond with the spirit and provision of the Act of Parliament, "for making more effectual provision for the Government of the Province of Quebec;" And no person whatever is to have holy Orders conferred upon him, or to have the Cure of Souls without a License for that purpose first had or obtained from you.

Thirdly, That no person professing the Religion of the Church of Rome be allowed to fill any ecclesiastical Benefice, or to have and enjoy any of the Rights or Profits belonging thereto, that is not a Canadian by birth, (such only excepted, as are now in possession of any such Benefice,) and that is not appointed thereto by Us, or by, or under Our Authority, and that all Right, or claim of right in any other Person whatever to nominate, present, or appoint to any vacant Benefice, other than such as may lay claim to the patronage of Benefices, as a Civil Right, be absolutely abolished. No Person to hold more than one Benefice, or at least not more than can reasonably be served by one and the same Incumbent.

Fourthly, That no person whatever, professing the Religion of the Church of Rome, be appointed Incumbent of any Parish,

in which the Majority of the Inhabitants shall solicit the appointment of a Protestant Minister; in such case the Incumbent shall be a Protestant, and entitled to all Tythes payable within such Parish; But nevertheless the Roman Catholicks may have the use of the Church for the free exercise of their Religion at such time, as may not interfere with the Religious Worship of the Protestants: And in like manner the Protestant Inhabitants in every Parish, where the Majority of Parishioners are Roman Catholicks, shall notwithstanding have the use of the Church for the exercise of their Religion at such times, as may not interfere with the Religious Worship of the Roman Catholicks.

Fifthly, That no Incumbent professing the Religion of the Church of Rome, appointed to any Parish, shall be entitled to receive any Tythes for Lands, or Possessions occupied by a Protestant; but such Tythes shall be received by such Persons, as you shall appoint, and shall be reserved in the hands of Our Receiver General, as aforesaid, for the support of a Protestant Clergy in Our said Province to be actually resident within the same, and not otherwise, according to such directions as you shall receive from Us in that behalf. And in like manner all growing Rents and Profits of a vacant Benefice shall, during such vacancy, be reserved for, and applied to the like uses.

Sixthly, That all Persons professing the Religion of the Church of Rome, which are already possessed of, or may hereafter be appointed to any

ecclesiastical Benefice, or who may be licensed to exercise any Power or Authority in respect thereto, do take and subscribe before you in Council, or before such Person as you shall appoint to administer the same, the Oath required to be taken and subscribed by the aforesaid Act of Parliament passed in the fourteenth year of Our Reign, intituled, "An Act for making more effectual Provision for the Government of the Province of Quebec in North America."

Seventhly, That all Incumbents of Parishes shall hold their respective Benefices during good behaviour, subject however, in cases of any Conviction for Criminal Offences, or upon due proof of seditious Attempts to disturb the Peace and Tranquility of Our Government, to be deprived, or suspended by you with the Advice and Consent of a Majority of Our said Council.

Eighthly, That such Ecclesiasticks, as may think fit to enter into the holy state of Matrimony, shall be released from all Penalties, to which they may have been subjected in such Cases by any Authority of the See of Rome.

Ninthly, That freedom of Burial of the Dead in Churches and Church yards be allowed indiscriminately to every Christian Persuasion.

Tenthly, That the Royal Family be prayed for in all Churches and Places of Holy Worship, in such manner and form, as are used in this Kingdom; and that Our Arms and Insignia be put up not only in all such Churches and Places of holy Worship, but also in all Courts of Justice; and that the Arms of France be taken down in every such Church or Court, where they may at present remain.

Eleventhly, That the Society of Romish Priests, called the Seminaries of Quebec and Montreal, shall continue to possess and occupy their Houses of Residence, and all other Houses and Lands, to which they were lawfully intituled on the 13th of September 1759; and it shall be lawful for those Societies to fill up Vacancies, and admit new Members according to the Rules of their Foundations, and to educate Youth, in order to qualify them for the Service of Parochial Cures; as they shall become vacant. It is nevertheless Our Will and Pleasure, that not only these Seminaries, but all other Religious Communities, so long as the same shall continue, be subject to visitation by You Our Governor, or such other Person or Persons, as you shall appoint for that purpose, and also subject to such Rules and Regulations, as you shall, with the Advice and Consent of Our Council, think fit to establish and appoint.

Twelfthly, it is also Our Will and Pleasure, that all other Religious Seminaries and Communities (that of the Jesuits only excepted) do for the present and until We can be more fully informed of the true State of them, and how far they are, or are not essential to the free exercise of the Religion of the Church of Rome, as allowed within Our said Province, remain upon their present Establishment; but you are not to allow the

admission of any new Members into any of the said Societies or Communities, the Religious Communities of Women only excepted, without our express orders for that

p. 831

purpose. That the Society of Jesuits be suppressed and dissolved, and no longer continued, as a Body corporate and politic, and all their Rights, Possessions and Property shall be vested in Us for such purposes, as We may hereafter think fit to direct and appoint; but We think fit to declare Our Royal Intention to be, that the present Members of the said Society, as established at Quebec shall be allowed sufficient stipends and Provisions during their natural Lives;—That all Missionaries amongst the Indians, whether established under the Authority of, or appointed by the Jesuits, or by any other ecclesiastical Authority of the Romish Church, be withdrawn by degrees, and at such times and in such manner, as shall be satisfactory to the said Indians, and consistent with the Public Safety; and Protestant Missionaries appointed in their places; That all ecclesiastical Persons whatsoever, of the Church of Rome, be inhibited, upon Pain of Deprivation, from influencing any Person in the making a Will, from inveigling Protestants to become Papists, or from tampering with them in matter of Religion, and that the Romish Priests be forbid to inveigh in their Sermons against the Religion of the Church of England, or to marry, baptize, or visit the sick, or bury any of Our Protestant Subjects, if a Protestant Minister be upon the Spot.

22. You are at all times and upon all occasions to give every Countenance and Protection in your Power to such Protestant Ministers, and School Masters, as are already established within Our said Province, or may hereafter be sent thither, to take Care, that such Stipends and Allowances, as We may think fit to appoint for them, be duly paid; that the Churches already appropriated, or which may hereafter be appropriated to the use of Divine Worship according to the Rites of the Church of England, as by Law established, be well and orderly kept; and, as the Number of Protestants shall, by God's Blessing, increase, to lay out new Parishes in convenient Situations, and set apart and appropriate proper Districts of Land therein for the Scite of Churches, and Parsonage Houses, and for Glebes for the Ministers and Schoolmasters.

23. You are to take especial Care, that God Almighty be devoutly and duly served in all Protestant Churches and Chapels throughout Our said Province, in which Divine Service is performed according to the Rites of the Church of England; the Book of Common Prayer, as by Law established, be read each Sunday and Holiday; and the Blessed Sacrament duly administered.

24. You are not to prefer any Protestant Minister to any

ecclesiastical Benefice in the Province under your Government, without a Certificate from the Right Reverend Father in God the Lord Bishop of London, of his being conformable to the Doctrine and Discipline of the Church of England, and of a good Life and Conversation; and if any Person hereafter preferred to a Benefice shall appear to you to give Scandal either by his doctrine or manners, you are to use the best means for his Removal.

p. 832

25. You are to give orders forthwith, that every Protestant Minister within your Government, be one of the Vestry in his respective Parish; and that no Vestry be held without him, except in case of Sickness, or, after Notice of a Vestry summoned, he omit to come.

26. And to the end, that the ecclesiastical Jurisdiction of the Lord Bishop of London may take place in Our Province under your Government, as far as conveniently may be; We do think fit, that you give all Countenance and Encouragement to the exercise of the same, excepting only the collating to Benefices, granting Licenses for Marriages, and Probates of Wills, which We have reserved to you Our Governor, and to the Commander in Chief of Our said Province for the time being.

27. And We do further direct, that no School-master, who shall arrive in Our said Province from this Kingdom, be henceforward permitted to keep School without the Licence of the said Lord Bishop of London; and that no other Person now there, or that shall come from other Parts, shall be admitted to keep School in your Government without your Licence first obtained.

28. You are to take especial Care, that a Table of Marriages, established by the Canons of the Church of England, be hung up in all places of public Worship according to the Rites of the Church of England.

29. And it is our further Will and Pleasure, that, in order to suppress, as much as in you lies, every species of Vice and Immorality, You forthwith do cause all Laws already made against Blasphemy, Prophaneness, Adultery, Fornication, Polygamy, Incest, Profanation of the Lord's day, Swearing, and Drunkenness, to be vigorously put in execution in every part of your Government; and that you take due Care for the punishment of these and every other Vice and Immorality by presentment upon Oath, to be made to the Temporal Courts by the Church Wardens of the several Parishes at proper times of the Year to be appointed for that purpose; And for the further discouragement of Vice and encouragement of Virtue and good Living, (that by such Examples the Infidels may be invited and perswaded to embrace the Christian Religion,) You are not to admit any Persons to public Trusts and

Employments in the Province under your Government, whose ill fame and conversation may occasion Scandal.

30. The Extension of the Limits of the Province of Quebec necessarily calls forth your Attention to a Variety of new Matter and new Objects of Consideration; The protection and control of the various Settlements of Canadian Subjects, and the regulation of the Peltry Trade in the upper or interior Country on the one hand, and the protection of the Fisheries in the Gulph of S^t Lawrence, and on the Labrador Coast on the other hand, point to Regulations, that require deliberation and despatch.

31. The institution of inferior Judicatures with limited Jurisdiction in Criminal and Civil Matters for the Illinois, Poste S^t Vincenne, the Detroit, Missilimakinac, and Gaspée has been already pointed out, and the Appoint-

p. 833

ment of a Superintendent at each of these Posts is all, that is further necessary for their Civil concerns; But it will be highly proper, that the Limits of each of those Posts, and of every other in the interior Country should be fixed and ascertained; and that no Settlement be allowed beyond those Limits; seeing that such Settlements must have the consequence to disgust the Savages; to excite their Enmity; and at length totally to destroy the Peltry Trade, which ought to be cherished and encouraged by every means in your Power.

32. It is Our Royal Intention, that the Peltry Trade of the interior Country should be free and open to all Our Subjects, Inhabitants of any of Our Colonies, who shall, pursuant to what was directed by Our Royal Proclamation of 1763, obtain Licences from the Governors of any of Our said Colonies for that purpose, under penalties to observe such Regulations, as shall be made by Our Legislature of Quebec for that purpose; Those Regulations therefore, when established, must be made public throughout all Our American possessions, and they must have for their object the giving every possible facility to that Trade, which the nature of it will admit, and as may consist with fair and just dealing towards the Savages, with whom it is carried on. The fixing stated times and places for carrying on the Trade, and adjusting modes of settling Tariffs of the prices of Goods and Furs, and above all the restraining the Sale of Spirituous Liquors to the Indians will be the most probable and effectual means of answering the ends proposed. These and a variety of other regulations, incident to the nature and purpose of the Peltry Trade in the interior Country, are fully stated in a Plan proposed by Our Commissioners for Trade and Plantations in 1764, a copy of which is hereunto annexed,¹ and which will serve as a Guide in a variety of cases, in which it may be necessary to make provision by Law for that important Branch of the American Commerce.

33. The Fisheries on the Coast of Labrador, and the Islands adjacent thereto are objects of the greatest Importance, not only on account of the Commodities they produce, but also as Nurseries of Seamen, upon whom the Strength and Security of Our Kingdom depend.

34. Justice and Equity demand, that the real and actual property and possession of the Canadian Subjects on that Coast should be preserved intirely; and that they should not be molested or hindered in the exercise of any Sedentary Fisheries they may have established there.

35. Their Claims however extend to but a small District of the Coast, on the greatest part of which District a Cod Fishery is stated to be impracticable.

36. On all such parts of the Coast, where there are no Canadian Possessions, and more especially where a valuable Cod Fishery may be carried on, it will be your Duty to make the Interests of Our British Subjects going

¹ The plan is given below, following these Instructions; see p. 716.

p. 834

out to fish there in Ships fitted out from Great Britain the first object of your care, and, as far as circumstances will admit, to establish on that Coast the Regulations in favour of British fishing Ships, which have been so wisely adopted by the Act of Parliament passed in the Reign of King William the Third "for the encouragement of the Newfoundland Fishery;" and you are on no account to allow any possession to be taken, or sedentary Fisheries to be established upon any parts of the Coast, that are not already private Property, by any persons whatever, except only such as shall produce annually a Certificate of their having fitted out from some Port in Great Britain.

37. We have mentioned to you the Fisheries upon the Coast of Labrador, as the main object of your attention; but the Commerce carried on with Savages of that Coast, and the state and condition of those Savages deserve some regard; the Society of Unitas Fratrum, urged by a laudable Zeal for promoting Christianity, has already, under Our Protection, and with Our Permission, formed Establishments in the Northern parts of that Coast for the purposes of civilizing the Natives, and converting them to the Christian Religion. Their success has been answerable to their Zeal; and it is Our express Will and Pleasure, that you do give them every countenance and Encouragement in your power, and that you do not allow any Establishment to be made, but with their consent, within the limits of their possessions.

38. By Our Commission to you under Our Great Seal of

Great Britain you are authorised and impowered, with the advice and consent of Our Council, to settle and agree with the Inhabitants of Our said Province of Quebec for such Lands, Tenements, and Hereditaments, as now are, or shall hereafter be in Our Power to dispose of. It is therefore Our Will and Pleasure, that all Lands, which now are, or hereafter may be subject to Our Disposal, be granted in Fief or Seigneurie, in like manner as was practiced antecedent to the Conquest of the said Province; omitting however in any Grant, that shall be passed of such Lands, the Reservation of any Judicial powers, or privileges whatever. And it is Our further Will and Pleasure, that all Grants in Fief or Seigneurie, so to be passed by you, as aforesaid, be made subject to Our Royal Ratification, or Disallowance, and to a due Registry thereof within a limited time, in like manner as was practised in regard to Grants and Concessions held in Fief and Seigneurie under the French Government.

39. It is Our Will and Pleasure however, that no Grants be made of any Lands, on which there is any considerable growth of white Pines fit for Masting Our Royal Navy, and which lie convenient for water carriage; But that you do cause all such Lands to be set apart for Our Use, and proper regulations made, and penalties inflicted, to prevent trespasses on such Tracts, and the cutting down, or destroying the Trees growing thereon.

40. And whereas it appears from the Representation of Our late Governor of the District of Trois Rivières that the Iron Works at Saint Maurice in

that District are of great consequence to Our Service. It is therefore Our Will and Pleasure that no part of the Lands, upon which the said Iron Works were carried on, or from which the Ore used in such Works was procured, or which shall appear to be necessary and convenient for that Establishment, either in respect to a free passage to the River Saint Lawrence, or for producing a necessary supply of Wood, Corn, and Hay, or for Pasture for Cattle, be granted to any private person whatever. And also that as large a District of Land, as conveniently may be, adjacent to, and lying round the said Iron Works, over and above what may be necessary for the above purposes, be reserved for Our Use, to be disposed of in such manner as We shall hereafter direct and appoint.

41. And it is Our further Will and Pleasure, that you do consider of a proper and effectual method of collecting, receiving, and accounting for Our Quit rents, whereby all Frauds, Concealments, Irregularity, or neglect therein may be prevented, and whereby the receipt may be effectually checked and controlled. And if it shall appear necessary to pass an Act for the more effectually ascertaining, and the more speedily and regularly collecting Our Quit rents, you are to prepare the heads of such a Bill, as you shall think may most effectually conduce to the procuring the good ends proposed; and to transmit the same to Us by one of Our principal Secretaries of State for Our further Directions therein. And you are also to transmit a Duplicate thereof to Our Commissioners for Trade and Plantations for their information.

42. You are to use your best endeavours in improving the Trade of the Province under your Government by settling such Orders and Regulations therein, with the advice of Our said Council, as may be most acceptable to the generality of the Inhabitants; And It is Our express Will and Pleasure, that you do not upon any pretence whatever, upon pain of Our Highest Displeasure, give your assent to any Law or Laws for setting up any Manufactures, and carrying on any Trades, which are hurtful and prejudicial to this Kingdom; and that you do use your utmost endeavours to discourage, discountenance, and restrain any attempts, which may be made to set up such Manufactures, or establish any such Trades.

43. And it is Our Will and Pleasure, that you do not dispose of any Forfeitures or Escheats to any person, until the Sheriff or other proper Officer have made enquiry by a Jury upon their Oaths into the true value thereof; nor until you have transmitted to Our Commissioners of Our Treasury a particular account of such Forfeitures, and Escheats, and the Value thereof; and you are to take care, that the produce of such Forfeitures and Escheats, in case We shall think proper to give you directions to dispose of the same, be duly paid to Our Treasurer or Receiver General of Our said Province; and a full

account transmitted to Our Commissioners of Our Treasury, or Our High Treasurer for the time being, with the names of the persons, to whom disposed.

44. And whereas Commissions have been granted unto several persons in Our respective Plantations in America for the trying of Pirates in those

p. 836

parts, pursuant to the Acts for the more effectual suppression of Piracy; and by a Commission already sent to Our Province of New York Our Governor there is empowered, together with others therein mentioned, to proceed accordingly in reference to Our said Province; Our Will and Pleasure is that you do use your best endeavours to apprehend all persons whatever, who may have been guilty of Piracy within your Government, or who, having committed such Crimes at other places, may come within your Jurisdiction, and until we shall think proper to direct the like Commission to be established for Our Government at Quebec, you are to send such Pirates, with what proofs of their Guilt you can procure or collect, to Our Governor of New York, to be tryed and punished under the authority of the Commission established for those parts.

45. And whereas you will receive from Our Commissioners for executing the Office of High Admiral of Great Britain and of Our Plantations a Commission, constituting you Vice Admiral of Our said Province; you are hereby required and directed carefully to put in execution the several powers thereby granted you.

46. Whereas great Inconveniences have happened heretofore by Merchant Ships and other vessels in the Plantations wearing the Colours borne by Our Ships of War, under pretence of Commissions granted to them by the Governors of the said Plantations, and by trading under those Colours, not only among Our own Subjects, but also those of other Princes and States, and committing divers Irregularities, they may very much dishonour Our Service; For preventing thereof, you are to oblige the Commanders of all such Ships, to which you shall grant Commissions, to wear no other Colours, than such as are described in an Order of Council of the 7th of January 1730, in relation to Colours to be worn by all Ships and Vessels, except Our Ships of War.

47. And whereas there have been great Irregularities in the manner of granting Commissions in the Plantations to private Ships of War, you are to govern yourself, whenever there shall be occasion, according to the Commissions and Instructions granted in this Kingdom; But you are not to grant Commissions of Marque or Reprisal against any Prince or State, or their Subjects in amity with Us to any person whatsoever without Our special Command.

48. Whereas We have been informed, that during the time of War, Our Enemies have frequently got Intelligence of the State of Our Plantations by Letters from private persons to their Correspondents in Great Britain, taken on board Ships coming from the Plantations, which hath been of dangerous consequence; Our Will and Pleasure therefore is, that you signify to all Merchants, Planters, and others, that they be very cautious in time of War, whenever that shall happen, in giving any accounts by Letters of the Public State and Conditions of Our Province under your Government; and you are further to give directions to all Masters of Ships, or other persons, to whom you may entrust your Letters, that they put such Letters

p. 837

into a Bag with a sufficient weight to sink the same immediately, in case of imminent danger from the Enemy: And you are also to let the Merchants and Planters know, how greatly it is for their Interest, that their Letters should not fall into the hands of the Enemy; and therefore that they should give like Orders to Masters of Ships in relation to their Letters; and you are further to advise all Masters of Ships, that they do sink all Letters, in case of danger, in the manner before mentioned.

49. And whereas the Merchants and Planters in Our Plantations in America, have in time of War, corresponded and traded with Our Enemies, and carried Intelligence to them, to the great prejudice and hazard of Our said Plantations; you are therefore by all possible methods to endeavor to hinder such Trade and Correspondence in time of War.

50. Whereas it is absolutely necessary, that We be exactly informed of the State of Defence of all Our Plantations in America, as well in relation to the Stores of War, that are in each Plantation, as to the Forts and Fortifications there, and what more may be necessary to be built for the Defence and Security of the same; you are as soon as possible to prepare an account thereof with relation to Our said Province in the most particular manner; and you are therein to express the present State of the Arms, Ammunition, and other Stores of War belonging to the said Province, either in public Magazines, or in the hands of private persons, together with the State of all places either already fortified, or that you judge necessary to be fortified for the Security of Our said Province; and you are to transmit the said accounts to Us by one of Our principal Secretaries of State, and also Duplicates thereof to Our Commissioners for Trade and Plantations, for their information, and also a Duplicate thereof to Our Master General, or principal Officers of Our Ordinance, which accounts are to express the particulars of Ordinance, Carriages, Balls, Powder, and other sorts of Arms and Ammunition in Our public Stores, and so from time to time of what shall be sent to you, or bought with the public Money; and to specify

the time of the disposal, and the occasion thereof; and you are half yearly to transmit a general account of the State of the Fortifications and Warlike Stores specified in the manner above mentioned.

51. And in case of any Distress of any other of Our Plantations, you shall, upon application of the respective Governors thereof unto you, assist them with what aid the condition and safety of Our Province under your Government can spare.

52. If any thing shall happen, which may be of advantage or security to Our Province under your Government, which is not herein, or by your Commission provided for, We do hereby allow unto you, with the advice and consent of Our Council, to take order for the present therein, giving

p. 838

unto Us, by one of Our principal Secretaries of State, speedy notice thereof, that you may receive Our Ratification, if We shall approve the same; Provided always, that you do not by colour of any power or authority hereby given you, commence or declare War without Our Knowledge and particular Commands therein; and you are also to transmit a Duplicate of such notice, as aforesaid, to Our Commissioners for Trade and Plantations for their information.

53. And whereas We have by the first article of these Our Instructions to you directed and appointed, that your chief Residence shall be at Quebec, you are nevertheless frequently to visit other parts of your Government, in order to inspect the management of all public affairs, and thereby the better to take care, that the Government be so administered, that no disorderly practices may grow up contrary to Our Service and the welfare of Our Subjects.

54. And whereas great prejudice may happen to Our Service, and the security of the Province by your absence from those parts, you are not upon any pretence whatsoever to come into Europe without having first obtained leave for so doing from Us under Our Sign Manual and Signet, or by Our Order in Our Privy Council; Yet nevertheless, in case of Sickness, you may go to South Carolina, or any other of Our Southern Plantations, and there stay such a space of time, as the recovery of your Health may absolutely require.

55. And whereas We have thought fit by Our Commission to direct, that, in case of your death, or absence from Our said Province, and in case there be at that time no person within Our said Province commissioned or appointed by Us to be Our Lieutenant Governor, or Commander in Chief, that the eldest Councillor, being a natural born Subject of Great Britain, Ireland, or the Plantations, and professing the

Protestant Religion, who shall be at the time of your death or absence residing within Our said Province under your Government, shall take upon him the administration of Government, and execute Our said Commission, and Instructions, and the several powers and authorities therein directed; It is nevertheless Our express Will and Pleasure, that in such case the said President shall forbear to pass any Act or Acts, but what are immediately necessary for the Peace and Welfare of the said Province, without Our particular Order for that purpose.

56. And whereas We are desirous, that a proper provision should be made for the support of Our Government within Our said Province of Quebec, We do therefore hereby declare it to be Our Royal Intention, that the following annual Salaries and Allowances be discharged and paid out of any Revenues arising to Us within the same, or out of such other Monies, as shall be granted or appropriated to the Uses and Services of Our said Province of Quebec, that is to say,

p. 839

	£	s.	d.
To the Governor p Annum	2,000	0	0
To the Lieutenant Governor	600	0	0
To the Chief Justice	1,200	0	0
To six Judges of Common Pleas, £500 each	3,000	0	0

To Pensions to the Officers of a Corps of Canadians employed in the last War, and discharged without any Allowance, as follows, Viz ^t										
To Mons ^r Rigauville, the Commandant of said Corps							200	0	0
To five Captains £100 each	500	0	0
To ten Lieutenants £50 each	500	0	0
To the Commandant of the Savages	100	0	0
To Annual Contingent Expenses	1,000	0	0
										£17,350 0 0

All which Salaries and Allowances are to commence on, and be payable from, and after the first day of May next ensuing.¹

[¹ Among the Dartmouth Papers is an "Estimate of the Expençe of the Civil Establishment of the Province of Quebec, and Its Dependencies." M 385, p. 494. In this a number of the salaries are rated at different amounts from those here given. Among the variations are the following—Lt. Governor, £800, Chief Justice, £1,000; the six Judges, £300 each, Commissary for Indians, £200. There are two additional offices, Judge of the Admiralty, £200, Register of the Court of Admiralty, £100. There was no provision for Schoolmasters, or for Contingent Expenses. From another document we find that the appointments to these positions were divided between Lord Dartmouth, the Treasury Board, and the Governor, as follows,—

Lord Dartmouth—Lt. Governor, Chief Justice, Seery & Register, 3 Judges, Attorney Gen^l, Clerk of Crown, Commissary for Indian Affairs, Naval Officers, 5 Superintendst, 4 Ministers, 2 Schoolmasters.

Treasury—Surveyor of Lands, D^o of Woods, Receiv^r Gen^l.

Governor—Clerk of Council, Captain of ye Port, 2 Sheriffs, 5 Judges, 5 Assessors, 5 Sheriffs Grand Voyer, French Secretary." M 385, p. 492.]

57. And whereas We are further willing in the best manner to provide for the support of the Government of Our said Province, by setting apart a sufficient Allowance to such, as shall be Our Lieutenant Governor, Commander in Chief, or President of Our Council for the time being within the same; Our Will and Pleasure therefore is, that, when it shall happen, that you shall be absent from Our said Province, one full Moiety of the Salary, and of all Perquisites and Emoluments whatsoever, which would otherwise become due unto you, shall, during the time of your absence from Our said Province, be paid and satisfied unto such Lieutenant Governor, Commander in Chief, or President of Our Council, who shall be, resident upon the place for the time being, which We do hereby order and allot unto him towards his Maintenance, and for the better Support of the Dignity of that Our Government.

G.R.

PLAN FOR THE FUTURE MANAGEMENT OF INDIAN
AFFAIRS, REFERRED TO IN THE THIRTY-SECOND
ARTICLE OF THE FOREGOING INSTRUCTIONS

1. That the Trade and Commerce with the several Tribes of Indians in North America under the protection of His Majesty shall be free and open to all His Majesty's subjects, under the several Regulations and Restrictions hereafter mentioned, so as not to interfere with the Charter to the Hudson's Bay Company.

2. That for the better Regulation of this Trade, and the Management of Indian Affairs in general, the British Dominions in North America be divided into two Districts, to comprehend and include the several Tribes of Indians mentioned in the annexed Lists A. and B.

3. That no Trade be allowed with the Indians in the southern District, but within the Towns belonging to the several Tribes included in such District; and that in the Northern District the Trade be fixed at so Many Posts, and in such Situations, as shall be thought necessary.

4. That all Laws, now in Force in the several Colonies for regulating Indian Affairs, or Commerce, be repealed.

5. That there be one general Agent or Superintendent appointed by His Majesty for each District.

6. That the Agent or Superintendent for the Northern District shall be allowed three Deputies to assist him in the Administration of Affairs within his District; and that the Agent or Superintendent for the Southern District shall be allowed two Deputies.

7. That there shall be a Commissary, Interpreter, and Smith, appointed by His Majesty to reside in the Country of each Tribe in the Southern District and at each Post in the Northern District.

p. 841

8. That it be recommended to the Society for the propagation of the Gospel in foreign parts to appoint four Missionaries in each District, to reside at such places, as the Agent or Superintendant for each District shall recommend.

9. That the Commissaries, Interpreters, and Smiths in each District do Act under the immediate Direction and Orders of the Agent or Superintendant, who shall have a power of Suspending them in Case of Misbehaviour, and, in Case of Suspension of a Commissary, or of a Vacancy by Death, or Resignation, the Office shall be executed, until the King's pleasure is known, by one of the Deputies to the Agent or Superintendant.

10. That the said Agent or Superintendant shall have the Conduct of all public Affairs relative to the Indians; and that neither the Commander in Chief of His Majesty's Forces in America, nor any of the Governors and Commanders in Chief of any of the Colonies, or persons having military Commands in any of the Forts within each of the said, Districts, do hold any General Meetings with the Indians, or send any public Talks to them without the Concurrence of the Agent or Superintendant, unless in cases of great Exigency, or when the said Agent or Superintendant may be in some remote part of his District.

11. That the said Agents or Superintendants do in all Affairs of political consideration, respecting peace and war with the Indians, purchases of Lands, or other Matters, on which it may be necessary to hold any general Meetings with the Indians, advise and act in concert with the Governors, (or the Governors and Councils, as the Occasion may require), of the several Colonies within their respective Districts; And that the said Agents or Superintendants shall be Councillors extraordinary within each Colony in their respective Districts, in like manner as the Surveyors General of the Customs for the Northern and Southern Districts of America.

12. That the Governor or Commander in Chief of every Colony be directed to communicate to the Agent or Superintendant of that District, within which his Government lyes, all such Information and Intelligence, as he may receive respecting Indian Affairs; And that the Agents or Superintendants shall in like manner communicate to the Governors all Intelligence and Information, respecting the State of Indian Affairs, which may in any wise regard the Security and Interest of the said Colonies.

13. That no Order shall be issued by the Governor or Commander in Chief of any of His Majesty's Colonies, or by any Officer having Military Command in any Forts within the Indian Country, for stopping the Trade with any Tribe of Indians in either of the said Districts, without the Concurrence and Consent of the Agent or Superintendant for Indian Affairs.

14. That the said Agents or Superintendants shall by themselves, or sufficient Deputies visit the several Posts or Tribes of Indians within their respective Districts once in every year, or oftener, as Occasion shall require,

p. 842

to enquire into, and take an Account of the Conduct and Behaviour of the subordinate Officers at the said Posts, and in the Country belonging to the said Tribes; to hear Appeals; and redress all Complaints of the Indians; make the proper Presents; and transact all Affairs relative to the said Indians.

15. That for the maintaining peace and good Order in the Indian Country, and bringing Offenders in criminal Cases to due Punishment, the said Agents or Superintendants, as also the Commissaries at each Post, and in the Country belonging to each Tribe, be empowered to Act as Justices of the Peace in their respective Districts and Departments, with all powers and priviledges vested in such Officers in any of the Colonies; and also full power of Committing Offenders in Capital Cases, in order that such Offenders may be prosecuted for the same; And that, for deciding all civil actions, the Commissaries be empowered to try and determine in a Summary way all such Actions, as well between the Indians and Traders, as between one Trade and another, to the Amount of Ten Pounds Sterling, with the Liberty of Appeal to the Chief Agent or Superintendant, or his Deputy, who shall be empowered upon such appeal to give Judgement thereon; which Judgement shall be final, and process issue upon it, in like manner as on the Judgement of any Court of Common Pleas established in any of the Colonies.

16. That for the easy attainment of Justice, the evidence of Indians, under proper Regulations and Restrictions, be admitted in all Criminal as well as civil causes, that shall be tried and adjudged by the said Agents or Superintendants, or by the said Commissaries; and that their Evidence be likewise admitted by the Courts of Justice in any of His Majesty's Colonies or Plantations in Criminal cases, Subject to the same Pains and Penalties in Cases of false Evidence, as His Majesty's Subjects.

17. That the said Agents or Superintendants shall have power to Confer such Honors and Rewards on the Indians, as shall be necessary; and of granting Commissions to principal Indians in their respective Districts to be War Captains or

Officers of other Military Distinctions.

18. That the Indians of each Town in every Tribe in the Southern District shall choose a beloved Man to be approved of by the Agent or Superintendant for such District, to take care of the Mutual Interests both of Indians and Traders in such Town; and that such beloved Men, so elected and approved in the several Towns, shall elect a Chief for the whole Tribe, who shall constantly reside with the Commissary in the Country of each Tribe, or occasionally Attend upon the said Agent or Superintendant, as Guardian for the Indians and Protector of their Rights, with Liberty to the said Chief to be present at all Meetings and upon all Hearings or Trials relative to the Indians before the Agent or Superintendant, or before the Commissaries; and to give his Opinion upon all Matters under Consideration at such Meetings or Hearings.

19. That the like Establishments be made for the Northern District, as far as the Nature of the Civil Constitution of the Indians in this District, and the Manner of Administering civil affairs will admit.

p. 843

20. That no person having any Military Command in the Indian Country shall be capable of Acting as Commissary for the Affairs of the Indians; in either of the above mentioned Districts respectively; nor shall such person having military Command be allowed to carry on trade with the Indians or to interpose his Authority in any thing, that regards the Trade with, or civil Concerns of the Indians; but to give the Commissary or other Civil Magistrate all Assistance in his power, whenever thereunto required.

21. That the said Commissaries shall keep exact and regular Accounts by way of Journal, of all their Transactions and Proceedings, and of all Occurrences in their respective Departments, and shall by every opportunity communicate such Transactions and Occurrences to the Agent or Superintendant in their respective Districts; which Agent or Superintendant shall regularly by every Opportunity correspond with the Commissioners for Trade and Plantations.

22. That the Agent or Superintendant, to be appointed for each District, as also the Commissaries residing at the Posts, or in the Indian Country within each District, shall take an Oath before the Governor or Chief Judge of any of the Colonies within their respective Districts, for the due Execution of their respective Trusts; and they and all other subordinate Officers employed in the Affairs of the Indians, shall be forbid, under proper Penalties to carry on any Trade with them, either upon their own Account, or in Trust for others, or to make any Purchase of, or accept any Grants of Lands from the Indians.

23. That for the better regulation of the Trade with the said Indians conformable to their own Requests, and to prevent those Frauds and Abuses, which have been so long and so loudly complained of in the manner of carrying on such Trade, all Trade with the Indians in each District be carried on under the Direction and Inspection of the Agents or Superintendants, and other subordinate Officers to be appointed for that purpose, as has been already mentioned.

24. That all Persons intending to trade with the Indians shall take out Licences for that purpose under the Hand and Seal of the Governor or Commander in Chief of the Colony, from which they intend to carry on such Trade, for every of which Licences no more shall be demanded or taken than two Shillings.

25. That all persons taking out Licences shall enter into Bond to His Majesty, His Heirs, and Successors in the Sum of _____ with one Surety in the Sum of _____ for the due observance of the Regulations prescribed for the Indian Trade.

26. That every Person willing to give Security, and finding a Security willing, if required, to take an Oath, that he is possessed of property to double the value of the Sum he stands security for, shall be intitled to a Licence.

p. 844

27. That every such Licenced Trader shall at the time of taking out the Licence, declare the Post or Truck house, at which or the Tribe of Indians with which he intends to trade, which shall be specified in the Licence itself.

28. That no Licence be granted to continue longer than for one Year.

29. That no Person trade under such Licence, but the person named in it, his Servants, or Agents, whose Names are to be inserted in the Margents; and in Case any of the Servants or Agents named in such Licence shall die, or be discharged, the same shall be notified to the Governor, by whom the Licence was granted, or to the Commissary of the Post, or in the Tribe, where such Trader carries on Trade, to the end that the Name or Names of any other Servants or Agents, employed by the said Trader in the place of those dead or discharged, may in like manner be inserted in the Margent of the Licence.

30. That all Licences be entered in the Secretary's Office, or other proper Office of Record in each Colony, where they are taken out; for which Entry no more shall be demanded or taken than Six pence for each Licence; and all persons to have free Liberty to inspect such Entry, paying a Fee of Six pence for the same.

31. That persons trading with the Indians without a Licence,

and without giving the Security above required, or trading at any other Posts or places, than those expressed in their Licences, do forfeit all the Goods they shall be found then trading with, and also pay a Fine of _____ to His Majesty, His Heirs, and Successors, and suffer _____ Months Imprisonment.

32. That all Traders immediately upon Arrival at the posts or Truck houses in the Northern district, or in the Tribes in the Southern district, for which Licences have been taken out, and before any Goods are sold to, or bartered with the Indians, do produce such Licences to the Commissaries appointed for the Direction and Inspection of the Trade at such posts, or Truck houses, or in such Tribes.

33. That all Trade with the Indians shall be carried on by Tariffs, to be settled and Established from time to time by the Commissaries at the several Posts, or Truck houses, or in the Countries belonging to the several Tribes in Concert with the Traders and Indians.

34. That the Commissaries appointed to direct and inspect the Trade at each Truck house in the Northern District, shall be empowered to fix and prescribe Limits round each. Post or Truck house, within which Limits all Trade with the Indians may be commodiously carried on in the most public Manner.

35. That all Traders have free Liberty to erect Hutts and Warehouses within such Limits, in such Order and Manner as the Commissary shall, with the concurrence of the Officer Commanding at such Post, Direct and appoint.

36. That no Trader shall Traffic, or have any Dealings with the Indians without the Limits prescribed by the Commissary or other Chief Officer appointed for the Inspection and Direction of the Trade.

37. That each Truck house or post of Trade in the Northern District be fortified and garrisoned; and that all Traders have free Liberty to retire into such Garrison with their Effects, when ever any Disturbance shall Arise, or the Commissary at such post shall represent it to be necessary.

38. That no Trader shall sell or otherwise supply the Indians with Rum, or other spirituous Liquors, Swan Shot, or rifled Barrelled Guns.

39. That in Trade with the Indians no Credit shall be given them for Goods in Value beyond the Sum of fifty Shillings; and no Debt beyond that Sum shall be recoverable by Law or Equity.

40. That all Disputes concerning Weights or Measures in the buying or selling Goods shall be decided by Standard Weights and Measures, to be kept in each Post or Truck-house in the Northern District, and in each Tribe in the Southern District.

41. That no private person, Society, Corporation, or Colony be capable of acquiring any Property in Lands belonging to the Indians, either by purchase of, or Grant, or Conveyance from the said Indians, excepting only where the Lands lye within the Limits of any Colony, the soil of which has been vested in proprietors, or Corporations by Grants from the Crown; in which Cases such Proprietaries or Corporations only shall be capable of acquiring such property by purchase or Grant from the Indians.

42. That proper Measures be taken, with the Consent and Concurrence of the Indians, to ascertain and define the precise and exact Boundary and Limits of the Lands, which it may be proper to reserve to them, and where no Settlement whatever shall be allowed.

43. That no purchases of Lands belonging to the Indians, whether in the Name and for the Use of the Crown, or in the Name and for the Use of proprietaries of Colonies be made but at some general Meeting, at which the principal Chiefs of each Tribe, claiming a property in such Lands, are present; and all Tracts, so purchased, shall be regularly surveyed by a Sworn Surveyor in the presence and with the Assistance of a person deputed by the Indians to attend such Survey; and the said Surveyor shall make an accurate Map of such Tract, describing the Limits, which Map shall be entered upon Record, with the Deed of Conveyance from the Indians.

It is estimated, that the annual Expence of supporting the Establishments, proposed in the foregoing plan, providing presents for the Indians, and other contingent Expences, may amount to about twenty thousand pounds; and it is proposed to defray this Expence by a Duty upon the Indian Trade, either collected upon the Exportation of Skins and Furs, (Beaver excepted,) from the Colonies, or payable by the Traders at the posts and

p. 846

places of Trade, as shall, upon further Examination and the fullest Information, be found most practicable, and least burthensome to the Trade.

A.

List of Indian Tribes in the northern District of North America.

[15 April,
1778.]**INSTRUCTIONS, PASSED UNDER THE ROYAL SIGN
MANUAL AND SIGNET, FOR FREDERICK
HALDIMAND**AS CAPTAIN GENERAL AND GOVERNOR IN CHIEF OF THE PROVINCE
OF QUEBEC AND THE TERRITORIES DEPENDENT THEREUPON.¹

(L.S.)

George R.

Instructions to Our Trusty and Welbeloved Frederick Haldimand Esquire, Our Captain General & Governor in Chief in & over Our Province of Quebec in America & of all Our Territories dependent thereupon Given at Our Court at St James's the Fifteenth day of April 1778. In the Eighteenth Year of Our Reign.—

First With these Our Instructions You will receive Our Commission under Our Great Seal of Great Britain, constituting you Our Captain General & Governor in Chief in and over Our Province of Quebec in America, & all Our Territories thereunto belonging, bounded & described, as in Our said Commission is set forth; in Execution therefore of the Trust We have reposed in you, You are to take on You the Administration of the Government, & to do & execute all things belonging to your Command, according to the several Powers & Authorities of Our said Commission & these Our Instructions to you, or according to such further Powers & Instructions as you shall at any time hereafter receive under Our Signet or Sign Manual, or by Our Order in Our Privy Council; and you are to call together at Quebec (which We do hereby appoint to be the Place of your ordinary Residence, & the Principal Seat of Government) the following Persons, whom We do hereby constitute & appoint to be Our Council for the Affairs of Our said Province & the Territories thereunto belonging, Viz^t Hector Theophilus Cramahé Esq^r Our Lieutenant Governor of Our said Province, or Our Lieutenant Governor of Our said Province for the time being, Peter Livius Esq^r Our Chief Justice of Our said Province, or Our Chief Justice of Our said Province for the time being, Hugh Finlay, Thomas Dunn, James Cuthbert, Francis L'Evesque, Edward Harrison, John Collins, Adam Mabane, Chaussegros de Lery, George Pownall Esq^r Our Secretary of Our said Province, or Our Secretary of Our said Province for the time being, George Alsopp, La Corne St Luc, Alexander Johnston, Conrad Guty, Picotté de Belestres, John

¹ Canadian Archives, Q 26 B, p. 213, and C.O. 43, vol. 2, p. 323.

Fraser, Henry Caldwell, John Drummond, William Grant, Rocque St Ours Junior, Francis Baby, & De Longueuil Esq^r every one of which respectively shall enjoy his Office of Councillor aforesaid for & during Our Will and Pleasure, & his Residence within Our said Province of Quebec, & not otherwise.—

(The following section, 2-15 as 16-57 of the Instructions to Haldimand, are identical with 2-15 as 18-58 of the General Instructions to Carleton of 3^d Jan^y, 1775, ante pp. 821-826 et. seq.—omitting the latter part of section 9—and adding section 16, as follows.)

16. And Whereas, in pursuance of the foregoing Instructions, Ordinances have been framed and ordained for the Establishment of Courts, and directing a proper mode of Administring Civil and Criminal Justice within Our said Province of Quebec, conformable to the Spirit and Intention of the aforesaid Act of Parliament, Intituled, "An Act for making more Effectual Provision for the Government of the Province of Quebec in North America," It is Our Will and Pleasure that you do from time to time, with Our said Council in their Legislative Capacities, deliberate upon, and frame such Ordinances, as the Circumstances and Condition of Affairs may require, either for continuing, Amending or enforcing such Ordinances, as have been Ordained, as aforesaid, or making any further and necessary Changes and Regulations in the Courts as established, or in the mode of administering Justice within Our said Province; provided, that such Ordinances be strictly conformable to the Act of Parliament aforesaid, And to the Tenor of these Our Instructions.

Endorsed: Frederick Haldimand Esq^r Governor of Quebec
Dated 15th April 1777. (1778).

The Usual Trade Instructions were signed & dated as above.

**EXTRACT FROM COMMISSION TO GOVERNOR
CARLETON OF QUEBEC.**

PATENT ROLL 26 GEORGE III. pt. 5, No. 8. No. 3826. COLONIAL
OFFICE RECORDS 42/17.

Sir Guy Carleton George the third, etc., to Sir Guy Carleton (Governor of Quebec) Greeting, etc. WHEREAS we did by our letters patent under our great seal of Great Britain bearing date at Westminster the eighteenth day of September in the seventeenth year of our reign constitute and appoint Frederick Haldimans, esquire, to be our Captain General and Governor in Chief in and over the province of Quebec, etc., And further know ye that we reposing especial trust and confidence in the prudence, courage and loyalty of you the said Sir Guy Carleton of our especial grace, certain knowledge and mere motion, have thought fit to appoint you the said Sir Guy Carleton to be Our Captain General and Governor in Chief in and over Our Province of Quebec in America comprehending all our Territories, Islands and Countries in North America—Northward to the southern Boundary of the Territory granted to the Merchants, Adventurers of England trading to Hudson's Bay, and also all such Territories, Islands, and Countries, which have since the tenth of February one thousand seven hundred and sixty three been made Part of the Government of Newfoundland, together with all the Rights, Members and Appurtenances whatsoever thereunto belonging.

Witness ourself at Westminster the 22nd day of April in the twenty sixth year of our reign.

BY WRIT OF PRIVY SEAL.

No. 193.

23 August,
1786.**INSTRUCTIONS, PASSED UNDER THE ROYAL SIGN
MANUAL AND SIGNET, FOR LORD DORCHESTER**C.O.
(Instructions Quebec
1786-1791.)AS CAPTAIN GENERAL AND GOVERNOR IN CHIEF OF THE PROVINCE
OF QUEBEC AND THE TERRITORIES DEPENDENT THEREUPON.¹

Instructions to Our Right Trusty and Welbeloved Guy Lord
Dorchester, Knight of the Most Honorable Order of the Bath
— Our Captain General and Governor in Chief in and over
Our Province of Quebec in America, and of all Our
Territories dependent thereupon—Given at Our Court at St
James's the 23rd Day of August 1786. In the Twenty Sixth
Year of Our Reign.

First. With these Our Instructions you will receive Our
Commission under our Great Seal of Great Britain constituting
You Our Captain General and Governor in Chief in and over
Our Province of Quebec in America, and all Our Territories
thereunto belonging bounded and described as in Our said
Commission is set forth; In execution therefore of the Trust
We have reposed in You, You are to take upon You, the
Administration of the Government, and to do and execute all
Things belonging to your Command according to the several
Powers and Authorities of Our said Commission, and these
Our Instructions to You, or according to such further Powers &
Instructions, as you shall at any time hereafter receive under
Our Signet & Sign Manual, or by Our Order in Our Privy
Council, and you are to call together at Quebec the following
Persons whom We do hereby constitute and appoint to be Our
Council for the Affairs of Our said Province and the Territories
thereunto belonging Viz^t Henry Hope Esq^r Lieutenant Gov^r of
Our said Province of Quebec, or the Lieutenant Governor of
Our said Province for the time being: William Smith Esq^r Our
Chief Justice of Our said Province of Quebec or the Chief
Justice of Our said Province for the Time being, Hugh Finlay,
Thomas Dunn, Francis Les Vesques, Edward Harrison, John
Collies, Adam Mabane, Chaussegros de Lery, George Pownall
Secretary of Our said Province

[¹ Canadian Archives, Q 26B. formerly M 230, p. 231. Just before leaving
for America Sir Guy Carleton was raised to the Peerage as Baron Dorchester.
He arrived in Quebec on Oct. 23rd, 1786. On comparing these Instructions
with those given to Carleton in 1775 and Haldimand in 1778, it will be
observed that the changes are not very numerous, beyond embodying the
additional instructions issued in the interval, as in articles 2, 16, 37, and 40 to
43; or readjusting the wording to harmonize with certain ordinances passed in
the meantime, as in articles 12 and 14.]

of Quebec, or the Secretary of Our said Province for the Time being, Picotté de Bellestres, John Fraser, Henry Caldwell, William Grant, Rocque St Ours Jun^r Francis Baby De Longueuil, Samuel Holland and George Davison Esquires, Sir John Johnson Bart, Charles de Lanaudiere de Boucherville & Compte du Pré Esquires, every one of which respectively shall enjoy his Office of Councillor aforesaid during Our Will and Pleasure and his residence within Our said Province of Quebec and not otherwise.

2^d It is Our further Will and Pleasure that any five of the said Council shall constitute a Board of Council for transacting all Business in which their Advice and Consent may be requisite, Acts of Legislature only excepted (in which Case you are not to act without a Majority of a whole) you are however not to select or appoint any such Members of Our said Council by Name to the Number of five as you may think fit to transact such Business, or term any select Number of such Members by the Name of a Privy Council, but you are on every Occasion where the Attendance of the Members is necessary or required, to summon all such who may be within a convenient Distance; And It is Our further Will and Pleasure that the Members of Our said Council shall have and enjoy all the Powers, Privileges and Emoluments enjoyed by the Members of Our Councils in Our other Plantations, and also such others as are contained and directed in Our said Commission under Our Great Seal of Great Britain and in these Our Instructions to you, and that they shall meet together at such time and times, place and places as you in your Discretion shall think necessary, except when they meet for the purpose of Legislation, in which case they are to be assembled at the Town of Quebec only.

Art.	}	same	{	3	[to Guy Carleton, ante pp. 821-823 ,
to				to	except for "Our Commissioners for
6				6	6

7. You are at your first calling together Our Council to communicate to them such and so many of these Our Instructions wherein their Advice and Consent are mentioned to be requisite, or which contain any Directions as to the framing of Ordinances for the Peace, Welfare and good Government of Our said Province, as likewise all such others from time to time as you shall find convenient for Our service to be imparted to them.

8. You are to permit the Members of Our said Council to have and enjoy freedom of Debate and Vote in all Affairs of publick Concern that may be debated in Council.

9. And whereas by the aforesaid Act passed in the fourteenth year of Our Reign Intituled, "An Act for making more effectual provision for the Government of the Province of Quebec in North America" It is

p. 852

further enacted and provided that the Council for the Affairs of the said Province to be constituted and appointed in manner therein directed, or the Major part thereof shall have power and Authority to make Ordinances for the peace, Welfare and good Government of the said Province with the Consent of Our Governor or in his Absence the Lieutenant Governor or Commander in Chief for the time being, Provided that no Ordinance shall be passed, unless upon some urgent Occasion at any Meeting of the Council, except between the first Day of January and the first Day of May, You are to take especial Care that the Directions of the said Act be duly observed and that no Ordinance be passed at any Meeting of the Council where less than a Majority is present, or at any time except between the first Day of January and the first Day of May as aforesaid, unless upon some urgent Occasion in which case every Member thereof resident at Quebec or within fifty Miles shall be personally summoned to attend the same.

10. That no Ordinance be passed for laying any Taxes or Duties, such Rates and Taxes only excepted as the Inhabitants of any Town or District may be authorized to assess, levy and apply within the said Town or District for the making of Roads, erecting & repairing of publick Buildings, or for any other purpose respecting the local Convenience and economy of such Town or District.

That no Ordinance touching Religion or by which any Punishment may be inflicted greater than Fine or Imprisonment for three Months, be made to take Effect, until the same shall have received Our Approbation.

That in all Ordinances imposing Fines, Forfeitures or Penalties, express Mention be made that the same is granted or reserved to Us, Our Heirs and Successors for the publick Uses of the said Province, and the Support of the Government thereof, as by the said Ordinance shall be directed, and that a clause be inserted declaring that the Money arising by the Operation of the said Ordinance shall be accounted for unto Us in this Kingdom, and to Our Commissioners of Our Treasury for the time being, and audited by Our Auditor General of Our Plantations or his Deputy.

That no Ordinance be passed relative to the Trade Commerce, or Fisheries of the said Province, by which the Inhabitants thereof shall be put upon a more advantageous footing than any other of Our Subjects, either of this Kingdom or of the Plantations, who have retained their Allegiance.

That no Ordinance respecting private property be passed without a Clause suspending its Execution until Our Royal Will and Pleasure is known, nor without a Saving of the right

of Us, Our Heirs & Successors and of all Bodies Politick and Corporate, and of all other persons, except such as are mentioned in the said Ordinance and those claiming by, from, and under them, And before such Ordinance is passed Proof must be made before you in Council and entered in the Council Books, that publick Notification was made of the Parties' Intention to apply for such Ordinance in the several Parish Churches, where the Lands in question lye for three Sundays at least successively before any such Ordinances shall be proposed, And you are to

p. 853

transmit and annex to the said Ordinance a Certificate under your Hand that the same passed through all the forms abovementioned.

That, except in Cases of imminent Necessity or immediate temporary Expediency, you shall not enact any Ordinance for less time than two years, and you shall not re-enact any Ordinance, to which Our Assent shall have been once refused, nor give your Assent to any Ordinance for repealing any other passed in Your Government, which shall have received Our royal Approbation, unless you take care that there be a Clause inserted therein suspending the Execution thereof until Our Pleasure shall be known, and in either case it will be your Duty to make full representation to Us by One of Our principal Secretaries of State, and to the Lords of the Committee of our Privy Council for Trade & Plantations for their Information of the reasons and Necessity which appeared to you for passing such Ordinance.

That all such Ordinances be transmitted by you within six Months after their passing, or sooner if Opportunity offers, to Us by one of Our principal Secretaries of State and Duplicates thereof to the Lords of the Committee of Our Privy Council for Trade & Plantations for their Information; That they be abstracted in the Margins and accompanied with very full and particular Observations where they may be necessary, together with fair Copies of the Journals of the proceedings of the Council, which you are to require from the Clerk of the said Council.

11. In the Consideration of what may be necessary to be provided for by Law within Our said Province, as created and established by the aforesaid Act, Intituled, "An Act for making more effectual Provision for the Government of the Province of Quebec in North America," a great Variety of important Objects hold themselves forth to the Attention of the Legislative Council.

12. The Establishment of Courts and a proper Mode of administering Civil and Criminal Justice throughout the whole Extent of Our Province according to the Principles declared in the said Act for making more effectual provision for the Government thereof demand the greatest Care and

Circumspection, for as on the one Hand it is Our gracious purpose, conformable to the Spirit and Intention of the said Act of Parliament, that Our Canadian Subjects should have the Benefit and Use of their own Laws, Usages and Customs in all Controversies respecting Titles of Land, and the Tenure, Descent, Alienation, Incumbrances and Settlements of real Estates and the Distribution of personal property of Persons dying intestate, so on the other hand it will be the Duty of the Legislative Council to consider well in framing such Ordinances, as may be necessary for the Establishment of Courts of Justice, and for the better Administration of Justice, whether the Laws of England may not be, if not altogether, at least in part the Rule for the Decision in all Cases of personal Actions grounded upon Debts, Promises, Contracts and Agreements, whether of a Mercantile or other Nature, and also of Wrongs proper to be compensated in Damages, and more especially where Our Natural born Subjects of Great Britain, Ireland,

p. 854

or other Plantations residing at Quebec, or who may resort thither or have Credit or Property within. the same, may happen to be either Plaintiff or Defendant in any Civil Suit of such a Nature.

13. Whereas an Ordinance hath been passed in Our Province of Quebec, Intituled, "An Ordinance for securing the Liberty of the Subject and for the prevention of Imprisonments out of this Province," It is Our Will and Pleasure that you do take effectual Care that the said Ordinance be duly enforced, so that every Security to personal Liberty, which is thereby provided for, may be fully enjoyed by Our Subjects in that Province.

14. Whereas, in pursuance of Our former Instructions to Our Governors and Commanders in Chief, Courts of Justice have been established within Our province of Quebec, It is Our Will and Pleasure that you do take due care that in all Cases whatever the Powers and Authorities granted by Us, or by any Ordinance confirmed by Us, to the said several Courts be duly observed and enforced, and that the Proceedings therein be in all things conformable to the said Act of Parliament "for making more effectual provision for the Government of the Province of Quebec," and to such Ordinances as may have been or hereafter may be enacted by the Legislature for those purposes; And that the Governor and Council (of which in the Absence of the Governor and Lieutenant Governor the Chief Justice is to be President) shall continue to be a Court of Civil Jurisdiction for the hearing and determining of all Appeals from the Judgment of the other Courts, where the Matter in dispute is above the Value of ten Pounds; That any five of the said Council (if no more shall upon Summons be present) with the Governor, Lieutenant Governor or Chief Justice shall constitute a Court for that purpose, and that their Judgment

shall be final in all Cases not exceeding the Value of five hundred Pounds Sterling; In which Cases an Appeal from their Judgment is to be admitted to Us in Our Privy Council; It is however Our Will and Pleasure that no Appeal be allowed unless Security be first given by the Appellant that he will effectually prosecute the same, and answer the Condemnation, as also pay such Costs and Damages as shall be awarded by Us, in case the Sentence be affirmed; Provided nevertheless, where the Matter in Question relates to the taking or demanding of any Duty payable to Us, or to any Fee of Office, or Annual Rents or other such like Matter or Thing, where the Right in future may be bound, in all such Cases Appeal to Us in Our Privy Council is to be admitted, though the immediate Sum or Value appealed for be of less Value; And it is Our further Will and Pleasure that in all Cases where Appeals are admitted unto Us in Our Privy Council Execution be suspended until the final Determination of such Appeal, Unless good and sufficient Security be given by the Appellee to make ample restitution of all that the Appellant shall have lost by means of such Decree or Judgment, in case upon the Determination of such Appeal such Decree or Judgment should be reserved, and restitution awarded to the Appellant: Appeals unto Us in Our Privy Council are also to be admitted in all Cases of Fines imposed for Misdemeanours, Provided the Fines so imposed amount to or exceed the Sum

of One hundred Pounds Sterling, the Appellant first giving good Security that he will effectually prosecute the same, & answer the Condemnation, if the Sentence by which such Fine was imposed in Quebec be affirmed.

15. And it is Our Will and Pleasure that you do, from time to time as the Circumstances and Condition of Affairs may require, with Our said Council in their Legislative Capacity deliberate upon and frame such Ordinances as may be expedient for continuing, amending or enforcing any Ordinances now in force, or making any further or necessary Changes and regulations in the Courts of Judicature already established, or in the Mode of administering Justice within Our said Province, provided that such Ordinances be strictly conformable to the Act of Parliament aforesaid and these Our Instructions.

16. It is Our Will and Pleasure that all Commissions, to be granted by you to any person or persons to be Judges or Justices of the Peace or other necessary Officers, be granted during Pleasure only.

17. You shall not displace any of the Judges, Justices of the peace or other Officers or Ministers without good and sufficient Cause, which you shall signify in the fullest and most distinct Manner to Us by one of Our Principal Secretaries of State and to the Lords of the Committee of Our Privy Council for Trade & Plantations for their Information.

18. Whereas it is of the greatest Importance to Our Service and to the Welfare of Our Plantations that Justice be everywhere speedily and duly administered, and that all Disorders, Delays and other undue Practices in the Administration thereof be effectually prevented, We do particularly require you to take especial Care that in all Courts where you are or shall be authorized to preside Justice be impartially administered, And that in all other Courts established or to be established within Our said Province all Judges and other Persons therein concerned do likewise perform their several Duties without Delay or Partiality.

19

Art. 19 } same { to [To Guy Carleton, ante pp. 828-
to } as { 832.]
29 } { 29

30. The Extension of the Limits of the Province of Quebec necessarily calls forth your Attention to a Variety of new Matter and new Objects of Consideration: The Protection and Controul of the Various Settlements of Canadian Subjects and

the Regulation of the Peltry Trade in the Upper or interior Country on the one hand, And the Protection of the Fisheries in the Gulf of S^t Lawrence and on the Labrador Coast on the other hand point to Regulations that require Deliberation and Dispatch.

31. You are not to allow any Settlements to be made beyond the Boundaries ascertained to the different Posts among the Indian Nations within the Limits of Our Province of Quebec in Alliance with Us, as such Settlements may tend to disgust those Savages, excite their Enmity and

p. 856

perhaps finally destroy the Peltry Trade which ought to be cherished & Encouraged by every Means in your Power.

32. It is Our Royal Intention that the Peltry Trade of the interior Country should be free and open to all Our Subjects, Inhabitants of any of Our Colonies, who shall, pursuant to what was directed by Our Royal Proclamation of 1763, obtain trading Licences from the Governors of any of Our said Colonies under penalties to observe such Regulations, as shall be made by Our Legislature of Quebec for that purpose. These regulations therefore when established must be made publick throughout all Our American Possessions and they must have for their Object the giving every possible Facility to that Trade, which the Nature of it will admit, and which may be consistent with fair and just Dealing towards the Savages, with whom it is carried on; The fixing stated Times and Places for carrying on the Trade and adjusting Modes of settling Tarifs of the Prices of Goods and Furs, and above all the restraining the sale of spirituous Liquors to the Indians will be the most probable and effectual Means of answering the finds proposed; These and a Variety of other Regulations incident to the Nature and purpose of the Peltry Trade in the interior Country are fully stated in a Plan proposed by Our Commissioners for Trade and Plantations in 1764, a Copy of which will be herewith delivered to you, and which will serve as a Guide in a Variety of Cases, where it may be necessary to make Provision by Law for that important Branch of the American Commerce.

33. The Fisheries on the Coast of Labrador and the Islands adjacent thereto are Objects of the greatest Importance, not only on Account of the Commodities they produce, but also as Nurseries of Seamen, upon whom the Strength & Security of Our Kingdom depend.

34. Justice & Equity demand that the real and actual Property & Possession of the Canadian Subjects on that Coast should be preserved entire, and that they should not be molested or hindered in the Exercise of any sedentary Fisheries they may have established there.

35. Their Claims however extend to but a small District of the Coast, on the greatest part of which District a Cod Fishery is stated to be impracticable.

36. On all such Parts of the Coast where there are no Canadian Possessions, and more especially where a Valuable Cod Fishery may be carried on, it will be your Duty to make the Interest of Our British Subjects going out to fish there in Ships fitted out from Great Britain the first Object of your Care, and as far as Circumstances will admit to establish on that Coast the Regulations in favour of British fishing Ships, which have been so wisely adopted by the Act of Parliament passed in the Reign of King William the Third for the Encouragement of the Newfoundland Fishery And you are on no account to allow any Possession to be taken, or Sedentary Fisheries to be established upon any parts of the Coast that are not already private Property

p. 857

by any Persons whatever, except only such as shall produce annually a Certificate of their having fitted out from some Port in Great Britain.

37. Whereas it will be for the general Benefit of Our Subjects carrying on the Fishery in the Bay of Chaleur in Our Province of Quebec that such Part of the Beach & Shore of the said Bay as is ungranted should be reserved to Us, Our Heirs & Successors, It is therefore Our Will and Pleasure that you do not in future direct any Survey to be made or Grant to be passed for any Part of the ungranted Beach or Shore of the said Bay of Chaleur, except such Parts thereof as by Our Orders in Council dated the 29th of June and 21st of July last are directed to be granted to John Schoolbred of London, Merchant, and to Mess^{rs} Robin Pipon and C^o of the Island of Jersey, Merchants, but that the same be reserved to Us, Our Heirs and Successors together with a sufficient Quantity of Wood Land adjoining thereto necessary for the purpose of carrying on the Fishery; The Limits of such Wood Land so to be reserved, to be determined upon and ascertained by you and Our Council for Our said Province of Quebec in such manner as from the most authentick Information shall appear to you & them most convenient and proper for that purpose; It is nevertheless Our Intention and We do hereby signify to you Our Will and Pleasure that the free Use of such Beach or Shore and of the Wood Land so to be reserved shall be allowed by you or any Person authorized by you to such of Our Subjects as shall resort thither for the Purpose of carrying on the Fishery in such proportions as the Number of Shallops, he or they shall respectively employ, may require; provided that, if any Fisherman who shall have permission to occupy any Part of the said Beach or Shore and Wood Land for the purpose of the said Fishery shall not during any one Season continue so to

occupy & employ any Part of the said Beach or Shore and Wood Land so allotted to him, You or any Person authorized by you as above may & shall allow the Use of such Part to any other Fisherman who shall apply for the same for the purpose of carrying on the Fishery. And Whereas it may be necessary to establish local Regulations to prevent Abuses as well as Disputes and Misunderstanding between the Fishermen resorting to the said Beach or Shore; It is Our Will and Pleasure that you, by and with the Advice and Consent of Our said Council, do frame such Regulations from time to time as to you shall appear necessary to answer those salutary Purposes and that you transmit the same to Us thro' One of Our principal Secretaries of State for Our Pleasure therein by the first Opportunity.

38. We have mentioned to you the Fisheries upon the Coast of Labrador as the Main Object of your Attention, but the Commerce carried on with the Savages of that Coast and the State and Condition of those Savages deserve some regard: The Society of Unitas Fratrum urged by a laudable Zeal for promoting Christianity have already under Our protection and with Our permission formed Establishments in the Northern Parts of that Coast for the purpose of civilizing the Nations and converting them to the Christian Religion. Their Success had been answerable to their Zeal, and It is Our

p. 858

express Will and Pleasure that you do give them every Countenance Encouragement in your power, and that you do not allow any Establishment to be made but with their Consent within the Limits of their Possessions.

39. By Our Commission to you under Our Great Seal of Great Britain you are authorized & empowered with the Advice and Consent of Our Council to settle & agree with the Inhabitants of Our said Province of Quebec for such Lands, Tenements and Hereditaments as now are or shall hereafter be in Our Power to dispose of, It is therefore Our Will and Pleasure that all Lands which now are or hereafter may be subject to Our Disposal, be granted in Fief or Seigneurie, in like manner as was practised antecedent to the Conquest of the said Province, omitting however in any Grant that shall be passed of such Lands the reservation of any judicial Powers or Privileges whatever; And It is Our further Will and Pleasure that all Grants in Fief or Seigneurie, so to be passed by you as aforesaid, be made subject to Our Royal ratification or Disallowance and a due Registry thereof within a limited time, in like manner as was practised in regard to Grants and Concessions held in Fief or Seigneurie under the French Government.

40. Whereas many of Our Loyal Subjects, Inhabitants of the Colonies and Provinces now the United States of America, are

desirous of retaining their Allegiance to Us and of living in Our Dominions, and for this purpose are disposed to take up and improve Lands in Our Province of Quebec, And We being desirous to encourage Our said Loyal Subjects in such their Intentions and to testify Our Approbation of their Loyalty to Us and Obedience to Our Government by allotting Lands for them in Our said Province, And Whereas We are also desirous of testifying Our Approbation of the Bravery and Loyalty of our Forces serving in Our said Province, and who may have been reduced there, by allowing a certain Quantity of Land to such of the Non-Commissioned Officers and Private Men of our said Forces who are inclined to become Settlers therein, It is Our Will and Pleasure that immediately after you shall receive these Our Instructions you do direct Our Surveyor-General of Lands for Our said Province of Quebec to admeasure and lay out such a Quantity of Land as you, with the Advice of Our Council, shall deem necessary and convenient for the settlement of Our said Loyal Subjects, and the Non-Commissioned Officers and Private Men of Our Forces which may have been reduced in Our said province, who shall be desirous of becoming Settlers therein; Such Lands to be divided into distinct Seigneuries or Fiefs to extend from two to four Leagues in front and from three to five Leagues in Depth if situated upon a Navigable River, otherwise to be run square or in such shape and in such Quantities as shall be convenient and practicable, and in each Seigneurie a Glebe to be reserved & laid out in the most convenient Spot, to contain not less than 300, nor more than 500 Acres; The Property of which Seigneuries or Fiefs shall be and remain vested is Us, Our Heirs & Successors, And you shall allot such Parts of the same as shall be applied for by any of Our said Loyal Subjects, Non Commissioned Officers and Private

p. 859

Men of Our Forces reduced as aforesaid, in the following Proportions, that is to say,

To every Master of a Family One Hundred Acres and fifty Acres for each Person of which his Family shall consist;

To every single Man fifty Acres;

To every Non Commissioned Officer of Our Forces reduced in Quebec Two Hundred Acres;

To every private Man reduced as aforesaid One Hundred Acres,

And for every Person in their Families fifty Acres.

The said Lands to be held under Us, Our Heirs and Successors, Seigneurs of the Seigneurie or Fief in which the same shall be situated, upon the same Terms, Acknowledgements & Services as Lands are held in Our said Province under the respective Seigneurs holding and possessing Seigneuries or Fiefs therein, and reserving to Us, Our Heirs and Successors from and after the expiration of Ten

Years from the admission of the respective Tenants a Quit Rent of one half penny per Acre.

41. And whereas upon the raising and establishing the Corps late the 84th Regiment of Foot, We did promise and declare that the Officers and Privates of the said Corps should when reduced be intitled to and receive Grants for certain allotments of Lands in proportion to their respective Ranks therein, It is Our Will and Pleasure that you do in manner as herein before directed Grant Warrants of Allotment and Survey to such of the Officers and privates of the said late Eighty fourth Regiment of Foot now reduced, who shall be willing to settle and become Inhabitants of Our said Province of Quebec, and shall apply for the same for such Quantities of Land as they shall be respectively intitled to, In consequence of our said promise and declaration contained in Our Instructions to Our Governors of New York and North Carolina dated the 3^d April 1775 that is to say,

To Field Officers	5000 Acres
Captains	3000
Subalterns	2000
Non Commission Officer	200
Privates	50

and that the Surveys be made and Grants for the same delivered free of Expence as herein before directed, Provided nevertheless that every Commissioned and Non Commissioned Officer or private belonging to the said late 84th Regiment of Foot, who shall claim and apply for Land in Our Province of Quebec as aforesaid, shall declare upon Oath, that no Land has been obtained by him in any of our other Provinces in America under Our Royal declaration as aforesaid.

42. It is Our further Will and Pleasure, that every Person within the meaning of these Our Instructions upon making application for Land shall take the Oaths directed by Law before you or Our Commander in Chief for the time being, or some person by you before him authorized for that purpose

and shall also at the same time make and subscribe the following Declaration (Viz^t.) "I, A B, do promise and declare that I will maintain and defend to the utmost of my power the authority of the King in His Parliament, as the supreme Legislature of this Province," which Oaths and declaration shall also be taken, made, and subscribed by every Future Tenant before his, her, or their admission upon Alienation, Descent, Marriage or otherwise howsoever, and upon refusal the Lands to become revested in us Our Heirs and Successors. And it is Our further Will and Pleasure that the expense of laying out and surveying as well the Seigneuries or Fiefs aforesaid, as the several Allotments within the same and of the Deed of admission shall be paid by the Receiver General of Our Revenue in the said Province of Quebec; out of such Monies as shall be in his hands, upon a Certificate from you or Our Commander in Chief for the time being in Council, Oath being made by Our Surveyor General to the Account of such Expense ; Provided however that only one half of the usual and accustomed Fees of Office shall be allowed to Our said Surveyor General or any other of Our Officers in the said Province entitled thereunto upon any Survey or Allotment made, or upon admission into any Lands by Virtue of these Our Instructions.

43. And whereas we have some time since purchased the Seigneurie of Sorel from the then Proprietors, the Lands of which are particularly well adapted for improvement and cultivation; and the local situation of the said Seigneurie makes it expedient that the same should be settled by as considerable a number of Inhabitants of approved Loyalty as can be accommodated therein, with all possible dispatch—It is therefore Our will and Pleasure, that you do cause all such Lands within the same as are undisposed of, to be run into small Allotments, and that you do allot the same to such of the Non Commissioned Officers and private Men of Our Forces who may have been reduced in Our said Province, or to such other of Our Loyal Subjects as may be inclined to settle and improve the same, in such Proportions as you may judge most conducive to their Interest and the more speedy Settlement of Our said Seigneurie. The Lands so allotted to be held of Us, Our Heirs, and Successors, Seigneurs of Sorel upon the same Conditions and under the same reserved Rent at the Expiration of ten years, as the other Tenants of Seigneuries now hold their Lands and pay to Us, and also of taking the Oaths and making and subscribing the Declaration as hereinbefore is mentioned and directed; The Expense of making the said Allotments and of Admission thereunto be also paid and defrayed in like manner as those in the Seigneuries directed to be laid out by these Our Instructions. It is nevertheless Our Will and Pleasure that the Allotments to be made of such of Our Loyal Subjects

from the Provinces or Colonies now the United States of America, as may be disposed to settle and improve Lands in Our said Province of Quebec, shall be limited to those only who may have withdrawn themselves from the said Provinces or Colonies after the signing of the definitive Treaty of Peace with the said United States, & no other.

And it is Our Will and Pleasure that a Record be kept in the Office of the

p. 861

Receiver General of Our Revenue of every Admission into Lands as well by Virtue of these Our Instructions with respect to Our Loving Subjects retiring from the Provinces & Colonies, now the United States of America, and to Our Forces disbanded as aforesaid, as in Cases of future Admission by Alienation or otherwise, A Docquet of which shall be transmitted yearly to Us, thro' one of our principal Secretaries of State, & also a Duplicate thereof to Our High Treasurer or the Commissioners of Our Treasury for the time being.

44. It is Our Will and Pleasure however that no Grants or Allotments be made of any Lands, on which there is any considerable Growth of White pines fit for Malting Our Royal Navy, and which lie convenient for Water Carriage, but that you do cause all such Lands to be set apart for Our Use and proper Regulations to be made and Penalties inflicted to prevent Trespasses on such Tracts and the cutting down or destroying of the Trees growing thereon.

45. And Whereas it appears, from the Representations of Our late Governor of the District of Trois Rivières, that the Iron Works at S^t Maurice in that District are of great Consequence to Our Service, It is therefore Our Will and Pleasure that no part of the Lands upon which the said Iron Works were carried on, or from which the Ore used in such Works was procured, or which shall appear to be necessary & convenient for that Establishment either in respect to a free Passage to the River S^t Lawrence or for producing a necessary Supply of Wood, Corn and Hay, or for Pasture for Cattle, be granted to any private person whatever; And also that as large a District of Land as conveniently may be, adjacent to & lying round the said Iron Works, over & above what may be necessary for the above purposes, be reserved for Our Use to be disposed of in such manner as We shall hereafter direct and appoint.

46. And it is Our further Will and Pleasure that you do consider of a proper and effectual Method of collecting, receiving and accounting for Our Quit Rents, whereby all Frauds, Concealments, Irregularity or Neglect therein may be prevented, and whereby the Receipt may be effectually checked and controlled—And if it shall appear necessary to pass an Ordinance for the more effectually ascertaining, and

the more speedily and regularly collecting Our Quit Rents, you are to prepare the Heads of such a Bill as you shall think may most effectually conduce to the procuring of the good Ends proposed, and to transmit the same to Us by One of Our Principal Secretaries of State for Our further Directions therein; and you are also to transmit a Duplicate thereof to the Lords of the Committee of Our Privy Council for Trade and Plantations for their Information.

47. You are to use your best Endeavours in improving the Trade of the Province under your Government by settling such Orders & Regulations therein, with the Advice of Our said Council, as may be most acceptable to the Generality of the Inhabitants; And it is Our express Will and Pleasure that you do not on any pretence whatever, upon pain of Our highest Displeasure, give your Assent to any Law or Laws for setting up any Manu-

p. 862

factures and carrying on any Trades which are hurtful & prejudicial to this Kingdom, and that you do use your utmost Endeavours to discourage discountenance & restrain any Attempts which may be made to set up such Manufactures or establish any such Trades.

48. And it is Our Will and Pleasure that you do not dispose of any Forfeitures or Escheats to any Person until the Sheriff or other proper Officer has made Enquiry by a Jury upon their Oaths into the true Value thereof, nor until you have transmitted to Our Commissioners of Our Treasury a particular Account of such Forfeitures & Escheats and the Value thereof; And you are to take care that the produce of such forfeitures and Escheats, in case We shall think proper to give you Directions to dispose of the same, be duly paid to Our Treasurer or Receiver General of Our said Province, and a full Account transmitted to Our Commissioners of Our Treasury or Our High Treasurer for the time being, with the Names of the persons to whom disposed of.

49. And Whereas Commissions have been granted unto several Persons in Our respective Plantations in America for the trying of Pirates in those parts pursuant to the Acts for the more effectual Suppression of Piracy and by a Commission already sent to Our Governor there is impowered, together with others therein mentioned, to proceed accordingly in reference to Our Will and Pleasure is that you do use your best Endeavours to apprehend all Persons whatever, who may have been guilty of Piracy within your Government, or who having committed such Crimes at other Places may come within your Jurisdiction, and until We think proper to direct the like Commission to be established for Our Government of Quebec, you are to send such Pirates with what Proofs of their Guilt you can procure or collect to Our

Governor of _____ to be tried and punished under the Authority of the Commission established for those Parts.

50. And whereas you will receive from Our Commissioners for executing the Office of High Admiral of Great Britain & of Our Plantations a Commission constituting you Vice Admiral of Our said Province, you are hereby required and directed carefully to put in execution the several Powers thereby granted you.

46

Art. 51 } same { to To Guy Carleton, ante pp. 836-838.
to } as { 54

60. And whereas We have thought fit by Our Commission to direct that, in case of your Death or Absence from Our said Province, and in case there be at that time no Person within Our said Province commissioned or appointed by Us to be Our Lieutenant Governor or Commander in Chief, the eldest Councillor, being a natural born Subject of Great Britain, Ireland or the Plantations and professing the Protestant Religion, who shall be at

p. 863

the time of your Death or Absence residing within Our said Province under your Government, shall take upon him the Administration of Government and execute Our said Commission and Instructions and the several Powers and Authorities therein directed; It is nevertheless Our express Will and Pleasure that in such case the said President shall forbear to pass any Act or Acts, but what are immediately necessary for the Peace and Welfare of the said Province, without Our particular Order for that purpose.

61. And whereas We are desirous that a proper Provision should be made for the Support of Our Government within Our said Province of Quebec, We do therefore hereby declare it to be Our Royal Intention, that the following Annual Salaries & Allowances be discharged & paid out of any Revenues arising to Us within the same, or out of such Monies as shall be granted or appropriated to the Uses and Services of Our said Province of Quebec, that is to say,¹

To the Governor p ^r Annum	£2,000	0	0
Lieut Governor	1500	0	0
To the Chief Justice	1200	0	0
To 6 Judges of Common Pleas, £500 each	3000	0	0
To the Judge of the Admiralty	200	0	0
To the Attorney General	300	0	0
To the Clerk of the Crown and Pleas	100	0	0

To two Sheriffs at £100 each	200	0	0	
To the Secretary & Register	400	0	0	
To the Clerk of the Council	100	0	0	
To the Surveyor of Lands	300	0	0	
To the Surveyor of Woods	200	0	0	
To the Commissary for Indians	300	0	0	
To the Captain of the Port	100	0	0	
To the Naval Officer	100	0	0	
To the Receiver General of the Revenues	400	0	0	
To twenty-three Councillors at £100 each								}	500	0	0
To the Lieutenant Governors or Superintendents at Detroit											
To one Judge of the Inferior Courts of King's Bench and Common Pleas at each of the above Posts, at £100 each Judge											
To an Assistant or Assessor at each Post, at £50 p ^r Ann:											
To a Sheriff for each District at £20 p ^r Annum											
To a Grand Voyer	800	0	0	
To a French Secretary	200	0	0	
To 4 Ministers of the Protestant Church at £200 p ^r Ann: each							800	0	0	
To 2 Ministers of the Church of England settled at Sorel and Catarqui £100 each	200	0	0	
To 2 Schoolmasters at £100 each	200	0	0	
To an Allowance to the Person licenced to superintend the Romish Church	200	0	0	

[¹ On comparing this list with the one given in the Instructions of 1775, (see p. 715), it will be found that several changes have been made, but without much alteration in the salaries. In the case of the Lt. Governors or Superintendents of the western Posts, though the Posts mentioned in the Instructions of 1775 were nearly all within the territory ceded to the United States by the treaty of 1783, yet as they had not been given up, these positions were still to be filled. The names of the Posts, with the Exception of Detroit, are left blank.]

p. 864

To Pensions to the Officers of a Corps of Canadians employed in the last War, and discharged without any Allowance, as follows, Viz^t:

To Mons ^r Rigauville, the Commandant of said Corps	200	0	0
To five Captains £100 each	500	0	0
To ten Lieutenants £50 each	500	0	0
To the Commandant of the Saveges	100	0	0
To Annual Contingent Expences	1000	0	0

£

62. And whereas We have made sufficient Provision for the Support of Our Lieutenant Governor of Our said Province of Quebec for the time being by the Allowance inserted in the foregoing Estimate, It is Our Will and Pleasure, when it shall happen that you shall be absent from Our said Province, that no Part of the Salary or any Perquisites and Emoluments, which are due unto you, shall during the Time of your Absence be claimed by, or paid and satisfied to such Lieutenant

Governor: And it is Our further Will and Pleasure that if Our Lieutenant Governor of the said Province of Quebec should happen to die during such your Absence, and the Administration of the Government thereby devolve on the President or Eldest Member of Our Council, such President or Councillor shall, during his continuing in the Chief Command, receive the Salary or Allowance hereby provided for Our Lieutenant Governor, and no other allowance, Perquisite, or Emolument whatever.

G. R.

ENDORSED: 1786 Quebec
Draught of General Instructions.
[L.S.]

No. 194.

**COMMISSION, PASSED UNDER THE GREAT SEAL OF
GREAT BRITAIN, APPOINTING LORD DORCHESTER**

TO BE CAPTAIN GENERAL AND GOVERNOR IN CHIEF OF THE PROVINCES
OF UPPER AND LOWER CANADA.¹

Guy Lord Dorchester } George the Third by the Grace of God
Commission. } of Great Britain France and Ireland
King Defender of the Faith and so
forth To Our Right Trusty and

Welbeloved Guy Lord Dorchester Knight of the most honorable Order of the Bath Greeting Whereas wee did by our Letters Patent under our Great Seal of Great Britain bearing date the twenty second Day of April in the Twenty sixth year of our Reign Constitute and appoint you Guy Lord Dorchester (then Sir Guy Carleton) to be our Captain General and Governor in Chief in and over our Province of Quebec in America comprehending all our Territories Islands and Counties in North America then bounded as in our said recited Letters Patent was mentioned and expressed Now Know ye that wee have revoked and determined and by these Presents do revoke and Determine the said recited Letters Patent and every Clause Article or thing therein contained And Whereas wee have thought fit by our Order made in our Privy Council on the Nineteenth day of August One thousand seven hundred and ninety one to divide our said Province of Quebec into two separate Provinces to be called the Province of Upper Canada and the Province of Lower Canada by a Line to commence at a Stone Boundary on the North Bank of the Lake Saint Francis at the Cove West of Point Au Baudet in the Limit between the Township of Lancaster and the Seigneurie of New Longueuil running along the said Limit in the Direction of North thirty four Degrees West to the Westernmost Angle of the said Seigneurie of New Longueuil thence along the North Western Boundary of the Seigneurie of Vaudreuil running North twenty five Degrees East until it strikes the Ottowas River to ascend the said River into the Lake Tommiscanning and from the head of the said Lake by a line drawn due North until it strikes the Boundary Line of Hudsons Bay the Province of Upper Canada to Comprehend all such Lands Territories and Islands lying to the Westward of the said Line of Division as were part of our said Province of Quebec and *the Province of Lower Canada to comprehend all such Lands*

¹ From the Patent Roll 31, Geo. III, Part 10, No. 4. Copy in the Canadian Archives, M. 229, p. 54.

Territories and Lands (Islands?)¹ lying to the Eastward of the said Line of Division as were part of our said province of Quebec² And Whereas by an Act passed in the present year of our Reign Intituled [An Act to repeal certain Parts of an Act passed in the fourteenth year of his Majesty's Reign Intituled [An Act for making more effectual Provision for the Government of Quebec in North America and to make further Provision for the Government of the said Province] further Provision is thereby made for the Good Government and Prosperity of our said Provinces of Upper Canada and Lower Canada ffurther Know ye that wee reposing especial Trust and Confidence in the Prudence Courage and Loyalty of you the said Guy Lord Dorchester of our especial Grace certain Knowledge and mere Motion have thought fit to constitute and Appoint you the said Guy Lord Dorchester to be our Captain General and Governor in Chief of our said Province of Upper Canada and of our said Province of Lower Canada respectively bounded as hereinbefore described And wee do hereby require and command you to do and execute all things in due manner that shall belong to your said Command and the Trust wee have reposed in you according to the several Powers Provisions and Directions granted or appointed you by Virtue of this Present Commission and by Virtue of the above recited Act passed in the Present year of Our Reign and of such Instructions and Authorities herewith given unto you or which may from time to time be given you in respect to the said Provinces or either of them under our Signet or Sign Manual or by Our Order in Our Privy Council and according to such Laws as shall hereafter be made and established within our said Provinces of Upper Canada and Lower Canada under and by Virtue of such Powers Provisions and Discretions (Directions) as aforesaid And our Will and Pleasure is that you the said Guy Lord Dorchester as soon as may be after the Publication of these our Letters Patent do take the Oaths appointed to be taken by an Act passed in the first year of the Reign of King George the first intituled [An Act for the further security of his Majesty's Person and Government and the Succession of the Crown in the Heirs of the late Princess Sophia being Protestants and for extinguishing the Hope's of the Pretended Prince of Wales and his open and secret Abettors] as altered and explained by an Act Passed in the Sixth year of our Reign Intituled An Act for altering the Oath of Abjuration and the Assurance and for amending so much of an Act of the seventh year of her late Majesty Queen Anne Intituled [An Act for the Improvement of the Union of the two Kingdoms as after the times therein limited requires the Delivery of certain Lists and Copies therein mentioned to Persons indicted of Treason or Misprision of Treason] as also that you make and subscribe the Declaration mentioned in An Act of Parliament made in the twenty fifth year of the Reign of King Charles the Second Intituled [An Act for Preventing Dangers which may happen from Popish Rescuants (Recusants ?)] And likewise that you take the usual Oath for the due

¹ Throughout the Commission the words inserted in brackets are added in the margin of the copy in the Canadian Archives.

p. 867

General and Governor in Chief of our said Province of Upper, Canada and our said Province of Lower Canada and for the due and impartial Administration of Justice and further that you take the Oath required to be taken by Governors of Plantations to do their utmost that the several Laws relating to Trade and the Plantations be observed all which said Oaths and Declarations the Executive Councils of our said Provinces of Upper Canada and Lower Canada respectively or any three or more of them (the?) Members of either of them have hereby full Power and Authority and are required to tender and Administer unto you and in your absence to our Lieutenant Governor if there be any upon the place All which being duly Performed you the said Guy Lord Dorchester or in your absence our Lieutenant Governors of the said Provinces or Persons Administering the respective Governments therein shall administer unto each of the Members of such Executive Councils as aforesaid the Oaths mentioned in the said first recited Act of Parliament altered as aforesaid as also cause them to make and subscribe the aforementioned Declaration and Administer to them the Oath for the due Execution of their Places and Trusts and you shall also administer the above mentioned Oaths and Declarations to our Lieutenant Governors if there be any within the said Provinces wherein you shall reside And Whereas wee may find it convenient for our Service that certain Offices or Places within our said Provinces of Upper Canada and Lower Canada should be filled by Our Subjects who may have become such by being Naturalized by an Act of the British Parliament or by the Conquest and Cession of the Province of Canada and who may profess the Religion of the Church of Rome It is therefore our Will and Pleasure that in all Cases where such Persons shall or may be admitted into any such Office or Place the Oath Prescribed in and by An Act of Parliament passed in the fourteenth year of our Reign Intituled [An Act for making more effectual Provision for the Government of the Province of Quebec in North Americas and also the usual Oath for the due Execution of their Places and Trusts respectively shall be duly Administered to them and wee do further Give and Grant unto you the said Guy Lord Dorchester full Power and Authority from time to time hereafter by yourselves (or) by any other to be Authorized by you in that behalf to Administer and give the Oaths mentioned in the aforesaid Acts to all and every such Person and Persons as shall at any time or times pass into our said Provinces of Upper Canada and Lower Canada or shall be resident or binding (abiding?) there And we do hereby Authorize and empower you to Keep and Use the

Public Seals (Seals?) of our Said Provinces of Upper Canada and Lower Canada for Sealing all things whatsoever that shall pass the Seal of our said Provinces respectively and in Case of your Absence from either of our said Provinces to deliver the same into the Charge and Custody of our Lieutenant Governor or Person Administering the Government there for the Purposes before mentioned until we shall think fit to Authorize you by an Instrument under our Royal Sign Manual to commit the Custody thereof to such Person or Person (Persons?) as may be appointed by us for that purpose And Whereas by the said recited Act passed in the present year of Our Reign it is enacted that there shall be within

p. 868

each of our said Provinces of Upper Canada and Lower Canada respectively a Legislative Council and an Assembly to be composed and Constituted in the manner in the said Act described and that in the said Provinces wee our Heirs and Successors shall have Power during the Continuance of the said Act by and with the advice and Consent of the Legislative Councils and Assemblies to make Laws for the Peace Welfare and good Government of the said Provinces respectively such Laws not being repugnant to the said Act and that all such Laws being passed by the said Legislative Councils and Assemblies and being assented to by us our Heirs and Successors or assented to in our name by such person as wee our Heirs and Successors shall from time to time appoint to be Governor or Lieutenant Governor of the said Provinces respectively or by such Person as wee our Heirs or Successors shall from time to time appoint to Administer the Government within the same are by the said Act declared to be by virtue of and under the Authority of the said Act valid and binding to all Intents and Purposes whatsoever within the said Provinces wee do hereby Give and Grant unto you the said Guy Lord Dorchester full Power and Authority to issue Writs of Sumons and Election and to call together to (the?) Legislative Councils and Assemblies of our said Provinces of Upper Canada and Lower Canada in such manner as is in the said Act Authorised and directed Subject to the Provisions and regulations therein contained in that behalf and to such Instructions and Authorities as shall herewith at any time hereafter be given unto you by us in that behalf under our Signet and Sign Manual or by our order in our Privy Council And further for the Purpose of Electing the Members of the Assemblies of our said Provinces of Upper Canada and Lower Canada Wee do hereby Give and Grant unto you the said Guy Lord Dorchester full Power and Authority to Issue a Proclamation dividing our said Provinces of Upper Canada and Lower Canada into Districts or Counties or Circles and Towns or Townships and appointing the Limits thereof and Declaring and appointing the Number by Representatives to be chosen by each of such Districts or Counties or Circles and Towns (Towns?) or

Townships respectively within our said Provinces of Upper Canada and Lower Canada and from time to time to nominate and appoint proper Persons to execute the Office of returning Officer in each of the said Districts or Counties or Circles and Towns or Townships respectively Subjects to the Provisions Directions and Regulations of the said last mentioned Act in that behalf and to such Instructions and Authorities as shall be herewith or at any time hereafter given by us unto you in that behalf under our Signet and Sign Manual or by Our Order in Our Privy Council and Wee do hereby give and Grant unto you the said Guy Lord Dorchester full Power and Authority to fix the time and Place of holding the Elections for the said Districts or Counties or Circles and Towns or Townships within our said Provinces of Upper Canada and Lower Canada and the times and Places of holding the first and every other Session of the Legislative Councils and Assemblies of our said Provinces of Upper Canada and Lower Canada and to Prorogue the same from time to time and to dissolve the same by Proclamations or otherwise Subject nevertheless to the Regulations Provisions and Directions

p. 869

of the said last mentioned Act and to such Instructions and Authorities as in respect of the Premises may be hereby or at any time hereafter given by us unto you under our Signet and Sign Manual or by our Order (in our?) Privy Council Wee do by these Presents Authorize and empower you from time to time with the advice of the Executive Councils appointed by us for the affairs of our said Provinces of Upper Canada and Lower Canada respectively from time to time to form Constitute and Erect Townships or Parishes within our said Provinces and also to Constitute and Erect within every Township or Parish which now is (or?) hereafter may be formed constituted or erected within our said Provinces one or more Parsonage or Rectory or Parsonages or Rectories according to the Establishment of the Church of England and from time to time by an Instrument under the Seal of our said Provinces respectively to endow every such Parsonage or Rectory with so much or such part of the Lands so allotted and appropriated as by the said last recited Act is in that behalf mentioned in respect of any Lands within such Township or Parish which shall have been granted subsequent to the Commencement of the same Act or of such Lands as may have been allotted and appropriated for the same Purpose by or in Virtue of any Instruction which may be given by us in respect of any Lands granted by us before the Commencement of the last mentioned Act as you with the advice of our said Executive Council of such Province shall judge to be expedient under the then existing Circumstances of such Township or Parish Subject nevertheless to such Instructions touching the Premises as shall or may be given you by us under our Signet and Sign Manual or by Our Order in Our Privy Council and

Wee do also by these Presents authorize and impower you to present Subject to the Provisions in the above mentioned Act in that behalf to every such Parsonage or Rectory and to every Church Chapel or other Ecclesiastical Benefice according to the Establishment of the Church of England within either of our said Provinces an Incumbent or Minister of the Church of England who shall have been duly ordained according to the Rites of the said Church and to Supply from time to time such Vacancies as may happen of Incumbents or Ministers of the said Parsonages Rectories Churches Chapels or Benefices or any of them respectively and wee do hereby Give and Grant unto you the said Guy Lord Dorchester by yourself or by your Captains and Commanders by you to be Authorized full power and Authority to levy Arm Muster Command and employ all persons whatsoever residing within our said Provinces of Upper Canada and Lower Canada and as occasion shall serve to March from one Place to another or to Embark them for the resisting and withstanding of all Enemies Pirates and Rebels both at Land and at Sea and to transport such fforces to any of our Plantations in America if necessity shall require for the Defence of the same against the Invasion or Attempts of any of our Enemies and such Enemies Pirates and Rebels (if there shall be occasion) to pursue and Prosecute in or out of the limits of our said Provinces and Plantations or any of them and if it shall so please God to vanquish apprehend and take them and being taken according to Law to put to death or Keep and Preserve them alive at your Discretion and to execute Martial

Law in time of Invasion or at other times when by Law it may be executed and to do and execute all and every other things (thing?) or things which to our Captain General and Governor in Chief doth or ought of Right to belong and wee do hereby give and grant unto you full Power and Authority Subject Nevertheless to such Instructions as wee may at any time be pleased to give unto you under our Signet and Sign Manual or by our Order in our Privy Council with the advise of the Executive Council appointed by us for our Provinces of Upper Canada and Lower Canada respectively to erect raise and Build in our said Provinces such and so many fforts and Platforms Castles and ffortifications as you by the advice aforesaid shall judge necessary and the same or any of them to fortify and furnish with Ordinance Ammunition and all Sorts of Arms fit and necessary for the security and defence of our said Provinces and by the advice aforesaid the same again or any of them or (to?) demolish or Dismantle as may be most convenient and for as much as Divers Mutinies and Disorders may happen by Persons shipped and employed at Sea during the time of War and to the end that such as shall be shipped and employed at Sea during the time of War may be better Governed and ordered wee do hereby give and grant unto you the said Guy Lord Dorchester full Power and Authority to constitute and appoint Captains Lieutenants Masters of Ships and other Commanders and Officers and to grant unto such Captains Lieutenants Masters of Ships and other Commanders and Officers Commissions to execute the Law Martial during the time of War according to the Directions of an Act passed in the twenty second year of the Reign of Our late Royal Grandfather Intituled [An Act for amending explaining and reducing into one Act of Parliament the Laws relating to the Government of his Majesty's Ships Vessels and fforces by Sea] as the same is altered by an Act passed in the nineteenth year of our Reign Intituled [An Act to explain and amend an Act made in the twenty second year of the Reign of his late Majesty King George the Second Intituled An Act for amending explaining and reducing into one Act of Parliament the Laws relating to the Government of his Majesty's Ships Vessels and fforces by Sea] and to use such Proceedings Authorities Punishments and Executions upon any Offender or Offenders who shall be Mutinous Seditious disorderly or any way unruly either at Sea or during the time of their abode or residence ir any of the Ports Harbours or Bays of our said Provinces of Upper Canada and Lower Canada as the Case shall be found to require according to the Martial Law and the said Directions during the time of War as aforesaid provided that nothing herein contained shall be construed to the enabling you or any by your Authority to hold plea or have any Jurisdiction of any Offence Cause Matter or thing committed or done upon the High Sea or within any of the Havens Rivers or Creeks of either of our said Provinces under your

Government by Any Captain Commander Lieutenant Master Officer Seaman Soldier or Person whatsoever who shall be in our actual Service and pay in or on board any of our Ships of War or other Vessels acting by immediate Commission or Warrant from our Commissions for executing the Office of High Admiral or from our High Admiral of Great Britain for the time being under the Seal of our Admiralty but that

p. 871

such Captain Commander Lieutenant Master Officer Seaman Soldier or other Person so offending shall be left to be proceeded against and tried as their Officers shall require either by Commission under our Great Seal of Great Britain as the Statute of the twenty eight of Henry the eighth directs or by Commission from ours (our) said Commissioners for executing the Office of our High Admiral or from our High Admiral of Great Britain for the time being according to the aforementioned Act intituled [An Act for explaining amending and reducing into one Act of Parliament the Laws relating to the Government of His Majesty's Ships Vessels and forces by Sea] as the same is altered by an Act passed in the nineteenth year of our Reign intituled [An Act to explain and amend an Act made in the twenty second year of His late Majesty King George the second intituled An Act for amending explaining and reducing into one Act of Parliament the Laws relating to the Government of His Majesty's Ships Vessels and forces by Sea] Provided nevertheless that all Disorders and Misdemeanors committed on shore by any Captain Commander Lieutenant Master Officer Seaman Soldier or other Person whatsoever belonging to any of our Ships of War or other Vessels acting by immediate Commission or Warrant from our said Commissioners for executing the Office of our High Admiral or from our High Admiral of Great Britain for the time being under the Seal of our Admiralty may be tried and Punished according to the Laws of the Place where any such disorders Offenders (Offences?) and Misdemeanors shall be committed on shore notwithstanding such Offenders be in our actual Service and born in our pay on Board any such our Ships of War or other Vessels acting by immediate Commission or Warrant from our said Commissioners for executing the Office of High Admiral or our High Admiral of our Great Britain for the time being as aforesaid so as he shall not receive any protection for the avoiding of Justice for such Offences committed on Shore from any pretence of his being employed in our Service at Sea you are to give Warrants under your Hand for the issuing of Public Monies for all Public Services and Wee do particularly require you to take care that regular accounts of all Receipts and Payments be duly Kept and that there be transmitted every half year or oftener Copies thereof properly Audited to our Commissioners of our Treasury or to our High Treasurer for the time being to the end that wee may be satisfied of the Right and due application of the Revenue of our said Provinces with the Probability of the

Increase or Dimunation (Diminution?) of it under every Head and Article thereof and wee do further give to you the said Guy Lord Dorchester full Power and Authority when and so often as any Bill which has been passed by the Legislative Counsel and by the House of Assembly of either of our said Provinces of Upper Canada or Lower Canada shall be presented unto you for our Royal Assent to declare according to your Discretion but Subject Nevertheless to the provisions contained on (in?) the said recited Act passed in the present year of Our Reign and Subject also to such Instructions Directions and Authorities as wee shall herewith or at any time hereafter give unto you in that behalf under Our Signet and Sign Manual or by an Order in our Privy Council that you Assent to such Bill in our Name or that you withhold our Assent from such

p. 872

Bill or that you reserve such Bill for the Signification of our Royal Pleasure thereon and wee do by these presents give and Grant unto you the said Guy Lord Dorchester full power and Authority with the advice of the Executive Councils appointed by us for the affairs of our said Provinces of Upper Canada and Lower Canada but Subject nevertheless to the provisions of the said Act and to such further powers Authorities and Instructions as we may herewith or at any time hereafter give to you in that behalf under our Signet and Sign Manual or by our Order in our Privy Council to erect Constitute and appoint such Court or Courts of Judicature or Public Justice within our said Provinces as you and they shall think fit and necessary for the hearing and determining of all Causes as well Criminal as Civil according to Law and Equity and for awarding Execution thereupon with all reasonable and necessary powers Authorities flees and privileges belonging thereunto as also to appoint and Commission fit persons in the several parts of your said Government to administer the several Oaths herein before mentioned as also to tender and administer the aforesaid Declaration unto such persons belonging to the said Courts as shall be obliged to take the same and wee do hereby authorise and empower you to constitute and appoint Judges and in Cases requisite Commissioners of Oyer and Terminer Justices of the Peace and other necessary Officers and Ministers in our said Provinces of Upper Canada and Lower Canada for the better administration of Justice and putting the Laws in execution and to administer or cause to be administered unto them such Oath or Oaths as are usually taken for due execution and performance of Offices and places and for the clearing of truth in Judicial Causes and wee do hereby give and grant unto you full power and authority where you shall see cause or shall judge any Offender or Offenders in Criminal Matters or for any ffines or fforfeitures due unto us fit Objects of our Mercy to pardon all such Offenders and to remit all such Offences ffines or fforfeitures Treason and Wilful Murder only excepted in which cases you shall likewise have power upon

extraordinary Occasions to grant reprieves to the offenders until and to the Intent that our Royal Pleasure may be Known therein and wee do likewise give and Grant unto you full Power and Authority with the advice of our Executive Councils for the Affairs of our said Provinces of Upper Canada and Lower Canada to grant Lands within the said Provinces respectively which said Grants are to pass and be sealed with our Seal of such Province and being entered upon Record by such Officer or Officers as shall be appointed thereunto shall be good and effectual in Law against us Our Heirs and Successors Provided nevertheless that no Grants or Leases of any of the Trading Ports in our said Provinces shall under Colour of this Authority be made to any Person or Persons whatsoever until our Pleasure therein shall be signified to you and wee do hereby give you the said Guy Lord Dorchester full Power to order and appoint (fairs Marts and Markets as also such and so many Ports Harbours Bays Havens and other Places for the Convenience and Security of Shipping and for the better Loading and unloading of Goods and Merchandizes within our said Provinces of Upper Canada and Lower Canada as by you with the Advice of Our Executive Council for Our said Provinces respectively shall be

p. 873

thought fit and necessary for the same And Wee do hereby require and command all our Officers and Ministers Civil and Military and all other Inhabitants of our said Provinces of Upper Canada and Lower Canada to be obedient aiding and assisting unto you the said Guy Lord Dorchester in the Execution of this Our Commission and of the powers and Authorities herein contained and in Case of your Death or Absence out of Our said Province of Upper Canada or Our province of Lower Canada¹ to be obedient aiding and assisting unto such Persons (as) shall be appointed by us to be our Lieutenant Governor or Commander in Chief of such Province respectively To Whom Wee do therefore by these presents in Case of your Death or Absence from such Province give and grant all and singular the powers and Authorities herein granted to be by him executed and enjoyed during our Pleasure or until your Arrival within such Province respectively And if upon your Death or Absence out of our said Provinces of Upper Canada or Lower Canada or either of them there be no Person upon the Place Commissioned and appointed by Us to be Our Lieutenant Governor or appointed by Us to Administer Our Government within the said Province² in case of the Death or Absence of you and our Lieutenant Governor of the said Province Our Will and Pleasure is that the oldest Member of our Executive Council for Our said Province of Upper Canada or Our said Province of Lower Canada being a natural born Subject of Great Britain Ireland or Our Colonies and Plantations and Professing the Protestant Religion who shall then be residing with Our said Provinces³ Shall take upon him the Administration of the Government and execute our said

Commission and Instructions and the several Powers and Authorities therein contained and to all Intents and Purposes as other Our Governors Lieutenant Governors or persons administering Our Governments until Our further pleasure be known therein Nevertheless as it may happen in Case of the Death Absence Removal or Suspension of our Lieutenant Governor of either of the Provinces above mentioned that the Succession of such oldest member as aforesaid to the Administration of the Government may not be for the good of Our Service and the Welfare of such Province Wee do hereby authorize and empower you in Case of such Death Absence or Removal if it shall appear to you that it would not be expedient for such oldest Councillor in Succession to administer the Government to nominate and appoint by a Commission under the Seal of such Province you being yourself at the Time of such Appointment Personally resident in it any Member of the Executive Council by Us appointed for Our said Province of Upper Canada or Our Province of Lower Canada respectively whom you shall judge the most proper and fitting to be Our Lieutenant Governor thereof such Person

[¹ In Sherbrooke's and subsequent Commissions the following clause is here inserted: "or in case from any special Circumstances we shall judge it expedient by Warrant under the Sign Manual or otherwise to provide for the Civil Administration of the government notwithstanding your actual presence in either of our said provinces."

² Drummond's Commission (1814) directs that the government devolve on the senior officer commanding the forces for the time being.

³ Provost's and Sherbrooke's Commissions add here "(the Chief Justice and Bishop for the time being excepted)."]

p. 874

being a Natural born Subject of Great Britain Ireland or of Our Colonies and Plantations and professing the protestant Religion until Our pleasure thereupon shall be Known and you are to transmit to us by the first Opportunity through one of our Principal Secretaries of State your Reasons for such Appointment And Wee do hereby Give and Grant unto you the said Guy Lord Dorchester full Power and Authority in Case any Person or Persons Commissioned or appointed by Us to any Office or Offices within Our said Provinces of Upper Canada or Lower Canada from which they may be liable to be removed by Us shall in your Opinion be unfit to continue in Our Service to suspend or remove such person or persons from their several Employments without stating to him or them your Reasons for such Suspension or Removal And Wee do hereby declare ordain and appoint that you the said Guy Lord Dorchester shall and may hold execute and enjoy the Office and place of our Captain General and Governor in Chief in and over Our said Provinces of Upper Canada and Lower Canada with all its Rights Members and Appurts whatsoever together with all and singular the Powers and Authorities hereby granted unto you for and during Our Will and Pleasure.

In Witness &c. Witness &c. this Twelfth Day of September

One thousand seven hundred and ninety one.

BY THE KING HIMSELF.

No. 195.

The following ten Commissions contain boundary descriptions similar to that contained in the next preceding Commission of the 12th September, 1791.

15th December, 1796.

Robert Prescott, Esquire.—Captain-General and Governor-in-Chief of the Provinces of Upper and Lower Canada.¹

29th August, 1807.

Sir James Henry Craig.—Captain-General and Governor-in-Chief of the Provinces of Upper and Lower Canada.²

21st October, 1811.

Sir George Prevost.—Captain-General and Governor-in-Chief of the Provinces of Upper and Lower Canada.³

28th December, 1814.

Gordon Drummond, Esquire.—Administrator of the Government of the Provinces of Upper and Lower Canada.⁴

25th March, 1816.

Sir John Coape Sherbrooke.—Captain-General and Governor-in-Chief of the Provinces of Upper and Lower Canada.⁵

8th May, 1818.

Charles, Duke of Richmond.—Captain-General and Governor-in-Chief of the Provinces of Upper and Lower Canada.⁶

THE ROYAL SIGN MANUAL AND SIGNET, FOR
LORD DORCHESTER**AS CAPTAIN GENERAL AND GOVERNOR IN CHIEF OF THE PROVINCE OF
LOWER CANADA.¹

[L.S.]

George R.

C.O. INSTRUCTIONS, QUEBEC, 1786-1791.

Instructions to Our Right Trusty and Welbeloved Guy, Lord
Dorchester, Knight of the Most Honourable Order of the
Bath, Our Captain General and Governor in Chief in and
over Our Province of Lower Canada; Given at Our Court at
St. James's, the Sixteenth day of September, 1791, In the
Thirty First Year of Our Reign.

* * * *

31. And Whereas nothing can more effectually tend to the
speedy settling of Our said Province of Lower Canada, the
Security of the Property of our Subjects and the Advancement
of our Revenue, than the disposal of such Lands as are Our
Property upon reasonable terms, and the establishing of a
regular and proper method of Proceeding, with respect to the
passing of Grants of such Lands. It is therefore Our Will and
Pleasure, that all and every Person and Persons who shall
apply for any Grant or Grants of Land, shall previous to their
obtaining the same, make it appear that they are in a condition
to cultivate and improve the same, and in case you shall, upon
a consideration of the Circumstances of the Person or Persons
applying for such Grants, think it adviseable to pass the same,
you are in such Case to cause a Warrant to be drawn up
directed to the Surveyor General or other Officers, empowering
him or them to make a faithful and exact Survey of the Lands
so petitioned for, and to return the said Warrant within Six
Months at farthest from the date thereof, with a Plot or
Description of the Lands so surveyed thereunto annexed, and
when the Warrant shall be so returned by the said Surveyor, or
other proper Officer, the Grant shall be make out in due form,
and the Terms and Conditions required by these Our
Instructions be particularly and expressly mentioned therein—
And it is Our Will and Pleasure that the said Grants shall be
registered within Six Months from the date thereof in the
Register's Office, and a Docket thereof be also entered in Our
Auditor's

¹ From a contemporary copy in the Canadian Archives, G. 181, p. 1.

Office, Copies of all which Entries shall be returned regularly by the proper Office to Our Commissioners of Our Treasury.

32. And for the further Encouragement of Our Subject, It is Our Will and Pleasure that the Lands to be granted by you as aforesaid, shall be laid out in Townships, and that each inland Township shall, as nearly as Circumstances shall admit, consist of Ten Miles Square; and such as shall be situated upon a navigable River or Water shall have a front of Nine Miles, and be twelve Miles in Depth, and shall be subdivided in such manner as may be found most adviseable for the accommodation of the Settlers, and for making the several Reservations for Public Uses and particularly for the Support of the Protestant Clergy agreeably to the above recited Act passed in the present Year of Our Reign.

33. And Whereas great Inconveniences have heretofore arisen in many of the Colonies in America from the granting excessive Quantities of Land to particular Persons who have never cultivated or settled the same, and have thereby prevented others more industrious from improving such Lands—In order therefore to prevent the like inconveniences in future, it is Our Will and Pleasure that you observe the following Directions and Regulations in all Grants to be made by you as aforesaid; vizt

That no Town Lot shall be granted to any one Person being Master or Mistress of a Family in any Township to be laid out as aforesaid which shall contain more than one Acre of Land.

That no Park Lot shall be granted to any one Person being Master or Mistress of a Family in any Township so to be laid out, which shall contain more than Twenty four Acres.

That no Farm Lot shall be granted to any one Person being Master or Mistress of a Family in any Township so to be laid out, which shall contain more than 200 Acres.

It is Our Will and Pleasure, and you are hereby allowed and permitted to grant unto every such Person or Persons such further Quantity of Land as they may desire, not exceeding one Thousand Acres over and above what may have heretofore been granted to them, and in all Grants of Land to be made by you as aforesaid, you are to take care that due regard be had to the quality and comparative Value of the different parts of Land comprized within any Township, so that each Grantee may have as nearly as may be a proportionable quantity of lands of such different Quality and comparative value, as likewise that the breadth of each Tract of Land to be hereafter granted be one third of the length of such Tract, and that the length of such Tract do not extend along the Banks of any River, but into the main Land, that thereby the said Grantees may have each a convenient Share of what accomodation the said River may afford for navigation or otherwise.

* * * *

56. It is Our Royal Intention that the Peltry Trade of the Interior Country shall be free and open to all Our Subjects, Inhabitants of any of Our

Colonies, who shall, pursuant to what was directed by Our Royal Proclamation of 1763 obtain trading Licenses from the Governors of any of Our said Colonies under Penalties to observe such Regulations as shall be made by Our Legislature of Our Province of Lower Canada for that Purpose—These Regulations therefore, when established, must be made Public throughout all Our American Possessions, and they must have for their Object the giving every possible facility to that Trade which the nature of it will admit, and which may be consistent with fair and just dealing towards the native Indians with whom it is carried on; The fixing stated times and places for carrying on the Trade and adjusting Modes of settling Tariffs of the Prices of Goods and Furrs, and above all the restraining the Sale of Spirituous Liquors to the Indians, will be the most probable and effectual Means of answering the ends proposed.

57. The Fisheries on the Coast of Labrador and the Islands adjacent thereto, are Objects of the greatest Importance, not only on account of the Commodities they produce, but also as Nurseries of Seamen upon whom the Strength and Security of Our Kingdom depend.

58. Justice and Equity demand that the real and actual property and possession of the Canadian Subjects which existed at the time of the Cession of the said Province on that Coast should be preserved entire, and that they should not be molested or hindered in the Exercise of any Sedentary Fisheries they may have established there.

59. Their Claims however extend to but a small district of the Coast, on the greatest part of which District, a Cod Fishery is stated to be impracticable.

60. On all such parts of the Coast where there are no Canadian possessions, and more especially where a valuable Cod Fishery may be carried on, it will be your Duty to make the Interest of Our British Subjects going out to fish there in Ships fitted out from Great Britain, the first Object of your Care, and as far as circumstances will admit to establish on that coast the Regulations in favour of British fishing Ships which have been so wisely adopted by the Act of Parliament passed in the Reign of King William the Third, for the Encouragement of the Newfoundland Fishery, and by the several Acts passed in the 15, 26, 28 and 29th years of Our Reign for that purpose; And you are to be Account to allow any Possession to be taken, or Sedentary Fisheries to be established upon any parts of the Coast that are not already private Property by any Persons whatever, except only such as shall produce annually a certificate of their having fitted out from some Port in Great Britain.

61. Whereas it will be for the general Benefit of our Subject carrying on the Fishery in the Bay of Chaleurs in Our Province of Lower Canada, that such Part of the Beach and Shore of the said Bay as is ungranted, should be reserved to Us, Our Heirs, and Successors, it is therefore Our Will and Pleasure that you do not in future direct any Survey to be made or Grant to be passed for any part of the ungranted Beach or Shore of the said Bay

p. 880

of Chaleurs, except such parts thereof as by Our Orders in Council dated the 29th of June and 21st of July 1786 are directed to be granted to John Shoolbred of London, Merchant, and to Mess^{rs} Robin, Pipon and Company of the Island of Jersey Merchants, but that the same be reserved to Us, Our Heirs and Successors, together with a Sufficient Quantity of Wood Land adjoining thereto, necessary for the purpose of carrying on the Fishery; The Limits of such Wood Land so to be reserved to be determined upon and ascertained by you and Our Executive Council for Our said Province of Lower Canada, in such manner as from the most authentic Information shall appear to you and them most convenient and proper for that purpose—It is nevertheless Our Intention, and We do hereby signify to you Our Will and Pleasure, that the free use of such Beach or Shore, and of the Wood Land so to be reserved, shall be allowed by you or any Person authorized by you, to such of Our Subjects as shall resort thither for the purpose of carrying on the Fishery in such proportions as the number of Chaloups he or they shall respectively employ may require; Provided that, if any Fisherman who shall have permission to occupy any part of the said Beach or Shore, and Wood Land for the purpose of the said Fishery, shall not during any one Season continue so to occupy and employ any part of the said Beach or Shore, and Wood Land so allotted to him, you or any Person authorized by you as above may and shall allow the use of such part to any other Fisherman who shall apply for the same for the purpose of carrying on the Fishery. And Whereas it may be necessary to establish local Regulations to prevent Abuses as well as disputes and misunderstanding between the Fishermen resorting to the said Beach or Shore, it is Our Will and Pleasure that you, by and with the Advice and Consent of Our said Executive Council, do frame such Regulations from time to time as to you shall appear necessary to answer those salutary purposes, and that you transmit the same to Us through one of Our principal Secretaries of State for Our Pleasure therein, and Copies thereof to Our Committee of Our Privy Council for Trade and Foreign Plantations by the first Opportunity.

62. And Whereas it is expedient for our Service that We should from time to time be informed of the State of the Trade and Fisheries, as well as of the Population of Our said

Province of Lower Canada; It is our Will and Pleasure, that you do transmit to Us through one of Our Principal Secretaries of State, and to Our Committee of Our Privy Council for Trade and Foreign Plantations for their Information, yearly and every year, a full and particular Account of the State of the Fur and Peltry Trade, The Nature and Extent of the several Fisheries carried on by Our Subjects or others, either on the Coasts Lakes or Rivers of the said Province, the State of Cultivation, particularly specifying the Quantity of Grain, Hemp, and Flax produced, and of any other important Branch of Trade which may in your opinion be undertaken and advantageously carried on by Our Subjects; the number of Inhabitants, distinguishing them under different heads, of Men, Women, and Children, inserting in such Account the number of Persons born, christened, and buried, and any extraordinary Influx or Emigration from Our said

p. 881

Province, specifying at the same time the number of Slaves, and the number of Our Subjects capable of bearing Arms in the Militia, the Number and Tonnage of Shipping and Craft employed upon the Lakes or Rivers in or contiguous to the Province of Upper Canada, and of the Number and Tonnage of the Shipping entering inwards or clearing outwards from the Ports of Our Provinces of Lower Canada; together with any other Information on these or any other points of the like nature which may be proper to be communicated to Us.

63. And Whereas for some years past, the Governors of some of Our Plantations have seized and appropriated to their own use, the produce of Whales of several kinds taken upon those Coasts, upon pretense that whales and¹ Royal Fishes, which tends greatly to discourage that Branch of Fishery in Our Plantations, and to prevent Persons from settling there. It is therefor Our Will and Pleasure that you do not pretend to any Claim nor give any manner of Discouragement to the Fishery of Our Subjects upon the Coasts of the Province under your Government, but on the contrary, that you give all possible Encouragement thereto.

Endorsed: Instructions for the Right Honourable
Lord Dorchester, Governor of Lower Canada.

Dated 16th September, 1791.

[L.S.]

¹ An error for "are."

[23 July 1752]
Report of the Lords of
Trade upon the
Petition of Several
Merchants of London
containing proposals
for opening a new
Trade and making
settlements upon the
Coast of Labrador.
C.O. 5/6

**CORRESPONDENCE, DOCUMENTS AND PAPERS
RELATING TO THE HISTORY OF THE
ADMINISTRATION OF THE COAST OF LABRADOR**

**No. 198.
REPORT OF LORDS OF TRADE ON PETITION OF
MERCHANTS.**

RECORD OFFICE REFERENCE C.O. 5 / 6.

To their Excellencies the Lord Justices.

May it please your Excellencies.

In obedience to your Excellencies commands signified to us by a letter from Mr. Anyand, your Excellencies Secretary, dated the 11th of May last we have taken into our consideration a Petition presented to your Excellencies by several Merchants of London, containing Proposals for opening a new Trade and making Settlements upon the Coast of Labrador or New Britain in North America, between 52 and 60 Degrees of Northern Latitude, and praying that the said Grant of Land may be granted to them and their Associates in perpetuity with the sole Privilege in exclusion of all other His Majesty's Subjects, of carrying on a Trade and Commerce to this Country for any Term or number of years not less than sixty three.

We have also been attended by the Petitioners, and have heard what they had to offer in support of their Petition and by other Persons who appeared to us to be interested or concerned in the subject matter of it, or who might be able to give us any information relative thereto; whereupon we beg leave humbly to represent.

That the Questions arising upon a Consideration of this Petition are, First how far the making a Grant to the Petitioners of this Country, may or may not interfere with any claims either of Right or Possession, which have been made to it by any other Prince or State, or by any of His Majesty's Subjects by virtue of former Grants or Concessions. Secondly How far the End and Object of the undertaking, considered in a commercial Light, may be of national advantage or disadvantage, and Thirdly, whether, supposing it

should be thought advisable to comply with this request, the Terms and Conditions proposed by the Petitioners are proper and reasonable.

As these three Questions appear to Us to take in every Circumstance necessary for your Excellencies Consideration, We shall in the course of Our Representation confine ourselves to them, and shall state to your Excellencies in the most full and explicit manner We are able, whatever appears upon the Books of Our Office, or hath occurred to us relative thereto.

As to the first Question, we beg leave humbly to represent: That the country called Nova Britannia or Terra Labrador, and by some ancient Geographers Estoitland and Terra Corterealis, lies on the North side of the Gulf and River of St Lawrence, extending North and North West to Hudson's Streights and Bay, and bounded on the East by the Atlantic Ocean: Some Geographers indeed, particularly the French, make the Southern Boundary of that Region to be a Line drawn from the Streights of Belle Isle, which divide Newfoundland from the Continent, due west across the said Continent, in order to separate it from the Settlements which that Nation has upon the Northern Banks of the Gulph and River of St. Lawrence.

It does not appear that any permanent Settlement has hitherto ever been made by any Nation in the Eastern Parts of this Country; for as on the one hand the English, who were the earliest navigators to that part of the World were led by the Hopes of discovering a Passage to the East Indies to pursue their Voyages and Searches still further to the Westward, and to which We owe the discovery and Settlement of Hudson's Bay, so on the other hand, the French arrived, and restrained by the Inhospitability and implacable Enmity of the Natives, have not as yet had any Settlements to the Northward of the Streights of Belle Isle.

The first Discovery of this Country is said to have been made by some Danes from Friezeland many ages before Columbus's Discovery of America; that these Danes gave it the name of Estoitland, and that it was afterwards visited in the year 1390 by Nicholas and Antonio Zeni, two Venetians, who in a Voyage to the North were driven by Tempest upon this Coast.

This account is given by Hackluyt in the first Volume of his collection of Voyages; but as he cites no other authority for it than Hearsay, except the simple Testimony of Abraham Ortelius who published a Book of Cosmography called *Theatrum Orleis* in the year 1520; and as the Account itself and the manner in which it is related carries evident marks of Invention, there is great Room to doubt its Veracity, and indeed it seems to be rejected by all late historians, and particularly by Pere Charlevoix in his History of New France. As little credit ought for the same Reason to be given to what is related by some other Writers of a Discovery of this Country by Francis Scanlon a Pole in the year 1477.

The first authentic account we have of a Discovery of this Country was of that made by Sebastian Cabot in the year 1497,

who had a Commission from Henry the Seventh to make Discoveries to the Westward. In the first Voyage he made in consequence of this Commission he fell in with the Land in Latitude 67 North, from whence he continued his course southward along

p. 885

the Coast of Labrador to Newfoundland and the Bacalaos Islands, and from thence down to Florida. At his Return to England he brought with him three savages whom it is said he took in Newfoundland; but as that Island is only visited by the Natives from the Continent at certain Seasons of the year, and then only on the Western Coast, it is most probable that he brought them from some part of the Coast of Labrador, and there is the greater Reason to believe this, as Gaslar Corterealis who is said to have visited this Coast in the year 1500, and from whence it has the name of Terra Corterealis, brought from thence a piece of a gilded Sword, and saw amongst the Natives several Toys, and other evident Vestiges of Europeans having been lately amongst them.

After this several Voyages were made by the English to these Northern Parts of America, particularly by Martin Frobisher, John Davis, George Weymouth and James Hill in the years 1576, 1577, 1585, 1586, 1587, 1588, 1602 and 1605; but as the Object of these Navigators was merely to discover a Passage to the Westward, it does not appear that any of them visited the Coast of Labrador, except John Davis who in 1586 landed in a Harbour in Latitude 56, where he stayed trafficking with the Natives for several Days; and this is the first authentic Account we have of any actual Possession being taken of that Country on the Eastern side. The rest of these Navigators pursued their course still further to the Westward giving English names to several Places at which they touched.

In 1610 Henry Hudson sailed thro' Davis Streights into the Bay which has since been called by all Geographers of all Nations Hudson's Bay, of which he took possession in the name of the Crown of England, and stayed there a whole Winter. Possession was again taken in the name of the Crown of England of this Bay by Sir Thomas Button, who also wintered there in 1612 in a River since called Nelson's River in Remembrance of his Captain who died there.

In 1631 Captain Luke Fox by command of King Charles the First made a voyage to Hudson's Bay, and amongst other places entered Port Nelson, and finding there a Cross which had been erected by Sir Thomas Button with the Inscription almost defaced and worn out, he erected it again with a new Inscription declaring the Right and Possession of His then Majesty King Charles the First, and named the adjacent Country New North Wales.

The Troubles and Civil War, which broke out soon after this, put a stop to any further Undertakings of this sort, nor does it appear that any Voyages were made to this Country from the year 1631 until the year 1667, when Zachary Gilman

being fitted out by the Merchants of London sailed thro' Hudson's Streights to the Bottom of the Bay and settled a Trade and built a Fort there, which he called Rupert's Fort in Honour to Prince Rupert who joined with the Merchants in the Adventure.

In 1669 another Voyage was undertaken by the same Adventurers, and one Captain Newland entered there making a publick Declaration of His Majesty's Right, and affixing up the Arms of England as a mark of Sovereignty.

p. 886

In 1670 the Adventurers in the aforementioned Voyages were incorporated into a Company by Letters Patents, by which Letters Patents the sole Trade and Commerce of all those Seas, Streights, Bays, Rivers, Lakes, Creeks, and Sounds, in whatsoever Latitude they shall be, that lye within the Entrance of the Streights commonly called Hudson's Streights, together with all the Lands and Territories upon the Countries, Coasts, and Confines of the Seas, Bays, Lakes, Rivers, Creeks and Sounds aforesaid, that are not already actually possessed or granted to any of His Majesty's Subjects or possessed by the Subjects of any other Christian Prince or State, with the Fishing of all sorts of Fish, Whales, Sturgeons and all other Royal Fishes in the Seas, Bays, Islets and Rivers within the Premises and the Fish therein taken, together with the Royalty of the Sea upon the Coasts within the Limits aforesaid, was granted to the said Company and their Heirs for ever.

In consequence of this Grant the Company in 1672 appointed William Bayley to be Governor of all their Forts and Factories, who established a Trade with the Natives and made Settlements at Port Nelson and other Places.

In the year 1682 in time of profound Peace the French sent two Ships from Quebec into Hudson's Bay and dispossessed the English of the Fort and Settlements in Nelson's River. They continued to make further Depredations, until the year 1686, when all the Company's Factories and Settlements at the Bottom of the Bay were surprised and taken by a Party of French sent over land from Canada.

Upon these repeated injuries and depredations several memorials were presented by the Company to King James 2nd and Complaints having been made to the Court of France they were referred to Commissaries appointed on both sides to meet in London in order to settle such Points as were then in dispute between the Crowns relative to America.

This Negotiation however was of very short Duration and the Conferences, the chief object of which was the Redress of the Damages done in Hudson's Bay, were broke off by the happy Revolution, which took place soon after, and before any satisfaction could be obtained or the Points in Dispute adjusted.

During the War which broke out a few years after between the two Nations the French took York Fort from the Company

to which they then gave the name of Bourbon; the Company however recovered this Fort again in 1696, but it was soon after re-taken by the French, and the Peace which was made in 1697 put an End to all further Hostilities.

By the 8th Article of the Treaty concluded at Ryswick, it is stipulated, that Commissaries should be appointed on both sides to examine and determine the Rights and Pretensions which either Crown hath to the Places in Hudson's Bay, but that the Possession of those Places which were taken by the French during the Peace that preceded the late War and were retaken by the English during the said War should be left to the French by Virtue of the foregoing Article. That the Capitulation made by the English on the 5th of

p. 887

September, 1696, (relating to Fort York) should be observed and the Merchandize therein mentioned restored and that the Differences arisen concerning the Execution of the said Capitulation and the Value of Goods there lost, should be adjudged and determined by the said Commissaries to be appointed for that and other Purposes in Pursuance of the said Treaty.

In Consequence of these Stipulations, Commissaries did meet at London, but the Peace was of so short a Duration as to prevent their coming to a final Determination upon any of the Points which were the subject of their Conference.

It appears upon an Examination of the Memorials and other authentick Papers which were delivered by the Commissaries in support of their respective claims to Hudson's Bay as well in the Conferences in 1687 as those in 1699, that the English Commissaries insisted, that all that part of North America, which comprehended Hudson's Bay, was discovered by Sebastian Cabot in 1497, that this Discovery conveyed a Right to the Crown of England to that Country, that that Right was afterwards established by the Discovery made and the actual Possession taken by the subsequent Navigators at times when no other Christian Princes or States had any Possession or even Knowledge of those Parts, the French in particular not having any Settlements in Hudson's Bay until 1682, and that this Right was further confirmed by the Treaty of Neutrality in 1686, by which it is stipulated that both Nations shall retain all the Dominion, Rights, and Preeminencies in the American Seas, Roads and Waters in as full and ample manner as of Right belonged to them.

In answer to this it is alleg'd by the French that this part of North America is call'd in all ancient Geography the Coast of Labrador, and was so named by the Spaniards who discovered it long before the English. That the Voyages mentioned to have been made by the English were merely the Discovery of a Passage to the South Seas, whereas they could prove an infinite number of Voyages to have been made at that time to the Coast of Labrador by the Normans and Basques, that the Possession taken of Hudson's Bay in 1612, was at a time when

the French were in actual Possession of the Country, that the English did not know the Northern Country from the year 1497. That the several Authors who write of Canada give it no Bounds to the North; That all the Northern Bay was comprehended in the Limits set down in a Grant made in the year 1628, by which a Canada Company was established and that if the English had had any knowledge of the Bay, or any Pretention to it, they would not have failed to have reserved their Right in the Treaty of 1632, which restored Canada to France.

That altho' the French had not at that time nor for a long time after any Forts in this Country, yet they traded with the Indians and had Settlements upon the Rivers which fall into Hudson's Bay, and they produced several Acts to prove the Indians acknowledged the Sovereignty of France before the English ever thought of going thither.

The said Commissaries also referred to several Grants, Edicts and

Letters Patent of the Crown of France in the years 1540, 1598 and 1627, by which all that part of North America including the Coast of Labrador and the Bay since called Hudson's Bay is granted to Certain Companies and private Adventurers.

The said Commissaries also refer to several subsequent Grants and Letters Patent of the like Nature, from whence they argue an uninterrupted Possession and therefore alledge that the Treaty of Breda in 1667 and that of Neutrality in 1686 favor their claim.

The English Commissaries in their Reply to the French Memorials, insist upon the Right of the Crown of Great Britain founded upon prior Discovery and Possession and although the Discovery and Possession upon which that Right is founded might be made in search of a north West Passage, yet that did not hinder that a Discovery made and Possession taken in such Pursuit was rightfull and proper. They further alledged that the Grants and Letters Patent cited by the French are of no Force, there never having been any actual Possession taken, and that in Effect all the other Letters Patent can signify nothing in Prejudice to His Majesty's Right, seeing no Prince whatsoever can be hindered from giving to his Governors, Agents and Companies such Titles as he shall think best; but nobody is so weak as to think anything passed by these Grants, but what the King is truly and rightfully possess'd of, for nil dat quod non habet, and that it was much more just and reasonable to rely upon actual Discovery and Possession taken in view of all the World.

That as to what has been alleged of Canada having no Bounds to the northward it is plain by all Maps that Terra Labrador and Estoitland are in the North of Canada lying northward between Canada and Hudson's Bay, and they did never hear that the French had laid claim to these two Countries. That as to what had been urg'd with respect to this Country not being reserved in the Treaty of 1632, there was no need of reserving that which was so remote and not so much as known to the French, and that the Treaty of Breda favoured the English who were in actual Possession before the 1st of January 1665.

That as to what had been alledged by the French that the Normans and Basques made voyages to Labrador at the time of the first Discovery of this Country by the English, it was not disputed, but that this Country was three or four Hundred Leagues distant from the Bay.

It does not appear that any considerable alteration was made in the state of things with respect to any part of this Country during Queen Ann's War at the Conclusion of which, Hudson's Bay was ceded to the Crown of Great Britain by the 10th Article of the Treaty of Utrecht which stipulates, that

“The said most Christian King shall restore to the Kingdom and Queen of Great Britain, to be possessed in full Right for ever, the Bay and Streights of Hudson's together with all

Lands, Sea, Coasts, Rivers and Places, situate in the said Bay and Streights, and which belong thereunto, no Tracts of Land or of Sea being excepted, which are at present possessed

p. 889

by the Subjects of France all which as well as any Buildings there made, in the Condition they now are and likewise all Fortresses there erected either before or since the French seized the same, shall within six months from the Ratification of the present Treaty, or sooner if possible, be well and truly delivered to the British Subjects having Commission from the Queen of Great Britain to demand and receive the same entire and undemolished, together with all the Canon and Canon-Ball which are therein, as also with the Quantity of Powder, if it be there found, in Proportion to the Canon-Ball and with the other Provisions of War usually belonging to Canon; it is however provided that it may be entirely free for the Company of Quebeck, and all other the Subjects of the most Christian King whatsoever to go by Land or by Sea whithersoever they please out of the Lands of the said Bay, together with all their Goods, Merchandise, Arms and Effects of what nature or Condition soever except reserved in this Article. But is agreed on both sides to determine within a year, by Commissaries to be forthwith named by each Party, the Limits which are to be fixed between the said Bay of Hudson and the Places appertaining to the French, which Limits both the British and French subjects shall be wholly forbid to pass over or thereby to go over to each other by Sea or by Land. The same Commissaries shall also have Orders to describe and settle in like manner the Boundaries between the other British and French Colonies in those Parts.”

In 1719, Commissaries were appointed by both Crowns in order to settle and adjust the several Points in Dispute relative to America, which were referred to Commissaries by the foregoing Article, and by the Instructions given to His Majesty's Commissaries they were directed to endeavour to get the Limits and Boundaries between Hudson's Bay and the Places appertaining to the French settled in the following manner, vizt :—“That the same begin from the Island called Grimington's Island or Cape Perdrix in the Latitude of 58 ½ North, which the Company desire may be the Boundary between the British and French Subjects on the Coast of Labrador towards Rupert's Land on the East main and Nova Brittainia on the French side, and that no French Ship, Barque, Boat or Vessel whatsoever shall pass to the North-westward of Cape Perdrix or Grimington's Streights or Bay of Hudson on any Pretence whatsoever, and further that the southwestward of the Island of Grimington or Cape Perdrix (so as to include the same within the Limits of the Bay) to the great Lake Miscosinke, alias Mistrovenny, dividing the Lake into two parts, and that where the said Line shall cut the 49th degree of Northern Latitude another Line shall begin and be extended westward from the said Lake upon the 49th degree of Northern

Latitude over which said Line so to be described as above mentioned. The French and all persons by them employed shall be prohibited to pass to the Northward of the said 49th Degree of Latitude and to the North or Northwestward of the said lake or supposed line by Land or Water, on or through any Rivers, Lakes, or Countries, to trade or erect any Forts or Settlements, and the British

p. 890

Subjects shall like be forbid to pass the supposed Line either to the Southward or Eastward. But they were to take especial care in wording such Articles as should be agreed on with the Commissary or Commissaries of His Most Christian Majesty upon this head, that the said Boundaries be understood to regard the Trade of the Hudson's Bay Company only, that His Majesty did not thereby recede from his Right to any Lands in America not comprized within the said Boundaries and that no Pretension be thereby given to the French to claim any Tracts of Land in America Southward or Southwest of the said Boundaries.”

Memorial agreeable to the foregoing Instruction was accordingly presented by the British Commissaries, but it does not appear that anything was done in consequence of it.

From the foregoing state it will appear to your Excellencies, that the Right to the Eastern Parts of Terra Labrador where the Petitioners propose to make a Settlement, had never been an object of particular Dispute or Discussion, with any other Prince or State, the Disputes with the Crown of France in the years 1687, 1699, and 1719 being solely confined to Hudson's Bay and the Territory dependent thereon, but it does appear however that many of the arguments urged and the Proofs offered on both sides in these Disputes, do from the nature of them imply more extensive claims, and tend to affect the Right to the whole of that part of North America, and it does not appear that these disputes have at any time been finally adjusted or a Boundary Line fixed between his Majesty's Dominions and those of His Most Christian Majesty in these Parts.

As to that part of the Question which has a relation to any claims of Right to this Country by any of His Majesty's Subjects, we must beg leave humbly to represent.

That the only Persons which appeared to us to have any Interest or concern therein are the Hudson's Bay Company. We therefore thought it proper to call upon them to inform us whether they claimed any or what Right to the Tract of Land desired by the Petitioners. In consequence of which we have received from them a Memorial, a copy whereof is hereunto annexed, and to which we beg leave humble to refer.

Upon Consideration of this Memorial it appears to us, that the Hudson's Bay Company seem to admit that the Eastern part of this Country cannot be construed to be within the limits of their Charter, and their chief objection to this Undertaking seems to arise from an apprehension that it may in its

Consequences interfere with and prejudice their Trade.

As to the Advantages or Disadvantages attending the Proposals of the Merchants considered in a commercial light, we are humbly of opinion that the Discovery and opening of any new Sources of Trade and Commerce to this Country will be of great National Advantage, more especially in the present case from the Nature and Design of the Trade itself, the chief Object of which is to increase the Importation of Beaver and other Furs, the scarcity whereof has been severely felt in a very important though declining manufacture, which We have Hopes may by the opening of a new

p. 891

Channel of Trade be revived, and those Advantages which other Nations have got over us in this Trade be recovered; and we have that Confidence in the known Characters and Abilities of the Gentlemen concerned in this Undertaking that we doubt not but they will attempt the Execution of it with Zeal and judgment.

With respect to the Terms of the Proposal, it appears upon the face of the Petition that the Petitioners desire a Grant of the Lands in Perpetuity, and upon observing that in that part of the Petition which proposes that the Trade shall be laid open at the End of Sixty three years, a Reservation is made to the Petitioners of the sole exclusive Propriety in all the Bays, Inlets, Lakes, Rivers, Island, Ports and Places included within the Limits set forth in their Petition. We expressed our Opinion to the Petitioners that such an exclusive Propriety would be inconsistent with the open Trade designed and might be made in effect the very Monopoly intended to be guarded against, upon which the Petitioners made the strongest Professions of their willingness to have any provisions inserted in their Grant which may be thought necessary for the security of a full Trade at the Expiration of their Term, and therefore care must be taken in preparing the said Grant, in case your Excellencies shall think it advisable to give one, that the said Bays, Inlets, Rivers, &c. be given in such a manner and under such Regulations as they cannot be made use of to the Prejudice of a free Trade in Exclusion of His Majesty's Subjects after the expiration of the Term for which the Petitioners desire an exclusive Trade.

As to any other Regulations, as well with respect to Cultivation as all other necessary Restrictions, they will become objects of further consideration in case your Excellencies shall think it advisable to comply with the Prayer of the Petitioners.

Upon the whole We cannot but be of Opinion that this Proposal is the most reasonable and least interested of any usually made in cases of this kind, for altho' the Petitioners do desire an exclusive Trade for Sixty Three years, yet some such Encouragement is absolutely necessary, not only as a Recompense for the great Expence and Risque which must attend such an Undertaking in its Infancy, but also in

consideration of the great Delay of the Returns upon this Trade arising from the nature of the Trade itself and the Difficulty's attending an Establishment of it in a savage, inhospitable Country, where everything must be begun from the very foundation; and We are and be rather of this opinion as the Petitioners profess themselves ready to submit to any Terms or Conditions which shall be thought proper to be inserted in the Grant obliging them to cultivate the Land, to build necessary Forts and to promote and establish a civil Correspondence and Amity with the Natives, the Benefit of all which Labour, Expence and Improvement will devolve to the Publick at the Expiration of this exclusive Trade, and His Majesty's Subjects will accede to an established Trade with many additional advantages.

We cannot conclude this Representation without observing to your Excellencies that the Petitioners have not assigned any Western Limit to the

p. 892

territory of which they desire a Grant, and therefore as the Hudson's Bay Company do by virtue of their Charter, claim the Coasts, and Confines of the Bay, it will be necessary, if any Grant should be made agreeable to the Prayer of the Petition, that such Grant should have a Western Limit appointed, which will not break in upon the Charter and Property of that Company.

All of which is most humbly submitted.

DUNK HALIFAX,
CHARLES TOWNSHEND,
ANDREW STONE,
JAMES OSWALD.

Whitehall,
July 23rd, 1752.

FIRST PERIOD: FROM THE TREATY OF PARIS, 1763, TO
THE QUEBEC ACT, 1774.[5 June,
1762.]

No. 199.
GENERAL MURRAY'S REPORTOF THE STATE OF THE GOVERNMENT OF QUEBEC IN CANADA,
5 JUNE, 1762.¹

CONST. DOCS. (1759-1791), 2nd edition, p. 47, CAN. ARCH.

MY LORD,—In obedience to his Majesty's Commands signified in Your Lordship's dispatch to Sr. Jeffrey Amherst of the 12th December last I have the honor to transmit the following account of His Majesty's Government of Quebec and dependancies thereof; however, deficient it may prove Your Lordship may be assured it has been my earnest desire, as it is my constant study to fulfil my Royal Masters intentions.

The better to effect the same, and in order to state the several interesting matters of this Report in the clearest light, I shall divide the whole under the following heads.

- 1st—Return of His Majesty's Forces in His Government of Quebec and dependancies thereof.
- 2nd—State of the Fortifications
- 3rd—State of the Government under the French Administration.
- 4th—The Revenues and Expenses.
- 5th—Church Government.
- 6th—Indian Nations.
- 7th—Nature of the Soil and its produce.

[¹ In the despatch of Lord Egremont to Sir Jeffrey Amherst of 12th Dec., 1761, in which the King approves of the system of military government established in the districts of Quebec, Three Rivers, and Montreal, he instructs him to send, for His Majesty's information, a full account of the newly acquired countries. In response to this command communicated to Murray, we have this Report, which was transmitted to the Government by Sir Jeffrey Amherst. This Report was among the documents submitted to the Board of Trade for their information in preparing a plan of government for the territories ceded to Britain by the Treaty of Paris of 1763.]

p. 894

- 8th—Population.
- 9th—Trade.
- 10th—Character of the People.

I shall subjoin some remarks pointing out the Errors of the Ancient System, and wherein by my own observations and the

best information I have been able to procure, there is room for alterations or amendments.

* * *

4. REVENUES AND EXPENCE OF THE GOVERNMENT UNDER THE FRENCH ADMINISTRATION.

Tho' I should properly give a state of the Revenues and expense of the Government of Quebec only, yet the whole under the French administration was so blended together it does not appear practicable to separate the same, and have therefore collected here all that has come to my knowledge on this head, without distinction of Governments. 1st—Five ports, (a) part of the Kings domaine which were under the immediate management of the director General of it; He furnished them at the Kings expense with the Merchandize and effects proper for the Indian Trade or Fisheries which were carried on at these several ports and received from thence likewise on the Kings account the Furs, Oil, Fish or other produce of the same.

They had been farmed but the Lease expired in 1756, they were advertised and no one bidding for them on account of the War, the Intendant lest the Indians should quit their usual haunts, ordered them under the foregoing management, which continued untill our arrival, tho' the expense far exceeded the produce.

* * *

Observations.

1st I had the Honor to inform the Lords of the Treasury very fully of the state of the Kings ports, in a Letter to M^r Martin their Secretary, of the 7th November last, at the same time that I transmitted all accounts relative thereto by M^r Ainslie whom I intrusted with the management of them until I could receive instructions from home, I am thoroughly persuaded the proposal I therein made to their Lordships of selling them to the highest bidder, for a Term of Years, is the surest expedient to make them profitable to His Majesty.

6th

INDIAN NATIONS RESIDING WITHIN THE GOVERNMENT.

In order to discuss this point more clearly I shall first take notice of the Savages on the North shore of the River S^t Laurence from the Ocean upwards, and then of such as inhabit the South side of the same River, as far as the present limits of the Government extend on either side of it.

p. 895

1st The Savages on the North shore. The first to be met with on this side are the Esquimaux, these are the wildest and most untamable of any, and are emphatically stilled by the other Nations, Savages. They never dress their food but eat fish rotted in the Sun and drink the oil it produces. Travellers represent them hardy, active and expert navigators: In the summer they come with their whole Families in Chaloups to

fish in the streights of Belisle, these they leave in the Bays, and go out themselves to a considerable distance in Canoes made of skins wherein they sew themselves up. Their clothes and sails of their Vessels are made of the skins of wild beasts; They are reckoned treacherous, and have had many encounters with the French and Canadians employ'd on the fisheries in those parts. Their Language is not understood but a few words they make use of nearly resemble the dialect of some of the most northern European Nations. A few here have trafficked with them and made a considerable advantage by it, but they never agreed well together; any trade with the Esquimaux however must be precarious; The Coast is rocky and difficult of access, the season for navigation short, and the risks too great to entice adventurers; they have never been known to come on this side of La Forteau.

2^d The Montagnais or Monsonies inhabit a vast tract of Country from Labrador to the Saguenay; they are again distinguished into those who live in the inland parts called Nascapies, and the inhabitants of the water side, for this reason stilled Chuchouxlapishouets. They take as many different names as they have Villages but are all the same people, and speak the same language. As in the interior parts of the Country there are many Lakes and Rivers which communicate with Hudson's bay, the former often trade on that side, which the latter also would have been obliged to do, if the interruption caused by the War, had continued for any time, tho' from the more convenient situation, they would have ever reverted to those who were Masters of the River S^t Laurence, those are the mildest and most tractable of all Savages and never enter into War. Tho' their country is extensive their number is inconsiderable; From Labrador to Mingan the Traders do not reckon more than from Eighty to one Hundred Families, and of those who resort to the King's Posts, there may be about 220 Families in all, but as their habitations are easily moved they are ever changing and shifting from one place to another.

A Jesuit Missionary meets them at Tadousac when they come there for the trade and he resides in the neighbourhood all the Year.

3^d The most civilized of all the Indians in this part of the World are the Hurons settled at a little Village called Jeune Lorette about 3 leagues from Quebec. These are called Roman Catholicks and are a decent well behaved people, it is now many Years since they removed there from their ancient habitations about Lake Huron or Erie, are settled upon lands belonging to the Jesuites, and live in much the same manner as the Canadians. They have excellent good Houses, Cultivate their own lands and live upon the Produce: In the Hunting season they go into the woods and hunt themselves

or traffic with the more remote Indians for their Pelletries. Some of the Elders have been so tenacious of their Mother tongue, they hardly speak a word of French, but most of the Younger ones speak it tolerably well; indeed it has ever been the policy of the French Government to make them retain that and as much of their ancient customs as possible, that they might prove of greater use to them in case of war with other nations, at the same time they endeavour'd to attach them to their Interest by every tie. A Missionary resides among them, they have a neat Chapel, where divine service is constantly performed at which all the Savages assist with a punctuallity and decorum worthy of imitation by more enlightened people; They seem to be well satisfied with the change of Masters, and were so particularly pleased at their Village having been spared during the Winter 1759, tho' forced by the French to abandon it, that they never could prevail on them to act with any degree of vigor against us. They have at present but 32 Warriors and the whole Village, Men, Women and Children are short of 100. Their number is decreased at least one half within these forty Years, and the Tribe would by this time have been almost extinguished but for the supplies they got by captures in War, and the sale of unhappy infants whose Parents chose to conceal their own shame at the expence of such iniquitous bargains.

* * *

9th

TRADE.

The French bent their whole attention in this part of the World to the Fur Trade, they never enter'd heartily or with any spirit into the fisheries; most of what was done in this way was by adventurers from the ports of France; some Fish indeed Lumber and provisions were exported to the French islands. Had this trade been opened and agriculture promoted here with any degree of warmth, this branch of Commerce must have become both valuable and extensive but it was monopolized into the hands of a few, by the connivance and management of the Chiefs, the sole view of these being to enrich themselves by every means. The interest of the State could not fail to be sacrificed upon all occasions.

* * *

The provinces of New York and Philadelphia now share with Canada a great part of the Fur Trade formerly in the hands of the French, but that proportion if it, which the Quebec government enjoy'd must remain here unalterably.

The foregoing is an attempt to sketch the trade of Canada, while subject to French Government, but under the full enjoyment of His Majesty's mild and gentle administration, its commerce must flourish to a far greater extent.

1st A Most immense and extensive Cod Fishery can be established in the River and Gulph of S^t Laurence, and may in time prove an inexhaustible

source of wealth and power to Great Britain; Settlements may be formed in the neighbourhood of the best fishing places to which the industrious and intelligent in that branch may be invited and encouraged to repair; a rich tract of country on the South side of the Gulph will in consequence be settled and improved, a Port or Ports established and furnished with every material requisite to repair Ships, that have suffer'd by stress of weather or the difficulties attending navigation in such narrow seas, a point much wanted which will lessen the risks, and considerably increase the profits of the Commerce of this Colony.

It is further to be observed that the Fish caught upon these coasts and in the bays, far exceed the bank Cod and fetch an advanced price in foreign markets; The fishermen being on the spot will commence fishing the very instant the season permits and will continue to the very last of it whereby at least two Months will be gained to the trade, which are just now a heavy expence to it, without producing the least profit to it.

2^d Next to the Cod in importance is the Whale fishery which can be carried on to the greatest advantage in the River St Laurence with less risk and expence than in any other seas, where the animals resort; Under this head may be placed the seal and sea-Cow fisheries of which there is a prodigious abundance, and an immense (sic) of oil and Whale-bone may be annually exported to Great Britain.

3^d There are several small rivers on the Coast of Labrador abounding with vast quantities of salmon; this if followed with spirit and industry, might very soon become a considerable object to the British Trader.

* * *

5th Tho' as has been before observed, this province must now share the Fur Trade, which she formerly possessed under the French Government, with the neighbouring Colonies, Yet that which was carried on with the different nations inhabiting the northern Coast of Canada, must still remain with her; she may likewise hereafter regain a great part of that with the upper Country, on account of the more easy conveyance.

It is likewise probable that this very branch may be much farther extended, than ever it was under the French, by reason of the superior diligence and application of the British Traders.

It must be allowed the French were laudable in restraining the vent of Spiritous Liquors to the Savages beyond a certain quantity: by this means many broils were avoided, for they are fond to excess of everything strong and are all mad in their intoxication.

* * *

Before this report is closed it will not be Improper to observe to Your Lordship how impossible it is to ascertain exactly what part of North America, the French stiled Canada, no Chart or Map whatever having fallen into our hands or public

record of any kind to chew what they understood by it.

However it is to be hoped, the limits on this side at least will need no canvassing nor admit of any dispute.

Should I be able to procure farther lights relative either to those limits or the several other matters contained in this Report worthy of notice, You may be assured they shall be forthwith transmitted to Your Lordships, happy if my labors can any way conduce to His Majesty's Service, or the good of my Country.

I have the Honor to be with great truth and regard
My Lord,—Your Lordships, most obedient
and most faithful humble Servant

No. 200.

EARL OF EGREMONT TO LORDS OF TRADE.

WHITEHALL May 5th 1763.

Lords of Trade

MY LORDS,—His Majesty having brought the Negotiation with France & Spain to a happy Conclusion, and having given the necessary Orders for carrying into Execution the several Stipulations of the late Treaty, is now pleased to fix His Royal Attention upon the next important Object of securing to His Subjects, and extending the Enjoyment of the Advantages, which Peace has procured.

His Majesty therefore, upon the same Principle of Sollicitude for the Interests of His Colonies, which engaged him in a just & necessary War, in support of their Rights, and obliged him to insist on such Terms of Peace as he thought peculiarly calculated for the future Security of that important Object, directs me to transmit to Your Lordships herewith the Definitive Treaty of Peace; and I am commanded to signify to Your Lordships His Majesty's Pleasure, that You do, without Loss of Time, take into Your most serious Consideration, those Articles which relate to the Cessions made by their Most Christian & Catholick Majesties, & that You do report Your Opinion.

By what Regulations, the most extensive Commercial Advantages may be derived from those Cessions, and

How those Advantages may be rendered most permanent & secure to His Majesty's Trading Subjects.

The Means of arriving at these desireable Ends, will perhaps be most distinctly pointed out, by considering, separately, the several Cessions stipulated by the Articles of Peace and examining the different Circumstances by which each Cession becomes more or less susceptible of the great Advantages of Commerce & Security above mentioned.

[¹ This and the following papers contain an account of the steps taken by the British Government to provide a suitable constitution and policy of administration for Canada and the other recently acquired territories in North America. They furnish the basis for the Proclamation of Oct. 7th, 1763, as also for the Commission and the Instructions of the same date, given to General James Murray as Governor of the Province of Quebec. The papers are copied from the originals in the Public Record Office, and except where noted, are from the series "America and the West Indies." The first is from vol. 268, p. 93.]

p. 900

North America naturally offers itself as the principal Object of Your Lordships Consideration upon this Occasion, with regard to which, I shall first obey His Majesty's Commands in proposing to Your Lordships some general Questions, before I

Murray's report said to be inclosed in letter of 20th. July 1762. Amherst to Egremont in A. & W. I. Vol. 97 but apparently missing.

Burton's April 26, 1762. In Amherst's letter to Egremont is June 1762 enclosure No. 20 A. & W. I, Vol. 97.

Gage's—Enclose No. 38 March 20, 1762 in Amherst's to Egremont of 12 May 1762 A. & W. I. Vol. 97.

Canada & Newfoundland.

proceed to desire You will furnish that Information, which His Majesty expects from Your Lordships, with regard to the Northern or Southern Parts of this Continent considered separately.

The Questions which relates to North America in general, are,

1st What New Governments should be established & what Form should be adopted for such new Governments ? and where the Capital, or Residence of each Governor should be fixed?

2^{dly} What Military Establishm^t will be sufficient ? What new Forts should be erected ? and which, if any, may it be expedient to demolish?

3^{dly} In what Mode least Burthensome and most palatable to the Colonies can they contribute towards the Support of the Additional Expence, which must attend their Civil & Military Establishment, upon the Arrangement which Your Lordships shall propose?

Under the first of those Heads, Viz^t What new Governments shall be established ? It will be proper to examine, what Priviledges are reserved to His Majesty's New Subjects by the Terms of their Capitulations; I therefore send Your Lordships herewith the Capitulation of Quebec & Montreal.

It may also be a proper Object of Consideration, how far it is expedient to retain, or depart from the Forms of Government which His Most Christian Majesty had established in those Colonies; and in order to furnish Your Lordships with those Lights, which may enable You to form a just Opinion on this Head, I send herewith Copies of the several Reports of Gov^{rs} Murray Burton & Gage.

The Second Question, which relates to the Security of North America, seems to include Two Objects to be provided for.; The first is, the Security of the whole against any European Power; The next is the Preservation of the internal Peace & Tranquility of the Country against any Indian Disturbances. Of those Two Objects, the latter appears to call more immediately for such Regulations & Precautions as Your Lordships shall think proper to suggest &c^a.

Tho' in order to succeed effectually in this Point, it may become necessary to erect some Forts in the Indian Country, with their Consent, yet His Majesty's Justice & Moderation inclines Him to adopt the more eligible Method of conciliating the Minds of the Indians by the Mildness of His Government, by protecting their Persons & Property & securing to them all the Possessions, Rights and Priviledges they have hitherto enjoyed, & are entitled to, most cautiously guarding against any Invasion or Occupation of their Hunting Lands, the Possession of which is to be acquired by fair Purchase only; and it has been thought so highly expedient to give them the earliest and most convincing Proofs of His Majesty's Gracious and Friendly Intentions on this Head, that I have already received and transmitted the King's Commands to this Purpose to the Governors of Virginia, the Two Carolinas & Georgia,

and to the Agent for Indian Affairs in the Southern Department, as Your Lordships will see fully in the inclosed Copy of my Circular Letter to them on this Subject.

Having thus executed the King's Commands, with regard to such Questions as relate to North America in general, I am to signify to Your Lordships His Majesty's further Pleasure that You do take into Consideration the following Queries, which concern some parts of that Continent in particular.

The first and most important Object is the Fishery, with regard to which Your Lordships will furnish all the Lights you possibly can in order to shew,—

Florida.

Whether the French had made any Incroachments with regard to the Fishery, contrary to what is stipulated, on this Head by the Treaty of Utrecht ? How those Incroachments may be most easily prevented by such timely Precautions, as may most effectually obviate all Disputes between the Subjects of both Crowns, in those Parts & preserve Peace & Tranquility there for the future.

What Inconvenience or Disadvantage may arise to His Majesty's Northern Colonies, or to the Fishery in those Parts, from the Vicinity of S^t Pierre & Michelon, ceded to France, under certain Restrictions by the 6th Article of the Definitive Treaty ? And by what Precautions may that Inconvenience be most effectually guarded against, either with respect to Our Fishery, or a Contraband Trade with Our Colonies.

Can Your Lordships furnish any Lights with regard to the Climate or Soil of the Inland Parts of Florida, which tho' hitherto neglected and useless, are said to be extremely fertile?

Is there any Reason to believe that the Mouth of the Catahocke River is, or might be easily made Commodious for Shipping, or, that a Harbour may be found in the Southern Parts of the Peninsula of Florida ? What particular Advantages might arise from such a Harbour, or from that of Pensacola or Mobile, or from any other, on that part of the Coast of North America lately ceded to His Majesty, which bounds the Gulph of Mexico to the North.

The general Queries with regard to North America, having taken in all the Points of Information wanted, relative to the Louisiana & the Illinois, I shall only add, that His Majesty desires to have Your Lordships Opinion whether any immediate Advantages may be derived from the free Navigation of the Mississippi, and how they are to be improved & extended?

Having thus gone thro' the several Points relative to N. America, upon which His Majesty desires to have the Opinion of Your Lordships, the obvious Application of most of the same Queries to the other Cessions made to His Majesty by the Peace, makes it unnecessary to repeat them, it will be sufficient therefore to desire that Your Lordships will report for His Majesty's Information, Your Opinion, with regard to the most effectual Means of improving and securing the

Commercial Advantages, which may be derived from the Conquered Islands and from Senegal. With regard to the latter I am to inform Your Lordships, that His Majesty has thought proper to accept the Proposal of the African Committee made in the Petition of which I send You Copy inclosed, and Orders are already given to the Governor of Senegal to have a

p. 902

Detachment under a proper Officer to keep Possession of that Place till the African Committee shall be prepared to take Possession thereof. Your Lordships will report Your Opinion of this Arrangement, and suggest whatever may occur to You for the Advantage of this Part of the African Trade.

In Order to supply Your Lordships with all the Materials in my Office, which can in any Shape assist You, in making Your Report as ample, and as satisfactory as possible, I inclose herewith Copies of Accounts transmitted by the King's Command from Colonels Scot & Worge, as also the Capitulation of Martinico, Grenade having surrendered under the same Terms, which had been granted to that Island.

C

As it must require some time to examine & deliberate upon the several Points which are referred to Your Lordships in this Letter, it is the King's Pleasure, that without waiting to make a full Answer to the whole You do, as soon as possible, report your Opinion upon such Points as shall appear to you most pressing that proper Directions may be given, without Loss of Time, with regard to the Arrangements immediately necessary for the New Acquisitions.

I am &c.

EGREMONT.¹

1763.

[¹ Charles, Earl of Egremont succeeded Wm. Pitt as Secretary of State for the Southern Department, Oct. 9th, 1761. At this time there were two Principal Secretaries of State, one for the "Northern" and the other for the "Southern" Department, these distinctions referring to the division between them of British foreign affairs in Europe. The American Colonies came under the attention of the senior secretary, being usually the secretary for the Southern Department. In Jan. 1768, a third Secretary of State was appointed to take charge of Colonial affairs; but, with the virtual loss of the American Colonies, this office was abolished in 1782. Thereafter a new division was made into the Home and Foreign Departments. The colonies came under the care of the former department until 1801, when they were transferred to that of the Secretary for War, a new department established in 1794. From 1801 to 1854 this department was known as that of the Secretary of State for War and the Colonies.]

JOINT

[Enclosures in No. 201.]

[L.S.] To the King's most Excellent Majesty.

MAY IT PLEASE YOUR MAJESTY,—Having received Your Majesty's Commands, signified to Us by a Letter from the Earl of Egremont, dated May 5th 1763, to take into Consideration, without loss of Time, those Articles of the late Definitive Treaty of Peace, which relate to the Cessions made by France and Spain, and to report Our Opinion by what Regulations the most extensive Advantages may be derived from them, and those Advantages rendered most permanent and secure to Your

Majesty's trading Subjects; And Your Majesty having further directed Us with regard to North America in general, to point out, what new Governments it may be necessary to establish, with the Form

p. 904

most proper for such Governments, and the Places most convenient for the Capitals; What Military Establishments will be sufficient for that Country; What new Forts it may be proper to erect, and what (if any) to demolish; And by what Mode of Revenue, least burthensome and most palatable, the Colonies can contribute to the Additional Expense of such Civil and Military Establishments: And Your Majesty having commanded that, particularly As to Canada and Newfoundland, after furnishing every Information in our Power relating to the Fishery, We should consider the Encroachments made by the French in this Article, contrary to the Stipulations in the Treaty of Utrecht, and give our Opinion by what Means such Encroachments may be prevented in future, and any Inconvenience which may arise from the Vicinity of S^t Pierre and Micquelon, may be most effectually guarded against.—That in respect to Florida, We should report upon it's Produce, the Situation of it's Harbours, and Rivers, with the Benefits which may arise from the free Navigation of the River Mississippi;—That in regard to the Islands conquered in the West Indies, and Senegal on the Coast of Africa, We should state the means which appear to Us most effectual for securing and improving the Commercial Advantages which may be derived from them;—But that upon the whole, it was Your Majesty's Pleasure (as some Time would be required to examine and deliberate on the several Points referred to Us) that We should, as soon as possible, report to Your Majesty Our Opinions on such of them as appear to Us most pressing, in order that Directions may be given without loss of Time:

In Obedience to Your Majesty's Commands, We have taken the several Points referred to Us into our most serious Consideration, and are of Opinion that We shall best comply with Your Majesty's Intention and Directions by stating particularly the Advantages which severally result to Your Majesty's Colonies and the Commerce of Your Subjects by the Cessions stipulated in the late Treaty, and then submitting Our humble Opinion to Your Majesty of the Means, which appear to Us immediately necessary to be put in Execution for securing and improving those Advantages.

Many of the particular Questions contained in the Reference will receive a particular Answer under one or other of those general Heads, and such as do not, We shall beg Leave, in Obedience to Your Majesty's Direction, to reserve for a future Report, when We may be better enabled to give Your Majesty Information upon such Points.

The most obvious Advantages arising from the Cessions made by the Definitive Treaty are, The exclusive Fishery of

the River S^t Laurence on all the Coasts in the Gulph of S^t Laurence and all the Islands in that Gulph. From all these Fisheries Your Majesty's Subjects were hitherto entirely excluded; partly by the express Stipulations of the Treaty of Utrecht by which Cape Breton, S^t Johns and the other Islands in the Gulph were dismember'd from Nova Scotia and ceded to France, partly by the Claim immediately set up by France to the whole Southern Shore of the Gulph under pretence that it had never made a part of Nova Scotia, but had always been considered as a seperate District of New France. In consequence of

p. 905

this Claim and of the Possession instantly taken of that Territory by the French, which till the late War they were permitted to retain, they established their most Valuable Fisheries in the different and most convenient Bays of that Country, as well in respect to Catching and Curing of Fish and fitting out Boats, Shallops and other Vessels, as to raising Provisions at the Cheapest Rates. From all these Circumstances this Fishery upon the Coasts of the Gulph and of the Islands in the Gulph of S^t Laurence, well known by the Name of La Peche Sedentaire, has ever since been deemed one of the most valuable parts of the French Fishery and We have reason to conclude from the Spirit and Industry which Your Majesty's Subjects have shown ever since the Reduction of Louisbourg that it will become equally valuable in their Hands, especially when We consider that, the Fishery of the River S^t Laurence consisting of Whales, Seals, Sea-Cows &ca has been in the short Period since the taking of Quebec, carried to a much greater Extent by your Majesty's Subjects, than ever it was by the French, during their Possession of Canada.

This Claim, and the Possession in consequence of it, of the whole Southern Coast of the Gulph of S^t Laurence, from the Streights of Canceau to Cape Roziere, at the Mouth of the River, appears to Us to have been the chief Encroachment made by the French in Violation of the Stipulations in the Treaty of Utrecht; But the Monopoly of the Fishery which they endeavoured to establish upon this Encroachment was greatly strengthened by other Circumstances. By suffering the whole of Nova Scotia (the Fort of Annapolis excepted) to remain entirely in the Possession of French Inhabitants from the Treaty of Utrecht to the Year 1749, Your Majesty's Subjects were discouraged and prevented from availing themselves of the advantageous and abundant Fishery which might have been carried on upon that part of the Coast of Nova Scotia expressly and exclusively reserved to them in the Treaty of Utrecht, for the french constantly excited the Indians to disturb the Fishermen that resorted thither; And by their Possession of the whole Coast of Labrador, they not only carried on an extensive Trade with the Esquimeaux Indians in Oyl, Furs &ca. (in which they allowed Your Majesty's Subjects no Share) but by the Vicinity of the Eastern Part of that Coast, to that part of

Newfoundland, (where a permissive Right of drying their Fish, only during the Fishery Season was granted by the Treaty of Utrecht) They assumed in some Measure an Exclusive Right to the Navigation in the Streights of Bellisle.

These several Encroachments, will, We apprehend, entirely cease, on the one Hand, by the compleat Settlement of Your Majesty's Colony of Nova Scotia, according to it's true and ancient Boundaries, and on the other by the Annexation of the Labrador Coast to the Government of Newfoundland, and by the faithfull Execution of those Instructions, which Your Majesty has been pleased to give to Your Governor of that Island, With respect to the Islands of S^t Pierre and Miquelon, We do not apprehend that any great Advantages can result to the French Fishery, or great Inconvenience to that of Your Majesty's Subjects by the Possession of them according to the Terms of the Treaty; We do not imagine they are fitted to restore or revive that Branch which the French call La Peche Sedentaire, and of which they have

p. 906

been deprived by the Cessions, not only as these Islands are without Wood, either for Firing or for any sort of Naval Construction, but as they are utterly incapable of producing Provision sufficient for the Consumption of any considerable Number of Inhabitants. And as to any Conveniences of Drying and Curing such Fish upon those Islands, as may be caught upon the Banks of Newfoundland during the Banking Season, It appears, by what Information We have had, that the best Fish so caught may be earlier and more conveniently dried upon that part of Newfoundland, where a permissive Right for so doing during the Season was granted as well by the Treaty of Utrecht, as by the late Treaty. It seems, therefore, only to remain, that proper Precautions be taken against any Contraband Trade, which may be carried on from those Islands by any of the Ships of Your Majesty's Subjects trading thither or otherwise. To prevent which Your Majesty's Governor of Newfoundland should be instructed to employ the utmost Vigilance with regard to all such Trade during his Continuance upon the Station, and to give express Directions to the Officers of the Garrisons and the Magistrates in their several Departments that in his Absence they should have the utmost Attention to this Object, and to put the Laws against contraband Trade into strict Execution, for which purpose it will be necessary to establish in that Government a Court of Vice Admiralty or some other Jurisdiction competent to the Cognizance and Punishment of Breaches of the Acts of Trade.

The next obvious Benefit acquired by the Cessions made to your Majesty is the Fur & Skin Trade of all the Indians in North America. The first of these Articles before the present Cession, was enjoyed by the French almost entirely; The only part left in the Hands of Your Majesty's Subjects, being that carried on by the Exclusive Company of Hudson's Bay, and a very inconsiderable Quantity through the Province of New

York. This Trade was acquired in virtue of the Possession which they had taken (contrary to the Stipulations of the Treaty of Utrecht) of all the Lakes in North America, communicating with the River S^t Laurence, tho' the circumjacent Territory avowedly belonged to the six Nations of Indians, Acknowledged by the French to be Your Majesty's Subjects in that Treaty, and by virtue of the Claim which they afterwards set up and were suffered to maintain for a long time of forcibly excluding Your Majesty's Subjects from any Navigation in those Lakes. But this Trade which the French with the utmost Industry had carried to the greatest Extent, by means of numerous well chosen Posts and Forts sufficient as well to overawe as to supply all the Indians upon that immense Continent, is now fallen entirely and exclusively into the Hands of Your Majesty's Subjects and may be secured and communicated to all Your Majesty's Colonies according to the Industry of each, by means of those Posts and Forts with proper Regulations for the Trade with the Indians, under the Protection of such a Military Force as may preserve their Tranquility, not only against Indian Incursions but be ready for their Defence against any European Attack.—The Skin Trade was Chiefly in the Hands of Your Majesty's Subjects in the Southern Colonies even previous to the Cessions, but was often disturbed and interrupted by the frequent Incursions of Indians incited by the French—

p. 907

As these Circumstances no longer exist, a great Extension and Improvement of that Article may likewise be expected.

Another obvious Advantage of the Cession, will be the supplying of all the Indian Tribes upon the Continent of North America with European Commodities immediately through the Hands of English Traders.—This Article, if not wholly engrossed by the French, was possessed by them in the greatest Degree, and was of so much Importance that the Traders of New York chose rather to supply the Inhabitants of Canada with English Goods and Manufactures fit for the Indian Trade, than to risque the Loss of what they esteemed so valuable a Branch, by attempting a direct Trade with the Indians themselves. And this strange Principle was adopted by many of the Merchants of London, as appeared upon a Hearing on that Subject before Your Majesty's Board of Trade in 1721.

Another Advantage attending the late Treaty is the secure settling of the whole Coast of North America, as it's produce may invite, or Convenience for Settlement may offer, from the Mouth of the Mississippi to the Boundaries of the Hudson's Bay Settlements, with the whole Variety of Produce which is capable of being raised in that immense Tract of Sea Coast, either by the Industry of Emigrants from Europe, or from the Overflowing of Your Majesty's ancient Colonies—previous to the late War, Nothing is more certain than that many of Your Majesty's ancient Colonies appeared to be overstock'd with Inhabitants, occasioned partly from an extremely increasing

Population in some of those Colonies, whose Boundaries had become too narrow for their Numbers, but chiefly by the Monopoly of Lands in the Hands of Land Jobbers from the extravagant and injudicious Grants made by some of Your Majesty's Governors, whereby a great many of Your Majesty's industrious Subjects were either forced into Manufactures, being excluded from planting by the high Price of Land (A Situation which they otherwise would have preferr'd) or forced to emigrate to the other Side of the Mountains, where they were exposed to the Irruptions of the Indians as well as the Hostilities of the French. And though, on the one Hand, Your Majesty's Province of Nova Scotia according to it's true and just Boundaries, and on the other, that of Georgia, would have contained many more of Your Majesty's Subjects than were in this disagreeable Situation, and more advantageously for the Trade and Interest of Your Kingdoms, Yet the Hostilities which the French contrived to excite at first, by the Indians in their Alliance, and at last by regular Troops in Nova Scotia, and a Dread of the like Calamities on the Side of Georgia from the Indians and Spaniards, have hitherto prevented the salutary progress of these new Settlements, and the happy Consequences which otherwise might have been expected from. them.

We have already mentioned the great Scope and Room which there is for beneficial Settlements in the Article of Fishery in Nova Scotia, another great Advantage however of the late Treaty, producing Strength to Your Kingdom and Riches to Your Subjects, is the future Supply which the new Acquisitions will afford of Naval Stores, more particularly that of masting for the Royal Navy, and of that Species of Timber and Wood commonly called

Lumber, so essential to the Commerce and Cultivation of the Sugar Colonies, both which Articles are to be found in great Quantities, and with peculiar Advantage and Convenience in the Province of Canada, upon Lake Champlain, and in those Parts of Nova Scotia, the exclusive Possession of which is now confirmed to Your Majesty, and this Benefit arising from the Treaty is of the greatest Consideration, as the Supply of Masting and Stores for the Royal Navy from America had been almost entirely stop'd by bad Management and Waste committed in Your Majesty's Woods in New England and New York and the Price of Lumber had been greatly enhanced from the Necessity of procuring it at a greater Distance from the Ocean, and from convenient Ports of Shipping.

In the Province of Georgia and the Neighbouring Florida Commercial Advantages of a still more valuable Nature will probably follow the secure Extension of Settlement, which will be attained by the Cession of Florida, and the End which will be thereby put to Interruptions from the Indians. For there can be no Doubt, that Indigo, Silk, Cotton, and many of the Commodities now found in the West Indies only, may be raised in these Climates. An Object which will prove a strong Temptation to the Settlement of those Territories.

A capital Advantage highly deserving Your Majesty's Attention is the Increase of the Trade of Sugar, Coffee, Cotton and other Indian Products by the speedy Settlement and Culture of the new acquired Islands.—It is known Truth, that the Produce of our West India Islands has hitherto been but barely sufficient to answer our growing Consumption in the first of these valuable Articles, and that as these Islands were all, excepting Jamaica, intirely cultivated, additional Territory was therefore become absolutely necessary to this Branch of Trade, which may be extended to a very great Degree if those new Islands are speedily settled.

The last advantageous Consequence arising from the Cessions which We shall now lay before Your Majesty is that of securing the whole Gum Trade on the Coast of Africa from a Monopoly in the Hands of the French by means of the River Senegal as well as the Acquisition of a considerable Share of the Slave Trade formerly in their hands, with a Variety of other Articles which there is great reason to believe may be obtained by the prosecution of further Discoveries on that River.

Having thus stated the most obvious Advantages resulting from the Cession made to Your Majesty by the late definitive Treaty, We submit to Your Majesty, as Our humble Opinion, that they can only be secured and improved by an immediate Establishment of regular Governments, in all such Places, where planting and Settlement, as well as Trade and Commerce are the immediate Objects. For in order to invite new Settlers to risque their persons and Property in taking up new Lands, as well as to secure the old Inhabitants in the Enjoyment of those Rights and Priviledges reserved to them by

the Treaty, such regular Government appears, both from Reason and Experience, of absolute Necessity. And it seems likewise necessary for the same reasons, as well as to secure Your Majesty's Sovereignty and the

p. 909

Publick Tranquility, that a large Military force should be kept up in each Government, 'till by the increase of Inhabitants, each Colony shall be enabled to maintain their own Governments by their own internal Force. But as no such regular civil Government is either necessary or indeed can be established, where no perpetual Residence or planting is intended; It will there be sufficient to provide for the free Trade of all Your Majesty's Subjects under such Regulations, and such Administration of Justice as is best suited to that End. Such We apprehend to be the case of Newfoundland, where a temporary Fishery is the only Object, and this We suppose has been the reason, which induced Your Majesty to annex the Coast of Labrador to that Government Such is the case of Senegal and the Principle upon which we suppose Your Majesty thought proper to put that River and Country under the Administration of the African Committee. And such we apprehend will be the Case of that Territory in North America which in Your Majesty's Justice and Humanity as well as sound Policy is proposed to be left, under Your Majesty's immediate Protection, to the Indian Tribes for their hunting Grounds; where no Settlement by planting is intended, immediately at least, to be attempted; and consequently where no particular form of Civil Government can be established. In such Territory we should propose, that a free Trade with the Indian Tribes should be granted to all Your Majesty's Colonies and Subjects under such Regulations as shall be judged most proper for that End, and under the protection of such Military Force, to be kept up in the different Posts & Forts in the Indian Country as may be judged necessary, as well for the Protection of Trade and the good Treatment of the Indians as the Maintenance of Your Majesty's Sovereignty and the general defence of North America.

We shall defer at present entering into any particulars, as to the number of Troops which it may be necessary to maintain for this purpose. The Number and Situation of the Posts and Forts, and the Regulations proper to be established for a free Trade from all Your Majesty's Colonies into the Indian Country; 'till by further Information from Your Majesty's Commander in Chief of America, and from Your Majesty's Agents for Indian Affairs, We shall be enabled to make a more full and particular Report upon so interesting and important a Subject. And We apprehend that no such Delay can be attended with very material Inconvenience, since, if Your Majesty shall be pleased to adopt the general proposition of leaving a large Tract of Country round the great Lakes as an Indian Country, open to Trade, but not to Grants and Settlements, the Limits of such Territory will be sufficiently

ascertained by the Bounds to be given to the Governors of Canada and Florida on the North and South, and the Mississippi on the West; and by the strict Directions to be given to Your Majesty's several Governors of Your ancient Colonies for preventing their making any new Grants of Lands beyond certain fixed Limits to be laid down in the Instructions for that purpose. And We apprehend that in the mean time the Security of this Trade will be sufficiently provided for by the Forts already erected, and such Garrisons as Your Commander in Chief may, at his Discretion, think proper to keep in them.

p. 910

But that no time may be lost in finally settling this important point of the Indian Country, it will be absolutely necessary that immediate Orders be sent as well to Your Majesty's Commander in Chief of America as to Your Agents for Indian Affairs, that without delay they furnish every Information in their power on this Subject, and that they be directed to correspond directly with Your Majesty's Board of Trade for this purpose.

Canada, Florida and the new acquired Islands in the West Indies appear to Us to be the Places where Planting, perpetual Settlement and Cultivation ought to be encouraged and consequently where regular Forms of Government must immediately be established.

Canada as possessed and claimed by the French consisted of an immense Tract of Country including as well the whole Lands to the westward indefinitely which was the Subject of their Indian Trade, as all that Country from the Southern Bank of the River S^t Lawrence where they carried on their Encroachments.

It is needless to state with any degree of precision the Bounds and Limits of this extensive Country, for We should humbly propose to Your Majesty that the new Government of Canada should be restricted, so as to leave on the one hand, all the Lands lying about the great Lakes and beyond the Sources of the Rivers which fall into the River S^t Lawrence from the North, to be thrown into the Indian Country, and on the other hand, all the Lands from Cape Roziere to Lake Champlain, along the Heights where the Sources of the Rivers rise, which fall into the Bay of Fundy and Atlantic Ocean, to be annexed to Nova Scotia and New England in such a manner as upon any future directions after particular Surveys have been made shall appear most proper, If this general Idea shall be approved the future Bounds of the new Colony of Canada will be as follows,

On the South East it will be bounded by the high Lands which range across the Continent from Cape Roziere in the Gulph of S^t Lawrence to that point of Lake Champlain above S^t Johns which is in Latitude 45 Degrees North; which high Lands separate the heads of the Rivers which fall into the great River S^t Lawrence from the heads of those which fall into the Atlantick Ocean or Bay of Fundy. On the North West It will be

bounded by a Line drawn South from the River S^t Johns in Labrador by the heads of those Rivers which fall into the River S^t Lawrence as far as the East end of Lake Nipissin upon the Ottawa River, and on the South West by a Line drawn due West to the River S^t Lawrence from that point on Lake Champlain which is directly opposite to where the South Line falls in and so cross the said River S^t Lawrence and pursuing a North West Course along the Heights where the Rivers rise, that fall into the Ottawa River, to be continued to the East end of Nipissin Lake where the North Line terminates.

In order however that Your Majesty may judge with the greater precision of the Limits of Canada as above described and also of those We shall propose for Florida, and of the Country we think right to be left as Indian Territory, We humbly beg leave to refer to the annex'd Chart in which those Limits are particularly delineated, and of which Your Majesty will have a clearer Conception than can be conveyed by descriptive Words alone.

p. 911

The Advantage resulting from this restriction of the Colony of Canada will be that of preventing by proper and natural Boundaries, as well the Ancient French Inhabitants as others from removing & settling in remote Places, where they neither could be so conveniently made amenable to the Jurisdiction of any Colony nor made subservient to the Interest of the Trade & Commerce of this Kingdom by an easy Communication with & Vicinity to the great River S^t Lawrence. And this Division by the heights of Land to the South of the River S^t Lawrence will on the one hand leave all Your Majesty's new French Subjects under such Government, as Your Majesty shall think proper to continue to them in regard to the Rights & Usages already secured or that may be granted to them. On the other hand, the reannexing to Nova Scotia all that Tract of Land from Cape Roziere along the Gulph of S^t Lawrence with the whole Coast of the Bay of Fundy to the River Penobscot, or to the River S^t Croix will be attended with this peculiar Advantage, of leaving so extensive a Line of Sea Coast to be settled by British Subjects: and all the new Settlers upon this Tract of Land will with greater facility be made amenable to the Jurisdiction of Nova Scotia than to that of Canada; and upon the same Principle, It will likewise be necessary to reannex the Islands of Cape Breton and S^t John's to the Government of Nova Scotia.¹

And here, We cannot help offering it as Our humble Opinion that the utmost Attention should immediately be given to the Speedy Settlement of this Tract of Country and that Instructions be prepared for Your Majesty's Governor for that purpose, with particular regard to such Officers & Soldiers who have served so faithfully & bravely during the late War and who may now be willing to undertake such new Settlements under proper Conditions.

It is obvious that the new Government of Canada, thus

bounded, will, according to the Reports of Generals Gage, Murray and Burton, contain within it a very great number of French Inhabitants and Settlements, and that the Number of such Inhabitants must greatly exceed, for a very long period of time, that of Your Majesty's British and other Subjects who may attempt Settlements, even supposing the utmost Efforts of Industry on their part either in making new Settlements, by clearing of Lands, or purchasing old ones from the ancient Inhabitants, From which Circumstances, it appears to Us that the Chief Objects of any new Form of Government to be erected in that Country ought to be to secure the ancient Inhabitants in all the Titles, Rights and Privileges granted to them by Treaty, and to increase as much as possible the Number of British and other new Protestant Settlers, which Objects We apprehend will be best obtain'd by the Appointment of a Governor and Council under Your Majesty's immediate Commission & Instructions. But the particular Regulations and Provisions to be adapted to the different Circumstances and Situation of this as well as Your Majesty's other new Acquisitions, will more properly and distinctly come under Your Majesty's

[¹ It will be observed that Nova Scotia, or Acadia, still included the territory afterwards erected into the separate Province of New Brunswick. The island of St. Johns, here mentioned, is now Prince Edward Island.]

p. 912

Consideration in the Draught of the Commission and Instructions to be prepared for each Governor, than in this first general Report.

It will however be necessary that a large military Force be kept up 'till the number of British Inhabitants and new Settlers be very considerably increased, as well to secure the Obedience and Fidelity of the ancient French Inhabitants as to give full Protection & Security to the new British Settlers.

Canada was, under the French, divided into the three Governments of Quebec, Montreal and Trois Rivieres, but the Residence of the chief Governor was at Quebec, and the two other Governments had each a Lieutenant Governor only, subordinate to the Governor in Chief, and we should humbly propose that the same Method be continued under the new Governm^t; not only as by this means the Administration of Justice and of Commerce will be less embarrass'd, but that a less proportion of military Force will be requisite to be maintained and be more easily applicable against all external or internal Disturbances.

Florida and that part of Louisiana to the eastward of the Mississippi, both which Tracts are ceded to Your Majesty by the late Treaty, may be compared to Canada, in respect to Extent of Territory, and the number of Indian Tribes, with which they have immediate Communication, but in other respects, they seem entirely different. The number of settled Inhabitants, either French or Spaniards, we apprehend, has never been considerable, and there is little probability, from

the Facility of their Removal, that any of them will remain, after the Cessions are compleated, tho' we are of Opinion, as well from this Circumstance of their Paucity, as with a view to the immediate Settlement of the Country, that every Expedient should be used, to induce as many to remain as can be prevailed upon.—

The Produce of Canada, with its Trade, the Navigation of the River S^t Lawrence, with its Communication to the great Lakes of North America, are, from authentick Information, in many particulars tolerably well understood; but we are sorry it is not in our power, either from any materials in our Office, or from any other to be depended upon, to give Your Majesty that certain Information we could wish either with regard to the Coast, Harbours and Rivers of Florida, or as to the Variety of Produce which there is the greatest probability may be raised in that extended Country. We shall therefore content ourselves with suggesting at present, that whenever a Government is established in this Country, Instructions should be given for surveying with all possible Accuracy, as well the Sea Coast and places fit for Harbours as the internal Country and Rivers, particularly of that part which lies between the great Mountains and the Mississippi, of which there are not extant any Charts or Accounts on which we can depend, for which purpose it will be necessary that a proper number of able and skilfull Surveyors be appointed.

The great Tract of Sea Coast from S^t Augustine, round Cape Florida, along the Gulph of Mexico, to the Mouth of the Mississippi makes it, we apprehend, indispenseably necessary that this Country should be divided into two distinct Governments, and, for the present, the Chief Residence of the Governor of the one should be at S^t Augustine, with orders to give particular Attention

to Cape Florida (as that Cape commands the whole Navigation from the Bay of Mexico) the Residence of the other at Pensicola, with particular Instructions regarding the Mississippi the free Navigation of which ought, we apprehend, to be most accurately understood, not only in respect of that River being the future Boundary betwixt Your Majesty's Dominions, and those of the French, but as this River by its Communication with the Ohio, the Illinoris &c^a is of the utmost Importance to all Connection with the Indian Nations and the only Outlet to the great internal Trade, which may be carried on amongst them.

If it shall be thought proper to divide Florida into two distinct Governments, they may be distinguished by the names of East and West Florida and may be bounded as follows,

East Florida to be bounded by the Coast of the Atlantick Sea from Cape Florida to the North Entrance of S^t John's River, on the East; by a Line drawn due West from the North Entrance of S^t John's River to the Catahowche or Flint Rivers, on the North; and on the West and South West by that part of the Coast of the Gulph of Mexico, which extends from Cape Florida to the Mouth of the Catahowche River, and from thence following the Course of the said Rivers to where the North Line falls in.

West Florida to comprehend all the Sea Coast of the Gulph of Mexico, extending West from the Catahowche River or Flint River towards the Mississippi, as far as Your Majesty's Territories extend, and stretching up into the Land as far as the 31st Degree of North Latitude, which, We humbly apprehend, is as far North as the Settlements can be carried, without interfering with Lands claimed or occupied by the Indians.

By this Plan of Division, which is formed with a view to make the two Colonies as distinct as possible, by establishing a natural Line of Separation between them, and by giving to each a due proportion of the natural Advantages and Conveniences of Commerce and Navigation, a large Tract of Land lying between the North Boundary Line of East Florida and the River Alatamaha, the present South Boundary of Georgia, which has hitherto been unoccupied as to any permanent Settlement, either by Your Majesty's Subjects or those of Spain, remains to be put under some proper Establishment: and we think it cannot in any respect be better disposed of, than by putting it under the Jurisdiction and within the Government of Georgia, By this means the principle Obstacles, which have hitherto impeded the Progress of that advantageous and well regulated Colony, will be removed, and its Settlements extended to the great Benefit and Advantage of the Mother Country.

With respect to the Form of each of these Governments, We are of Opinion, that in regard to their being Infant Settlements the most suitable will be that of a Governor and Council, by Your Majesty's Commission, with Instructions adapted to the

most quick and speedy Settlement of these Countries. But a considerable military Force must be likewise kept up in these Governments, as well in respect to the neighbourhood of the French and Indians, as to the Security of the Settlers, till their numbers enable them to have Security by their own internal Force.

The chief Object of the new acquired Islands in the West Indies, being

p. 914

that of extending West Indian Products of all kinds, as quickly as possible, to the Benefit of the Trade of Your Majesty's Kingdoms; And such Extension being impossible to be obtain'd but by the means of a very large Capital immediately to be laid out by Settlers in the Purchase of Negroes and Erection of Buildings, it is obvious that Security in this is more peculiarly to be attended to, and that as all those Islands, the Grenadaes excepted, which are inhabited by French, are almost entirely uncleared and uncultivated, It is equally obvious, that this Security cannot be obtained for some time at least but by the means of regular Troops—and We are clearly of opinion that this is so necessary, that We do not believe any Persons of sufficient Stock will be found willing to hazard the Capital necessary for a Sugar Plantation in any of these Islands without it.—The next Circumstance necessary to the Establishment of general Security is that of the regular Administration of Justice under a civil Government, the only Form of which that can be adapted to the present Situation of these Islands is, We apprehend, by a Governor and Council, under Your Majesty's immediate Appointment. But all particulars relative to it will best come under Your Majesty's Consideration, when We receive Your Orders to prepare the Commission and Instructions for the Governor.

We are of Opinion that the erecting all these Islands into one general Government, with a subordinate Lieutenant Governor in each, as is now practised in the Leeward Islands, will be better adapted, as well to the purposes of Civil Government as to the Application of military Power to the Protection of the whole, than either the separating of them into distinct Governments, or leaving those of S^t Vincent, Dominico and Tobago under the Commission of the Governor of Barbadoes.—For, by this means, the military Force will be best applied to the general Security, especially if their relative Situation be such as we are inform'd it is, that there is an easy Communication from y^e one to the other, even of those which appear to be most remote.—Their being subject to one Government for the present will likewise contribute best to the carrying most speedily into Execution those Instructions, which will be necessary, as well for surveying those Lands as for dividing them into Lotts proper for Sugar Plantations or other Products, and for granting such Lotts to such Persons as shall be willing to undertake the Settlement of them, either upon Sale, Lease or gratuitous Grants as Your Majesty shall

think most proper to direct.—By this Disposition not only Your Majesty's Orders will go thro' the Channel of one Person, but one Person will be responsible for the due Execution of them.

Having thus given our humble opinion in general as to the Government, which it may be necessary for Your Majesty to establish in Canada, Florida and the West Indies, We should now conclude this point, reserving all other particulars relative to it to be offer'd to Your Majesty's Consideration in the Draughts of y^e Commissions and Instructions for the respective Governors, which must necessarily be prepared, if Your Majesty shall approve the general Proposition, but our Duty and the Experience of our Office, as well as the Authority of our Predecessors, oblige Us on this Occasion to make one other general Observation, which We humbly submit to Your Majesty.

p. 915

That if all the Governors of Your Majesty's Colonies are not for the future obliged to constant Residence, as well as all subordinate Officers whatsoever, particularly in these new Governments, and appointed in such manner as to be removeable at Your Majesty's Pleasure there will be no proper Security either for the due Execution of their Offices upon the spot, or for their furnishing in a regular and punctual manner such Information to Your Majesty's Boards and Offices in this Kingdom, as is absolutely necessary for Your Majesty's Service, and for the Security and Improvement of Your old as well as new Colonies; and, We apprehend, it was upon a Conviction of this Truth, that when the Governments of Georgia and Nova Scotia were lately erected, all the new Officers then created, were appointed in this manner.

It now only remains that, in Obedience to Your Majesty's Commands, We should give our Opinions upon the mode of Revenue least burthensome and most palatable to the Colonies, whereby they can contribute to the additional Expence, which must attend the Civil and Military Establishments adopted on the present Occasion, but on this point of the highest Importance, it is intirely out of our Power to form any Opinion, which We could presume to offer for Your Majesty's Consideration, as most of the Materials necessary to form a just and accurate Judgement upon it, are not within the reach of our Office. Such as can be procured shall be collected with all possible Dispatch, and shall at any time be laid before Your Majesty, in such manner as You shall please to direct,

[14 July, 1763.]

All which is most humbly submitted,

No. 203. JOINT
EARL OF EGREMONT TO THE LORDS OF TRADE.¹

WHITEHALL, July 14th 1763.

Lords of Trade.

MY LORDS,—Your Report, dated the 8th of last Month, having been laid before the King, and His Majesty having taken the Same into Consideration; I am, in Consequence thereof, to acquaint your Lordships, That the King approves the Erecting Three New Governments in N^o America, under the Denominations your Lordships propose, of Canada, East Florida, and West Florida; But, with regard to the Limits of these Governments,

¹ A. and W. I., vol. 268, p. 205.
p. 916

as described in the Report, and marked out in the Chart thereunto annexed; Altho' His Majesty entirely concurs in your Lordships Idea, of not permitting any Grant of Lands, or New Settlements to be made, for the present, beyond the Bounds proposed by your Lordships; Yet the King thinks, that great Inconveniences might arise, from so large a Tract of Land being left, without being Subject to the Civil Jurisdiction of some Governor, in Virtue of His Majesty's Commission, under the Great Seal of Great Britain; And that, (besides the Difficulties there might be, for Want of such a Civil Jurisdiction, in bringing to Justice Criminals, & Fugitives, who may take Refuge in that Country,) Their not being included within some established Government might, in Time to come, furnish Matter of Dispute, with Regard to the Property; And other Powers, who might hereafter find Means of Access to those Countries, might take Possession thereof, as derelict Lands: The King therefore is of Opinion, that, in the Commission for the Governor of Canada, all the Lakes, viz^t, Ontario, Erie, Huron, Michigan, and Superior, should be included, with all the Country, as far North, & West, as the Limits of the Hudsons Bay Company, and the Mississippi; And also that all Lands whatsoever, ceded by the late Treaty, and which are not already included within the Limits of His Majesty's ancient Colonies, or intended to form the Governments of East and West Florida, as described in your Lordships Report, be assigned to the Government of Canada, unless your Lordships should suggest any other Distribution, which might answer the purpose more effectually; On which Matter your Lordships will lose no Time in making a Report to His Majesty¹.

Having thus informed your Lordships of the King's Intentions, with regard to the Extent of the New Governments to be erected in North America; I am now to repeat to you, That His Majesty entirely concurs in your Lordships Idea, of not permitting, for the present, any Grant of Lands, or New

Settlements, beyond the Bounds proposed in your Report; And that all the Countries, beyond such Bounds, be also, for the present, left unsettled, for the Indian Tribes to hunt in; but open to a free Trade for all the Colonies And the King would have the Instructions to the Three New Governors in North America, formed so, as to contain the strongest Injunctions and Restrictions for this Purpose:—And His Majesty having been pleased to appoint The Hon^{ble} James Murray to be Governor of Canada; Francis Grant Esq^r to be Governor of East Florida; and George Johnstone Esq^r to be Governor of West Florida; I am to signify to your Lordships, the King's Pleasure, that you do, forthwith, prepare, to be laid before His Majesty for His Approbation, Draughts of Commissions, and Instructions, for the said Three Governors, agreeable to the King's Intentions communicated to you in this Letter, and to the Form of Government, proposed by your Lordships, of a Governor and Council by the King's Commission; Adapting the Instructions to the different Circumstances and Situation of the respective Countries; And your Lordships will insert an Instruction to the said Governors of Canada,

[¹ The reasons for not following the plan suggested are given in the reply of the Lords of Trade, of Aug. 5th, which follows this letter.]

and of East and West Florida, to cause accurate Surveys to be made, of the Countries under their Government.

With regard to the ancient Colonies; I am to acquaint your Lordships, that the King approves the extending the Limits of Georgia in the Manner you suggest; as also the Additions, your Lordships propose to be made, to Nova Scotia; and, in Case such Addition to Georgia, and Nova Scotia, shall make it necessary to issue New Commissions to any of the present Governors in N^o America, your Lordships will prepare Draughts thereof, for the King's Approbation: And your Lordships will also prepare Draughts of such Instructions, as shall be necessary, for the several Governors of the ancient Colonies, for preventing their making any New Grants of Lands beyond certain fixed Limits to be therein laid down for that purpose; And in these Instructions, as well as in Those for the New Governors, your Lordships will insert a Clause directing most particular Regard to be had, in the granting of any Lands, to such Officers and Soldiers, more especially Those residing in America, who have served so faithfully, and bravely, during the War, and who may now be willing to undertake any New Settlements under proper Conditions.

His Majesty thinks it highly proper, that the Agents for Indian Affairs should correspond with your Lordships, in regard to the Indian Country, and should transmit such Information on this Subject, as your Lordships shall require from them; for which purpose you will send them the necessary Orders and Instructions; But, with regard to the Commander in Chief of His Majesty's Forces, the King thinks, that His Correspondence should remain, as it has hitherto done,

with the Secretary of State; who will not fail to communicate to your Lordships all such Informations, & Lights, as he shall, from time to time, furnish, relative to the State of the new Acquisitions in America: And as soon as your Lordships shall be able, from such Information, to make a more full and particular Report, as to the Number of Troops necessary to be maintained in the several Governments, and Posts, in America; and that the King shall have taken His Resolution thereupon; the Secretary of State will signify the same to the Commander in Chief And, in the mean Time, I shall acquaint him, with your Lordships general Idea, that a large Military Force should be kept up in the New Governments; and such Garrisons, as he shall, in his Discretion, think proper, in the Forts already erected, and proposed to be kept up, for the Security of the Indian Trade.

Having now gone thro' the several Points, relative to North America, I come to the new acquired Islands in the West Indies; On which Subject I have only to inform your Lordships, that the King approves your Proposal of Erecting all These Islands, viz^t Grenada and the Grenadines; S^t Vincent; Dominico; and Tobago; into one general Government; with a subordinate Lieutenant Governor in Each, as is now practiced in the Leeward Islands, under the same Form of Civil Government by a Governor and Council:—And His Majesty having been pleased to appoint Robert Melvill Esq. to be Governor of the said Islands; Your Lordships will prepare, to be laid before

¹ This reply from the Lords of Trade, with its enclosure, are not contained in the A. and W. I. series "Canada," vol. I. They are taken from Canadian Archives Q. 1, p. 109.

No. 205.

[*Enclosure in No. 204.*]
To the King's most Excellent Majesty.

MAY IT PLEASE YOUR MAJESTY,—In Obedience to Your Majesty's Commands contained in a Letter from the Earl of Egremont, dated the 14th of July last signifying to Us Your Majesty's Most gracious Approbation of Our Idea, that that large Tract of Country bounded by the Mississippi and the Limits of the Hudson Bay Company on the one hand and on the other by the Limits of Canada, East and West Florida and His Majesty's ancient Colonies, should for the present be made subject to no grants of Lands nor to any Settlements, But acquainting us, that it was Your Majesty's Pleasure, that it should be put under some civil Jurisdiction, by a Commission under the Great Seal of Great Britain, so as to prevent any Objection, which might be formed, as to the Property of it, or its being considered as abandoned or direlict, or it's becoming a refuge for Criminals and Fugitives, and for these Reasons, that the whole of this Territory should be inserted in the Commission of the Governor of Canada, and assigned to that Government, unless we should suggest to Your Majesty some disposition which would answer these Purposes more effectually and directing us on this Matter to lose no time to report to Your Majesty.

We have taken this important Subject into our most serious Consideration and do most humbly concur in Your Majesty's Opinion, of the propriety of putting this Country under a particular Government, by a Commission under Your Great Seal, with a most precise Description of its Boundaries, in Order to ascertain the actual possession of its property, and with such Powers as may be necessary, as well to maintain and secure the free Exercise of the Indian Trade, which it is proposed all Your Majesty's Subjects shall enjoy within it, under proper Regulations, as to prevent its becoming a Refuge to Criminals and Fugitives.—But at the same time, we beg Leave to submit to Your Majesty, the following Objections which have occurred to us, against the annexing this Country to any particular Government, especially to that of Canada—

1st We are apprehensive that, should this Country be annexed to the Government of Canada, a Colour might be taken on some future Occasion, for supposing that Your Majesty's Title to it, had taken it's Rise, singly from the Cessions made by France, in the late Treaty, whereas Your Majesty's Title to the Lakes and circumjacent Territory as well as to the Sovereignty over the Indian Tribes, particularly of the Six Nations, rests on a more solid and even a more equitable Foundation; and perhaps nothing is more necessary than that just Impressions on this Subject should be carefully preserved

in the Minds of the Indians, whose Ideas might be blended and confounded,

p. 920

if they should be brought to consider themselves as under the Government of Canada—

2^d We are apprehensive as the whole of this Country would become subject to the Laws of a particular Government or Province, it would give that Province such superior Advantage in respect to the whole of the Indian Trade, which Your Majesty in Your Justice and Wisdom has determined to leave as open as possible, to all Your Subjects, as might controul and obstruct it to the Prejudice of Your other Colonies—

3^d If this great Country should be annexed to the Government of Canada, we are apprehensive, that the Powers of such Government could not be carried properly into execution, either in respect to the Indians or British Traders, unless by means of the Garrisons at the different Posts and Forts in that Country, which must contain the greatest Part of Your Majesty's American Forces and consequently the Governor of Canada would become virtually Commander in Chief or constant and inextricable Disputes would arise, between him, and the commanding Officers of Your Majesty's Troops—

If these Objections should appear of Weight to Your Majesty, We would humbly propose, that a Commission under the Great Seal, for the Government of this Country, should be given to the Commander in Chief of Your Majesty's Troops for the time being adapted to the Protection of the Indians and the fur Trade of your Majesty's subjects; And We submit to your Majesty whether any Inconveniencies would arise, from such Commission, which would not equally arise from a like Commission to a Governor of any of Your Majesty's particular Colonies—

But as the Instructions to such Governour, if Your Majesty should approve of this Proposition, would require a great Variety of Information, both with respect to the Management of the Indian Tribes and Trade, which can only be had from Your Majesty's Commander in Chief, and Your Agents for Indian Affairs, We would further submit, whether the issuing such Commission and Instructions, may not be delayed; 'till by the receipt of such Information, which Your Majesty has been graciously pleased to direct, We are enabled to make a full and particular Report on that very important subject.—And we flatter Ourselves, that no such delay will produce any bad Consequences, either in Respect to this Country's being considered as direct, while Your Majesty's Troops are in the actual possession of every Post and Fort formerly enjoyed by the French, or in respect of Criminals and Fugitives, taking refuge in this Country with Impunity, as this may be easily

prevented by an Instruction to the present Commander in Chief, empowering and directing him to send back all such Persons to their respective Colonies—

In the mean time We humbly propose that a Proclamation be immediately issued by Your Majesty as well on Account of the late Complaints of the Indians, and the actual Disturbances in Consequence, as of Your Majesty's fixed Determination to permit no grant of Lands nor any settlements to be made within certain fixed Bounds, under pretence of Purchase

p. 921

or any other Pretext whatever, leaving all that Territory within it free for the hunting Grounds of those Indian Nations Subjects of Your Majesty, and for the free trade of all your Subjects, to prohibit strictly all Infringements or Settlements to be made on such Grounds, and at the same time to declare Your Majesty's Intentions to encourage all such Persons who shall be inclined to commence new Settlements from Your old Colonies, together with all foreign Protestants, coming by themselves or with such Undertakers, in Your new Colonies of East and West Florida or your old Colony of Nova Scotia with particular regard to be shewn to those Officers and Soldiers, more especially those residing in America, who have so faithfully and bravely distinguished themselves, during the War, by allowing; Five thousand Acres lying together to every Field Officer; Three thousand Acres to every Captain, Two thousand five hundred Acres to every Subaltern or Staff Officer; One hundred Acres to every non-commission Officer, and Fifty Acres, to every private Man; in such parts as they shall chuse, on condition that they shall personally apply for and reside upon them subject to such terms of Cultivation, as your Majesty shall think proper to impose on all Persons undertaking such Settlements, which Encouragements may be also extended to reformed Commission Officers in Your Majesty's Navy in Case Your Majesty shall judge it reasonable and expedient.

All which his most humbly submitted,

SHELBURNE

No. 206.

JOINT

EARL OF HALIFAX TO LORDS OF TRADE.¹

St JAMES'S Sept^r 19th 1763.

Lords of Trade,

MY LORDS,—Having laid before the King Your Lordships, Representation of the 5th of August last, transmitted to the late Earl of Egremont in Your Letter of the same Date, I am commanded to acquaint Your Lordships that His Majesty, upon Consideration of the Reasons therein set forth, is pleased to lay aside the Idea of including within the Government of Canada, or of any established Colony, the Lands which are to be reserved, for the present, for the Use of the Indians. And His Majesty thinks proper to direct that

¹A. and W. I., vol. 268, p. 217.

p. 922

the Extent of the Commission, which Your Lordships are to prepare for the Hon^{ble} James Murray, shall be exactly such as is marked out in your first Report of the 8th of June last, and in the Map thereto annexed, under the Denomination of Canada. That such Government be described in the Commission, as comprehending all such Part of Canada on the North Side of the River St Lawrence, and all such Parts of His Majesty's antient Colonies of Nova Scotia, New England, and New York, on the South Side of the said River, as lie within the Limits above mentioned, and that It be called the Province of Quebec.

His Majesty approves Your Lordships' Proposition of issuing immediately a Proclamation, to prohibit for the present, any Grant or Settlement within the Bounds of the Countries intended to be reserved for the Use of the Indians; and to declare the Encouragement, which His Majesty, in his Royal Bounty, is graciously pleased to give to reduced Officers, and Soldiers, who served in North America, during the late War, and are desirous of settling in the Colonies. But His Majesty is of opinion, that several other Objects, of much Importance to his Service, might, with great Propriety, be provided for at the same time: And that the speedy Settlement of the new Colonies might be promoted; the Friendship of the Indians more speedily and effectually reconciled, and Provision be made for preventing Inconveniences, which might otherwise arise from the Want of Civil Jurisdiction in the interior, and reserved Countries, by extending such Proclamation to the following Purposes, viz^t.

To make known the Establishment and Limits of the four new Colonies, and the Additions made to the Governments of Newfoundland, Nova Scotia, and Georgia.

To declare the Constitution of the new Governments, as established for the present, & intended in future, and the general Powers which the Governors will have of granting Lands within Them.

To prohibit private Purchases of Lands from Indians.

To declare a free Trade for all His Majesty's Subjects with all the Indians, under Licence, Security, and proper Regulations.

—And

To empower all Military Officers and Agents for Indian

Affairs, within the reserved Lands, to seize such Criminals, and Fugitives, as may take Refuge in that Country, and to send them to be tried in any of the old Colonies (if That can legally be done) or else to that Government, from which They respectively fled.

It is therefore His Majesty's Pleasure that Your Lordships do immediately prepare, and transmit to me the Draught of such a Proclamation as may extend to the several Points above-mentioned.—But with respect to One of Them, namely the Encouragements to be offered to reduce Officers, and Soldiers, I am to acquaint Your Lordships, that His Majesty's Intentions are, To grant to such reduced Officers only, as have served in North America during the late War, and to such private Soldiers only, as have been, or shall be, disbanded in America, and are actually residing there, the following Quantities of Land, in any of the Colonies on the Continent, upon the usual Reservation of Quit—

p. 923

Rents, after the Expiration of ten Years, and upon sure Terms of immediate Settlement, & Cultivation; viz^t

To every Person having the Rank of a Field Officer....	5,000
Acres	
To every Captain	3,000
To every Subaltern or Staff Officer.....	2,000
To every non-commissioned Officer.....	200
To every private Man	50

His Majesty is also graciously pleased to offer the like Quantities of Land, upon the same Terms, to such reduced Officers of his Navy, of like Rank, as served on board his Ships of War in North America, at the time of the Reduction of Louisbourg, and Quebec in the late War.

I am farther to acquaint Your Lordships, that, as it is of the greatest Importance, that the General Plan, upon which His Majesty's Subjects are to carry on a free Trade with all the Indians of North America, should be established as soon as possible, His Majesty expects that Your Lordships will avail Yourselves of every Information in Your Power, and lay before Him, with all possible Dispatch, a System of Regulations for that purpose.

As to the Commission proposed in Your Lordships', Report of the 5th of August to be given to the Commander in Chief of His Majesty's Forces, for the government of the interior Country, if upon Experience, & future Information, it shall still appear to Your Lordships to be expedient, & practicable, You will be pleased to prepare, and lay it before His Majesty.

[4 Oct. 1763.]

I am &c.,
DUNK HALIFAX.¹

WHITEHALL October 4th 1763.

MY LORD,—In obedience to His Majesty's Commands, signified to us by Your Lordship's Letter of the 19th of last Month, we have prepared, and herewith transmit to your Lordship, the Draught of a Proclamation, conformable to the Directions contained in your Lordship's Letter; And having laid the said Draught before His Majesty's Attorney General, He has reported

[¹ George Dunk, Earl of Halifax, succeeded Hon. George Grenville as Secretary of State (Northern Department) Oct. 14th, 1762. On Aug. 21st, 1763, the Earl of Egremont died suddenly from apoplexy and the Earl of Halifax temporarily took over the duties of the department, being formally transferred to the Southern Department about Sept. 9th. He was succeeded in the Northern Department by the Earl of Sandwich.]

² A. & W. I., vol. 268, p. 227.

to us, That, the same is agreeable to Law, and to the usual Form of Proclamations.

We have only to observe to your Lordship, that, in order to save time, we have fixed the Limits of East Florida according to Our Letter to your Lordship of the 28th of last Month, presuming that our Opinion, mentioned therein, will be approved of by His Majesty.

We beg leave further to add, That as it appears to us, upon a Revision of the Report of this Board of the 8th of June last, That, it will be expedient for His Majesty's Service, and give Confidence and Encouragement to such Persons as are inclined to become Settlers in the new Colonies, That an immediate and public Declaration should be made of the intended permanent Constitution and that the power of calling Assemblies should be inserted in the first Commissions, We have therefore drawn the Proclamation agreeable to this Opinion, and have prepared the Commissions accordingly: and we humbly hope Our Conduct herein will meet with His Majesty's approbation, as we conceive, that any temporary Power of making Ordinances and Regulations, which must of necessity be allowed to the Governors and Councils before Assemblies can be called, as well as the mode of exercising that Power, will be better inserted in the Instructions, which we are now preparing.—

LITERATURE, FOR THE YEAR 1763."

(SIXTH ED., VOL. VI., LONDON, 1810.)

Chap. V.

"By the IV. and VII. articles of the last treaty of peace, Canada was ceded to Great Britain in its utmost extent. This stretched the northern part of our possessions on the continent of America from one ocean to the other. The cession of Louisiana to the Mississippi, and of the Spanish Florida on both seas, made our American empire complete. No frontiers could be more distinctly defined, nor more perfectly secured. The only object of attention, which seemed left to Great Britain, was to render these acquisitions as beneficial in traffic, as they were extensive in territory. An immense waste of savage country was evidently to a commercial nation no great object for the present; but it was a considerable one in hope, because it contained an inexhaustible variety of soils, climates, and situations, and thereby afforded ample materials for the exertion of wealth and skill in its improvement to all the purposes of trade. These exertions were not likely to be wanting, or to be ineffectual. Independent of national motives, the administration in England had a particular interest in improving those acquisitions to the utmost; they were to justify the choice they had made in preferring them to the West India islands. They therefore took very great pains to come at an exact knowledge of every thing, which could tend to render our new conquests on this continent flourishing and commercial. To this end they judged it expedient to divide them into three separate and independent governments.

The first, and most northerly of these divisions was called the government of Quebec. It is bounded on the Labrador coast by the river of St. John, or Saguenay. This river continues the boundary of the colony, as it runs from the westward, until you come to a lake, which it meets in its course, called the Lake of St. John.

To form the western boundary, an imaginary line is here drawn from that lake to another, which is situated to the southwest of it, and is called Nipissim. At this lake they changed the direction of the line, so as to make it cross the river St. Lawrence and the Lake Champlain in forty-five degrees of north

latitude; and this formed the southern boundary. From thence striking the line to the north-east, they carried it quite to the gulph of St. Lawrence, through the high lands, which separate the rivers which fall into the great river of Canada from those which fall into the ocean. This government is very short, almost upon every side, of the extent of the government of Canada, whilst it continued in the hands of the French.

They divided the southern part of our conquests on this continent into two governments, those of East and West Florida. The former was bounded towards the north by our colony of Georgia; to the east and south by the Atlantic ocean and the gulph of Florida; and on the west by the river Apalachicola.

The latter, or West Florida, was bounded on the east by the same river. Its southern frontier ran along the gulph of Mexico to the Lake Pontchartrain on one of the mouths of the Mississippi. This great river formed its boundary to the west unto the 31st degree of latitude, from which a line was struck across from the northern limit, due east, until it met the abovementioned river Apalachicola.

As to the shore of Labrador and the adjacent islands in the gulph of St. Lawrence, their value consists, in a manner wholly, in the fishery carried on upon their coasts. It is of importance to that branch of commerce to be under strict regulations; and this could never be well compassed, unless the coast, near which it is carried on, was under a single direction. With great judgement, therefore, all the coast of Labrador from the river Saguenay to Hudson's streights, and all the neighbouring islands, were put under the care and inspection of the Governor of Newfoundland. But the islands of St. John and Cape Breton were annexed, as their situation required, to Nova Scotia.

The reader will observe, and possibly with some surprise, that in this distribution, much the largest, and perhaps the most valuable part of our conquests, does not fall into any of these governments; that the environs of the great lakes, the fine countries on the whole course of the Ohio and Ouabache, and almost all that tract of Louisiana, which lies on the hither branch of the Mississippi, are none of them comprehended in this distribution. The government of West Florida extends in no part much above half a degree from the sea.

Many reasons may be assigned for this apparent omission. A consideration of the Indians was, we presume, the principal, because it might have given a sensible alarm to that people, if they had seen us formally cantoning out their whole country into regular establishments. It was in this idea that the royal proclamation of the 7th of October, 1763, strictly forbids any purchases or settlements beyond the limits of the three abovementioned governments, or any extension of our old colonies beyond the heads of the rivers which fall from the westward into the Atlantic ocean; reserving expressly all the territory behind these as an hunting ground for the Indians. The crown, however, retains its right of making purchases and agreements with the Indians.

**LORDS OF TRADE TO LORDS OF THE COMMITTEE
OF COUNCIL**

UPON MEMORIAL OF CAPT. RICHARD GRIDLEY.

Report to the Lords of
the Committee of
Council for
Plantation Affairs
upon the memorial of
Cap^t Rich^d Gridley.

B.T.N.S. VOL. 37, p. 253.

To the Right Honble the Lords of the Committee of His Majesty's Most Honble Privy Council for Plantation Affairs.

MY LORDS.—Pursuant to your Lordships Order on the 31st of December 1762, we have considered the Memorial of Richard Gridley a reduced Captain of General Shirley's first Regiment of Foot, now on half pay, praying that His Majesty would confirm to him by grant his possession of the Islands of Madelaine in the Gulph of S^t Lawrence Where he alleges to have made an Establishment, and improved a considerable Fishery for Seals and Sea Cows; and we beg leave to report to your Lordships, that tho' we think that all possible encouragement ought to be given to every usefull undertaking of this Kind, and that the petitioner may have merit in the improvements he has made, yet, as His Majesty has not thought proper to establish any Form of Civil Government in the Lands and Islands comprized within the Commission of the Governor of Newfoundland, it does not appear to us to consist with propriety to make for the present the grant prayed for by Captain Gridley.

[1 July
1764.]**PROCLAMATION OF PALLISER**

TO BRING ABOUT FRIENDLY INTERCOURSE WITH ESQUIMAUX INDIANS.

B.T. NEWFOUNDL. VOL. 18. T. 8.

By His Excellency Hugh Pallisser Governor and Commander in
Chief in and over the Island of Newfoundland in North
America &c^a &c^a

Whereas many and great Advantages would arise to His Majesty's Trading Subjects if a Friendly Intercourse could be Establish'd with the Esquemeaux Indians, Inhabiting the Coast of Labradore and as all Attempts hitherto made for that Purpose have Prov'd Ineffectual owing in a great Measure to the Imprudent Treacherous or Cruel conduct of some People who have resorted to that Coast by Plundering and killing several of them from which they have Entertain'd an opinion of our Disposition and Intentions being the same with respect to them, as theirs are towards us that is to circumvent and Kill them: and whereas such Wicked Practices are most contrary to His Majesty's Sentiments of humanity to his Concilating their Affections and his Endeavours to Induce them to Trade with his Subjects. In Conformity to these His Majesty's Sentiments, I hereby Strictly forbid such Wicked Practices for the Future, and declare all such as are found offending herein shall be Punish'd with the Utmost Severity of the Law.

And whereas I have taken Measures for bringing about a Friendly Communication between the said Indians and His Majesty's Subjects and for removeing those Prejudices that have hitherto proved Obstacles to it. I hereby Strictly enjoin and require all His Majesty's Subjects, who meet with any of the said Indians to treat them in the most civil and Friendly manner and in all their dealings with them to act with the Utmost Probity and good Faith particularly with such of them as may Produce this Certificate of their having enter'd into Treaty with me and that I have in His Majesty's Name Assur'd them that they may by Virtue thereof safely Trade with His Majesty's Subjects without danger of being hurt or Ill Treated; And I hereby require and enjoin all His Majesty's Subjects to Conform and pay the strictest regard thereto, at the same time Recommending it to both Parties to Act with Proper

Caution for their own Security till by frequent Communication
a Perfect Confidence may be Establish'd between them.

Given under my Hand
at S^t Johns 1st July 1764.

[9 Oct.,
1764.]**PALLISER TO LORDS OF TRADE**REPORTING FRIENDLY COMMUNICATION WITH INDIANS WILL PROVIDE
SECURITY FOR BRITISH SHIP FISHERS ON THE COAST OF LABRADOR.B.T. Newfoundl^d VOL. 18. T. 15.

MY LORD,—My last Letter was of the 1st Sept^r giving your Lordships an Account of my proceedings and the State of Affairs in this Government.

* * * *

From Accidents the Frigate Station'd in the Streights of Bell Isle did not get to York Harbour and Quirpont some of our People Fishing at the first Place were frightened away by the Esquemeaux Savages who came in a Body of about two hundred to Trade and Plunder as is their Practice, the French found means to Invite them over to Querpont where they Trafficked with them for what Whale Bone and Furrs they had, but this may be easily prevented the next year. The Moravian who I mentioned to your Lordships in my last being then gone to the Labradore Coast did not meet with them till late he was Able to converse with them very well in their own Language to their great Astonishment and Satisfaction, having never before met with any European that could converse with them otherways than by Signes, I think a good use may be made of this Man the next Year, inclosed is a Memorandum of what passed between him and those Savages at the interview he had with them, he goes home in the Lark with this, should your Lordships think proper to Examine him I am of opinion Measures may be taken for opening a friendly Communication with them, for gratifying them with what they want in the way of traffic and thereby provide a Security for our Fishers for Cod, Whale and Seal upon that Coast. Every encouragement to a Ship Fishery there and the North part of Newfoundland seems to me a Consideration worthy of Attention.

I am

My Lords

St Johns Newfoundland
9th October 1764.Your Lordships
Most Obedient and
most Hum^{ble} Serv^{ts}

HUGH PALLISSER.

[1764.]

**REMARKS, &c., BY PALLISER, MADE IN OBEDIENCE
TO THE SEVERAL ARTICLES OF HIS MAJESTY'S
INSTRUCTIONS TO HIM.**Reply to Article 12.
See pp. 61-62.

Remarks.

RELATIVE TO THE TRADE, FISHERY, &c. OF NEWFOUNDLAND IN
THE YEAR 1764.For my Proceedings
and, all Occurrences
that have Relation to
the first Eight
Articles I refer your
Lordships to my
several Letters of the
1st of Sept^r 9th & 21st
Octo^r & 7th of Nov^r.

B.T.N. VOL. 19.

What is here directed is very necessary for encouraging, extending & improving the Fishery, for administering Remedies to Abuses in the Out-Ports, and for enabling the Governor to judge of and to lay before your Lordships the true State of the Fisheries and Affairs of the Government; I fully intended in Obedience thereto to have gone quite round the Island and to have visited all the Coasts, but while the French had ships of War at St Pierres it was not proper to go far from them, lest they should offer any Insult or Encroachment.

Mr Cook the Surveyor employed by the Admiralty has this Year surveyed the Coast from Greguet (which is three Leag^s to the S^o ward of Cape de Grate) round that North point of the Island as far as Point Ferrole in the Gulph, which he has executed very completely, all which Coast we had not the least knowledge of before. His Drafts are delivered into the Admiralty Board.

Reply to Article 13.

Having had no Ship to spare this Year to the Northern Part of the Coast of Labrador, I have had no authentick Account about the Place mentioned in this Article by the Name of Davis's Inlet, but from the Conversation which the Moravian had with the Exquimaux Savages, as mentioned in my Letter of the 9th of Octo^r, and from the Description they gave of the Place they came from, it is probable they came from about that Place & I have Reason to believe none of them abide any where to the Southward of it. See more upon this Subject in Answer to the 13th & 14th Articles.

I am not yet sufficiently informed of all Things necessary for judging where new Establishments or Forts may be useful for securing the Country or extending the Trade & Fisheries, but upon this Subject, I take leave to observe, that, as I apprehend the Security of a Fishing Colony must ever depend upon a Naval Force, (to the Support of which such a Colony is supposed greatly to contribute) to do it by Fortifications and Inhabitants would be impracticable in such a Country as Newfoundland, which abounds with more Harbours than any known Country of equal Extent, all which in that Case, should be fortified, and would require more Expence than the whole

charge of the Navy; Yet it seems necessary to have two or three principal Posts to secure the Command of those Coasts where the Fishery is carried on. These Posts, I am of Opinion, should be sufficiently Strong to withstand a regular Attack, so long as the Season in that country will admit of such Operations by Forces to be sent that same Season from Europe & such Posts should also be so situated as to secure the Possession of a principal Harbor. No Place Answers this Description better than S^t John's which has many natural Advantages beyond any Port in the Country for its Security, and the same Expence that has been laid out upon it, for ineffectually securing it (for it never stood an Attack but was taken without Resistance) would have made it impregnable to ten times the Force that ever has been sent against it.

Having said a fishing Colony is best defended by a Naval Force, which is supposed to spring from it, I take leave to add my humble Opinion, that under the present Management of our extensive one at Newfoundland it does not afford that annual Return of Seamen to England that is generally imagined, not near the Number it might, nor scarce above half the Number the French have from their limited Fishery which I have explained in my Answer to the 16th Article & as appears by the general Scheme of the French and English Fisheries for this Year sent herewith.

Upon the Coast of Labradore, which is inhabited by Savages, some Posts, I judge, will be necessary as well for introducing a Trade with them for Fur &c. as for securing our People from their Attacks and Plunder & I am informed those inhabiting the Coast within the Streights of Bell-Isle are a docile People much inclined to traffic; those along the Coast Northward without the Streights have never been in Friendship with any Nation, but from the Interview had with them this Year, as mentioned in my letter of the 9th of Octo^r I am of Opinion a friendly Intercourse might be easily introduced & I would recommend an advanced Post as far to the Northward as possible for a trucking Place, where those Savages may be stopt from coming further Southward by supplying them there with what they want or will be most useful to them & we may procure what we want of them and thus keep the rest of the Coast open & free for our Adventurers to try whether it affords a Fishery which I have good Reasons for believing it does, both for Cod & Whale, & also for Seal which is said to be here in great Abundance. See more on this head in Answer to the last & next Article.

Reply to Article 14

The whole Trade for Fur & the Fishery, upon that part of the Coast lying within the Streights of Bell-Isle, are carried on by a few Merchants from Quebec, who having had Grants from General Murray for exclusive Priviledges for that whole Coast, have prevented any other Adventurers that way. They employ none but Canadians in that Trade and Canadean Vessels having Passes from the Governor of Quebec to come to the Fisheries, I fear will facilitate a clandestine Trade between them and the French at Newfoundland, by which French

Produce. will be introduced amongst them, and the French will by mixing themselves with them preserve an Influence & Correspondence with both Canadians and Indians, & get their Furs.

No Aliens, or Strangers have had any Communication with the Indians,

p. 936

Reply to Article 15

or Savages in this Government this Year, except what proceeded from Accident with the French at Quirpont as mentioned in my Letter of the 9th of Octo^r. For further Particulars of what is required in this Article I refer your Lordships to my Letters of 1th Sept^r & 9th Octo^r, & to my Answer to the last Article, to which I have only to add that I met with a New-England Man who some Years ago made several Voyages in a small Vessel along the Coast of Labradore, as far as the Place called Davis's Inlet, he describes it, as affording many excellent Harbors, both on the Main & in Islands, which abound with almost incredible Quantities of Cod, in Size, equal to four of those caught on the Banks of Newfoundland (some of which I have seen) also abundance of Seals & Whales. He trafficked with the Indians for a great deal of Whale-bone, and says they are not so cruel and barbarous as they have been represented. I have a Sketch of the Coast, which though rough and incorrect (being only an Eye Draught) may be of some Use, as it Marks the Situation of some good Harbors, and Stations, where he never failed to meet with the Savages.

Reply to Article 52

The Whale Fishery, in the Gulph of S^t Lawrence, is very considerable & is wholly carried on by New England Men; this Year they have had good Success & have employed about 100 Sail of Sloops & Schooners from 50 to 100 Tons each. They commonly go two in Partnership & from the best Accounts I could collect I understood they generally got as much Oil as loaded one of the Vessels, besides Whale-bone. After the Whale Fishery is over the other Vessel goes upon the Cod Fishery.

The Sea Cow Fishery at the Magdalen Islands is carried on by one Mr Gridley of New England, who, having had a Grant of those Islands from General Murray, has prevented any other Persons improving that Fishery. He employs in it only a few New England Men, the rest being French Men, who do not acknowledge themselves to be the King's Subjects, & refuse to take the Oaths of Allegiance, of which I informed your Lordships in my letter of the 21th of Octo^r.

The Indians on the Coast of Labradore within the Streights, traffick, I am informed, with a good deal of Fur, the principal Post for which having been granted by Gen^l Murray to particular People, I find they monopolise that Trade & have prevented other People either from Newfoundland or directly from Britain, going thither. Very little Traffick has been had this year, with the Esquimaux Savages without the Streights. For farther Particulars relative to these People, and for Measures for establishing a Trade and Fishery on that Coast I

refer your Lordships to my Letters of the 1th of Sept^r & 9th of
Octo^r & also to my Remarks on the 13th & 14th Articles.

No. 216.

**REGULATIONS FOR YE FISHERY ON THE COAST OF
LABRADOR, ANTICOSTI, MADELAINES AND
WHALE FISHERY IN GULF ST. LAWRENCE.**

PRIVY COL. RECORDS 1/52.

BY HIS EXCELLENCY HUGH PALLISER GOVERNOR AND COMMANDER IN
CHIEF IN AND OVER THE ISLAND OF NEWFOUNDLAND ETC.

Rules, Orders and Regulations observed on the Coast of
Labradore, and on the Islands of Anticosti and the Madelaines.

WHEREAS the property of all the land on the said Coast of
Labradore and the Islands of Anticosti and the Madelaines is in
the Crown, and since the conquest thereof no part of it has
been lawfully given or granted away and no power being
vested in me to give or grant any exclusive possessions or
privileges to any person whatever, and Whereas it has ever
been the policy of the nation to give to His Majesty's subjects
from Britain in preference to all others every encouragement to
carry on the fisheries.

In order to invite Adventurers into that extensive Field for
Fishing and Trade, I hereby order and direct that ye whole
shall be publick and free to all the King's British subjects in
preference to all others till His Majesty's further pleasure shall
be known, under the following Regulations subject to such
alterations and additions as may hereafter be found necessary
for extending and improving that valuable branch of Trade:

1. All the Rules and Regulations ordained by that excellent
Act of the 10th and 11th of William III, intituled An Act for the
Encouragement of the Trade and Fisheries to Newfoundland
shall be strictly observed on ye Coasts and Islands
abovementioned, except that Proviso in the said Act which
says (provided always that all such persons as since the 25th
day of March 1685 have built, etc.), is not to be in force on the
Coast and Islands above mentioned.

2. All British Whale Fishers are to choose places on the
shore for landing to cut up their Whales and other Oil fish and
to make their Oil as they respectively arrive with Fish to land,
observing that they are never to occupy or use any place that
ever has or hereafter may be used by any British Cod fisher.
Whale Fishers from the plantations may fish within the Gulph
of St. Lawrence for Whale only, but not for cod or any other

fish, and they may land on the said Coast and Islands within the Gulph and nowhere else,

p. 938

to cut up their Whales and to make their oil, and for that purpose may use any place that they find unoccupied and that never have been used by any British Fishing ships for either Whale, Cod or Seals, taking especial care that they do nothing to annoy or hinder any British Fishers whatever.

3. Whereas complaint has been made to me that the Whale Fishers from the plantations have a practice of turning adrift ye useless part of the carcasses of Whales to the annoyance and damage of neighbouring fishers for Cod and Seal, or else leave them on ye shore which is a great nuisance. I hereby order and direct that all Whale fishers shall convey the carcasses of the whales to at least three leagues from the shore.

4. No vessel shall be considered as a British fishing ship nor be entitled to the privileges thereof, or of being Admirals of harbors on the coast and islands above mentioned, except such as clear out from Britain the same season and carry out men to be actually employed in ye fishery and to return to Britain when the fishing season is over.

5. If any person commits murther, whether of any of His Majesty's Christian or Indian subjects on the Coasts or Islands above mentioned, or any other criminal crime, all His Majesty's subjects are hereby required and authorized to apprehend such offenders and carry them before the Commanders of any of His Majesty's Ships, or before the Admiral of any Harbor, and Oath being made before them of the fact, the Captain of any of His Majesty's ships are hereby ordered and directed to secure them, and when they join me to bring such offenders with them in order to the being tried at the general Assizes.

Given under my hand, 8th April, 1765.

HUGH PALLISER.

SURROGATE COMMISSIONS.

BY HIS EXCELLENCY HUGH PALLISER, ETC.

By Virtue of the power and authority to me given by His Majesty's Letters made Patent, bearing date at Westminster the ninth day of April in the fourth year of the reign of our Sovereign Lord George III. by the Grace of God of Great Britain, France and Ireland, King Defender of the Faith I do hereby constitute and appoint you to be my Deputy or Surrogate with full power and authority to assemble Courts within to enquire into all such complaints as may be brought before you to hear and determine the same to all intents and purposes as I myself might or would do. By virtue of the power and authority vested in me you have likewise power and authority to seize and detain in order to proceed to condemnation all unaccustomed prohibited or run goods that may be found within the aforesaid limits or ports adjacent. And I do grant and give unto you full power and authority to administer the several oaths to any person or persons you shall think fit agreeable to the several Acts of Parliament made in that behalf. And I do strictly enjoin all Admirals of Harbours, all Justices of the Peace, all Officers Civil and Military, and all other His Majesty liege subjects to be aiding and assisting you the said and to obey and put into execution all such lawful orders as you shall give unto them as I myself might or would do by virtue of the power and authority vested in me.

Given under my hand this 13th April, 1765.

By Command of His Excellency,

JOHN HORSNAILL.

Commissions delivered to:—

Captain Hamilton of His Majesty's Sloop Zephyr from point Riche to St. Barbe on Newfoundland and from St. John's River to Cape Charles on the Coast of Labradore.

Captain Saxton from Cape Ray to Ferryland.

Captain Thompson of His Majesty's Ship Lark from Trinity to Quirpont, both inclusive.

Sir Thos. Adams, Bart., of His Majesty's Ship Niger on the Coast of Labradore from the entrance of Davis' Streights to York Harbour inclusive.

Daniel Burr, Esq., on the Coast of Newfoundland from Cape Bonavista to Cape St. Francios.

**REPRESENTATION OF THE LORDS OF TRADE TO
H.M. THE KING**

[29 April,
1765.]

REPORTING ON THE STATE OF FISHERIES AND ON THE NECESSITY OF
SEPARATE REGULATIONS FOR FISHERIES ON THE COAST OF LABRADOR.

C.O. 195. VOL. 9.

To the King's most excellent Majesty
May it please Your Majesty,¹

* * * *

With regard to that part of the Coast of Labrador and the Islands adjacent thereto and in the Gulph of S^t Lawrence, which Your Majesty has thought necessary to include within this Government, it does appear to us, from the best Information we have been able to collect of the State of the Fisheries established therein, which Information however is but very imperfect, that they will require a separate Consideration, and cannot properly fall under any Regulations Your Majesty may approve for the Island of Newfoundland; for, though it be true, that an advantageous Cod Fishery may be established on some Parts of the Coast of Labrador, more especially to the northward; yet it is certain, that the Whale, Seal, and Sea Cow Fishery have been hitherto, and will most probably continue to be the principal Objects of Attention and Pursuit in these Parts of Your Majesty's Dominions.

The Plan adopted by the French for the Establishment and Improvement of these Fisheries, more especially of those for Seals and Sea-Cows, was the

¹ A portion of this Representation relating to the state of Newfoundland will be found in the series of documents relating to the History of Newfoundland. Vide infra p. 1848.

granting exclusive Leases for a certain number of Years of those Parts of the Coast and of the Islands, where these Animals frequented; and this Method was, as we conceive, adopted upon the Apprehension, whether justly founded or not

we cannot as yet determine, that any Rivalship or Interfering in those Places would, from the Nature and delicate Sensations of these Animals, absolutely destroy the Fishery; and, We find, that Your Majesty's Governor of Quebec, probably adopting the same Opinion, had pursued the same Plan; and that all these fishing Posts are now in Possession of particular Persons under Leases, subject to your Majesty's royal Approbation, from the said Governor, made before Your Majesty had declared Your Royal Intention of putting that Part of your Territories within the Government of Newfoundland.

Under these Circumstances therefore, and imperfectly informed as we are of the actual State of these Posts, either in respect to their Number, Extent, or Produce, or of the Terms for which, or the Conditions whereon, they are leased, we cannot take upon us to form an Opinion, what Regulations it may be proper finally to make in respect thereto; but as we shall not fail to direct Your Majesty's Governor of Newfoundland to make a particular Enquiry into, and to report to us a full State of all that concerns this part of Your Majesty's Dominions, and of his Government, as well with respect to the Fisheries, as the Commerce that may be opened and established with the Savage Inhabitants, we shall hope to be able next year humbly to submit to Your Majesty our Opinion thereupon, and to propose such Measures as may produce to this Nation every Advantage, that can be derived from these newly acquired Territories.

All which is most humbly submitted

[28 Aug.,
1765.]**REGULATIONS FOR LABRADOR FISHERY, 1765.**

C.O. RECORDS 194/16, T. 61.

Regulations for carrying on a Fishery
and Trade on the Coast of Labradore
distributed throughout this Government.

BY HIS EXCELLENCY HUGH PALLISER, ETC., ETC.

WHEREAS a most valuable Fishery and Trade may be carried on upon the Coast of Labradore for establishing of which on the best footing for the benefit of the nation some Rules, Orders and Regulations are immediately necessary, and above all things first to banish all disorderly people who can't be depended upon for preserving good order and peace with the savages (upon which the success of His Majesty's intentions for opening this extensive field of commerce to his subjects wholly depends), I therefore hereby order and direct that the following Rules, Orders and Regulations shall be strictly observed on all the Coast of Labradore within my Government, subject to such alterations as may hereafter be found necessary for the aforementioned purposes.

1. That no inhabitant of Newfoundland no By Boatkeeper nor any person from any of the colonies shall on any pretence whatever go to the Coast of Labradore (except Whale fishers within the Gulph of St. Lawrence from the colonies as allowed by my order of 8th April last) and if any such are found there, they shall be corporally punished for the first offence and the second time their boats shall be seized for the public use of British ship fishers upon that coast.

2. That no person whatever shall resort to Labradore to fish or trade but ship fishers annually arriving from His Majesty's Dominions in Europe lawfully cleared out as Ship fishers, carrying at least 21 men all engaged to return after the season is over to the King's Dominions in Europe.

3. That all the Rules, Orders and Regulations (respecting British Ship Fishers) ordained by that excellent Act of the 10th and 11th of William III. entitled an Act for the encouragement of the Trade and Fisheries of Newfoundland shall be strictly observed on the Coast of Labradore.

4. And as a further encouragement to British Ship Fishers the first arriving Ship in any Harbour on that Coast (besides being Admiral of that Harbour) shall have the privilege of leaving in that Harbour one small vessel not exceeding eighty tons with a gang of twelve men and no more for the next winter seal and whale fishery and no other people whatever shall stay the winter in that Harbour on pain of corporal

punishment such vessel to be properly armed for defence, and the Master to be a prudent, discreet person, to prevent anything being done to break the Peace which I made with the Carolit or Esquimaux Savages on the 21st instant, who have promised to

p. 945

live in friendship with us by night and by day, so long as we forbear to do them any harm. The Master of the 2nd arriving British Fishing Ship in any Harbour as above mentioned shall (besides being Vice-Admiral of the Harbour) have the exclusive right to all the Salmon fishery in that Harbour during that season. The Master of the 3rd arriving British Fishing Ship as aforementioned (besides being Rear-Admiral of the Harbour) shall enjoy in common with the 1st and 2nd ships the exclusive privilege of trafficking with the savages, under the Regulations prescribed in the following article.

5. The Master of the 1st, 2nd and 3rd arriving British Fishing Ships in any Harbour on the Coast of Labradore shall equally enjoy an exclusive privilege of Trading with the natives that may come within limits of that Harbour (the precise limits belonging to each harbour to be hereafter ascertained and made publick), and no other persons whatever shall have any trade or truck with the savages on forfeiture of all goods so trucked for to be equally divided among the three Admirals of that harbour, and to lose their liberty of fishing on the Coast for that year.

That within the limits of each harbour a proper place shall be fixed upon by the Admirals at a proper distance from all the fishing stages where they are to make a barrier for trucking with conveniency and safety with the savages, and on no account to suffer their people and the savages to mingle together. And if either of the Admirals truck with them at any other place within or without the limits of their own port such Admiral shall forfeit all the goods trucked for to be equally divided between the other Admirals, and also to forfeit all his privilege as Admiral for that season, and for better preventing confusion and for preserving peace with the savages all further Regulations or Orders that may be made by the Commanders of any of His Majesty's Ships stationed on the Coast of Labradore for the time being shall be strictly conformed to.

6. All British Fishing Ships as well as the Admirals of the Harbours during the summers fishery for Cod, that is from the time of their arrival to the time of their departure may also carry on the whale fishery. This the early arriving ships may do with great advantage their being abundance of Whales on the Coast in the months of April, May and June.

Given, etc., in Pitt's Harbour the 28th August, 1765.

HUGH PALLISER.

**EXTRACTS FROM GOVERNOR PALLISER'S
DISPATCH TO EARL OF HALIFAX
(AT THE ADMIRALTY).**

C.O. RECORDS 194/27.

In consequence of the French Ambassador's Memorial, in April last, relative to their people trafficking with the Labradore Savages, and my answer to it of the 13th of April, I hope Your Lordship will approve of this Order upon that subject.

From the Coast of the Petit Nord I went to the Coast of Labradore, for better enabling me to form judgments & make reports to Your Lordship for His Majesty's information, what advantages His Subjects may reap from that Coast, as also to endeavour to have an interview with the wild Savages of that Country, and, in obedience to His Majesty's commands, to endeavour to conciliate their affections, & establish peace & friendship with them; accordingly I had the luck to meet with a Party of near 500 (Men, Women & Children included) of the Wild Carolit or Esquimaux Savages, from the North Coast of Labradore, & by means of one of the Brethen of the Unitas Fratrum, who speaks their language, & who came from Germany on purpose with a view of sending Missionaries amongst them, I first explained to them His Majesty's affection & gracious intentions towards them, & in his name offered them protection from all People whatever, & invited them to live in peace & friendship with us, they joyfully accepted the Offer, & promised to live in peace & friendship with us by night & by day, so long as we forbear to do them any harm, notwithstanding these People have the character of being the most treacherous, cruel & barbarous of all Savages ever known, and with whom no Europeans have ever had any friendly intercourse longer than for a day; yet with the advantage of conversing in their own language, (which no European ever did before) with kind usage & fair honest dealing, I have not the least doubt of these People being soon reconciled, & made a very useful People to His Majesty's Subjects, as an introduction to measures for this end, I found it necessary to make them a small present, and not being furnished with anything for this use, I was obliged to take things of the Merchants, amounting to £18 12s. which I pray Your Lordship will please to Order to be repaid to me, after this I carried them to Our Merchants, who trucked for Whalebone & Skins, with English Goods at a profit of eight or nine hundred P.C^t. I will not trouble Your Lordship with an

Account of the several useful informations collected from these People, nor of the discoveries made by a King's Vessel I

p. 947

sent to explore the Coast to the Northward towards Davis's Streights, and to make remarks usefull to Trade & Navigation, with another of the Brethren of the Unitas Fratrum, on board, as I shall lay all before the Board of Trade at my return to England, upon the whole I will only observe to Your Lordship, that under proper Regulations (for on that all will depend) I am of opinion that Coast will prove a most valuable source of wealth and strength to the Nation, and as some regulations were immediately necessary for preventing the more savage ungovernable inhabitant Fishers of Newfoundland getting footing there, & defeating all future measures for these ends, I issued an Order (No. 7) to be in force till some other shall be made under authority of Parliament.

I am &c.

(Signed) HUGH PALLISER.

C

MINUTE OF COMMITTEE OF PRIVY COUNCIL

RELATIVE TO THE STATE OF THE FISHERY OF NEWFOUNDLAND.

P.C. 2. VOL. III.

Extracted from the Minutes of 24 October, 1765.

The Lords of the Committee this day took into their Consideration several Representations from the Lords Commissioners for Trade and Plantations relative to the State of the Fishery of Newfoundland, and finding that the information at present before them not sufficient to enable their Lordships to report a decisive opinion to His Majesty thereupon, were pleased to postpone the further Consideration of this affair for the present.

[30 Oct.,
1765.]**GOVERNOR PALLISER TO LORDS OF TRADE.**COLONIAL OFFICE RECORDS 194/16, T. 57 & PRIVY COUNCIL
RECORDS 16/52

MY LORDS—

Before I left England, His Majesty signified his commands to me upon matters relative to the French in this Government, by one of his Principal Secretaries of State through the Board of Admiralty. I have therefore from time to time transmitted accounts of all occurrences upon such matters through the same channel for His Majesty's information.

And now the fishing season is over I shall according to His Majesty's instructions receiv'd from your board lay before your Lordships accounts of all such matters as seem proper for your information concerning the trade and fisheries.

Having had no particular instructions concerning the new conquered lands annex'd to this government, and having the last year experienced the want of some regulations on those coasts, I thought it necessary to make some before I left England for the guidance of the commanders of His Majesty's ships on their respective stations, a copy is the inclos'd paper marked (No. 1) by those coasts and islands being annex'd to the Newfoundland government. I understood the fisheries there are intended to be governed by the same principals of policy as that of Newfoundland ought to be, that, to be a British not an American fishery. I have, therefore, by those regulations admitted only American whale fishers within certain limits and under certain restrictions : this I judged proper, apprehending people from Britain will not so readily undertake it within the Gulph of St. Laurence, therefore that so valuable a branch of the fishery might not in the mean time be lost, I thought it proper to allow this privilege to the Americans, but strict measures must be taken for preventing them doing mischief on the coast and from carrying on the cod fishery in the government, which is ruinous to the British cod fishery, more especially as they do and always will deal, with the French at St. Pierres, and at the Petit Nord, I have therefore given strict orders that no vessels from the plantations shall resort to any part of Newfoundland between Cape Bonavista and Point Riche.

The salmon fisherys in this country being capable of great improvement I have published an order (No. 2) for encouraging new undertakers which has not yet had time to produce the effects intended, but many people have

assured me, that they will the next year come out provided with nets and tackle now they know they can have liberty to use them.

The Paper (No. 3) is a Copy of what I caused to be dispers'd amongst our People who went to Labradore this year, as Preparatory for Facilitating measures for carrying into Execution that part of His Majesty's Instructions for Conciliating the affections of the Savages, and for Introducing a Communication and Commerce with them.

For enabling me to make proper Reports in Order to your Lordships forming a Judgment of the nature and Disposition of those People and of what Advantages His Majesty's Subjects may hope to reap from that Coast, I went there myself, and met with a party of between Four and Five Hundred of those Savages who come yearly from the North down to the Streights of Bell Isle and by means of the Brethren of the Unitas Fratrum, I had many interviews and conversations with them, for an account of the informations we got from them. I refer your Lordships to a narrative of what passed at the interviews I had with them, which I shall lay before you at my return to England; therefore will here only add my opinion that those people who have hitherto been so much dreaded, may in a very short time by kind treatment and fair dealing, be made exceeding usefull people to His Majesty's Subjects, they are expert whale catchers and naturally fishers, are almost amphibious creatures, living constantly on little Islands along the coast, and subsist almost wholly upon fish.

I am likewise of opinion that under proper regulations that coast may prove a source of great wealth and naval strength to the nation, and as some regulations seemed immediately necessary for preventing our far more savage and ungovernable inhabitants of Newfoundland, from getting footing there, I have published some rules and orders which I judged proper in the present state of things till your Lordships shall make others, a copy thereof is (No. 4) by it your Lordships will observe that I have endeavoured to link the cod, whale, seal and salmon fisherys together, in such manner as to me seemed best for encouraging adventurers and for raising a spirit of emulation amongst them, could some societys of merchants from the trading Towns in England (where they are not already engaged in the sloathfull monopolizing method of carrying on the Newfoundland Fishery) be engaged with a due mixture of Greenland Whale fishers and cod fishers, to try the Coast of Labradore, I think they and the publick would soon find their account in it, but these are imperfect hints which I submit to your Lordships better judgment.

I must acquaint your Lordships that the Brethren of the Unitas Fratrum have taken great pains as well in the business of their mission as in assisting me in matters for His Majesty's service. I therefore take leave to mention them as very worthy of that countenance and protection which His Majesty and your Board are pleased to honour them.

I am also to acquaint you that the inhabitants carrying on a fishery upon the Coast of Labrador, established there by grants from General Murray, are also clandestine traders as well with the Islands St. Pierre and Miguelon as
p. 950

directly from France, one of their vessels from Bordeaux going in at the Streights of Bell Isle run ashore on the Coast of Labradore near to the place where I was, between 50 and 60 tons of wine of her cargo was saved and seiz'd.

I am,
My Lords, Very respectfully,
Your Lordships
Most obedient and most humble servant,
HUGH PALLISSER.

ST JAMES'S 20th Dec^r 1765.

Case of Cap^t Philibot.

Commod^{re} Palliser,

SIR,—By M^r Secretary Conway's directions I inclose You a Copy of the Case of Capt. Philibot, and am to desire you to let me know for M^r Secretary Conway's Information how far he is founded in his Allegations.

I am, &c^a.

WILLIAM BURKE.

*sic.

Copy.

The Case of Captain Philibot.

In August 1763 Governor Murray (for the reasons mentioned in his Letter of recommendation to Gen^l Conway) gave to Cap^t Philibot the Post of Forteaux on the Coast of Labrador for 4 Years for the purpose of curring Seals caught in certain limits; on the following conditions. That the Governor only granted this Priviledge as far as in him lay, till the Kings further Pleasure was known, & provided no other just claim could be laid thereto.

In August 1765 Gov^r Palliser who stills* himself Commander in Chief of Newfoundland the Coast of Labrador &c^a published an Instrument for the reasons he gave General Conway before he left the Coast) importing that no Person from any of the Colonies should on any pretence go to the Coast of Labrador except whale Fishers, on pain of the Penalties therein set forth, or be suffered to Winter there.

Therefore these subsequent Orders of Gov^r Palliser having rendered void the Grant of Gov^r Murray above-mentioned Cap^t Philibot by virtue of this Grant of the latter has entered a formal Protest against the former for having refused him any longer access and admittance to the Post of Forteaux & an account is delivered in to Gen^l Conway by Capt. Philibot, & his Owners of the prime or first Cost of his Ship; of the Expense of fitting her out, & the Effects she had on board when she was forced to return to Quebec, & of the Effects belonging to him & the other Proprietors, left at

the Post of Forteaux, all which objects they value at about £1870 of Province Money.

Observation.

No absolute demand seems to be made for the 1870£ nor indeed could it be demanded because tho' Gov^r Palliser annulled the Priviledge granted by Gov^r Murray (who seem'd diffident of his Authority to allow such Privileges) still the only positive Injury done Cap^t Phillibot, & the other Owners by Palliser was the seizing or destroying their Effects left bona fide, if he did destroy them which I cannot find was or was not the Case by these Papers at the Post of Forteaux which they estimated at no more than TM680 of Province Money for the Vessel & her Cargoe; tho' disappointed in the View with which she was fitted out, returned untouched to Quebec, tho' it is apparent the Proprietors must from this Circumstance have been at an obvious useless Expense. How far Captain Philibot as an Individual is an Object of the Governments Notice, is another Consideration.

PALLISER'S ANSWER TO PHILIBOT'S CASE.

B. T. NEWFOUNDL^D VOL. 18. T. 56.

Copy.

Murray.

21st December 1765.

Murray.

As to the Particulars said to be set forth in the Case of Capt. Philibot, I know nothing of, nor of Him, having never heard his name before; but I can undertake to assure M^r Secretary Conway that no Damage has been done to any Vessels, or Effects of the said Philibot, as is suggested, either by me, or any other Person under my Government; His real Complaint seems to be against the Regulations made by me last Summer, for the Coast of Labrador, by which He is no longer to enjoy the exclusive Privileges pretended to be granted to Him by Gov^r *Merry*; I am informed many Grants of the same kind for all the best Fishing Places, including above 140 Leagues of Sea Coast within my Government, are extant from Gov^r *Merry*; How, or upon what Terms, those Grants have been obtained I know not, but I have been informed, they are for Three Years, The Grantees have enjoyed the Advantages of the Grants during that Time, therefore may be supposed to be reimbursed any pretended Expences, besides they have had ample Notice of those Grants not being valid, as well by His Ma^ty's Proclamation in 1763, for establishing the Bounds of The New Governments in which it is expressly

p. 953

said The Fisheries shall be open & free to His Majestys

Subjects on The Coast of Labrador,) as by Notice from the Officers that I have Yearly sent along that Coast.

Murray.

The Consequence of those Grants, is, that hitherto no other Persons have ventured to undertake any Fishery upon that Coast, & the People to whom these Grants were made, instead of carrying on The Fishery, have used those Posts (as all Setlers upon These Coasts allways do) only for carrying on a Clandestine Trade with the French at Petit Nord, at St Pierres, & even directly with France, for supplying all Canada with French Goods & Manufactures; they also admit many Frenchmen amongst them, of all which, I have the fullest Proofs in my Hands; It was therefore Time, & my indispensable Duty, to anull those monopolizing pernicious Grants from Gov^r *Merry*, so injurious to the Rest of the King's Subjects, so prejudicial to the Shipping, Trade & Manufacturers of this Kingdom, & to lay the Fisheries open to all His Ma'ty's Subjects from Britain, & not suffer it to run into a Colony Fishery, but keep it a free British Fishery agreable to the Laws, & to what has ever been the Policy of the Nation respecting the Fisheries.

Since publishing my above mentioned regulations, several Gentlemen have assured me (& I am informed of many more) that will now immediately undertake the Fisheries on that Coast, with Ships & men from Britain, as Capt. Philibot may do under those Regulations, a copy of which I had the Honor to transmit to M^r Secretary Conway from that Coast, by which I have linked together the several Branches of the Fishery and Trade as seemed best for encouraging new adventurers, & which I am satisfied will have the desired Effect, if an End is put to all Expectations of obtaining exclusive Grants & Privileges; in that Case, (but not otherways) I am confident that Coast will very soon prove a most valuable Source of great Wealth, & naval Strength for the Safety of this Kingdom.

HUGH PALLISSER.

P.S.—The Post of Forteaux is about the Middle of the above mentioned Extent of 140 Leagues of Sea Coast.

[19 March,
1766.]**GOVERNOR PALLISER'S REPORT TO BOARD OF
TRADE.**C. O. RECORDS, 194/16 T. 79 & 80.
PRIVY COUNCIL RECORDS, 1/52.

SIR,

Please to acquaint the Lords Commissioners for Trade and Plantations, that before the Date of your Letter of the 1st May last, Inclosing by their directions, heads of enquiry's for me to make respecting that part of the Coast of Labradore within my Government, the King's Ships were sailed for their respective Stations, therefore I had not the Oportunity of giving the Captains the necessary Instructions for Collecting such Accounts as to enable me to give Satisfactory Answers to all their Lordships' Query's.

I therefore could make no other certain Report thereon, than what you will find relative to that Coast in my Letter of the 30th Oct^r last from Newfoundland, and in the latter part of my General Report upon the Fishery's sent to the Board the 18th Dec last.

But as their Lordships' yesterday seem'd to express a desire to have some farther Information with my Remarks and Opinion respecting that Coast, be pleas'd to lay before their Lordships, the Inclos'd Copy of their Query's with my Answers and Remarks annexed as far as I am able to give any; which I wish may prove of any use for enabling their Lordships to propose such Instructions as may be a proper Encouragement to English Adventurers to carry on the Fishery's and Trade on that Coast.

* * * * *

Signed: HUGH PALLISSER

P.S.—I also herewith send a draft of the Place where the Esquemeaux's reside, which I beg to have again, as I shall want it for the use of the Captain of y^e Ship which I intend to send thither this year.

No. 229.

(Enclosure in No. 227.)

HEADS OF ENQUIRY

RESPECTING THE STATE OF THAT PART OF THE COAST OF TERRA
LABRADOR, COMPRIZ'D WITHIN THE COMMISSION TO THE
GOVERNOR OF NEWFOUNDLAND, WITH GOVERNOR PALLISER'S
ANSWERS.

B. T. NFDL^D. Vol. 18. T. 80.

QUERY'S.

1st What is the Extent of
the Coast of Terra Labrador
under Your Government.—

2^d What is the Nature of
the Soil and Climate; what
are its natural or improv'd
Productions, & are any, or if
any, what Parts thereof
Adapted to Inhabitancy—

ANSWERS.

From the River St John,
which is the Western
Boundary, to Cape Charles
which is the Eastern
Extremity is 150 Leag^s &
from Cape Charles to the
Entrance of Hudsons
Streights is 160 Leag^s more,
making together an extent
of 310 Leagues of Sea
Coast.—

The Climate is much the
same as in Newfoundland,
is too severe to Admit of
any Cultivation or
Improvements, the summer
being so Short, that nothing
except a little Garden Stuff
can ever be brought to
Maturity; it is not capable of
any Produce to Subsist
European Inhabitants,
therefore no part of it is
adapted to Inhabitancy, its
natural Produce is nothing
but Woods, there is great
tracts without any Wood,
being nothing but bare
Rock, or covered only with
a deep Moss.—

3^d What are Ye Principal Rivers, Bays or Harbours; their Situation & Capacity; and what Convenience do they afford either for Navigation or Fishery.

The Coast not being yet Survey'd & but little frequented, I cant be particular in my Answer to this Article, but in general can say, that the whole Coast abounds with Excellent Harbours, Infinite (sic) Numbers of Islands and all sorts of Conveniency's for Fishery's.

p. 957

QUERY'S.

4th What is the Nature and Extent of Y^e different Fishery's carry'd on upon that Coast whether of Whales, Seals, Sea Cows, or any other Species.

ANSWERS.

The Fishery's that may be carry'd on upon this Coast is for Cod, Whale, Seal, and Salmon, each are in great Abundance and of the best Kinds—that for Cod, was carry'd on to a considerable Amount by French Ship Fishers from Old France—that for Whales within the Gulph, the French reap'd little or no Advantage from, being a Monopoly to certain People who Paid an Acknowledgement to the Gov^r of Quebec for a Licence, so that I am inform'd never above two or three Ships were Employ'd on it. The Seal & Salmon Fishery and the Indian Trade, was in like manner carry'd on under Exclusive Grants from the Governor of Quebec, the Whole Coast as far as Cape Charles was divided into Districts or Posts, and Granted in Monopoly as aforementioned, the Exact Limits of each or any of those Posts I have not been able to Learn.—

5th What Establishments have been made for these Fishery's, at what Places and under what Authority.

Governor Murray of Quebec has (as I am Inform'd) taken upon him,

in imitation of the Maxims of the French Government, to make exclusive Grants of that Coast from S^t Johns River as far as Cape Charles, therefore no British Adventurers have hitherto Offer'd to go there, the Conditions or tenor of those Grants I am a Stranger to, other than by Reports.—for the reasons set forth in my Letter to the Board of the 30th Oct^r and in my Answer to the Case of Cap^t Philibot which their Lordships have now before them; I hope their Lordships will Approve of my having Annulled those Grants, and warn'd those People settl'd there under them, to quit that Coast till His Majesty's Pleasure shall be known thereon.—

6th Are any Posts Occupy'd or possess'd under exclusive Grants or leases from the Governor of

What is said in the foregoing Article is in part an Answer to this, I know of no titles deriv'd from the Crown of France to Monopolies in Fishery and Trade that can be

p. 958

QUERY'S.

Quebec, or claimed or held under any Title derived from the Crown of France while that Country was in her Possession, if so, by whom, under what conditions, and for what Term? and if any Rents are reserved what is the Amount? to whom payable, and whether any, or what part thereof has been Paid, and to whom? and what Remains due.

ANSWERS.

binding to the English Government, such English settlers from Quebec as have Adress'd themselves to me, since I warn'd them to quit the Coast, Pleaded Governor Murray's Grants; on explaining to them/that such Grants are Injurious to the rest of the King's Subjects, were illegal, even if that Coast had been within his Government; they then said they Claimed under the common Rights

of British Subjects, to take and hold Possession of any place not before Possessed by any other Person, on telling them my Opinion, that, that could not be allowed, without the King's Permission, which in that case would be signified to me, as all the Land is in the Crown, and rejecting some overtures to be concerned wth them if permitted under my Authority to hold those possessions, they seemed then to intend to try to derive a right under some Seigniorys, Granted by the Crown of France, to great Officers and others in the French Service, this is what I don't understand, but it should seem M^r Murray (who had in his Custody the Archives and Records of the Country) thought such Pretensions of no Weight, when he made those Grants by his own Authority, the several Particulars in the latter part of this Query, I am not able to make any Answer to.—

7th What is the extent of each Post so held or Claimed as well along the Coast, as within the Land, the Number of Men and Vessels employed at each, and the Quantity of Fish or Oil anually produced therefrom? and what is the peculiar Fishery carry'd on in each.—/

I have never been able to Learn with certainty the extent of each or any of the Posts Granted as aforementioned by Gov^r Murray, but have understood they were from 30 to 40 Leag^s Sea Coast Each; Inclos'd is a Copy of the Exactest State of the Labradore Fishery's that I have been able to get, with a Letter that inclos'd it, from one of those settlers from Quebec, from this Account & Letter, I extracted what I mentioned relating to Labradore; in my Report to the Board on the Fishery's in General the 18th Dec^r last.—/

QUERY'S.

8th What is the Nature & Disposition of the several Nations on Tribes of Savages Inhabiting the Country.—

ANSWERS.

The Savage Inhabitants on this Coast may be distinguished into two distinct Nations on People.

(1st) All those within the Streights of Bell Isle Inhabit inland, far from the Sea Coast, and are called the Mountainere Savages.

(2^d) All those inhabiting without the Streights of Bell Isle, and to the Northward towards Hudsons Streights, are called by the Europeans Esquimeauxs, but they call themselves Carolits, we have yet but a very Imperfect knowledge about those People, I must therefore refer their Lordships to the Narrative on Journal delivered them by the Missionaries of the Unitas Fratrum.

The Savages called Mountaineres are represented as a Pucelanemous, harmless People, adicted much to stealing & drinking to excess, both which they have been taught by the Examples of Europeans, of their Numbers on Places of abode very little is kown, they come down to the Coast in greater on less Numbers, according to the treatment they have met with the Preceeding Year.—

The Carolits on Esquemeauxs, are also great thieves, but will taste no Liquor, are a more subtle enterprizing People, yet exceeding timerous & Jealous of y^e Europeans, both which may with great Justice be atributed to the Barbarous treatment they

9th What Traffick on
Comerce is on may be
Establish'd on carried on
with those Savages; and if
any

continually experience from
our People, notwithstanding
which, I am satisfied they
may be easily Civilized,
which would be of great
advantage to the Trade of
His Maj^s Subjects, and for
this End I most Humbly
recommend to their
Lordships favour, the
Brethren of the Unitas
Fratrum, for such Grants or
Encouragements as may not
be Inconsistent with the
rights & Interests of the
nest of the King's Subjects,
respecting Fishery and
Trade.

Tho' our Accounts are yet
very Imperfect on this
Head, I am satisfy'd a very
Advantageous Traffic may
be carry'd on (under proper
Regulations) with Y^e
Mountainier

p. 960

QUERY'S.

such Traffic is Establish'd or
carry'd on, at what Places,
and under what
Regulations?

ANSWERS.

Savages for Furs, but this
will depend on Keeping at
the beginning all disorderly
People off the Coast.—
What little Trade has
hitherto been carry'd on
with them, has been by the
settlers from Quebec, and
the New England Whale
Fishers, who by their
Barbarities and
Irregularities, will keep that
Coast in a constant State of
War, and render it
inaccessible to any of the
King's Subjects, I can partly
answer for the Conduct of
regular English Ship
Fishers, but none else.

This together with what I
have before said in my
Letters to the Board of the
30th Oct^r, and 18 Dec^r last, is
all the lights at Present in

my Power to furnish their
Lordships in these matters.

HUGH PALLISSER.

**REPRESENTATION OF THE LORDS OF TRADE TO
H.M. THE KING,
REPORTING ON STATE OF THE COAST OF
LABRADOR.**

C. O. 195. VOL. 9.

To the King's most Excellent Majesty.

MAY IT PLEASE YOUR MAJESTY*

* * *

Having thus humbly brought into Your Majesty's View every Fact and Material relative to Newfoundland separately considered, it only remains for us to make some Observations upon what relates to the State of the Coast of Labrador, and the other Territories annexed to this Government after the Conclusion of the last War: and we observe, that in that Part of the Representation made to Your Majesty by our Predecessors on the 29th of April 1765, which relates to the State of these Territories, they proposed to offer to Your Majesty's Consideration this Year such Measures as in their Judgement might be proper to be pursued in respect thereto; And to the End that they might be enabled to do this with the greater certainty and Precision, we find that they did soon after give Instructions to Your Majesty's Governor for the Obtaining and Reporting to them full Information of the State of these Territories in every minute Circumstance of commercial Advantage, that either had been or could be derived from them; but it having unfortunately happened, that the Ships, appointed for the Service of those Coasts and Islands, were gone out before Your Majesty's Governor received these Instructions, so that it was impossible for him to make that compleat Return which they require; we find ourselves deficient in those Lights and that Information which can enable us fully to answer what Appears to have been the Intention of our Predecessors in respect to this Object.

Difficult however as it would be, under this Circumstance of Want of Information, to form any perfect or permanent Plan of Measures to be pursued for Securing to this Kingdom all the Advantages which the Coast of Labrador is capable of producing; yet we trust that Your Majesty will be of Opinion,

[¹ The portions of this representation dealing with the state of Newfoundland will be found in the series of documents relating to the History of Newfoundland, vide p. 1856, *et seq.*]

that so valuable a part of Your Majesty's newly-acquired Territory should not remain without some commercial Regulations, until from further Information a more perfect Plan can be formed; and for the better enabling Your Majesty to form Your Judgement, as well upon the temporary Regulations which Your Majesty's Governor has thought it necessary to establish in respect to these Territories, as upon what may be thought further Necessary, we humbly beg leave to annex the Reports which he has made to us, since his Return, of the State of Labrador and the Madelaine Islands, and of the Nature and Extent of the Fisheries carried on there.

It appears to be the Opinion of Your Majesty's Governor, that the greatest Object of commercial Benefit to be derived from this Coast is that of a Cod Fishery, more abundant and more advantageous in every Respect than that carried on upon the Coasts of Newfoundland; and that the Seal and Sea-Cow Fishery, which our Predecessors in Office appear in their Representation to Your Majesty to have considered as the principal Object of commercial Regulation in these Territories, neither has been nor ever can be other than a secondary Object of Attention, confined to particular Parts of that Coast, and carried on at a Season when it will not interfere with the other more important Fishery for Cod; for, although it be true, that the French had established several exclusive Posts upon the Coast of Labrador for the purpose of carrying on in the Winter Season a Fishery for Seals and Sea-Cows, and a Traffic with the Savages; yet the Governor represents, that a considerable Ship Fishery for Cod was carried on upon the Coast of Labrador by Ships fitted out from the Ports of old France.

This appearing to Your Majesty's Governor to be the Plan of Policy adopted by the French and prosecuted with great Success and Advantage, and seeing that it did in the general Principles of it conform to the Policy which had been antiently adopted in respect to the Cod Fishery in Newfoundland, he thought it his Duty to establish those Regulations for the Fishery upon these Coasts, which are before referred to, and which at the same Time that they promised to, secure to this Nation the Benefit of a Ship Fishery for Cod, tend to induce those whom Interest should engage in this Pursuit to avail themselves of every Advantage that could be derived from the Oil Fishery, and from a Traffick with the Savages, leaving to the American Fishers, who appeared to have largely engaged in the Whale Fishery on that Coast, the full Pursuit of that beneficial Object, subject only to such Restrictions and Regulations as were thought necessary to prevent abuses in particular Persons, which had operated to the prejudice of the public Interest in general. These Regulations, Copies of which we humbly lay before Your Majesty, will inform Your Majesty of every Step which has been yet taken with regard to this Part of Your Majesty's Territory; But how far these Regulations are in point of Policy or in any other Respect proper and expedient, must be submitted to Your Majesty's Determination.

The Circumstances, which seem to us to require a separate Attention in the general Consideration of whatever general

First—The exclusive Posts established upon this Coast by the French for the purposes of Seal and Sea Cow Fishing, and continued under temporary Leases from the Governor of Quebec.

Secondly—The State of the Malelaine Islands, and

Thirdly—The Mission established on the northern Part of the Labrador Coast the last Year by the Society of the Unitas Fratrum under the Countenance and Protection of Government.

The only Difficulty, which occurs to us in the Consideration of what may be proper to be done in respect to the exclusive Posts on the Coast of Labrador, is the nature of the Tenure under which they are held and claimed; for if, as we apprehend, they depend only upon the temporary Leases granted by the Governor of Quebec, it appears to us, that they ought to be, as they actually have been, set aside by the Regulations established by your Majesty's Governor, which do in our humble Opinion point out a Method, by which this Kingdom may avail itself of the Benefits of an Oil Fishery, without the Continuance of exclusive Possessions in the Hands of Americans, operating as Monopolies and to the Establishment of an illicit Importation of foreign European Manufactures and Productions, to the Prejudice of the Revenue and the Commerce of this Kingdom; but if, on the Contrary, the Tenure of these Posts shall appear to be such as to fall within the Description of that Property, reserved to the Inhabitants of Canada by the Treaty of Paris, it may be a doubt, how far it may be in Your Majesty's Power to abolish them.

With respect to the Madelaine Islands it appears unto us, from the best Information we have been able to receive, that no other use or Advantage either ever has been or can be made of these Islands than for the Establishment of Oil Fishery, which, from the nature of it, as well as from the small Extent and peculiar Situation of these Islands, must be exclusive in some one Person; and therefore Your Majesty may, if you think it advisable, either grant the said Islands in Fee simple or upon Lease for years, on such Terms and Conditions and for such Rent as shall appear to be adequate to the Advantages accompanying a beneficial Grant of this Kind.

It is unnecessary for us to trouble Your Majesty with every Circumstance relative to the Mission of the Society of the Unitas Fratrum; it will be sufficient for us to say, that the Object of it is so commendable in itself, and the Conduct of those, who went out last Year upon this difficult and hazardous Service, appears by the Report of Your Majesty's Governor to have been so meritorious and prudent, that, independent of the

public Advantage arising from the Discovery of a Coast hitherto unknown and unexplored, does seem to us to recommend them to Your Majesty's further favour and Protection; and therefore we submit to your Majesty, whether it may not be advisable, that Your Majesty's Governor should be instructed to allow this Society to occupy such a District of Land, not exceeding one hundred thousand Acres, upon the Coast of Labrador, as they shall think best situated for the purpose of their Mission; reserving however to all Your Majesty's Subjects a full

p. 964

Right of carrying on Fisheries within the said District, and making such Regulations for the Peace and Welfare of the Persons, who shall establish themselves in this District, as shall appear to be reasonable, and necessary, and tending to promote so pious and laudable an Institution.

All which is most humbly submitted.

No. 232.

**MEMORIAL OF SUNDRY MERCHANTS OF THE
PROVINCE OF QUEBEC**CONCERNED IN FISHERIES ON COAST OF LABRADOR.¹

COL COR: NEWFOUNDLAND. VOL. 2.

Copy.

No. 1.

To the Right Honourable the Lords Commissioners for Trade and Plantations.

The Memorial of Sundry Merchants, whose Names are hereunto Subscribed, settlers in His Majesty's Province of Quebec, and of others Concerned in the trade of the said province, Humbly Sheweth,—

That whilst the province of Quebec was in the Possession of His Most Christian Majesty, the Coast of Labrador was a part of the dependencies of the Government of Canada, and that several Inhabitants of the said province procured Grants from the Governors of Canada of sundry Settlements & fishing posts upon the said Coast, particularly upon that part thereof which is situate within the Streights of Belleisle, which Grants were afterwards duly ratified & confirmed by His Most Christian Majesty.

That upon the Reduction of Canada by His Majesty's Arms it was stipulated amongst other things that the Inhabitants of that Country should retain the possession of that real & personal property, and that such of them, as were inclined to remove to Old France, should be at liberty within a Certain limited time to alienate their property to British Subjects.

That upon the faith and Confidence of the terms of Capitulation, some of Your Memorialists purchased within the time limited by the said Articles of several of the proprietors of the said Settlements and posts their Right & Interest therein for a Valuable Consideration, and others procured from His Excellency General Murray Governor of the province of Quebec Grants of several other settlements and posts which were at that time unoccupied, and which said Grants given by General Murray were Antecedent to His Majesty's most gracious proclamation of the 7th October 1763, whereby the Coast of Labrador was annexed to the newly-established Government of Newfoundland.

*sic.

That His Majesty having been most graciously pleased by His Royal Proclamation above mentioned expressly to invite His Subjects without distinction to extend the Fishery carried

of Your Memorialists and others His Majesty's Subjects residing in the province of Quebec being desirous of availing themselves, of the Seal fishery, which at great Hazard & expence had been established within the Streights of Belleisle, put themselves to a very Considerable expence, in Order to Carry on, extend & improve the fishery, which if they should be permitted to exercise without hindrance or Molestation, would prove not only Advantageous to the Individuals Concerned therein, but highly beneficial to Great Britain.

That some of your Memorialists and others His Majesty's Subjects, Adventurers in the said fishing, being possessed of the Rights, and encouraged by the proclamation hereinbefore mentioned were in the Course of the last Years fishery dispossessed of their posts, their fishing tackle, and Utensils necessary for Carrying on the said fishery, which had been provided at a great expence, were seized, burnt and destroyed, & they otherwise greatly Molested in the enjoyment of what they Apprehend were their legal rights, and much injured and oppress'd by His Excellency Hugh Palliser Esq^r Governor of the Island of Newfoundland, and the Coast of Labrador, &^c and certain other persons Acting under his Authority.

That the said Governor Pallisser published Certain Orders, Rules, & Regulations to be Observed on the Coast of Labrador, &ca. bearing date the 8th of April and 28th of August 1765, whereby, among other things, the said Governor arbitrarily imposes illegal and unwarrantable Restraints and Restrictions upon His Majesty's Subjects inhabiting His Colonies in America, and takes upon himself to declare, that Offenders against the said Orders, Rules and regulations shall be punished with Corporal punishments, & Confiscation of their goods and effects.

That your Memorialists have Ready to produce Copies of the said Orders, Rules, and Regulations, by which it will appear (as they are advised) that the same are illegal, oppressive and prejudicial to the Rights & priviledges which the Inhabitants of the province of Quebec are entitled unto, as British Subjects.

That Nevertheless the said Governor Pallisser pretends that the said Orders, Rules, & Regulations, and the Molestation and Disturbance given to some of Your Memorialists and others, as herein above set forth, were issued and given by him in Consequence of Certain instructions alledged by him to have been Received for that purpose from this Honourable Board, or under some powers otherwise vested in him, sufficiently Authorising him so to do, And your Memorialists further Shew unto your Lordships,

That they doubt not to prove to the satisfaction of this Honourable Board, that the Rules established by Governor Pallisser for the Regulation & of the fishery upon the Coast of

Labrador are very prejudicial to the extension and improvement of the said fishery, and particularly injurious to His Majesty's Subjects the Inhabitants of the province of Quebec, as above three hundred families of His Majesty's newly Acquired Subjects are employed in or Supported by the Winter's Seal fishery upon that Coast, which, if the said Rules shall be permitted to operate as laws, and continued to be enforced as they hitherto have been, will be Reduced to the greatest distress by being deprived of the

N. Jacquin
P. Rustan
Rabutin

p. 968

employment in which they have been bred up from their infancy and by which they have hitherto earned their Subsistence.

That your Memorialists are well convinced, that the protection and improvement of the Seal fishery aforesaid is of great importance to the trade of the Province of Quebec; but they are Apprehensive, that, without the interposition of this Honourable Board, several of the grievances herein Complained of will be continued and Remain unredressed, & Consequently the said fishery be entirely lost.

Your Memorialists therefore humbly pray Your Lordships to take the premises into your Consideration, that they may be heard by their Council in Support of the several Matters and things herein alledged; That Your Memorialists and all others Concerned in the Subject Matter of this Memorial may be effectually reinstated in their Respective Rights & Possessions, and permitted to enjoy the same Unmolested.

That Orders may be given to Governor Pallisser, declaratory of the sense of this Honourable Board in respect of the Aforesaid Rules Regulations established by him.

And that Your Memorialists may have such other and further relief in the premises, as the Nature of the Case may require And Your Memorialists &c.

OBSERVATIONS UPON MEMORIAL OF SETTLERS IN PROVINCE OF
QUEBEC CLAIMING EXCLUSIVE RIGHT TO TRACTS OF COAST AND
FISHERIES THEREON, IN LABRADOR.

B.T. NEWFOUNDL^D. VOL. 18. T. 88.

SIR,—Having perused the Memorial presented to the Right Honble the Lords for Trade and Plantations in behalf of several Persons, Signers thereto, Settlers in the Province of Canada, Claiming an Exclusive right to great tracts of Coast and to the Fishery's thereon in Labrador, within my Government.—

In Addition to what their Lordships have already before them from me upon that Head, be Pleas'd to lay before their Lordships one or two Observations upon the said Memorial.—

Whether the Coast in Question was a dependancy or not on the Government of Canada whilst the French possess'd Quebec.

Whether Exclusive Grants and Monopoly to Trade and Fishery's on that Coast made by French Governors are binding to the English Nation, or proper Examples for me as an English Governor to follow.—

Whether the Coast in Question is within the Limits of Canada according to the French Governor Generals Accounts of its Bounds deliver'd in when he Capitulated for Canada.—

Whether a Coast conquer'd and possess'd, (or of right belonging, before to the English) long before Y^e Capitulation of Canada or even before the Surrender of the City of Quebec (which was the Case of this Coast) can be comprehended either in the Capitulation for Canada or that for Quebec.—

Whether the Tenure of such Exclusive Grants (suposing the Authority had been good) as have been usually given by the French Governors and by General Murray to parts of the Coast in Question, convey a Real Estate of Vast Tracts of Coast, and.—

Whether the said Coast in Question is not free and at His Majesty's disposal, are all matters that must be submitted to the determination of His Majesty's Ministers, I shall speak only to other parts of the Memorial.

The Assertion of their Fishing Tackle, Utensils and Necessary's, having been Seiz'd, Burnt and destroy'd, is an Audacious attempt to impose a falsity

from any Man, nor any thing hapen'd to give a Colour to such an Insinuation, except the Memorial means to alude to a trifling Accident, by which a few Old Barrell Staves, belonging to Mess^{rs} Brymer and Bayne were Burnt at Charles River, which was Occasion'd by the folly and Imprudence of their own People, and no fault in any of the Kings Officers, the Circumstances of which they have been fully inform'd of by myself, nor has any one of them been the least Molested or affronted, certain I am, that they will do me the Justice to own, that such of them as have Aply'd to me, I have taken infinite Pains to give them the utmost Satisfaction in my Power, and to Encourage them to pursue the Fishery's in a Publick and fair way, and to lay aside their Schemes of Monopoly and Clandestine Trade, and find I have Succeeded with some but not with all.—

*sic.

As to the Restraints Complain'd of in the Memorial laid by me upon the Lawless Banditi Murdering Crews, resorting to that Coast from the Colony's, by which certain Punishments and Penalty's are threaten'd against Offenders, the Execution of those Restrictions and Punishments is reserved for His Majesty's Pleasure, nothing of what is therein threatened having yet been done nor intended till His Majesty's pleasure should be known.—

I have stop'd no Lawfull Commerce of the Kings Subjects from the Plantations, but I have stop'd them Fishing for and Assisting the French Fishery, for which Fish and Assistance they are Paid with French Goods and Manufactory's.*

As to my making Regulations for the Coast of Labradore (having receiv'd none from His Majesty or this Board) I Aprehend I had Authority to make temporary Regulations, but that General Murray had no such Authority.

*sic.

The Regulations that I did make, are (or at least I intended they should be) for the Encouragement, Improvement, and Extension of every Branch of the Fishery; most for the Benefit of the Nation in general, and of the Adventurers in Particular, by which the most industrious and most Orderly will find a Proportionable Reward.—

Whatever Regulations His Majesty may please to make for that Coast, shall be most punctually executed according to the Comands I may receive upon that Head.—

I Will only trouble the Board with adding, that as Mr. Murray's Plan, has had an uninterrupted tryal of three Fears, the Pernicious Effects of which has been represented by me to the Board, and as in confidence * of my having laid the Coast open and free to all the Kings Subjects, with certain Encouragements to British Adventurers in preference to others, several English Adventurers have fitted out several Ships for that Coast, at a far greater expence than those settlers from Canada at their first outset, so I most Humbly hope, my Plan with their Lordships amendments may have an Equal tryal with M^r Murray's, and as I Aprehend the true Policy of the Nation respecting Fishery's has ever been to encourage Shipping and Men from England, if an Effectual Stop is but put to all Expectations of Monopoly, Exclusive Grants and

residence on that Coast, & some Encouragements and preferences given to British Adventurers I think I may venture to say, that in three years there will be above a Hundred Ships from Britain Employ'd upon that Coast, and that Number will be constantly increasing.

I am

Sir

Your most Obedt

Humble Servt

HUGH PALLISSER.

FURTHER REMARKS ON CLAIMS OF CANADIAN SETTLERS TO EXCLUSIVE RIGHTS AND POSSESSIONS ON COAST OF LABRADOR.

B. T. NEWFOUNDL^D VOL. 18. T. 89.

MY LORDS,—Having heard the Pleadings before your Lordships, in support of Claims to certain Exclusive Rights and Possessions on the Coast of Labradore, and observing that somehow there was omitted a Paragraph of my Letter to the Secretary of State dated 21st Dec^r last, in Answer to one of those Claims, which Letter I requested your Lordships would admit, and that it might be farther Consider'd as Applicable to every other such Claim, which request I again repeat, because all the Claimants were, at first, under M^r Murrays Sole Authority, independent of any Old French Claims; the Paragraph of my Letter that was omitted, and which I request may be read and Considered at your Board, and that your Lordships Sentiments thereupon may be set forth in your Report is as follows:—

*I now desire to add
*and all other such
Claimants.*

*sic.

How far M^r Philibot* may as an Individual be considered as an Object of the Governments Consideration, I shall only take leave to Observe, that if he has Paid any thing for the Grants he Obtain'd, it may be a matter of Consideration whether he ought or not to be reimburs'd* that Sum.—

To this I would now Add, for your Lordships Information and Considerations that I have very Good Grounds for Intimating, that those extraordinary

*sic.

and unlawfull Grants of Posts, were not Obtain'd Gratis; whatever Injury may be suppos'd to have been done, by annulling and setting aside the Old French Claims (if any thing is to be admitted under them) has not been done by me, who was Ignorant of them, but by M^r Murray who knowingly did Annul and set them aside, for reasons which it seems he has given your Board some Account of.

If Particular People, by acting under M^r Murrays particular Grants, have suffer'd Inconveniencies or disappointments, they may Possibly be entitled to some satisfaction on that Account, but not from the Government I hope on Account of what I have done, or from me, but from M^r Murray, who took upon him to make those Grants without any Power Vested in him either by his Commission, by his Instructions, or by the Laws to Authorize his so doing.

M^r Murrays Proceedings and mine, seem to have been influanc'd* by very different Motives, and will produce very different Effects, M^r Murrays Promoting the very great Profit of a very few Individuals, without the least Authority for so doing, and thereby Injuriously precluding all the rest of the Kings Subjects.—

*sic.

My Proceedings in regard to myself, have produced me much trouble and Vexation, and some Expence, but not the smallest Pecuniary Advantage whatever, the Object of them is to lay open to all His Majesty's Subjects, a New and extensive Field for the great Increase of Fishery, Trade and Seamen, which will prove of Immense Advantage to this Kingdom by the Smallest Encouragement from Government, and in this I presume myself fully Authoriz'd not only by His Majesties Proclamation which Admits of no Monopolies or Exclusive Possessions; but by my Commission also as Governor of the Country, and by my Instructions under His Majesties Signe Manuel relative to every Branch of Fishery and Trade within the Limits of my Government; but all these things I make no Doubt your Lordships will duly Consider and take Notice of in your Report.—

I did not look upon the Pleadings before Your Lordships Yesterday as a matter of suit against me, therefore I did not offer to trouble Your Lordships with the tedious Pleading of a Lawyer, I rather close* to trust wholly to your Lordships Candor and Justice, for Impartially. Stating the Matter for His Majesty's Information.—

I am

Very Respectfully

My Lords,

Your Lordships' most Obed^t

and most Humble Serv^t

HUGH PALLISSER.

London 22^d April 1766.

To The Right Honble the Lords Commissioners for Trade and

Plantations.

Endorsed.

[30 April,
1766]**MEMORIAL OF FOWLER WALKER,**ON BEHALF OF QUEBEC MERCHANTS, ET AL., PROTESTING AGAINST
PALLISER'S REGULATIONS FOR COAST OF LABRADOR.B.T. NEWFOUNDL^D. VOL. 18. T. 92.To the right honourable the Lords Commissioners for Trade
and Plantations.The Memorial of Fowler Walker Agent on behalf of the
merchants, traders & other inhabitants of the province of
Quebec. Humbly Sheweth,—

That Your Memorialist hath been informed that this honorable board hath now under consideration certain rules & orders lately established by his excellency Hugh Palliser Esq^r Governor of Newfoundland & of the coast of Labrador for the regulation of the fishery on the said coast. That the s^d rules & orders tend not only to deprive a great number of the inhabitants of the province of Quebec of their private rights but that the same (as Your Memorialist is advised) will also entirely destroy a very considerable branch of commerce carried on by the inhabitants of the said province which will be to the great detriment of all & to the entire ruin of many who are at present engaged therein.

That if the inhabitants of the said province should be permitted to exercise the fishery on the said coast of Labrador in such manner as they have been accustomed that no inconvenience can possibly arise to the fishery exercised by the british Ships on the said coasts.

And that if the rules established by Gov^r Palliser shall take place very considerable Sums will annually be lost to Great Britain which otherwise would be remitted in return for british manufactures.

That Your Memorialist hath also been informed that the proper measures are taking for procuring the sanction of parliament to confirm the s^d rules & orders or to some other plan for regulating the fishery upon the s^d coast of Labrador as will imediately occasion great loss & prejudice to his Majesty's subjects in the province of Quebec & eventually exclude them from exercising the fishery upon the s^d coast as they have heretofore done.

Your Memorialist therefore most humbly prays your
Lordships to take the premisses into your consideration
That he may be permitted to lay before your Lordships

such Arguments & proofs as he is at present furnished
with in support of what is herein alleged.

p. 974

And that whatever plan it may be thought expedient to
adopt for regulating the fishery on the s^d Coast of
Labrador, It may please your Lordships to recommend
that such attention may be paid to the private rights of the
individuals & the general Welfare of the province of
Quebec as natural justice & good policy require.

And your Memorialist &^c &^c

FOWLER WALKER.

**REPRESENTATION OF LORDS OF TRADE TO H.M.
THE KING,**REPORTING ON CLAIMS OF MERCHANTS, AND INHABITANTS OF QUEBEC,
AND ON PALLISER'S REGULATIONS FOR COAST OF LABRADOR.¹

COL. COR: NEWFOUNDLAND. VOL. 2.

To the King's Most Excellent Majesty.

MAY IT PLEASE YOUR MAJESTY,—We have taken into our Consideration a Memorial (Copy whereof we beg leave herewith to lay before Your Majesty) (No. 1.) presented to us on the Behalf of Sundry Merchants, whose Names are thereunto annexed, Settlers in Your Majesty's Province of Quebec, and of others concerned in the Trade of the said Province, setting forth, “That several of these Memorialists and others, Your Majesty's Subjects, Adventurers in the Fishery carried on upon the Coast of Labrador, being possessed of Sundry Fishing-Posts and Settlements thereupon; and being desirous of availing themselves of the Fishery for Seals, which at Great Hazard and Expence had been Established on the said Coast, (particularly upon that Part of it which is situate within the Streights of Belleisle,) after having put themselves to considerable Charge in order to carry on, extend, and improve the same, had, in the Course of last Year's Fishery, been dispossessed of their Posts, their Fishing-Tackle, and Utensils necessary for carrying on the said Fishery, seized, burnt and destroyed and themselves otherwise greatly molested and oppressed, by Hugh Palliser Esquire, Your Majesty's Governor of Newfoundland and the Coast of Labrador, and by certain other Persons acting under his Authority complaining withal of certain Orders, Rules, and Regulations to be observed on the said Coast, and elsewhere, published by Governor Palliser, on the 8th of April and 28th of August 1765, whereby, as they conceive, among other Things, the said Governor arbitrarily imposes illegal and unwarrantable Restraints and Restrictions upon Your Majesty's American Subjects; and praying that they may be effectually reinstated in their respective Rights and Possessions, and permitted to enjoy the Same, unmolested, for the future.”

Whereupon we beg Leave humbly to represent to Your Majesty, that having taken into our serious Consideration the Several Matters complained of in this Memorial; and having heard whatever the Complainants, by their

[¹ The four papers referred to in this document, i.e. Nos. 1, 2, 3 and 4, are listed as Nos. 24, 15, 10 and 30 respectively.]

Counsel, had to urge in Support of the several Allegations therein contained, as well as what Your Majesty's Governor of Newfoundland had to offer in Answer thereunto; it does appear to us, that the several Matters advanced by the said Memorialists are reducible to two General Heads: the first containing their Complaints, that in Consequence of the Orders and Regulations lately made by your Majesty's Governor of Newfoundland, they have been dispossessed of certain Rights and Privileges which they alledge to have been legally vested in them; and the other representing, that the Continuance and Enforcement of such Orders and Regulations will involve many of your Majesty's Subjects in the Province of Quebec in the utmost Distress, and be extremely prejudicial to the Extension and Improvement of the Fishery upon that Coast. In considering the first Head of Complaint, which respects the supposed Infringement of Rights, the Memorialists have stated themselves as affected in two different Capacities.

The first Capacity, in which they represent themselves to be aggrieved by the aforesaid Rules & Orders of Your Majesty's Governor of Newfoundland, is, as Owners or Proprietors of certain Posts and Settlements on the Coast of Labrador, which they profess to hold either under the Title of certain Grants in propriety made while Canada was in the Possession of His most Christian Majesty, or by Sundry temporary Concessions made and granted, since the Reduction thereof, by His Majesty's Governor of Quebec; all which Posts and Settlements, with the exclusive Privileges thereunto annexed, are, by these Placarts of Governor Pallisser, determined, and resumed to Your Majesty's Use; and of one of which in particular under the latter Description, two of Your Majesty's Subjects, Subscribers to the said Memorial, complain, that, by his express Order they have been forcibly, and to their great Loss and Detriment dispossessed.

The second Object of their Complaint is, the Injustice done to them in their general Capacity, as Your Majesty's American Subjects, by excluding them from the Privilege of resorting to the Coast of Labrador for the Convenience of fishing, or for any other Purpose whatever, under certain Pains and Penalties.

These prohibitory Regulations compose the first and second Articles of a Placart published

(No. 2.) by Governor Palliser on the 28th of August last, a Copy whereof (as well as of that of the

(No. 3.) 8th day of April 1765 above mentioned) we beg Leave hereunto to annex.

With respect to the Title which these Memorialists claim to certain Posts and Settlements on the Labrador Coast, under Grants to Canadian Proprietors, (which was the first Predicament under which they state themselves to be aggrieved by Governor Pallisser's Rules and Regulations) their

Memorial in general sets forth, "That several of these Posts and Settlements on the Coast of Labrador, (particularly upon that Part thereof which is situate within the Streights of Belleisle,) having in times past, while the Province of Quebec

p. 977

was in Possession of His Most Christian Majesty, been granted by the Governor of Canada (of which Government they conceive the said Coast of Labrador made a part of the Dependencies) sundry of Your Majesty's Subjects, upon the Reduction of Canada, and upon the Faith and Confidence of the Terms of the Capitulation thereof, purchased, within the time limited by the said Articles, of several of the Canadian Proprietors of the said Settlements and Posts, their Right and Interest therein, for a valuable Consideration." This is the Assertion contained in their Memorial above mentioned, and, material as it should seem for these Claimants, for the due ascertaining their Right and Title to the said Posts and Settlements, that they should support and confirm the said Assertion by clear and authentic Facts and Proofs; yet we must observe to your Majesty, that, throughout the Agitation of this Question, no such Facts have been laid before us on the Part of these Memorialists: no Proofs whatever of any valuable Consideration given, or of any Title derived either by Purchase or by Lease of these Posts from the Canadian Proprietors, have been produced for our Information in the Matter; so that the Fact must still continue to stand unsupported by any other Evidence than the bare Credit of their Assertion.

Nevertheless it may be proper for us to observe to your Majesty, that from a Copy or Register of sundry Canadian Grants, which has been transmitted to us by your Majesty's Governor of Quebec, we have no manner of Doubt but that many and various Tracts of Land on the Coast of Labrador have at different times been granted and conceded by the Governors of Canada, while France was in Possession of that Province; yet very few of these, as far as appears to us, having been granted in Propriety (the rest being only temporary Concessions for a Term of Years, all of which are laps'd and expired;) it follows, that none of these Grants can be supposed now to subsist in Force, or be made the Subject of our present Consideration, except the few in Propriety above mentioned.

The first of these was made in the year 1662, to Messrs. Bissot and Jolliet, of the Post and Settlement of Mingan on the Coast of Labrador to the Bay of Phelippaux in Propriety to them and their Heirs. And in the year 1679, another Grant was made to the said Jolliet, jointly with the Sieur La laude, of all the Islands bordering on the said Coast from the Isle of Mingan to the said Bay of Phelippaux, the same to be held in Fief and Seignery with an exclusive Privilege of the Fishery for Seals and Sea-Cows. This joint Grant was in the year next ensuing followed by a separate one of the whole Island of Anticosti in Propriety as before to the former of these Granties (Jolliet) with the same exclusive Privileges as are recited in the first

Instance. From these Grants, which we have thus briefly enumerated to your Majesty, one Person only, as we understand, amongst the Subscribers to the above Memorial affects to claim, or derive Right and Title to any Settlement or Post on the Coast of Labrador; and no charge has, to our Knowledge been produced either by him or by any person claiming under the like Pretensions, of any actual Molestation being given to them in their Settlements, from the Rules and Orders above mentioned.

p. 978

In the next Place we are to consider the Complaints of such of your Majesty's Subjects, who profess themselves to suffer from these Regulations of Governor Pallisser, as Proprietors or Occupiers of Sundry Fishing Posts and Settlements on the said Coasts under the Grants of the Hon^{ble} James Murray, Your Majesty's Governor of Quebec.

The Memorial sets forth, that “the said Governor granted to sundry of Your Majesty's Subjects, Inhabitants of the Province of Quebec, certain Posts and Settlements on the said Coast, which were at that time unoccupied and which said Grants were antecedent to your Majesty's most Gracious Proclamation of the 7th of October 1763, whereby the Coast of Labrador was annexed to the newly established Government of Newfoundland.” How far these Grants of the exclusive Possession of these fishing Posts could be considered as continuing in Force after your Majesty's most Gracious Proclamation above mentioned was published; or in Case they were not thereby revoked, whether Governor Pallisser was not, by your Majesty's Appointment of him to the Government of this Territory, sufficiently authorized in your Majesty's Name to put an end to the Continuance of these Grants, which appear upon the Face of them to have been no more than temporary Licences to carry on the Fishery, determinable at Your Majesty's Pleasure, must be submitted to your Majesty.

Amongst the Representations which have been made to us of the Injuries which this Order of Complainants have derived from M^r Pallisser's Regulations, one Instance only has been produced of his having actually removed any of these Claimants from their Posts on the Coasts above mentioned: and that is in the Case of Messrs. Bayne and Brymer, Subscribers to the Memorial above recited. These Complainants claim Possession of a Fishing-Post at Cape Charles on the said Coast of Labrador, by virtue of a Grant from Governor Murray; and complain, that their Agent or Factor, stationed there, was compelled to evacuate and abandon the said Post, and to remove their Fishing Tackle, Utensils and Effects, under the Alternative of having them destroyed in Case of Refusal; and the said Agent further declares, that a considerable Number of Casks were actually burnt and destroyed, and that other Damages ensued to the said Bayne and Brymer from the Interruption thereby given to their further Prosecution of this Trade; A Sloop, which they had

fitted out from Quebec for this purpose, & which the said Agent met, on his Return from Cape Charles, in the River St Lawrence, having desisted from her Voyage upon the Report of these Proceedings, and returned. back to Quebec, where her cargo and Effects were sold at public Vendue, to the great Loss and Detriment of the Owners.

To this Charge Governor Pallisser replies, that when he ordered these Complainants to quit their irregular Monopolizing Possessions on the above Coast, he accompanied that Order with a strict Injunction, that every Assistance should be given them in removing their Effects; That accordingly these Effects were received into the Care of a Master of a British Fishing Ship then at the Port of Chateau, pursuant to an agreement made betwixt him and their Agent above mentioned, Your Majesty's Officers and Men giving all the

p. 979

Help and Assistance in their Power in the Course of this Removal; That the Master of the British Fishing Ship above mentioned is ready and has repeatedly offered to account with them for these Effects so received into his Care; That the Damages, which ensued to them from the Consumption of their Casks by Fire, were owing to a very natural Mistake in Your Majesty's Officer, who, discovering these Casks, and perceiving them to be French Hogsheads did presume that they were the Property of some Party of that Nation, belonging to their Fishing Ships employed on the Coast of Newfoundland, who had secretly settled themselves there for the Summer's Fishery, Information having been received of such parties being on the Coast, and in search of whom the said Officer was sent; That he accordingly destroyed these Casks, upon the above Presumption, no people being there to be found to own them; That with Respect to the Disappointment of these Complainants from the Return of their Vessel, which their Agent met in the River St. Lawrence bound to Charles River, and which in consequence of that Meeting did not proceed to that Post to take in their Effects, M^r Pallisser observes, that his Order, so far from forbidding this Vessel to proceed for the purpose of carrying their Effects back to Quebec, did on the contrary warrant the so doing; they being enjoined to remove them and prohibited only from wintering there, or resorting thither in future.

The last Predicament, under which we proposed to consider these Memorialists as affected by the Orders and Regulations of Governor Palliser, is in their general Capacity, as Your Majesty's American Subjects, by excluding them from the Right of Fishery on the Coast of Labrador, or on any Pretence whatever resorting thereunto (except in the Case of Whale Fishers within the Gulph of St. Lawrence) under certain Pains and Penalties annexed to the Breach of this Ordinance.

In answer to the Complaints of these People, who claim a Right, in Common with the rest of your Majesty's Subjects

wheresoever dispersed, of resorting to & navigating these Seas, either for the Purposes of Fishing, or on any other Occasion or Pretence whatever, M^r Pallisser opposes the authority of the Statute of the 10th and 11th of King William, made and enacted for the better Regulation of the Trade and Fishery to and from Newfoundland; which M^r Pallisser appears to have understood as absolutely excluding all Ships, but such as are fitted out from Great Britain, from the said Fishery and which he thought it his Duty to extend to the Coast of Labrador, now made a Part of his Government; with an Exception however as to that Clause, which confirms “the Owners or Builders of Houses, Stages &c. for fishing there in the quiet Enjoyment of the same” and which Clause could in no respect be applicable to this part of his Government.

Upon this Case we have only to observe to your Majesty, that, if Governor Pallisser (who seems to have understood this Statute of King William as operating to the Exclusion of Your Majesty's American Subjects from the Right of Fishery on the Coast of Newfoundland) be right in his Construction of this Statute, we should think him justified in extending the like Regulations to Your Majesty's Territory of Labrador, which forms a Part of his Govern-

ment; nor can these Memorialists upon that Supposition have any just Cause of Complaint: But if (as we conceive to be the Case) he should have mistaken the sense and meaning of this Statute, and that the purport of it should be only to encourage Your Majesty's British Subjects in this Fishery preferably to all others; but not to go to the Exclusion of Ships fitted out from America; In that Case we conceive M^r Pallisser had no sufficient Authority to exclude your Majesty's American Subjects from a Right of Fishery in the Seas and on the Coasts above mentioned.

In the mean time the Damages and Inconveniences, which appear to have actually ensued to your Majesty's American Subjects at large from the Execution of this Order and Regulation, as distinguished from what respects the Claims to particular Posts and exclusive Privileges, do not, (as far as they have come to our knowledge) seem to have been at all considerable. Having thus in as clear and concise a manner as we are able, humbly laid before your Majesty, a State of the Damages which these your Majesty's Subjects, Subscribers to the said Memorial, profess to have sustained from the past Execution of Governor Pallisser's Regulations; and having considered these Complainants under the respective Capacities of Proprietors under Canadian Grants, Claimants under Governor Murray's Concessions, and as making a Part of your Majesty's General Body of American Subjects; it remains for us to take Notice of the second General object of their Memorial above mentioned, which regards the Expediency of discontinuing and annulling the Orders & Regulations in Question.

It has been asserted on the Part of the Memorialists, that the Seal Fishery, as carried on by your Majesty's Subjects of the Province of Quebec, supports several hundreds of useful and industrious Families, and annually furnishes Exports to the Value of six thousand pounds sterling. To this M^r Pallisser replies, that the Fishery for Cod and Whales on the Coast of Labrador, if carried on by Vessels from Great Britain only, might be productive, as he conceives, of more Advantages to this Country, and improved to greater Value and Perfection, than the Fishery at present established on the Coast of Newfoundland;—That from the Experiments which have been already made, there is the greatest Reason to believe, that the Fish on the Labrador Coast exceeds the last mentioned both in Quantity and Quality, and have ever borne a better Price in the European Markets;—That the Returns made to this Kingdom from a Trade of this sort, and the Benefits which might result from it (if put under proper Regulations) to your Majesty's Navy, by the Increase of Seamen are Considerations, as he conceives, infinitely superior to any which are stated on the Part of the Province of Quebec; That upon these Principals, and upon Conviction of the practicability of procuring these Advantages, he published the Regulations in Question, well

knowing that if these Settlers were continued in their Posts to the Exclusion of British Adventurers, the Ship Fishery could no longer subsist, and the Advantages which might from thence redound to Great Britain must be lost, or diverted into the Channel of your Majesty's American Provinces, whose proximity to these Seas would render them Rivals in the Fishery, too formidable for your Majesty's British Subjects to contend with.

p. 981

Upon this Part of the Case, which respects the Expediency and good Policy of continuing these Regulations, we shall not presume to offer any opinion, having already submitted to Your Majesty's Consideration that most extensive and important Question concerning the most advantageous Method of carrying on these Fisheries.

But whatever may be the Plan which your Majesty may judge proper finally to adopt for that Purpose, we think it our Duty, from what has appeared to us in the Course of our Inquiry upon the Subject of the present Memorial, to observe to your Majesty, that however these Memorialists have failed to make out any such Title to themselves under any of the French Grants above mentioned as might support the Complaint of their Rights having been actually infringed; yet as we have no Doubt but that claims to the exclusive Property of some of the Posts in question have been and will be made by some of your Majesty's Subjects under Titles derived from these Grants, we cannot think it adviseable, that, until the Question of the Validity of such Titles shall have been decided, such Parts of these Regulations as would immediately supercede and defeat them, should be carried into Execution; And if your Majesty should be of opinion, that by virtue of the Act of the 10th and 11th of King William the 3^d together with your Majesty's Royal Proclamation of the 7th of October 1763, all your Majesty's Subjects residing in every Part of your Dominions are intitled to the Right of an open and free Fishery on the Coasts of Newfoundland and Labrador, it will then remain for your Majesty's Consideration, whether upon that account also, it would not be adviseable to discontinue that Part of the said Regulations, which does in express Terms exclude a Part of Your Majesty's Subjects from the Labrador Fishery.

Before we close this our humble Representation to your Majesty, we beg Leave to lay before your Majesty a Paper very lately presented to us by (No. 4) Governor Pallisser, entitled "Proposals for encouraging the Fisheries on the Coast of Labrador, and for improving that at Newfoundland." The Subject of these Proposals is no doubt of the greatest national Importance; but these as well as whatever is contained in this our humble Representation, must be submitted to your Majesty in Your great Wisdom, and with the advice of Your Council to decide and determine thereupon.

All which is most humbly submitted,

Whitehall, }

[1766.]

**PROPOSALS FOR ENCOURAGING THE FISHERIES
ON THE COAST OF LABRADORE,**AND FOR IMPROVING THAT AT NEWFOUNDLAND
(No. 4.)Copy.
COL. COR. NFD. VOL. 2.

The following Proposals are founded on a knowledge of the Valuable Fisheries that may be carried on upon the Coast of Labradore, and suggested by taking a view of and reflecting upon, a compared State of ours and the french Fisheries in Newfoundland, and the great disproportion of the Advantages arising therefrom to each Nation respectively; also on a Conclusion, that Fisheries (abstracted from pecuniary Advantages) are of the utmost Importance to all Maritime Nations, and more particularly to this, they being the greatest and most certain Nurseries for Seamen; yet observing that, by Neglects, Abuses, and the want of proper Regulations, the Advantages, that are absolutely necessary for the Safety of the State, may be lost, as is verified by the present State and management of our Newfoundland Fishery, which, instead of being a Nursery for, is the true Cause of the often-experienced Scarcity of Seamen for manning our Fleets on sudden & dangerous Occasions, and is an effectual Bar to all such increase of Seamen as is provided for by the Laws of this and all Nations relating to Fisheries.

My poor and humble Opinion here offer'd for establishing a new British Fishery, & towards recovering the most important Advantages of an old One, is most humbly submitted to Consideration.

First, as to the New-one

If Regulations are made for the Coast of Labradore, calculated to encourage Adventurers from His Majesty's Dominions in Europe, it will in a short time prove a great Source of Wealth and Naval Strength to this Kingdom; but in order to secure these Advantages to the State, the Regulations that may be made, should in my humble Opinion, above all things first provide against the Existence of any pretensions whatever to Property or exclusive Right, or Possessions, or Monopolies on that Coast, which should be declared Publick and Free to all the King's Subjects with all proper Preferences and Advantages to those from His Majesty's Dominions in Europe—and next

In order to put a Stop to the horrid Massacres, and many other Mischiefs committed on the poor Natives of that Country

from all Parts resorting thither, no Residents whatever (as yet) should be permitted during the Winter, and the absence of the King's Ships, except what may be particularly mention'd in the Regulations, till a farther knowledge can be obtain'd concerning the nature of the Country, the Indian Inhabitants, &c^a &c^a, in order to make such farther Regulations as may hereafter be judged best for the Benefit of the Fisheries, and the Trade of His Majesty's Subjects.

That to encourage Adventurers to begin this Fishery in the proper way, a Bounty be immediately offer'd to British Ships resorting thither, directly from His Majesty's Dominions in Europe, properly equip'd for both the Whale and Cod Fishery; Such a Bounty to depend on the number of men actually going out from, and returning directly to His Majesty's Dominions in Europe with a Proportion of new Men, viz^t every fifth Man to be a New or Green Man, that is to say, not a Seaman, or having ever been at Sea before, with such other Restrictions, and Conditions as may effectually guard against Abuses and fully answer the main Objects of bringing home and increasing of Seamen. If part of this Bounty was to be paid on the Ships sailing, first giving proper Security for performing the Conditions prescribed for the Voyage, (as is the practice in France,) it would send out great Numbers of new Adventurers of industrious Fishermen, independent of rich Merchants; and this will prevent the Fishery being a Monopoly to a few.

Such a Bounty would produce to the Nation all the Advantages proposed by that now given to the Greenland Ships; but in a far greater Degree, both as to the number of Men to be employ'd, and thereby secured in constant readiness for defence of the State, as by the great Profits that will arise from the labour of such increas'd Number of Men; for the Bounty now paid, on an Average of the three last Years, to the Greenland Ships is not less than £26,000 p. Annum for not more than 1800 Men employ'd therein, which amounts to £14 8s.—p. Man; if a Bounty is given as above propos'd at £3 a Head, which I think would be proper to begin with, when it amounts to that Sum, it will provide 8,666 Men in constant readiness for manning our Fleets, besides a Yearly Increase of 1733 such Men.

Whatever Bounty is at first given to this Fishery, in a few years it may be lessen'd, after it is once set on foot; and that the Blockhouses hereafter proposed are finished upon that Coast.

It must be observed, that the two principal Branches of this Fishery is for Whales and Cod; the others for Seals and Salmon, also the Indian Truck are very inconsiderable Objects compar'd with the two first; therefore the Regulations with respect to them, should consider them only as Articles to be bestow'd as Rewards to the most adventurous and industrious in the other two; This seems proper for raising an useful Spirit of Emulation, and is what I studied to do by my Regulations for that Coast the last year, by granting certain Privileges

respecting those Articles, to the 1st 2^d & 3^d arriving Ships in each Port from Europe; for it must also be observ'd, that the Ports, that admit of proper Situations for Sealing, or Rivers for Salmon, or Places resorted to by Indians, are but few.

p. 984

As a farther Encouragement and Security to British Adventurers upon that Coast, as well during the fishing Season, as for such Winter's Crews, as, by the Regulations to be made, they may be permitted to leave, I would propose,

That the Coast be divided into 3 Districts, Viz^t the North, the South, and the West, each containing about 100 Leagues of Sea Coast; that a King's Ship be stationed on each during the fishing Season; as well for Protection of the Fishery as for regulating Disputes and Disorders amongst the Fishers; that at some of the principal Ports in each District be erected a strong Blockhouse for the Security of such Winter's Crews, and of the Boats, &c^a left on the Coast by the Fishers: such Block-houses to be in such Situations as may be found best for these purposes; this will also be establishing the possessory Right to the whole Country.

The Block-houses here proposed are of a new Construction, far stronger than any other hitherto used, affording (from the Improvements made in those projected by the Earl of Egmont) double the Defence and Conveniences of any other hitherto constructed of the same Dimensions, yet not more expensive.

Besides the Bounty above propos'd for setting on foot the new Whale and Cod Fishery on the Labradore Coast, if a Bounty was to be given, for a few years only, to all ships bringing home not less than 21 Men directly from the Fisheries of Newfoundland., at the rate of 30 Shillings a head, that being the present Price of a Man's passage home, it would prove a great encouragement to the Trade, greatly contribute to restore the Ship Fishery there, prevent our Men running to America, lessen the Number of Residents in Newfoundland, draw from thence many thousands of Men, who remain there only for want of the Means of returning; and this, together with what may be expected from the Labradore Fishery, will soon provide such a Number of Men, always at hand in this Country for manning our Fleets as would be in effect be* a register'd Marine Guard, for security of the Nation against all sudden Dangers, without distressing other Branches of Trade, and prove a real Nursery for Seamen.

*sic.

Scheme for executing what is here proposed, for establishing the Blockhouses.

The Commanders of the King's Ships on that Coast to be directed this Year to look out for, and make Report of Places within their Districts fit for such Posts; each of the stationed Ships the next Year to carry out all Materials, that can't be had there, with proper Workmen for erecting one of these Block-houses in their respective Districts; and this Method to be observed yearly, till as many are erected as may be thought necessary.

I have visited and examined York or Chateaux Bay, with all its contained Harbours; and as this will always be the principal Port on that Coast, if I am empower'd, I will undertake myself to see one of these useful Block-houses finished at that Place this Year; this will be an immediate Encouragement to the Adventurers, and establishing the possessory Right to the Country at a Place in the Center of the whole Coast.

p. 985

I would propose to leave in these Block-houses, either a Sea Officer with a Party of Seamen or a Marine Officer with the like Number of Marines belonging to the station'd Ship, or a Detachment from the Garrison of St' Johns; such Officers and Men to be relieved every Year.

Such part of these Block-houses as are to be of Wood, may either be framed and prepared here, carryed out and immediately set up there, or a proper number of Workmen may be sent out in each Frigate; and build them with the Timber there, carrying such other Materials as may be wanted; either of these ways, I apprehend the Expence will not be great, may be exactly estimated, and the precise time of their execution ascertained. If they are to be wholly of Stone, the Expence I apprehend will be considerable; besides the uncertainty of meeting proper Stone there; but this may be better judged of hereafter; I would therefore recommend, that one Block-house on the aforementioned Plan, this Year be first erected of Wood, at York Bay, in case of a disappointment of Stone.

It will greatly facilitate the establishment of the Fisheries, and procure a safe and peaceable Access for His Majesty's Subjects to the Coast of Labradore, if the Brethren of the Unitas Fratrum are encouraged to settle amongst the Indians, as Missionaries, (which they are very solicitous to do) I would therefore propose to grant them any Priviledges, that may not be inconsistent with the Prosperity and Freedom of the Fisheries, and to give them one of the aforementioned Block-houses to themselves to live in, at any Place they may pitch upon.

The French now give a great Bounty to their Newfoundland Fishery; their particular Regulations I have not yet been able to get; but the Object thereof is to secure the return of their Men to France, with a certain yearly Increase of such Men; from the best Account I have been able to get, the Bounty, which their Merchants actually received the last Year, amounted to between 3 and 4 Pounds p. Man, upon 13,362 Men, which they had employ'd the last Year.

Now if the Court of France finds her Account in paying 40 or 50 thousand Pounds p. annum for the return of 13,362 Men, from her Fisheries, with a yearly Increase of one in every five on that number, it becomes a matter of consideration, whether an equal Sum would not be well laid out by Britain, for providing double that Number, to give us the Superiority over France in that important Article of Men fit for and always ready to man our Fleet, which we are now absolutely robbed of

(*sic.)

by the present Method of the Fisheries being carried on; the Men remaining there, therefore never to be had for that Service; nor have we such yearly Increase as France has, but on the contrary a loss of great Numbers that yearly run to America.

HUGH PALLISSER.

PROCLAMATION

ADMITTING VESSELS FROM PLANTATIONS TO FISHERY ON COAST OF
LABRADOR, ETC.

*sic.

B.T. NEWFOUNDLAND. VOL. 20, p. 66.

By His Excellency Hugh Pallisser Governor and Commander in
Chief in and Over the Island of Newfoundland the Coast of
Labradore and of all the Territories dependent thereupon.

Whereas a great many Vessels from his Majestys
Plantations Employed in the Whale Fishery resort to that part
of the Gulf of Saint Lawrence and the Coast of Labradore
which is within this Government, And as I have been informed
that some apprehensions have arison* amongst them, that by
the Regulations made by me relating to the different Fisheries
in those parts they are wholly precluded from that Coast.

*sic.

Notice is hereby given that the King's, Officers Station'd
in those parts, have always had my Orders to protect Assist and
Encourage by every means in their power, all Vessells from
the Plantations employed in the Whale Fishery coming within
this Government And pursuant to his Majesty's Orders to me,
all Vessells from the Plantations will be admitted to that Coast
on the same footing as they ever have been admitted in
Newfoundland; The ancient Practices and Customs Established
in Newfoundland respecting the Cod Fishery under the Act of
Parliament passed in the 10th and 11th years of William 3^d
Commonally* called the Fishing Act, always to be Observed.

*sic.

And by my Regulations for the Encouragement of the
Whale Fishers they are also under certain necessary
Restrictions therein Prescrib'd permitted to Land and Cut up
their Whale in Labrador, This is a Liberty that never has been
allowed them in Newfoundland because of the Danger of
Prejudicing the Cod Fishery carry'd on by our Adventurers
Ships And by Boat Keepers from Britain Lawfully Qualified
with Fishing Certificates according to the aforementioned Act,
who are fitted out at a very great risque and Expencc in
Complying with the said Act, Therefore they must not be liable
to have their Voyages overthrown or rendered Precarious by
any means, or by any other Vessels whatever. And—

Whereas great Numbers of the Whaling Crews ariving*
from the Plantations on the Coast of Labrador early in the
Spring considering it as a lawless Country were Guilty of all
sorts of Outrages before the arival*

of the Kings Ships, Plundering whoever they found on the Coast too weak to resist them, obstructing our Ship Adventurers from Britain by sundry ways, Banking amongst their Boats along the Coast, which ruins the Coast Fishery And is contrary to the most Ancient and most strictly observ'd Rules of the Fishery, and must not be suffered on any Account, also by destroying their Fishing Works on the Shore, Stealing their Boats, Tackle, Utensils, Firing the Woods all along the Coast and Hunting for and Plundering the poor Indian Natives of the Country, by these Violences, Barbarities, and other Notorious Crimes and Enormities, that Coast is in the Utmost Confusion, and with respect to the Indians is kept in a State of War.

*sic.

For preventing these practices in future Notice is hereby given, That the Kings Officers in those parts are authoriz'd and strictly directed to Apprehend all such Offenders within this Government, and to bring them to me to be Tryed for the same at the General Assizes at this place, And for the better Government of that Country, for Regulating the Fisherys and for protecting his Majestys Subjects from Insults from the Indians, I have his Majestys Commands to Erect Block Houses and to Establish Guards along that Coast.

This Notification is to* put up in the Harbours in Labrador within my Government.

Given under my Hand at Saint John's in Newfoundland 1st August 1766.

HUGH PALLISSER.

By Order of his Excellency

JN^o HORSNAILL.

Note.—The above was published in the papers at Boston for the information of all concern'd.

RELATING TO FISHERY ON COAST OF LABRADOR, ETC.

COL. COR. NEWF^{LD}. VOL. 2.

Copy of a Letter from Commodore Pallisser, Commander in Chief of His Majesty's Ships and Vessels at Newfoundland, to M^r Stephens, Secretary of the Admiralty, dated on board His Majesty's Ship the Guernsey in St. Johns Harbour the 25th August 1766.

* * * *

When the King's Ships arrived on their Stations this Year upon the Coast of Labradore, they found between Two and Three Hundred Whaling Vessels from the Plantations, great part of which were employed fishing for Cod and carrying it over to the French Ships in Newfoundland; also destroying the fishing Works belonging to English Fishers; firing the Woods, and doing every kind of mischief to prevent and discourage English Adventurers from going to that Coast; also in hunting and plundering the poor Indians on that Coast. The King's Officers immediately put a stop to all this, and sent them away a Whaling, then our new Ship Adventurers from Britain under this protection went to work, and have succeeded beyond expectation, taking amazing Quantities of Cod, but they were too late this Year for the Whale.

August 26th
1766.

The Block House ordered to be built in Labradore could not (because of my late arrival) be executed this Season on the Plan proposed, but a very sufficient one of Timber shall be completed in Pitts Harbour, in which I propose to leave an Officer with a Guard of Twenty Men to secure the Boats, Craft and fishing Utensils of the British fishing Ships from being stole or destroyed by the Indians, or by the far more mischievous plundering Crews from the Plantations.

* * * *

Since writing the foregoing, I have had farther Advices from the Northern Parts of this Island, by which I find the Fishery there has proved very bad to both English and French, but our People have found a noble resource at Labradore, which makes their Voyages good, whilst the French are all exceeding bad.—An effectual stop being put to our People trafficking with the French there, has occasioned many to leave the Coast very early for want of Bread, being disappointed of Supplies from New England, one of their Agents has been here to solicit me for leave to purchase a Supply for Four of their Ships, but I have not granted him a Biscuit; our People begin to see their folly in dealing with

them by which they were enabled to pursue the Fishery to their own prejudice, and now begin to carry on the Fishery in those Parts with proper Spirit.

Endorsed. In the Lords of the Adm^{ty}s of the 29th Sept^r 1766.

COAST OF LABRADOR IN FAVOUR OF BRITISH SHIP FISHERS.

Copy.

COL. COR. NEWFLD. VOL. 2.

MY LORDS,

*

*

*

When the King's Ships arrived on their Stations this Year, upon the Coast of Labradore, they found between two and three hundred whaling Vessels from the Plantations, great Part of which were employed fishing for Cod and carrying it over to the French Ships in Newfoundland, also destroying the fishing Works belonging to English Fishers there, and in the North part of Newfoundland, firing the Woods, and doing every kind of Mischief, to prevent and discourage English Adventurers from going to that Coast; also in Hunting and Plundering the poor Indians on that Coast; the King's Officers immediately put a Stop to all this, and sent them away a Whaling; then our new Ship Adventurers, from Britain under this Protection went to work, and have succeeded beyond Expectation, taking amazing Quantities of Cod, but they were too late this Year for the Whale. I think proper here to refer your Lordships to my Letter of the 30th October last upon this Subject, and farther to observe, that the Abundance and Quality of the Cod, at Labradore, so far exceeds that at Newfoundland, that if Ships from the Colonies are admitted to carry on that Fishery, none can be employed from Britain, which must soon cause the Ruin of the British Newfoundland Fishers, and prove of the same Consequence, as if American Vessels were admitted to carry on the Newfoundland Fishery, that is, the whole will be conducted by Men and Ships that would never see Britain; and that grand Nursery for Seamen be wholly lost to Britain, and center in America. This is what the Act called the Fishing Act has hitherto in some Degree prevented; the footing I have put the American Vessels on for this Year on the Labradore Coast, is contained in the inclosed Notification I have published, to which I beg leave to refer your Lordships.

**PETITION FROM JEAN TACHÉ AND HEIRS OF
BISSOT AND JOLIET TO THE KING,**PRAYING TO BE MAINTAINED IN QUIET ENJOYMENT OF THEIR POSTS ON
COAST OF LABRADOR.ARCHIVES PUBLIQUES DU CANADA,
C. O. 42. VOL. 6.

Requête Au Roy
de Jean Taché et des heritiers Bissot et Joliet, Nouveaux sujets
Canadiens, présentée par Antoine Pierre houdin fondé de leur
procuration.

SIRE,—Les heritiers Bissot et Joliet seigneurs, depuis plus
d'un siècle, de la Terre ferme de Mingan, des Isles et Ilets de
Mingan et de L'isle d'anticosty; et Jean Taché propriétaire à
Vie du Poste de St. Modet, (Les dits biens situés dans la
Rivière St. Laurent) sont forcés de recourir à la Justice de
Vôtre Majesté, pour etre maintenus dans La possession de
Leurs biens.

Les limites tirés en 1763 entre les Provinces de Quebec et
de terre Neuve ont mis sous le gouvernement de cette derniere
Province La plus grande partie de leurs seigneuries. En 1765,
L'on a commencé de les troubler dans leurs possessions, Une
fregatte ayant renvoyé les batimens partis de Quebec, (quoi
que munis de passeports) pour aller exploiter les Postes de St.
Modet et autres Postes des dites seigneuries, et les placards et
menaces continuels ayant obligé Leur fermier de La Seigneurie
de Mingan de se refugier dans les Limites de la Province de
Quebec, d'où il en a resulté un tort très considérable pour les
dits heritiers en particulier; pour plus de 500, de Vos
Nouveaux sujets, privés de leur travail ordinaire, et pour la
Province de Quebec en général par la perte totale de la Pêche;
Perte qui ne peut être reparee; la pêche qui se fait dans cette
partie n'ayant lieu que dans un certain temps de l'hyver où le
poisson passe, et qui ne peut par conséquent être faite que par
les gens établis sur le Lieu.

Le seul droit des gens; Une possession réelle et
immémoriale; Une jouissance d'un siècle; La capitulation
généralle du Canada confirmée par le traité de Paix, et ce
traitté Luy même sembloient assurer aux sujets du même
Monarque, sous deux gouvernemens séparés, Its sont troublés
dans leur jouissance sous de faux prétextes, et cette privation
est assurément egalle pour eux, à les en depouiller.

Vôtre Majesté est trop juste, Sire, pour souffrir l'oppression, et trop compatissante pour exposer à ses yeux la situation de 50 des dits heretiers reduits à la mendicité par les malheurs de la Guerre; que leurs ancêtres ont obtenu ces seigneuries pour prix du sang qu'ils ont versé en combattant et soumettant les Sauvages de ces parties, et par leurs découvertes; chosén qui ont contribué à l'établissement d'un Pais passé en la possession de Vôtre Majesté par la gloire de ses armes. Non Sire, Vos nouveaux sujets n'employent point ces ressources attendrissantes auprès d'un Monarque conduit par l'esprit de justice! La seule exposition de leurs droits est suffisante auprès de Vôtre Majesté.

Ces droits sont, pour les heritiers Bissot et Joliet. 1° La Seigneurie de la terre ferme de Mingan, à prendre du cap des corps morans, jusqu'à la baye Phelippaux, ou ance des Espagnols. 2° La Seigneurie des isles et ilets de Mingan, sur le même front que la Terre ferme. 3° La Seigneurie de l'isle d'anticosty. 4° La reunion à la terre ferme de Mingan, d'une portion de la dite seigneurie, nommée le Poste du grand Mecatinat, qui en avoit été detachée pour 9 années, seulement et dont la jouissance a ensuite été accordée en 1762, pour 7 années au Sr John Gray négociant, par son Excellence le général Murray, qui conduit que cette partie du Commerce estoit negligée, les Canadiens ruinés, étant alors hors d'état de la faire Valoir: Ne demandent cependant cette reunion, qu'après l'expiration des 7 années de jouissance accordées au dit sr John Gray, qui paye une rente aux dits heritiers. Les droits du sr Jean Taché, sont. La jouissance pendant sa vie du Poste de S^t Modet.

Les heritiers Bissot et Joliet et le Sr Jean Taché convaincus que Votre Majesté, moins glorieuse par ses Conquêtes, que par le bien et la tranquillité dont elle entend faire jouir ses nouveaux sujets s'adressent done avec la confiance la plus entiere et la plus respectueuse aux pieds du Thrône, et suplient Votre Majeste, de vouloir bien donner ses ordres au Gouvernement de Terre Neuve, pour empêcher qu'ils soient troublés à l'avenir dans leurs possessions et qu'ils puissent jouir au contraire de leurs dites seigneuries et pontes paisiblement et en toute propriété, soit par eux mêmes ou leurs fermiers, comme ils en ont joui depuis un siècle, et que l'ordre de vôtre Majesté soit intimé au Gouverneur de la dite Province de Terre Neuve, affin qu'il n'en puisse prétendre cause d'Ignorance, C'est la justice que Vous demandent, Sire, les dits heritiers Bissot et Joliet et le S^r Jean Taché; leurs Coeurs penetrés de la plus respectueuse reconnoissance ne cesseront de contunier les Voeux sincères qu'ils font pour la Gloire et l'heureux Règne de Vôtre Majesté, ainsi que le supliant, qui en travaillant pour d'infortunes compatriotes, n'a d'autre intérêt que de faire eclater la justice de Vôtre Majesté.

[1766—1768.]

[*Translation of No. 244.*]**PETITION TO THE KING**

FROM JEAN TACHE AND THE HEIRS BISSOT AND JOLIET, NEW
CANADIAN SUBJECTS, PRESENTED BY PIERRE HOUDIN, THEIR
ATTORNEY.

CANADIAN ARCHIVES.

C. O. 42. Volume 6.

SIRE,—The heirs Bissot and Joliet, seigniors for over a century of the mainland of Mingan, of the Mingan isles and islets and of the isle of Anticosty; and Jean Taché owner for life of the Post of St. Modet (the said property being situated on the river St. Lawrence) are compelled to appeal to Your Majesty's sense of justice so that they may be maintained in the possession of their property.

As a result of the boundaries drawn in 1763 between the provinces of Quebec and Newfoundland, the greater part of their seigniories have been placed under the government of the latter province. In 1763 they commenced to be disturbed in their possessions, a frigate having ordered back the vessels which had left Quebec (although provided with passports) to go and work the post of St. Modet and other posts in the said seigniories, and continuous libels and threats having forced their lessee of the Mingan seigniorie to take refuge within the limits of the province of Quebec, the result of which has been a considerable prejudice to the said heirs in particular: to over 500 of your new subjects, deprived of their usual labour, and to the province of Quebec generally through the entire loss of the fisheries; such a loss cannot be made up as the fisheries in this district can only be carried on a certain time in the winter when fish is migrating and consequently can only be worked by people residing in the region.

Your Majesty is too just to countenance oppression and too humane to be shown the situation of 50 of the said heirs reduced to beggary through the misfortunes of war and that their ancestors were granted these seigniories as a reward for having shed their blood in fighting and subjecting the Indians in these parts and for their discoveries, all of which made for the building up of a country now passed into Your Majesty's possession by the victory of his arms. Nay, Sir, your new subjects need not have recourse to such pitiable arguments with a Monarch actuated by a sense of justice! The mere recital of their rights is sufficient for Your Majesty.

As far as the heirs Bissot and Joliet are concerned these rights consist of:

1° The seigniority of the mainland of Mingan, extending from the cape of the Cormorant, as far as the bay Phelippaux or Spaniards' inlet. 2° The seigniority of the isles and islets of Mingan, on the same front as the mainland. 3° The seigniority of the isle of Anticosti. 4° The reunion to the mainland of Mingan, of a part of the said seigniority called the post of Greater Mecatina, which had been separated therefrom for nine years only and the enjoyment of which was subsequently granted in 1762, for 7 years to the sieur John Gray, merchant, by His Excellency, General Murray, who was aware that this part of the trades was neglected, the Canadians ruined, they being then unable to develop the same; such reunion being asked only after the expiration of the 7 years of enjoyment granted to the said sieur John Gray who pays rent to the said heirs. The rights of the sieur Jean Taché consist in the enjoyment for life of the post of St. Modet.

The heirs Bissot and Joliet and the sieur Jean Taché satisfied that Your Majesty takes more glory from the welfare and tranquillity he intends to be enjoyed by his new subjects than from his conquests, most confidently and respectfully beg of Your Majesty, at the foot of the throne, that he may be pleased to give to the Newfoundland government instructions that they be no longer disturbed in their possessions and that they may on the contrary, enjoy peaceably and as their exclusive property their said seigniories and posts, either themselves or through their lessees as they have enjoyed the same for a century, and that the Governor of the said province be served with Your Majesty's order so that he may not plead ignorance thereof. Such is the justice requested of you Sire, by the heirs Bissot and Joliet and the sieur Jean Taché who their hearts filled with the most respectful gratitude, shall not cease to pray for the glory and welfare of your Majesty's realm, and so shall the petitioner who, in lending assistance to unfortunate fellow countrymen, has no other end in view than to proclaim Your Majesty's justice.

P. HOUDIN.

[15 January, 1767.]

ATTORNEY GENERAL OF QUEBEC ON BISSOT'S CLAIM TO MINGAN AND TACHE'S CLAIM TO ST. MODET.

C. O. RECORDS 42/6.

A State of the Claim made by the Heirs and Representatives of Francis Bissot &c. . . . to the Seigniorship or Lordship of the Main-land of Mingan, Situated on the North Shore of the River and Gulph of S^t Lawrence, the Seigniorship or Lordship of the Isles or Islets of Mingan, Situated in the River and Gulph of S^t Lawrence near the Front of the Seigniorship of Mingan &c. . . . and of the Claim made by Mr. John Tachet to the Post of S^t Modet on the Coast of Labrador within the Straights of Belle-Isle.

* * * *

These persons complain that they have been grievously injured by the Orders Issued last year by the Governor of Newfoundland to the Inhabitants of the Labrador Coast to quit their Settlements.

* * * *

Of the Seigniorship of Mingan.—The Seigniorship or Lordship of Mingan is a Large Tract of Land situated on the North Side of the River and Gulph of S^t Lawrence, and containing in length 167 Leagues and a half, to-wit, the whole Extent of Country from the Point of the Main-Land that is adjacent to Egg Island (which is within the Boundaries of the Province of Quebec) to the Spaniards Bay commonly called Labrador or Baye Phelipeaux, which is very far without the Boundaries of the province of Quebec, and a little to the Westward of the Straights of Belle Isle. The depth of this Lordship is unknown, because the Original Grant of it is lost, and only the Front of it towards the River and Gulph of S^t Lawrence has been inhabited or occupied.

* * * *

Of the Posts called the Great Mecatina & Saint Modet.

* * * *

The Post of S^t Modet is Situated on the Coast of Labrador within the Straights of Bellisle, beyond the Bay of Philipeaux which is the Eastern Boundary of the Extensive Lordship of Mingan

* * * *

The next Instrument produced in Support of these Claims is the King 30 of France's Grant of St Modet to Mr. Hocquart for his life, dated the 20th July 1753.

By it the King grants him, in consideration of his long and Faithfull

p. 998

Services during the time of his being Intendant of Canada (which Office he held near 20 years) the same spot of Ground, on the Coast of Labrador, consisting of four Leagues in front, and four Leagues in depth, together with the Isles and Islets adjoining to the four Leagues in front

* * * *

Of that part of the two Lordships of the mainland and of the Isles and Islets of Mingan, which lies between Egg Island and Cape Comorant.

About 30 years ago the Western part of the two Lordships of the Mainland and the Isles and Islets of Mingan, from the River Moisie to Cape Cormorant, Twelve Leagues from the River St John, (which is the Eastern Boundary of the Province of Quebec,) was reunited to the Demesne of the King of France for the benefit of the King's Posts

Mr. Cugnet has likewise put into my hands another paper relating to the Title of the Heirs of Mr. Bissot and Mr. Jolliet to the Lordship of Mingan. . . . He says that on the 18th of February 1662, the French West India Company, who, by the Cession of the King of France, were at that time the Owners and Governors of Canada (les Regisseurs du Canada) Granted to Mr. Francis Bissot, Sieur de la Riviere, the Mainland on the North Side of the River and Gulph of St Lawrence from Egg Island to the Bay des Espagnols, called also the Bay Phelippeaux or Bay of Labrador, with power to make Settlements there for a Whale, Porpoise, and Seal fisherv in such places as he should find convenient for that purpose in that whole Tract of Country, and with a right of Hunting and Trading with the Indian.

[1927lab]

[9 Feb,
1767.]**PALLISER TO THE EARL OF SHELBURNE**IN DEFENCE OF HIS REGULATIONS AND PROCEEDINGS ON COAST OF
LABRADOR.

C. O. 194 VOL. 27.

MY LORDS,—In the year 1765 on a Visit I made to the Southern parts of my Government, in the Neighbourhood of S^t Pierres and Miquelon, I found great numbers of French from those Islands encroaching on His Majesty's Territories and on the Fisheries belonging to His Subjects, our People engaged in all sorts of Clandestine Trade with them, our Inhabitants of Newfoundland and vast numbers of Vessels from the Plantations all employ'd in fishing for y^e French, with several French Ships of War on the Coast to countenance and force this Clandestine Trade and Encroachments; I immediately put a stop to all this, and oblig'd the French Ships of War to quit the Coast; In the Execution of this Service, I discover'd that several People from Quebec, had settled themselves on the Coast of Labrador within my Government, for the conveniency of carrying on Clandestine Trade with the French both from S^t Pierres and directly from France; After I had put things into good Order in the Southern parts of my Government, and station'd Cruizers, and issued the necessary Orders to the Commanders, I proceeded to the Northward to do the same there, and in August I arrived in Labrador with several British Adventurers Ships under my Protection for carrying on the Fisheries there.

On my arrival I was inform'd of all y^e best Harbours and convenient Places along that Coast being possess'd in the Name of a few People belonging to the Province of Quebec, by Grants or Charters from General Murray His Majesty's Governor of Quebec, made when he was only Military Governor of that Place, each Grant including vast Tracts of Sea Coast with all the Islands Adjacent.—

I also found that those Settlers did not use those Places for carrying on the Fishery, but for the conveniency of carrying on a most Infamous and extensive Clandestine Trade with France, for supplying Canada with French Commodities, and other dealings with the French to the great Advantage of their Fishery, Commerce & Navigation, and without which the French cannot carry on the Fishery in those parts; those People were also in a State of War with y^e Natives of the Country, as well as with the many Lawless Crews resorting thither from the different Colonies.—

Such exclusive Possessions of the Fishing Coast held under Grants or Charters from a Governor of any of the Colonies, I consider'd no other than as partial and unjust Monopolies, restraining into y^e Hands of a few (and those Colonists) enormous Tracts of Land and Sea Coast, with all the Trade and the rich Fisheries within those Districts, to the obstruction of all Measures

p. 1000

for extending and improving the Fisheries, and to the utter exclusion of our Adventurers Ships from Britain, contrary to the special Priviledges which by y^e Fishing Laws they have a right to; also to the exclusion of all other the King's Subjects even from Quebec, and the other Colonies—therefore—

I consider'd such exclusive Possessions respecting the Fishery, as contrary and repugnant to the plain Words, Sense and Meaning, as well as to the Policy of every part of the Act of the 10th & 11th of William 3^d, and to every Rule and Regulation ordain'd thereby.—

I also consider such Settlers and Possessions (in that Country in particular) as contrary to the Kings Proclamation of the 7th October 1763.—

Thus applying the Effect of these Monopolies to the intent and meaning of the Fishing Laws, they appear'd to me exceeding Prejudicial to the Trade, Shipping and Navigation of this Kingdom, for I saw they must operate to subvert the very principles of the Fishing Act, and prove destructive of the great National object and advantage arising from the Fishery, for when once such a practice is allow'd in favour of the Colonies, or of any one of them, the Fishery will immediately become merely an American Fishery, the French reap the greatest share of the profits, and the whole be conducted by Men and Ships that will never see this Country; In that Case, all our British Ships and Men now employ'd in the Fishery, being above 300 Ships and 17,000 Men, must very soon be laid up, and that Grand Nursery for Seamen remain in America instead of this Kingdom, out of reach and where they may be withheld (under the Sanction of the Statute of 6 Ann. C37. S9) from ever being of Service for defence of the Nation, especially in such times of sudden danger as lately have, and in y^e natural course of things will often happen, and this will immediately be the case if I am not justified in having put a stop to so new & dangerous a Practice.—

Considering those Charters in this light, I conceiv'd it became my indispensable Duty to put an immediate stop to a practice of so exceeding dangerous a tendency.—

The whole matter appear'd to me reduceable to one Question, (*viz*^t) whether Settlers under Charters from a Governor of any of the Colonies, or on any other pretence whatever, shall take possession of, & constantly hold, exclusively, on the Fishing Coasts, either the Land and Coast with any Branch of the Fishery for Cod, Seal, or Salmon, together or seperately, or whether the whole shall remain open

and free to our British Adventurers to enjoy their Priviledge of the first choice of Places Yearly for the Fisheries, according to the Rules prescribed by the Fishing Act, and the constant usage under that Act, For when the Colonists are once allow'd to come and take possession of, and constantly hold places, and enjoy exclusively under any pretence whatever, either the Coast or any Branch of the Fishery, or to have the first choice of places yearly, our British Adventurers will be robbed of all the necessary Encouragements and Preferences that are granted to them by the Fishing Act, which if not preserv'd to them, they are not on a Par with the Colonists, nor can we have any Fishery from Britain; upon this view of the case.—

After duly considering the trust repos'd in me, I consulted my Commission

p. 1001

under the great Seal, and my Instructions under His Majesty's Sign Manual for Authority to dispossess those monopolizing, smuggling Settlers, and to annul those extraordinary grants, and for establishing Peace and good Order on that Coast.—

By both I found myself refer'd in all things respecting the Fishery, to the Act of the 10th & 11th of Will^m 3^d, without any exception or distinction respecting any part of my Government,—

I found myself strictly commanded not to do anything, nor to suffer anything to be done contrary or repugnant to the said Act.—

I likewise found myself authoriz'd in all things, not particularly provided for in my Commission and Instructions, to take present Order therein, and to report for His Majesty's Information my Proceedings, in order to receive His Ratification if Approv'd of.—

Hence I thought myself fully authoriz'd to annul all such charters, and to remove all Settlers under them, for it appear'd to me that nothing could possibly be more contrary or repugnant to the Act refer'd to, and to the Priviledges thereby granted to British Fishers, and no Person but myself was authoriz'd to take present Order in such matters.—

*sic.

How those Grants were originally obtain'd, and whether at any Expence to the Grantees I know not,—but relying on this Authority, on the rectitude of the Measures for the Benefit of the Publick, for fulfilling the intent of the Fishing Act, and on the receiv'd usage under the said Act, as well as the Customs of the Fishery for One Hundred Years before the passing that Act; I did annul those Charters and Grants, and determin'd to remove all the Settlers under them, and such of them as were within my reach, I did dispossess; I studied how to do this without damage or loss to them, and it was done to their real Profit instead of Loss, for they having no ship or Vessel there, I consulted with their Agent upon the Spot, and gave him my Opinion and Advice on everything he propos'd, and every possible Assistance was given him in doing what he thought best, and which was for the real profit, instead of loss to the

Owners.—

As soon as it was known at Quebec, that I had dispossess* the Grantees of their Lands, they complain'd to Governor Murray, who had never recall'd those Grants; He told them, that he had reported for His Majesty's Information, an Account of his having issued them, and no disapproval thereof had ever been signified to him, and therefore in support of them he took Cognizance of their Complaint, and with his Council of that Province proceeded to examine into, and to adjust their Accounts in order to obtain Damages from me, and attested their Proceedings under their hands, so that I must consider this as a Suit of the Governor and Council of Quebec, with a few more Monopolists, against the Governor of Labrador and all British Fishers; it also appears that some of the Council of Quebec, were concern'd in those extraordinary Grants; the Object of such a proceeding cannot be the benefit of the Trading part of His Maj^s Subjects, but it may answer some private purposes and be intended to intimidate me in the execution of my Duty, and to remove me from the King's Service, but His Majesty's Pleasure in this respect is the Law.

p. 1002

Here I cannot avoid pointing out one flagrant inconsistency in this matter; The People who complain against me, are complainants also with many others in the Name of all the People of the Province of Quebec, against restraints on Trade, Monopolies & exclusive grants of tracts of Coasts and Islands to the prejudice of a free Fishery within Mr Murrays present Government, and yet they prosecute me for annulling such pernicious Grants made by him, within the Limits of my Government; and the Validity of them seem still to be supported at Quebec, the Complainants encouraged & assisted by the Proceedings of the Governor and Council there, to prosecute me for removing the Settlers under them from Their Possessions, and for putting those few Grantees on the same excluded footing (with respect to that Coast) as Governor Murray's Grants had before put all the rest of the People of his own Province and this was only for a very short time (viz^t) from the end of one Season to the beginning of the other, that is till the Kings Pleasure could be known, and which was also a temporary and absolutely necessary expedient for establishing Peace and Order in a Country where no Government, Law or Regulation had yet taken place, and where War Repine, Robbery all sorts of Crimes and Enormities and the utmost Disorder and Confusion reign'd by mixt multitudes of Lawless Crews from all the neighbouring Colonies.

On my return to England in 1765, I found some of those Grantees arrived from Quebec Encouraged as aforementioned to prosecute me; They first represented to me that great damage had been done them in Labrador; I told them over and over again, that if by being dispossess'd of the Lands the

smallest thing belonging to them on the Coast, had been embezzled or lost, or not accounted for to their satisfaction, I would see it made good, if they would let me know what it was, but nothing would satisfy them without consequential damages for being remov'd from the Possessions granted to them by Governor Murray, and which they still continue to demand.—

After I left England in 1766 to return to my Government, they presented a Memorial of Complaint to His Majesty against me, which before my return to England His Majesty was pleas'd to dismiss, and the Complainants were refer'd by the Lord President to their Action at Law; Had it pleas'd His Majesty to have caus'd the matter to have been enquir'd into in Council, I should most cheerfully have submitted to whatever might have been Judged proper, and it may be presumed the Complainants would have acquiesced; as they had chosen that method by way of appeal from my decision in a Matter relative to a Claim to Land and exclusive Priviledges within my Government, and upon which no Person but myself had Authority to decide in that Country, And the Complainants still say they wish it had been so decided, rather than by a long expensive Law Suit, but under the Circumstance of being already dismiss'd I know not how far it may be proper for me to apply for it. Yet if in strictness of Law it should be determined that those People are intitled to any damages, I will hope His Majesty will determine whether Mr Murray or I ought to Pay it, since he tho' Ignorant of the Nature of the Fisheries, of the Laws relating to them, and without the least shadow of Authority made those extraordinary and unlawfull grants, which was the occasion of, and made all my proceedings respecting the Coast of Labrador necessary, had

p. 1003

it not been for those grants the Fishery ther would have gone on in the proper and usual way, without any difficulty or troubl'd to me in the Execution of my duty—

When I return'd to England in December last, I found myself giving up to Vexatious and expensive Law suits in Westminister Hall, y^e expence of which I can but ill afford to support, if it had pleas'd His Majesty to have indulged me with hearing in Answer to the Complaints before the Complainants had been advised to seek their remedy at Law, I trust I should havemade it appear that I have done nothing but what is agreeable to my Instructions, to the Fishery Laws, and consistant with the Duty of my Office for His Majesty's Service, and the benefit of his Subjects.—

I understand I am the first of His Majesty's Governors that has ever appear'd in Westminster Hall on such an occasion, therefore I must appear there insuch a light, as it will not be to His Majesty's Honour to continue me in his employ, however, if a total change in the mode of carrying on the Fisheries is to take place, and thereby the whole put into the Hands of the Colonists (which must be the consequence of my not being

justified for putting a stop to this new Practice begun and Encouraged by y^e Governor and Council of Quebec) I had rather it should be done under the sanction of an English Judge and Jury, than by an act, neglect or connivance in me.

I wish, not only on my own Account, but also on Account of Government (seeing that not only the Measures of Government and the Kings Instructions must be brought into Question) that the matter might have been heard at y^e Council Board, conformable to what I am inform'd has been the constant Practice in the like cases, and conformable to the wishes of the complainants themselves, but since I am precluded from that usual mode of Proceeding, and that this matter which is more of a Political than Personal nature, must be submitted to the decision of a Court of Law, I must beg the favour of your Lordship to lay this my humbl^e representation of my situation before the King, and to move His Majesty for leave to produce in Court my Commission and His Majesty's Instructions and (if I don't stand in a light unworthy of it) that he will be Graciously Pleas'd to order that I may have such Assistance from the Law Servants of the Crown, as shall appear to be necessary in a case in which the Publick Interest is no less concern'd, than my character and Conduct as an Officer and Servant of the Crown.—

I am with the utmost respect

My Lord

Your Lordships

Most Obedient & most

Humble Servant,

HUGH PALLISSER.

No. 247.

[23 July,
1767.]**ORDER AGAINST FIRING THE WOODS ON THE
COAST OF LABRADOR.**

BY HIS EXCELLENCY HUGH PALLISER, ETC., ETC.

Whereas the woods are frequently set on fire upon this coast by the crews of whaling vessels from the plantations and the same is an offence against the Statute of the 10th and 11th of William III., and is equally prejudicial to the public whether done wilfully maliciously or negligently. Notice is hereby given that if any persons by any ways or means whatever, shall set on fire any of the woods within my Government, they will be apprehended and sent to me at St. John's to be tried for such offence against the Statute.

Given, etc., in Pitt's Harbour, Labrador, 23rd July, 1767.

HUGH PALLISER.

N.B.—Copies of this order are put up along this Coast where Whaling vessels resort.

N.B.—No fires must be made on shore where there is a possibility of its communicating to the adjacent woods.

By Order of His Excellency,
JOHN HORSNAILL.

INSTRUCTIONS TO MR. LUCAS

[2 Aug., 1767.]

To Mr. Fra's. Lucas in
York Fort, Labrador,
to take upon him ye
care Charge of the
King's Shallop &
Boats to be left there
this Winter.

Mr. Robt. Baldock,
Mr. Thos. Dodd,
Surgn's Mate.
Wm. Tinnion,
Saml. Foster,
Thos. Butler,
Josh. Tracey.

WITH CARE AND REGARD OF KING'S SHALLOP AND BOATS
AT YORK FORT.

RECORD BOOK, ST JOHN'S, NEWFOUNDLAND. VOL. 4.

By His Excellency Hugh Pallisser, &c., Commander in Chief of
all His Maj's Forts and Garrisons and Ships and Vessels
Employ'd within the said Districts.

Whereas I have judged proper to appoint a Petty Officer,
with a Boats Crew, part of the Complement of His Majesty's
Ship Guernsey, to stay at York Fort in Pitts Harbour, Labrador,
during the Winter, to take care of the King's Shallop and Boats
to be left there for the service of the Garrison after the King's
Ships leave the Coast.

You are hereby required and directed to proceed with the
Six Men named in the margin to the said Fort, and take care of
a Yawl and two Wooding Boats, and when the Zephyr leaves
the Coast, the King's Shallop, also with all materials belonging
to them.

You are to follow the Orders and directions of Lieut. Saml.
Davys, the Commanding Officer of the Garrison, in all things
for the King's Service, and in case of his Absence or Death, I
hereby appoint you to succeed to the Command of the
Garrison, and to Execute the Instructions he has from me, and
in case of your absence or Death also, Mr. Robt. Baldock is in
like manner to succeed to the Command, and after him
Newman Serjeant of Marines.

As early in the Spring as the Season will permit, you are to
put the Shallop into the best order you can for Service, to be
Employ'd on the Coast, as the Commander of the King's Ships
Station'd here shall think proper after his arrival.

You are to keep an exact Journal of the Wind and Weather,
& of all Occurrences.

Given &c. in Pitts Harbr., Labradore, 2nd August, 1767.

2 August,
1767.**No. 249.****GOVERNOR PALLISER TO LIEUT. SAML. DAVYS,**TO TAKE UPON HIM YE COMMAND OF YORK FORT IN
PITTS HARBOUR, LABRADOR.RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 4, page 19
(reverse of book).

By His Excellency Hugh Pallisser, &c., &c.

Commander in Chief of all His Majesty's Forts and Garrisons &
Ships & Vessels employ'd within the said Districts.

IN PURSUANCE of the King's Commands for Establishing Posts with Guards on the Coast of Labrador, for the Encouragement and Security of His Subjects Employ'd in the Fisheries on that Coast, against insults from the Savages as well as to secure their Ships, Boats, Craft, Tackle and Fishing Works, from being damaged or destroy'd by Lawless Crews from the Plantations or elsewhere, I have erected a Strong Block House and Stockaded Fort at Pitts Harbour on the said Coast.

You are hereby required and directed to take upon you the Command of the said Fort, named York Fort, & observe the following instructions.

1st. You are by every means in your Power, to protect, and defend His Maj's Subjects resorting thither, with their Ships from Britain, and their Effects, Fishing Works, &c. as above-mention'd.

2nd. Whereas many lawless Crews from the Plantations and elsewhere, resorting to the Coast of Labrador, have been guilty of all kinds of disorders, such as Robbing, Plundering and Murthering each other, and the Natives of the Country; also destroying the Fishing Works in the absence of the Ships, Firing the Woods, and sundry other Crimes and Enormities to the obstruction of the Fishery, you are as much as in you lies to prevent the same in future, and for better, enabling you to do this, and to preserve the Peace, you will herewith receive a Commission appointing you His Majesty's Justice for keeping the Peace, and any Persons that set fire to the woods, or that Commit Robbery, or do any damage to the Ship Fishing Works, or Commit Murther on any of His Majesty's Christian or Indian Subjects, or any other Capital offence, you are to

apprehend and deliver such Offenders to the Commander of any of His Maj's Ships that may come to the Coast, in order to their being convey'd to St. John's to be try'd for the same at the General Assizes there.

p. 1007

3rd. You are not by Virtue of these Instructions or of your Commission, as Justice of the Peace, to do anything contrary or repugnant to the Statute of the 10th and 11th, of William 3rd, which you will herewith receive, nor to oppose or interfere with the powers thereby granted to the Fishing Admirals in what relates to the Fishery, and the Rules and Regulations ordained by the said Act, nor interfere in anything but for preserving the Peace, and the particular offences mentioned in the preceding Article.

4th. The Officer who you will Relieve, will deliver you an account of the Ordnance Arms, Ammunition and Stores in the Fort, which you are to be carefull of, and keep a regular account of the Expenditure thereof.

5th. I have appointed the Guard to consist of Twenty two men, all apart of the Complement of His Majesty's Ship Guernsey (viz) Yourself, a Serjeant, a Corporal, and twelve Marines, a Midshipman and Six Seamen, the whole to be in all things under your authority and Command. Mr. Lucas, Midshipman of the Guernsey has my directions to take on him the dare and Charge of the King's Shallop a Yaul and two Wooding Boats, which I have ordered to be left with you to be employ'd on the Service as you shall see occasion to direct; I have also order'd provision to be laid in for the aforementioned number of Men, to serve till the first day of August next. You are to be very careful the same is regularly issued according to the Established Allowance of the Navy.

6th. You are to be very careful to keep a proper Guard and make a proper disposition for being always secure against any Surprise or Attacks from the Savages you will herewith receive my Regulations relating to ye Natives of the Country for your information and guidance in what is thereby directed, taking care (especially after the Ships have left the Coast) never to put yourself or any of your People into their power, however friendly they may pretend or appear to be, and above all things never to admit above one or two within your Works, and that not often, only now and then, to convince them that no harm is intended to them, and dismiss them with kind and friendly treatment, yet be always strictly on your Guard, nor don't encourage them to abide in your Neighbourhood, and on no Account ever let your People go out without Arms, either by land or in Boats.

7th. When any Vessels from the Plantations come into your Port (and when their is no King's Ship there) you are to take an

Account of them in the Form you will herewith receive, and let the Masters read the Advertisement relating to them dated the 1st Aug., 1766, which you will also herewith receive, and inform the Masters, that if any of them are guilty of any of the Offences therein mentioned, they will be apprehended by you, and sent to me, to be Punished with the utmost severity of the Law.

8th. If at any time any French or other Foreign Vessels should come on the Coast you are to detain them (except in cases of very apparent distress)

p. 1008

and deliver them to the Commander of the first King's Ship that may arrive on ye Coast to be sent to St. John's for my Examination, and to be proceeded against according to Law.

9th. You are to Communicate these Instructions to ye Commander of any of the King's Ships that may come to your Harbour, & follow any Orders they may Judge necessary to give you for the King's Service.

10th. In case of your absence or Death, I have appoint'd Mr. Fran's. Lucas to succeed to the Command of the Garrison and after him Mr. Robt. Baldock, and after him Newman, Serjeant of Marines.

PRAYING TO BE SUPPORTED IN THEIR RIGHTS AND PRIVILEGES ON COAST
OF LABRADOR.

B.T. NEWFOUND^{LD}. VOL. 20.

To His Excellency Hugh Pallisser Governor and Commander in Chief in & over the Island of Newfoundland, the Coast of Labrador & of all the Territories dependent thereupon.—

We the Undersigners, being Adventurers in the Fishery from Britain to the Coast of Labrador, beg leave to represent to your Excellency, that we and a great many others are determined to pursue the Ship Fishery with Spirit to this Coast, since by your measures it is made Manifest that We may depend on being supported therein, under the Rules and

Regulations prescribed by the Statute of the 10th & 11th of William 3^d and that the Government will provide a Sufficient security for the Persons, Ships, Effects & Fishing Works of the Adventurers, as well from the several Nations of Savages of the Country, as from the depredations, outrages and encroachments which we have been expos'd to from the many Lawless Crews resorting hither from the different Plantations and elsewhere.

And as we are satisfied your measures are proper for preserving good Order, and for the Publick benefit, without giving undue preferences to individuals We beg leave to offer to your consideration our opinion, that it will be a great Encouragement to the Ship Fishery, if such Fishing Ships as

p. 1009

may first make a new place and Fishing Conveniencies thereon, can be only allowed to enjoy the same to their own use and benefit, so long as they continue to occupy and use the same with Fishing Ships Yearly but no longer; a declaration of Your sentiments upon this Head, and that you think such a Custom will be conformable to the intention of the said Statute for extending and improving the Fishery, will, we know determine great numbers immediately to become Ship Adventurers to this Coast from Britain.

On this occasion, we also beg leave to return our thanks for the Advantages we have already experienced from the pains the Kings Officers upon this Coast under your Excellencies directions, have taken for putting a stop to the great disorders that have of late Years been committed on this Coast by Lawless Crews from the Colonies, by which great advantages to Ye Nation have been lost, the Coast kept in a State of War, and the utmost confusion reigned amongst the many different People from the different Colonies all disputing, contending and obstructing each other, and the whole conspiring to exclude and Ruin Adventurers from Britain.—

We beg the continuance of your measures for suporting us in our Rights and Privileges as Ship Fishers from Britain arriving Yearly, equipped and Manned as the aforemention'd Statute directs; against all obstructions and Inter lopers, and particularly that care may be taken for preserving the Woods for the uses of the Fishery, which is already very scarce, many tracts of many Leagues each, having been already fired and destroy'd by the aforemention'd disorderly Crews, and above all we hope that you will not allow of any Patents or Grants from the Governors of any of the Plantations for any Persons whatever to hold exclusively any particular districts or Harbours on this Coast, or any branches of the Fishery thereon such as we have been inform'd the Governor of Quebec has made, since such a practice would prove not only the immediate ruin of us, but of the whole British Fishery in general.—

No. 251.**REGULATIONS**

FOR THE ESTABLISHMENT OF THE BRITISH FISHERY ON COAST
OF LABRADOR, 1767.

[10 Aug.,
1767.]

C.O. 194. VOL. 18.

By His Excellency Hugh Pallisser Governor of Newfoundland and Labrador, & all the Islands and Territories dependent thereupon, Commander in Chief of all His Majesty's Forts and Garrisons, and Ships & Vessels Employ'd within the said Limits.

Sundry Merchants and Adventurers in the Fishery, having by Memorial in behalf of themselves and others, represented to me several matters for the Encouragement of the Fishery on this Coast of Labrador, particularly that it would be an Encouragement to the Ship Fishery, if Fishing Ships who may first clear and make New Fishing Places and erect New Stages and other conveniences on this Coast of Labrador, could be permitted to enjoy them to their own use, so long as they continue to resort to and use them with Fishing Ships Yearly and no longer, and on ceasing so to use them, the same to become Publick and common. To the said Memorial I think proper to make the following declaration.

I have advised with the present Ship Adventurers upon the Coast, & have consider'd the said proposal, and applied it to the Words, intent and meaning of the Statute of the 10th & 11th of William 3^d in favour of Ship Fishers, and find that the several good Rules and Regulations ordained by that Statute (and which must be observed here) were founded on and are a confirmation of the Ancient customs and usages established and observed by the Ship Fishers amongst themselves, before there was any Statute Law for regulating the Fishery; therefore, it being the general opinion and consent amongst the Ship Adventurers that the aforesaid proposal should become a rule and custom amongst them, that is, for the Ship Adventurers (but none else) who now have on hereafter may first make New Fishing Places, and erect New Stages and other Works on this Coast of Labrador, to enjoy the same whilst they continue to use them from Year to Year successively, with Fishing Ships arriving Yearly from Britain, Lawfully qualified as such, with the usual Fishing Certificates on the Oath of the Master, of their being Mann'd as is prescribed by the said

Statute, and the Fishing Admirals themselves strictly to conform to this Rule, and in the exercise of their Authority to hear and determine

p. 1011

in the first instance, all disputes arising in their respective Harbours, about the choice of Rooms in turns as Ships respectively arrive &c^a to pay regard to the plea of those Ship Adventurers who have, or hereafter may first make any New places and erect New Stages and other Works thereon, and to adjudge the same to them on their return, or such part thereof as may be in proportion for their number of Men according to their Fishing Certificates then to be produced, and for that Year; I therefore approve of this proposal becoming an Established Rule, because it appears to me as represented (viz^d) Reasonable and agreeable to the intent of the said Statute, for the Encouragement and Establishment of the Ship Fishery, but it is always to be understood, that nothing is to be construed to take away any of the Lawfull Authority and rights belonging to the Fishing Admirals, to judge all matters which concerns the privileges belonging to the Fishing Ships according to the said Statute and the above Rule, nor to invest any Person whatever, with an exclusive property or possession of any places or Fishing Works in this Country, so as to give any right or pretence for any Persons to damage or take away such Works once erected, or to let for Rent, Sell, Mortgage, give away or bequeath the same, nor to Establish any Inhabitants thereon, or on this Coast, nor to dismiss or leave any of their Men in this desolate Country (except such as is hereafter provided for) all which is inconsistent with a Publick and free Ship Fishery, causes the Fishing places to be ingross'd by a few, the Ship Fishers to be excluded, and the Fishing Trade to be contracted into the Hands of a few to the very great loss of the Publick, and advantage of our Rivals in that valuable Trade, therefore all places and Works thereon must become common and Publick after the first Erectors thereof once cease to use them, or any part of them during one Season, with qualified Ships and Men as above prescribed, and a Register to be kept of the whole.—

All Inhabitants, Settlements and possession upon this Coast of Labrador, between the Limits of the Government of Quebec, and the Limits of the Hudson's Bay Companies Charter, are forbid by His Maj^s Proclamation of the 7th Oct^r 1763, and all Persons who had then made any Settlements here, under pretended Grants from any of the Governors of the Colonies, or on any other pretence, are by the said Proclamation warned to withdraw and quit the same; therefore, and for better securing the Ship Fishers Works from being destroy'd in their absence, no person can be permitted to stay on this Coast in the Winter, till His Majesty's farther pleasure shall be known, except the Masters of three of the first arriving Fishing Ships at or within ye Limits of each principal Harbour hereafter Named, may chuse to leave each a Crew of Twelve Men (who

agree to stay) and no more, for the Winter Sealing Voyage &c^a the Foremen or Skippers of such privileged Crews to be prudent trusty Men, and to be furnished with a Certificate from the Master of the Fishing Ship to which they belong, who is to be answerable for the conduct of his Crew so left, and to make good any damages they may commit to the Fishing Works; The Masters of the three first arriving Ships who intend to use this privilege, must in future declare it in Writing, to the Fishing Admiral at each principal Port, on or before the first day of August each Year, this is allowing full as

p. 1012

many Crews as there are Posts within the Limits of each Port fit for the Seal Fishery, and this preference thereof given to the first arrivers, is intended as a reasonable and usefull reward and Encouragement to the most Adventurous and Industrious Ship Fishers; besides this Limitation of the number of Winterers, is absolutely necessary for preventing constant quarrels about those Sealing Posts, and likewise many other quarrels, outrages, disorders, and even frequent shocking murthers that yearly happen, amongst numbers of such People staying in this desert Country, likewise to prevent quarrels, murthers and Acts of Violence against the Natives of the Country, by which they will be provoked to be always our Enemies, and to obstruct the Fishery.—

And as a farther Encouragement to the Ship Adventurers on this Coast, a strong Block House is erected in Pitts Harbour, with an Officer and a Guard Established there, under the protection of which they may leave any number of Boats, Craft and Fishing Utensils in perfect security during the Winter; and it is intended to erect others such for the same purpose, at other convenient Places along the Coast.—On this footing the Fisheries on this Coast must remain till the King may please to order it otherways.

Given under my hand in Pitts Harbour Labrador 10th Aug^t 1767.

HUGH PALLISSER.

Pitts Harbour, Labrador,
14th Aug., 1767

Your letter of the 2nd October, 1766 and 18th May, 1767 in favour of several Persons therein Named (Inhabitants of Quebec) to hold Posts on this Coast for the Fishery, I did not receive till this Day.

The exceeding confused state in which I found things on this Coast in my coming to this Government, occasioned by great numbers of the most abandoned People from all the Colonies resorting to it, all considering it as a Lawless Country, and all disputing, quarrelling, contending & obstructing each other, has produced so many outrages and disorders, that the most vigorous measures, and the utmost endeavours of the King's Officers in those parts, have not yet been able to reduce them into any tolerable order, or to enforce the Fishing Laws, this, together with the difficulty of preserving Peace between such People and the Natives who are the most Savage of all Savages, a Tribe of about Five Hundred of which are come down and now encamped under the protection of the King's Ships at this place, so that I am now so fully engaged, that I have only time to say in Answer to yours, that your request cannot be granted, and for the reasons must beg to refer you to the inclos'd Memorial from the Merchant Adventurers, and my declaration in answer thereto, explaining the footing upon which the Fishery is Established, and as it must remain until ye King shall please to order it otherways, all which I wish to be understood, and made as Publick as you think proper to make it for the information of the People of your Government, and also, that they may know that I shall always have the utmost pleasure in rendering any services that I can regularly do, to any Person worthy of your recommendation, notwithstanding some inconsiderate New Settlers in your Province, endeavour to be as troublesome to me in England, as they are here; for detecting and putting an end to their infamous Clandestine Schemes in combination with the French, and for enforcing the British Laws, for supporting the British Fishery and Navigation, upon which the Nations Marine Strength and security so much depends.

I am,
With great regard,
Sir, &c., &c.

[27 Aug., 1767.]

ADDITIONAL RULES FOR LABRADOR FISHERY.

N.B. This Rule relates only to Esquimeaux Island, Henley Island, Castle Island and the Seal Islands without any regard to room for drying and curing of Fish, those Islands being all deemed Stage Room only.

RECORD BOOK. VOL. 4.

Additional Rules proposed in Labrador, agreed to and register'd.
Chateaux Bay, Labrador, 22nd August, 1767.

1. According to the opinion of all Adventurers in this District, it is agreed, that from sufficient experience, it appears that Esquimeaux Island, Henley Island, Castle Island, and the Seal Islands, are not places where any Person can cure a Voyage of Fish, but that they are exceeding convenient places for erecting many stages and Works upon, for Splitting and Salting Fish only, therefore to prevent the same being engross'd by a few, and that as many Ships may as can possibly with conveniency be admitted to the use of those Islands for the aforesaid purpose, after duly considering all circumstances, and the course of the Fishery upon this Coast, it is agreed as follows:

That it is necessary to have Stage Room enough to lay occasionally at one time, two Hundred Quintals of Fish in Salt pile per Boat, and that a space equal to 25 feet square which is 625 square feet is necessary and sufficient for that and all other purposes, excluding the Stage Head, the measurement to commence at 36 feet from the outermost Beam of the Stage Head.

That all Stages now built, or that hereafter may be built on the said Islands, shall be measured, register'd and Rated according to the above proportion, but no Stage to be Register'd till a Platform of at least two Beams length is laid, and a Roof frame over it at the end of the Season, and to be allowed the following Season to finish it, then to be Rated according to this proportion.

That if Ships should occasionally make their Stages on the said Islands serve for a greater number of Boats than the above proportion, that shall not give them a right to hold any adjacent or other vacant Ground for those overplus Boats, from having Stages Built thereon by others.

That if the Measurement of a Stage exceeds the even proportions above mentioned so much as one half of a proportion for a Boat, such excess to be rated for another Boat.

That any Ship may build Stages on any vacant space on the said Islands, observing to leave sufficient room between his in and out Stage and another for two Shallops to be abreast.

All Hutts, Cookrooms, &c. belonging to each Stage, are to

be built on the Shore as near as possible, within the extent of their respective Stages along the Shore.

p. 1015

2. In order to put an end to all unfair practices and engrossing places to obstruct discourage and exclude other Adventurers on the said Island, as well as on other parts of this Coast.

No marks whatever that may be put up on any places on this Coast, except Stages and Fishing Works actually built or in hand a Building, shall exclude another Ship on the spot, from immediately Building thereon, and whoever begins a Stage without finishing it at the end of a Season, it is not to be register'd except a Platform of at least two Beams length is laid and finished, this and nothing else to be deemed a lawfull mark, then it is to be register'd and allowed the following Season to finish it, and all unregister'd places are deemed void and free for a new comer to chuse and Build thereon, notwithstanding any marks put up thereon.

3. Whereas great disorders and damages frequently arise to the Adventurers, by strong Liquors being sold amongst the Fishermen and Seamen, it is agreed that no Person shall sell or pretend to give Strong Liquors to the Fishermen and Seamen of another Ship on the Coast, and whoever does so, on being convicted thereof before any two of the Fishing Admirals of the Harbour, or the Commander of a King's Ship, if he is a proprietor of all the Stages and Works on this Coast belonging to him, shall be forfeited to the Publick, and the same to be enter'd in the Register Book accordingly, and if such Person is a Master of a Ship, an Agent or a Servant, he shall forfeit all his wages to the Master of the Seamen or Fishermen, to whom the Liquor may be sold or pretended to be given, and if the Employers of such Masters, Agents, or Servants, continue them afterwards in their service upon this Coast, all the Stages and Works on this Coast belonging to such Employers to be forfeited to the Publick.

N.B. This Rule does not extend to Esquemeaux Island, Henley Island, Castle Island and the Seal Islands, which are appropriated for Stage Room only.

4. In order to prevent as much as possible disputes, arising hereafter about the space of beach or Flake Room to be allowed to Fishing Ships on this Coast, in proportion to their number of Men and Boats, there being no Rule prescribed for it by the Fishing Act, and seeing the difficulty of prescribing a rule for each of the various kinds of places; In order that every Adventurer may have full and sufficient Room for carrying on their business with conveniency, the nature of the Fishery on this Coast also consider'd; It is agreed that a space of one Hundred and Twenty Feet Square for each Boat and every Seven Men, contained in a Ships Fishing Certificate, is on a medium a full and sufficient proportion to be allowed for all the various kinds of Ground on which the Adventurers who are Proprietors or Occupiers may make any kind of Flakes and Fishing Works they think best adapted to the Places, and in

cases of disputes arising concerning Room, the Fishing Admirals are to decide the same by this Rule.

No. 254.[15 Dec.,
1767.]**PALLISER TO EARL OF SHELBURNE,**

REPORTING ON STATE OF BRITISH SHIP FISHERY, 1767.

B.T.N. VOL. 20.

This accompanies the general Scheme of the British Fishery within my Government for this Year 1767, To which I have only to add for your Lordships Information, that amongst the many abuses in the management thereof, I have been particularly attentive to endeavour to remedy that great one so much complained of (Viz^t) the great number of Idle useless People remaining in the Country during the Winter, which is a dead charge on the Fish Trade, a good deal has been done towards it, and I flatter myself it may be accomplished in a short time; I have a satisfaction in being able to inform your Lordship, that the number of Ships employ'd therein has Yearly increased, and the number of Men returning Yearly to Britain and Ireland is full double what it ever has been for Sixty Years past, tho' yet not quite equal to what France has from her limited Fishery, the particular measures which I have pursued this Year for accomplishing this end, is contained in the paper herewith sent, titled an Order issued in 1767 for sending home all Men that are useless in the Country, after the Fishing Season is over.

A part of the Coast Fishery this Year has proved very bad from the scarcity of Fish, but the success in other parts has in a great measure made up that loss.

I visited the Coast of Labrador this Year, and find reason to confirm my former Reports of the Value of that new Fishing Coast, Twenty Seven British Fishing Ships were there this Year, those who first objected to establishing the Ship Fishery there, have now address'd me to support it, I have accordingly established it upon the System of the Act of the 10th & 11th of Will^m 3^d and under such Regulations conformable thereto, as the Adventurers themselves desired, so there is a good prospect of that Fishery being much extended for the Publick benefit; the measures taken for this end with the advice and consent of the Adventurers on the spot, is contained in the paper titled Establishment of the Ship Fishery in Labrador 1767.

With respect to the Trade and Fisheries carried on within this Government by Vessels and People from ye Plantations, the particulars thereof is annexed to the General Scheme of the Fishery herewith sent, it may be proper here, only to report

upon this Subject, that the mix'd Multitudes of disorderly Crews from the different Colonies resorting to this Government, have this

p. 1017

Year behaved more orderly than heretofore, fewer Insolences to the Kings Officers, and fewer mischiefs and obstructions to each other have hapened; upon the whole they are now reduced into some degree of order, and all seem to be convinced that the necessary Regulations made by me, are Calculated for their benefit, and submit thereto, a few offenders excepted amongst the New England Men, who are the most difficult to manage.

**REPORT OF ATTORNEY GENERAL AND SOLICITOR
GENERAL TO LORDS OF TRADE.**

To the Right Honourable the Lords Commissioners for
Trade and Plantations.

MAY IT PLEASE YOUR LORDSHIPS,—In Obedience to your Lordships' Command, Signified to us by Mr. Pownal's Letters of the Seventeenth day of April and the Twenty Second day of May last, Inclosing a paper drawn up by His Majesty's Attorney General for the Province of Quebec, upon certain Claims of property in, and exclusive Possession of, Land and Fishing Ports, on the Coast of Labrador, in the Gulph of St. Lawrence in North America, set up and exhibited by several Inhabitants of that Province heretofore Subjects of France; and desiring us to take it into our Consideration;

* * * *

The Claim as it is now made, is of an Exclusive Right of propriety in the Soil, Containing, Originally, in Extent, along the North shore of the River Saint Lawrence from the Isle of Eggs to the Bay Phelippeaux, which appears to be about five hundred Miles, and in depth, into the Country without Bounds or Limitations; . .

W. De GREY,
E. WILLES.

Report of the Attorney and Solicitor General.

No. 256.

PALLISER TO SHELBURNE,[24 Feb^y.
1768.]RECOMMENDING EXTENSION OF REGULATIONS OF ACT OF 10 & 11 WM. III.
TO THE COAST OF LABRADOR, ETC.

COL. COR. N. VOL. 3

MY LORD,—I beg Leave to represent to Your Lordship, that as there is no Statute Law for regulating the Fishery on the Coast of Labrador, there seems to be an absolute necessity for a Clause to be inserted in some Act of Parliament, for extending such part of the Act of the 10th & 11th of William 3^d to the Coast of Labrador and the Islands now annex'd to the Government of Newfoundland, as respects British Fishing, Ships, without which, the utmost confusion and mischief must immediately ensue, as well amongst a multitude of Lawless Crews from the different Colonies and our Fishers from Britain, as between them and the French in Combination with the Canadians and the Quebec Traders against all the rest, also with ye natives of the Country, for neither I, nor any Officer under me, will venture to interfere and prevent them, not being myself supported or secured from vexatious suits, but on the contrary, have (unheard) been turned over to the Courts of Law, for only moving a few Setlers from thence, who had pretended to take possession of 140 Leagues of that Coast, without any Licence from the King, and by Authority only of a Colonel in the Army, I therefore beg Leave humbly to submit what is above proposed to Your Lordship's Consideration, and am with great Respect.—

My Lord

You Lordships

Most Obedient and most

Humble Servant

HUGH PALLISSER.

London 24th Feby 1768.—

P.S.—That Your Lordship may Judge of what is above proposed, I take Leave to add my farther reasons for it.

Because by the above mentioned Act, Fishing Ships are described to be Ships from England, Wales, & Berwick, now from Britain.

Because such Ships only are qualified to be Admirals, and they only have a Judicial Authority in the respective Harbours, to decide all Disputes on the

*sic.

spot in the first instance, and to preserve Peace and Order, and to see the Rules of the Act duly Executed.—

Because such Ships have the Lawfull right to the choice of all Places as they respectively arrive, & are not to be excluded from any.

Because no Person whatever can possess and use any place till such Ships arriving from England, Wales & Berwick (now from Britain) are all Provided.

These and other Powers and Privileges granted by the said Act to Fishing Ships, is what has kept the Fishery in the hands of British Adventurers in Newfoundland, and without a Clause to Establish the same, or some other form of Government for the Fishery in Labrador, the consequences * to be apprehended is* dreadfull,—27 such Ships having established Fisheries there the last Year, and I suppose not less than 50 are now Equiping for that Coast, trusting to their being Protected in their Rights and Privileges, which, under the Authority of my Patent as Governor and the Kings Instructions to me, I assured them of.

To The Right Hon^{ble} the Earl of Shelburne, one of His Majesty's
Principal Secretaries of State.

Endorsed: London 24th Feb^{ry} 1768.

p. 255.

No. 257.**REPRESENTATION OF THE LORDS OF TRADE TO
H.M. THE KING**UPON CLAIMS OF INHABITANTS OF QUEBEC TO EXCLUSIVE PROPERTY ON
COAST OF LABRADOR

C.O. 42 VOL. 28.

To the King's most Excellent Majesty.

MAY IT PLEASE YOUR MAJESTY,—In obedience to Your Majesty's Commands, signified to us by the Earl of Shelburne, one of Your Majesty's principal Secretaries of State, in his Letters of the 31th of March and 28th of April 1767, We have taken into Our Consideration the Petitions of Mess^{rs} Cugnet and Tachet, together with several Papers & Documents respecting the Claims and Pretensions, which sundry Inhabitants of Your Majesty's Province of Quebec, and heretofore Subjects of France, set up and exhibit, of Property in, and exclusive Possession of Land and Fishing Posts on the Coast of Labrador in the Gulph of S^t Lawrence; and being required to report Our Opinion for Your Majesty's Information, touching the Validity of these Claims & Pretensions We beg leave humbly to represent to Your Majesty;

That the Examination of these Claims appearing to us to relate entirely to Matters of Law and Property, which do not come under Our Cognizance, we judged it proper to refer the same to Your Majesty's Attorney and Solicitor General, for their Advice and Opinion upon the Matter, And having now obtained their Report upon the Cases referred, in which Report they have in a full, clear and circumstantial Manner entered into an examination of the said several Claims and Pretensions, we beg leave to annex a Copy of the said Paper to this Our humble Representation, observing at the same time to Your Majesty, that, from such Judgement as We are able to form upon this subject, We do entirely agree with the Arguments and Observations of Your Majest's Attorney and Solicitor General, set forth in the above Report; and are clearly of Opinion, that these Claims standing as they do at present, cannot, in any Judicial Enquiry, be allowed as valid and effectual, and should not therefore prevent Your Majesty from making any such Regulations and Arrangements in the Government and Direction of that Coast and Country, as shall seem adviseable for the general Benefit of these Kingdoms, and the promotion of Navigation and Commerce.

This Point being established, little Difficulty, as we conceive, can occur, whether these Claims, thus deemed inadmissible in point of Law and Justice,

p. 1022

should be allowed upon Principles of Policy and Prudence, The State and Extent of the Coasts and Islands thus claimed, their Situation with respect to the Fisheries carried on in the Gulph of S^t Lawrence, and the Influence, which such exclusive Property, as is therein set forth, must necessarily have over those Fisheries leave us no room to doubt, but that the Establishment of such private Rights and Possessions would be attended with very prejudicial Consequences. And in this Opinion we are the more confirmed by the Information and Report of M^r Pallisser, Your Majesty's Governor of Newfoundland, who has attended us on this Business, and represented, that the regrating any part of this Coast or any Branches of the Fisheries there to any particular Person or Persons, will, in his Opinion, not only deter any Adventurers from Britain from carrying on the Fisheries on that Coast, for which, it seems, a great Number of Ships are now fitting out for the ensuing Season, and from which very considerable Advantages are derived to this Country; but that (in addition to this Objection) it is to be apprehended, that all such Posts and Settlements, if granted away, instead of being directed to the Purposes of such Grants, will most probably be applied to the Introduction of illicit Trade and Commerce, and converted into Receptacles for the Merchandize and Manufactures of France.

All which is most humbly submitted.

CLARE
SOAME JENYNS
W^m FITZHERBERT
THOMAS ROBINSON.

[19 March,
1768.]**CASE OF PROPRIETORS AND POSSESSORS OF SEAL
FISHERIES ON COAST OF LABRADOR**

*sic.

B.T. NEWFOUNDL^D. VOL. 20.

Case of The Land holders in Canada, Proprietors of Seal Fisherys on the Coast of Labrador, and their Leasees,* As also of the Possessors of certain Seal fisherys on that Coast, under Grants from the Governor of Quebec, with respect to certain Rules & Regulations established by the Governor of Newfoundland.

The Rules and Regulations which give birth to the present question, may have been well intended, to promote two capital objects, viz. The improvement of the fisherys of Newfoundland & the Labrador Coast, and the training up of Seamen, from which nursery His Majestys fleets might be Supply'd. But the best of purposes may sometimes fall short of the Sanguine expectations of Projectors.

In the present case, it is presum'd there will be little difficulty to show, that neither of those Advantages could follow the observance of these Rules, as to the Seal fisherys; That His Majestys Subjects in Canada, must be deprived of their natural rights, The propertys vested in many Canadians, must be annihilated, And Adventurers in the trade, who upon the greatest good faith have employed large Sums in re-establishing the Seal fisherys on the Labrador Coast, which had been destroyed by the war, must be heavy Sufferers, while the Seal fisherys must be unavoidably lost to Great Britain.

*sic.

It can be no matter of dispute, that the Coast of Labrador was one of the dependances of Canada, anterior to the reduction of that Country, by His Majesty's Forces, and it is equally undeniable that the Several Governors appointed by His Most Christian Majesty exercised every Act of power upon that Coast, which they lawfully could do in any other part of Canada or New France; of consequence after the Reduction Labrador was held and deemed as much a dependance of Canada, as any other part of that Country, until regular Governments were established, and the Coast of Labrador United to that of Newfoundland.

While Canada remained in the hands of the French, the improvement of the various fisherys, along the Coast of Labrador, became an object of national concern; Among others a Seal fishery was attempted and brought

to a degree of perfection, and the returns from this branch, sent yearly to France in payment of the products of that Country consumed in Canada might Ammount* to about £10,000 Sterling.

This Species of fishery is almost unknown in any other Country, and is practiced in a manner widely different from any other fishing, in the Gulph or River St Lawrence: Great caution, experience & Judgement are absolutely necessary to bring the Seal fishing to any account, and it will appear evident that any attempt to make it general must ruin it. Other fisherys such as Cod, Whale & the like may be prosecuted in the open Seas, and in various different places and Shapes, and were general under the French Government But the Seal fishery's are chiefly formed by the Contiguity of small Islands or Rocks to the main Land, which occasion strong Currents called Passes, where only such fisherys can be exercised, and hitherto only about twelve that are of any consideration have been discovered. The Seal fishery is chiefly followed in the Winter Season, and the operation of catching these Animals, commences the first week in December and continues only about fifteen days; But the fishers employed in this business, must be at their Station in the course of the month of September, & cannot get away from it before the end of May.

Thus besides the fishing implements and matterials, a Sufficient Stock of provisions and other necessarys must be laid in, and for the same reason as well as for the purpose of making preparing and Storing the oyl, The Occupiers of Seal fisherys must have dwelling houses warehouses & a variety of utensils, whence it is apparent that the exercise of these fisherys will ever be attended with a very great expence. The method of fishing is thus, A certain number of nets remarkable for Strength, and of a particular contexture fitted to the depth of the Water and the width of the respective Passes, are fitted to strong Cables or hawsers, & placed in the Pass at certain distances, having one end Secured on the Rock or Island by Anchors, and the other on the main Land by Capstones, The uppermost or lower nets (as may Suit the occasion) are sunk quite to the Bottom, the others are kept at full stretch across the Pass—This done, the people carefully watch the appearance & motions of the Seal Shoals as they approach the Pass, either in coming up or in going down the River, and as soon as the bulk of the Seals have got over the outermost or end nets, all hands are set to work to heave these nets to the Surface of the Water, by which means the Seals are enclosed, and entangle themselves in the nets till they are caught. In this operation Singular care is necessary to any Success, The fishers must not allow the trace of a foot, to appear on the Shore, nor any Carrion to lye within their Smell otherwise the Seals often change their course and defeat for that time the Success of the fishery, even the smallest interruption in the neighbourhood of the entrance of a Pass would have the same Effect and hence it

was, that the french Government found it impracticable to make these fisherys general because the least competition among Contending Adventurers destroyed the Success of each. Besides every Occupier of Such fishing must Suit his tackle to his particular Pass, which will by no means answer at any other but at such an expence & loss of Matterials as to destroy in one Season perhaps what

p. 1025

would serve at one pass for three years with moderate repairs, for there are not two Passes on the whole Coast that do not differ most matterially in the essential Articles, the depth of the Water, the Strength of the Current, the width & length of the Passes, being as various and different, as the Passes themselves are distinct and Separate. Some of them require fourteen or fifteen nets to fill them, others more and Some are occupied by a Smaller number; so that unless a Seal fisher knows with certainty the Pass which he is to occupy, he neither can judge of the Outfits necessary to be made, or the number of people to be employed, nor can he afford the expence when he has done it, if by the Regulations his possessing any one Pass more than one Season depends on the uncertainty of a first arriving Ship.

The Seal fishery was first discovered and practiced many years agoe, by Mess^{rs} Jolliet, Anticosti Cartier, Niverville & others, and it is certain, that in respect of their discoveries or other services rendered to the Government of France, they did obtain Grants of Several Islands in the River or Gulph of St Lawrence and some tracts on the main land, with the exclusive privilege of the Seal fisherys, hunting and trade with the Indians, They connected their familys by inter marriages, and the rights of property which were vested in them, have been transmitted thro a long line of Successors, have been the Subject of Sale and transaction with indifferent people and have passed into other familys by variety of marriage settlements as patrimonial inheritances. These Heirs or Proprietors have always either occupied or Leased out their Seal fishing Posts to Tenants at pleasure. Others of these original Seal fishers only obtained Grants or leases for life or a term of years, and upon expiration were occasionally renewed by the different Governors of Canada. There came also to be a different Sort of property established in these fisherys for so soon as the Seal fishing became known as an object of any value, the Proprietors of Islands which from their Situation became useful to any Grantee of a Seal fishery, claimed a property in that fishing by virtue of their right in the said Islands.

This gave rise to various Suits at Law, and it was at length determined that the Grantees of such Seal fisherys, should pay in the nature of rent to the Proprietors of the Islands, a Sum equal to three p. cent upon the gross yearly produce of every such fishing, to be ascertained according to the market price for the time being at Quebec. These propertys too have passed thro different hands by Succession and otherways and the three

p. cent has been regularly paid for many years before, and ever since the Conquest.

Soon after the Reduction of Canada, several trading people resorted to Quebec from Great Britain with large quantities of merchandize. The products of Canada and its dependances were soon discovered to be more narrow than had at first been imagined. Formerly the trade with the Savages in the upper Countrys from Montreal to Fort Illinois had been carried on with Success, and chiefly engrossed by the Canadians, But after the reduction, the Interruptions from the Indian war, and the participation of the other British Colonies in that trade greatly reduced its value to Canada, and hence the new Settlers finding difficulty to make their returns to Britain, and Seeing that the Seal

p. 1026

fishery was abandoned in consequence of the war, which had disabled the Canadians from carrying it on, apply'd to the Governor of Quebec for leave to embark therein.

Enquiry being made into the nature & state of these fisherys, it appeared that some of them were by undisputed titles, clothed with uninterrupted possession the property of Individuals, & that others were in the gift of the Crown, and it also appearing from the nature of these fisherys, impracticable to re-establish them except upon the principle which the french Government had adopted, The proprietors were encouraged to lease them out in the usual manner and those in the gift of the Crown were bestowed on such as made the first application, for a certain number of Years or until the Kings pleasure should be known.

*sic.

Here it may not be improper to observe that as this happened anterior to the dismembering the Labrador Coast from the Government of Canada & uniting it to that of Newfoundland The Governor of Quebec did report his proceedings to the Board of Trade, the motives inductive of his conduct, and every grant he had made; And as no contrary orders appeared until the Regulations of Governor Pallisser were published, the Grantees were in the mean time induced to believe their Grants were approved. In this Confidence they were at much labour and expence in the prosecution of the fisherys, They followed the established practice of Canada, by purchasing from the former Grantees the whole of the dwelling houses, fishing implements utensils &c for preparing & warehouses for Storing the oyl, in a word at some of these Posts Adventurers in this way laid out to the ammount* of three thousand pounds to re-establish a fishery at one Post or Pass; a Sum which no man would have risked but from the encouragement he had reason to expect in behalf of a wise measure tacitly approved of, and that if his Grant when expired should be given to another the Successor would be obliged to purchase of him in the same manner as he had done from a Canadian at his entry, agreeable to the ancient custom of the Country.

This custom had always been practiced and obtained the force of a law, which owed its existence to the peculiar circumstances of the Seal fishery because the implements of fishing as well as the houses could not be used at any different Post and it would have been a singular hardship upon a possessor to suffer so great a loss upon the expiration of his Grant, as must have been brought upon him if the new Grantee was at liberty to refuse the purchase upon a Valuation, when they could not be otherwise disposed of but at the greatest disadvantage. As an example of this, it stands in the clearest manner authenticated, that the present possessor of one fishing Post has a property there to the extent of £1400 St^s exclusive of Repairs laid out on houses and fixtures. In this Situation it would be extremely hard, that the Grantees under the Governor of Quebec should be hastily deprived the benefit of a fishery they had established at so great an expence, which leads one to consider the advantage that would accrue, if the Regulations of Governor Pallisser should continue in force with respect to the Seal fisherys. In this point of view the Rights of property vested in Canadians shall be laid out of the question,

p. 1027

and the matter treated on the general purpose Governor Pallisser seems to have had in view.

The language of the Regulations appears to be that as a premium upon industry and an encouragement to activity, the first arriving Ships from Britain shall have the exclusive privilege of occupying the Seal fishing Passes nearest to the harbour, in which each Ship shall first take Post Now if the Ships from Britain are to make any advantage by the proposed encouragement, they must be perfectly certain of the following particulars First, which ship shall first arrive & at what harbour Secondly what Seal fishing Posts fall within the district of that harbour, thirdly the breadth of the Pass and depth of the water, and when these particulars are known, they must next prepare a Vessel of 80 Tons burden, Seal nets fitted to the Pass with many other materials and a crew of men capable to conduct the fishery under the Severity of a Labradore Coast winter, with a Stock of provisions Sufficient to maintain them for at least fourteen or fifteen months; For example any vessel contending to gain this premium ought to Set out from Britain in the month of march the latest, her 80 Ton consort must accompany or follow her, the Crew must be employed in the Summer in the Cod or Whale fishery and must be at their Station for the Seal fishing in the month of September from which they cannot get away before the latter end of May following. And supposing the many accidents attending Sea passages or other casualtys were to create no uncertainty as to a first arriving Ship, it comes next to be stated the degree of Advantage that would result from one years possession under every fortunate circumstance that can be figured. From Good experience it is known that any new Adventurer, who makes his outfit from Quebec to establish a Seal fishery at any pass

where about 2000 Seals are usually caught in a season, it will cost him at least £2000—and for other Passes in proportion, provided he has every thing to begin anew, such as houses to buy or build, his stock of provisions, Vessel, Boats, and all other materials to lay in, all which he must do, unless he be allowed to benefit by the industry and effects of his predecessors; His 2000 Seals will yield him at the most about 300 hogsheads of oyl and if they net him at market £3 10 each, being as much as is commonly done after deducting leakage & other expences, he will receive £1050. The first years adventure will therefore expose him to a loss of £950, with no other prospect of relief, but the price which the fishing implements &c. might bring, or from pursuing the same plan another year, under the certainty of a great additional expence, purely for the sake of a precarious chance, that his Ship may Sail faster than any other the Succeeding season. It is to be observed that in this state no notice has been taken of the Shares or Wages of the fishermen, which generally amount to one third of the produce, to pay which there only remains the Seal Skins, & they commonly sell for 1/- to 1/6 each, which will still reduce the returns.

If indeed an Adventurer in the Seal fishery obtains a grant for 7 years, at the end of these if no accident intervenes, and no Conditions are imposed on him that may Subject him to any expense but what is necessary to carrying on this fishery, he may with great management, recover his first outlay and

yearly advances, with perhaps a profit, over & above, But to the great hurt of those who unhappily for them have embarked in the Seal fishery that does not appear to be the intention of the Regulations.

If it should be objected to this view of the charges attending the Seal fishing, that outfits may be made cheaper from Britain than from Quebec, it is answered that several Individuals concerned, from a desire to retire their property, & at same time to comply with the Regulations have put it to the tryal, and found of the two their equipments from Great Britain the most expensive.

Should the rights of property claimed by the Canadians be deemed valid upon a minute enquiry, the disputes, law suits & confusions that must follow the enforcing the present Regulations in their full rigour and extent are more easy to be imagined than expressed. But on the Supposition that no Such property do exist, and that the wisdom of Government sees meet to confine in future; the exercise of every species of fishery on that Coast to the Inhabitants of Britain alone; Yet the dictates of humanity & natural justice must plead in favor of Individuals who in faith of Grants or permissions given them, and trusting in the lenity of the British Legislature have ventured & invested their property to so great an extent, as will require time to recover. And it is humbly hoped that those who shall be found in that predicament will be permitted to possess the Posts or Passes they have re-established at such great expence & labour, for at least three or five years, without being liable to be displaced by a first arriving Ship, of any new comer; And that if the Policy of the nation shall ultimately require them to make their equipments from Britain they may not before that period is expired, be Subjected to the further expence of entering into the precarious branches of the Cod or Whale fisherys against their judgement & inclination—which as they are circumstanced they can only do, for the sake of retiring a property, of itself but too uncertain even under all the indulgences that can be given them.

So far as regards the Cod and Whale fisherys the Regulations of Governor Pallisser are certainly well calculated and must be productive of good consequences, But as to the Seal fisherys, whether they be given as encouragement to Cod & Whale fishers, or whether they be permitted to be carried on singly, certain it is, the necessary outfits & preparations must be made, and it is demonstrable that in either Case Such preparation will stand the Adventurer in the Same expence, independent of any other plans he may be concerned in. So that unless such Adventurer can obtain peaceable possession for a term that will give him a probable chance to get in his money again, he will find his first outset so heavy as to Sicken him of a Second attempt under the same uncertaintys. From the nature of the Seal fisherys it is impossible to Subject them to the Same Rules as the Cod & Whale fisherys, without

destroying them entirely. The latter are of a fluctuating & changeable nature, as to place & time and all they went on Shore is convenient places to cure their cod & melt their oyl, which the other cannot hurt or interfere with them in the exercise of: The former being Sedentary require great expence more bulky materials & comfortable houses for the people in the winter, which cannot

p. 1029

be transported at pleasure, neither does it seem at all clear, that men following the Sedentary Seal fishery, where they must stay the greatest part of the year, and have no active employment but for about fifteen days, should ever add to the number of useful Seamen; nor if they did, can their numbers its presumed be an object to Government, Sufficient to recommend a scheme, that will ruin individuals, in order to gain a point so inconsiderable. In any event if the Regulations are enforced as they now stand, with regard to the Seal fisherys, they must be totally ruined, and very grievous hardships in the mean time, thrown upon those who at present possess & have been at such expence to set them on foot. They must either abandon the enterprize at once, or if they mean to preserve the property they have invested, they must increase their risk & expences in Schemes Still more precarious. And even after they shall have comply'd with this very hard condition, that the trivial circumstance of another Ships arriving at their fishing places a few hours or days before them, shall still subject them to be dispossessed, and expose them to the loss of their property, or to its being rendered of little or no use to them, (which is the same thing in effect) would, in their humble conceptions be enacting a law as grievous & burdensome in its operations as they fear it will be found inadequate to the purposes expected from it.

PALLISER TO LORDS OF TRADE,[6 April,
1768.]*re* CLAIM OF SETTLERS FROM QUEBEC TO LANDS ON LABRADOR COAST,
UNDER GRANTS FROM GENERAL MURRAY.

B.T.N. VOL. 20.

MY LORDS,—In obedience to the King's Commands by the 25th & 26th Articles of His Majesty's Instructions, to give Notice to your Lordships of my Proceedings, and of the condition of the affairs of the Islands & Territories under my Government, and the Trade and Fisheries thereof in order to be laid before His Majesty; I now beg leave to observe to Your Lordships, that sundry claims and pretentions have been set up by a few Smugling Traders settled at Quebec, to an exclusive property of above 500 miles of the Coast of Labrador, and the numerous adjacent Islands, with a Monopoly of the Fisheries thereon, founded 1st on a mistaken notion, that before the late Treaty of Peace with France, the said Countries and Islands belonged to the Crown of France, and were ceded as a part of Canada, which I apprehend was not the case, 2^{dly} on a pretended old French Grant which I understand is either groundless and never existed, or is obsolete, and such as was never admitted even amongst the French themselves. 3^{dly} on other Grants pretended to have been made to a few particular People by General Murray, when he was Commanding Officer in the Town and Garrison of Quebec, which being Monopolies, I have always consider'd as illegal and injurious to the common rights of the rest of the King's Subjects, particularly to British Adventurers. 4^{thly} on a Grant pretended to have been made the 1st May 1764 by His present Majesty, which I have no knowledge of; I therefore in conformity to the King's Instructions, have not dared to allow or encourage any such exclusive possessions of Lands, Territories or Fisheries, to be taken or held by any Persons whatever, on the aforementioned or any other pretentions whatever.

Yet as the said Claims and pretentions to such exclusive Possessions and Monopolies, have been thought of sufficient weight for preventing the 30 passing of an Act of Parliament intended for remedy of the great mischiefs and confusion which reigns there, for encouraging British Adventurers & for removing the many obstructions and discouragements to extending and improving the Fisheries; and as the Suits and Complaints against me, for disallowing of those Claims and

pretensions have been lately revived. I hope I shall stand excused for stating the Delemma I am in, and for desiring it may be taken into consideration, whether I ought to have any and what

p. 1031

informations for my guidance in future in these matters, that if I am to allow of any exclusive Possessions of the Coast or Islands, or Monopolies of the Fishery, or of any Branches thereof to the exclusion of British Adventurers, I desire it may be distinguished what parts thereof and to whom, for altho' I have hitherto avoided being troublesome by applications for explanations of my Instructions, and only studied (as I always shall) how I can best execute them by a steady pursuit of what upon the best Judgment I am able to form of those matters, and of the true intent and meaning of my Instructions most for the general benefit of His Majesty's Subjects, without partiality or unlawfull distinctions, yet, as matters now stand, I am doubtfull how far I can with safety support British Adventurers in the enjoyment of the Rights and Privileges which they have ever enjoyed under the Laws, Customs, and usages of the Fishery, and which I have assured them of in the King's Name, as hitherto I thought I ought and was authorized to do, and not to abandon them and that whole Coast to the rapine and plunder of Lawless Crews from the Plantations mixed with French. His Majesty's Instructions expressly directing me, not to allow, or encourage any thing to be done contrary or repugnant to the Act of the 10th & 11th of William 3^d in any of the Islands, or Territories under my Government.

What I have now the honour to lay before Your Lordships, I beg may not be construed to imply, that I entertain in my mind, the least apprehensions that any projects of those People to the prejudice of the Fishery of Great Britain, will ever find Encouragement from any of His Maj^s Ministers, it is from the fullest confidence I have ever had of the contrary, that I have hitherto treated with disdain, all the attempts made by those People, to prevail on me, or to terrify me into a compliance with any of their Projects, which I have conceived to be contrary to the King's Instructions, Repugnant to the Laws, Customs and usages of the Fishery, prejudicial to the common Rights of His Majesty's Subjects, particularly to British Adventurers and to the Navigation of this Kingdom, and favourable to the French and to Clandestine Trade.

I have the honor to be with the greatest Respect.

My Lords,
Your Lordships
Most obedient and Most Humble Servant,
HUGH PALLISSER.

London, 6th April 1768.

[20 October,
1768.]**GOVERNOR PALLISER TO LORD HILLSBOROUGH.**

C.O. RECORDS 194/12, p. 53.

MY LORD,

I think it proper to inform your Lordship, that I have continued to keep up the fortified Blockhouse on the new Fishing Coast of Labrador, which by the King's Orders I established there in the year 1766, with a Guard for the protection of the British Adventurers Fishing Works and Craft, as well from the depredations of Crews from New England as from the Natives of the Country.

In the month of November last, an attempt was made by some of the Savages from the North Coast, to steal some shallops and Fishing Craft, when three Englishmen were killed, a detachment of men from the Blockhouse went out, attacked the Savages, killed many of them and drove the rest away, who left behind them three Women and Six Children, belonging to some of the Men who were killed, one of the Women proves to be very intelligent, from her I have obtained more satisfactory accounts than any that have yet been got of those People respecting their numbers, their places of abode, etc.

These poor Women and Children are the first of those People that have ever been taken and kept alive by any Europeans, they express great astonishment at being kindly treated and suffer'd to live, and seem yet doubtfull whether they are not reserved for a publick sacrifice; there was no possibility of sending them home this Season, I have therefore been obliged to provide for their subsistance till the next year, then they will be capable of carrying a proper message to their People, either for establishing a friendly intercourse between them and the King's Subjects, or to forbid them ever coming near us, as may be judged best for facilitating undertakings of Merchant Adventurers from England to that Coast, under such privileges as Government may think proper to grant them, for extending the Oil and Whale Bone Trade with those People, which are become very considerable articles of Commerce.

Many attempts have been made at different times for this purpose to that Coast, which abounds with Whales and Seals, as well from London as from New England, particularly in the years 1752, 1753, and 1754, all which miscarried by the imprudent conduct of those employed towards the Natives. Now by means of these People and the Brethren of the Society

of the Unitas Fratrum, (who your Lordships may remember, through a zeal for propagating the Christian faith amongst the heathen, have solicited for encouragement to undertake something of this kind) it is very probable some

p. 1033

considerable Merchants of London, would readily engage in such undertakings, as your Lordship may approve of for the publick benefit.

This will confirm to those People the truth of what I assured them by interpretation of some of the Brethren of that Society, who speaks their language, who voluntarily went with me to that Coast in the year 1765, when I had a conference with a large tribe of them.

That we did not intend to molest or hurt them, but to trade with them in a fair and friendly way.

That if ever they offer'd to kill any People or to steal anything they would suffer for it.

That when the King should please to give Orders, I should send men enough to destroy them all at once.

That such of them who behave inoffensively might depend always on Protection and being kindly treated as Friends, etc.

Signed: HUGH PALLISER,
St John's, Newfoundland 1768.

[Dec. 1768.]

MEMORIAL OF MESSRS. BAYNE AND BRYMER,

PRAYING RELIEF FOR LOSSES SUSTAINED IN CONSEQUENCE OF
PALLISER'S REGULATIONS.

B.T. NEWFOUNDL^D. VOL. 20.

To the Right Honourable the Lords Commissioners for Trade
and Plantations.

The Memorial of Daniel Bayne and William Brymer late of the
City and Province of Quebec Merchants. Humbly
Sheweth—

That whilst the Province of Quebec was in the Possession
of his most Christian Majesty the Coast of Labradore was part
of the Dependancies of the Government of Canada and that a
very Valuable Seal Fishery was carried on in that part thereof
which is situate within the Streights of Belleisle.

That in Order to carry on the said Fishery it was necessary
that certain Buildings should be Erected on the Sea Shore and
Nets procured of Dimensions adapted to the several Passes or
Guts thro' which the Seals passed and repassed and Boilers and
other Implements and Utensills should be provided at a great
Expence.

That to Encourage the Adventurers in the said Fishery to
make the necessary Disbursm^{ts} for Exercising the same and to
assure them of the Possession & Occupation of the several
Posts and Passes for which their Nets and other Gear were
fitted and adapted, it was usual for the said Adventurers to
procure Grants from the Governor of Canada of the sev^l Posts
and Settlements respively occupied by them which said Grants
were afterwards ratified and Confirmed by his most Christian
Majesty.

That after the Conquest of Canada the Hon^{ble} James Murray
Esq^r his Majesty's Governor thereof being sensible of the Great
Advantage that would accrue to the said Province from the
Exercise and Extension of the said Seal ffishery gave every
Encouragem^t in his Power to his Majesties Subjects resident in
Canada to become Adventurers therein and being convinced of
the necessity that the Adventurers should respectively possess
certain Posts and Settlements on the said Coast—the said
Governor made out Grants thereof in such manner as had been
usually done by the Governor of Canada before the Conquest
thereof by his Majestys Arms.

That Your Memorialists were by these means induced to
Embark in the said Seal ffishery and for that purpose did

procure from Governor Murray a Grant bearing date the 6th day of April 1763 of a certain Tract of Land or Post

p. 1035

on the said Coast of Labradore therein described by the Name of Cape Charles for the space of four years from the Date of the Grant or until his Majesty's further pleasure should be known therein.

That the said Grant was made when the Coast of Labradore was part of the Dependancies of the Government of Canada and antecedent to his Majesties most Gracious Proclamation of 7th Oct^r 1763 whereby the Coast of Labradore was put under the Care and Inspection of his Majesty's Governors of Newfoundland to the end that the open and ffree Fishery of his Majestys Subjects might be extended and carried on upon the said Coast and the adjacent Islands.

That the said Governor Murray did Transmit to this Hon^{ble} board a Copy of the said Grant and that it hath not been Signified to Your Memorialists that his Majesty hath disapproved of the same.

That Your Memorialists relying on the Validity of the said Grant did at a very considerable Expence cause Buildings to be Erected at the said Post at Cape Charles and ffurnish and supply the same with Men Provisions Implements and Utensils necessary for Exercising the said Fishery and did Exercise the same to their very great Advantage under the Superintendency & Management of William Lead.

That Your Memorialists remained in the quiet Possession and Occupation of the said Post until the 11th of August 1765 when Lord Rutherford at that time Lieutenant of his Majesty's Ship the Niger one of the Squadron then on the Newfoundland Station under the Command of Admiral Pallisser did wilfully and without giving any Notice to your Memorialists Agent burn and destroy about 90 Hogsheads of the value of 60^{lb} or thereabouts the Property of your Memorialists then being at the said Post & did Seize and carry away some of Your Memorialists Effects.—

That on the 17th of the said month of Augst Lieutenant Waters of his Majesty's Ship the Guernsey then under the Command of the said Admiral Pallisser together with 16 Armed Mariners came to the said Post at Cape Charles and Seized the said William Lead and ffrancis Carpentier who was Servant to Your Memorialists and Assistant to the said W^m Lead and insisted that they the s^d Lead and Carpentier should immediately abandon the said Post and go with him to the Admiral then on board the Guernsey in Chateau bay at the distance of 7 Leagues from the said Post of Cape Charles in pursuance of Orders he declared to have received from Admiral Pallisser for that purpose.

That the said Lead remonstrated with the said Lieutenant Waters thereupon and denied that the said Admiral could by any Lawful Authority oblige him to quit the said Post at Cape Charles and abandon the Service & business of Your

Memorialists but the said Lieutenant Waters persisting therein the said Lead and Carpentier being unable to resist his force were by threats and Violence and illegal Restraint and Imprisonment of their Persons obliged to abandon the Post and the Effects of Your Memorialists and consent to go on board the Admirals Ship then lying in Chateau bay.—

That upon Lead's arrival on board the Guernsey he produced his Papers to Admiral Pallisser and underwent an Examination by him whereby it

p. 1036

appearing that some Canadians (at that time British Subjects) were Employed by Lead as Servants to Your Memorialists in carrying on the said Fishery the said Admiral declared that he should no longer occupy the said Post and Exercise the said Fishery.

That thereupon the said Lead acquainted the said Admiral that no Notice had been given him of any Regulations made by the said Admiral, that Your Memorialists had Effects lying at the s^d Post of Considerable Value he therefore prayed that he might be set at Liberty and Permitted to return to Cape Charles and take the most Effectual means in his power for Securing the same which request being granted the said Lead went to Cape Charles took an Inventory of Your Memorialists effects there lying to the Amount of 750^{lb}, and returned to Chateau bay on 28th of the said month of August.

That he was thereupon again Examined by the said Admiral Pallisser and Ordered immediately to return to Cape Charles and remove from thence all the Effects belonging to Your Memorialists which the said Lead having no Authority from Your Memorialists refused to do whereupon the said Admiral P. declared that he would have his Orders Obeyed, that he would Secure the Person of the said Lead until they were removed and furthermore that if the said Effects were not immediately removed they should be destroyed.

That the said Lead apprehending that the proceedings of the said Admiral were unwarrantable and that it was necessary that he should be able to justify his Conduct to Your Memorialists, his Employers insisted that the said Admiral Palliser should reduce his Orders into Writing whereupon the said Admiral delivered him a certain paper Writing in the Words and figures following:—

“By his Excellency Hugh Pallisser Gov^r and
Commander in Chief in and over the Island of
Newfoundland, the Coast of Labradore and all the
Territories dependant thereupon—

William Lead and Carpentier in the Employ of
Mess^{rs} Bayne and Brymer residing at Quebec are hereby
Ordered immediately to quit the Coast of Labradore and
take away with them all their Effects, or they may sell
them to any British ffishing Ship in this Harbour.

Given under my Hand in Pitts Harbour within
Chateau bay on the Coast of Labradore this 28th
August 1765.

HUGH PALLISSER.

By Command of his Excellency
JOHN HORSNAILL.”

That the said Lead acquainted the said Admiral that it was impossible for him to Comply with the said Order as he was unprovided with any Vessell wherewith to Transport the said Effects to Quebec the place of Your Memorialists residence and which was distant about 300 Leagues from Cape Charles.

That the said Admiral Pallisser persisted in his Resolution of Obliging the said Lead to abandon his Employment and remove the said Effects from

p. 1037

Cape Charles ordered him to apply in his the said Admirals Name to Captain Nicholas Darby who then Commanded a ffishing Vessell lying in Chateau bay to take the said Effects on board his Ship which was bound for Newfoundland and from thence to some part of Europe.

That Your Memorialists have been Informed that the said Captain Darby did take on board his Ship some Effects belonging to Your Memorialists but they are entirely Ignorant in what manner he has disposed of the same, nor have they ever received any remittance on Account of the Produce thereof.

That Your Memorialists being unacquainted with the above recited Transactions on the Coast of Labradore were fitting out at Quebec a certain Sloop called the Esquimeaux with a supply of Provisions Utensills, and other necessaries for carrying on the Seal fishery at the said Post at Cape Charles which said Sloop being Equipped at a very great Expencc proceeded on her Voyage as far as Mingan 120 Leagues down the River Saint Lawrence at which Place the said W^m Lead arrived in his return to Quebec and acquainted the Master of the said Ship of the Treatment he had received from the Admiral and furthermore that the said Admiral had published a certain Proclamation dated 28th August 1765 whereby he prohibited all persons residing in the Colonies from going to the said Coast of Labradore under Pain of Corporal Punishment and Confiscation of their Effects.

That the Master of the said Sloop finding that the further Prosecution of his Voyage could not in any wise be for the Advantage of your Memorialists and being Terrified by the above mentioned Proc^l did immediately return to Quebec where your Memorialists on having no other Occasion for the said Vessell and Cargo disposed of the same by Public Sale but as the same were particularly adapted for the Seal Fishery on the Coast of Labradore, and as the Colonists were prevented from Exercising the said Fishery, the said Vessell and Cargo

necessarily sold to a considerable Loss.

That upon Admiral Pallisser's arrival in England Your Memorialists did apply to him for Satisfaction for the Injury and Damage which they had received by the means aforesaid but the said Admiral Pallisser instead of complying with so reasonable a request pretended that he could well Justify the several Acts herein before recited done by him or by his Orders by Virtue of his Majestys Commission under the Great Seal appointing him Gov^r and Commander in Chief in and Over his Majestys Island of Newfoundland & the Coast of Labradore and certain Instructions given and delivered to him as Gov^r & Commander in Chief in and over the said Island and Coast.

That Your Memorialists did thereupon by a Memorial setting forth their Case addressed to his Majesty in Council humbly pray that his Majesty would be graciously pleased to grant them Relief.

That the right Honble the Lords of a Committee of his Majestys Council to whom the said Memorial was referred did not think proper to enter into the Particulars of Your Memorialists Case but were pleased to Declare that if your Memorialists had been Aggrieved they should seek for redress in his Majesty's Courts of Law.

That Your Memorialists being advised that Notwithstanding the Justifi-

p. 1038

cation set up by Gov^r P. he was Answerable at Law for the Damage they had sustained by his Means did in Michas Term in 1766 Commence an Action against the said Gov^r Pallisser in his Majesty's Court of Kings Bench.

*sic.

That the said Cause being at Issue and coming on to be tryed at Guildhall on the 15th day of this Instant December by a Special Jury of Merchants of the City of London before the Lord Chief Justice Mansfield, his Lordship having previously inspected the Pleadings in the said cause wherein the Justification set up by the Gov^r under his Majestys Commission and Instructions were specially Pleaded & having perused a State of the ffacts delivered in by both Parties and being made acquainted with the Application to his Majesty in Council was pleased to Order that the Jury should not be called and to Declare that many very weighty and Important questions must necessarily be agitated in the Course of the Trial of the said Cause which for Reasons drawn from particular Circumstances he was of Opinion were by no means proper to be Discussed before a Jury therefore his Lordship did Recommend that the said Cause should stand over, and that immediate Application should be made by both Parties, Plaintiffs and Defendants to this Honble board for Relief and that they should desire to be respectively heard by their Council.*

And Your Memorialists further Shew unto Your Lordships that they are prepared to prove the several Allegations set forth

in this their Memorial and a Particular of the Loss and Damage which they have sustained by the Means herein before recited.

Your Memorialists therefore most humbly Pray that your Lordships will be Pleased to take the Premes into Your Consideration and grant them such Relief as their Case shall require.

**PETITION OF GOVERNOR PALLISER TO
LORDS OF TRADE**

IN DEFENCE OF HIS REGULATIONS AND TRANSACTIONS ON COAST
OF LABRADOR.

[1769.
Jan:(?)]

BT. NEWFOUNDL^D. VOL. 20.

To the Right Honble The Lords Commissioners for Trade and
Plantations.

The Humble Petition of Hugh Pallisser Esq^r Governor and
Commander in Chief of Newfoundland and Coast of
Labrador &c. and Commodore of the Convoy appointed
for the Fisheries—Sheweth,—

That by the late Treaty of peace concluded on the 10th
February 1763 between this Kingdom and France all Canada
with its Dependencies was ceded to his Majesty.

That by the Royal proclamation issued on the 7th of
October following for Settling the New Government in
America His Majesty with the Advice of his privy Council To
the End that the open and free Fishery of his Majesty's
Subjects might be extended to and carried on upon the Coast of
Labradore did think fit to put all that Coast under the Care and
Inspection of the Governor of Newfoundland And did declare
it to be his royal Will and pleasure that no Governor in his
Majesty's three Colonies of Quebec East or West Florida
should presume upon any pretence whatsoever to grant
Warrants of Survey or pass any patents for Land beyond the
Bounds of their respective Governments as described in their
Commission And that it was his Majesty's Will and pleasure
for the present to reserve under his Sovereignty protection and
Dominion all the Lands & Territories, not included within the
Limits of the said three new Governments and did strictly
forbid all his Subjects from making any Settlements
whatsoever or taking possession of any of the Lands so
reserved without his Majesty's special Leave and Licence for
that purpose first obtained and did enjoin and require all
persons who had either wilfully or inadvertently seated
themselves upon any Lands within the Countries above
described forthwith to remove themselves from such
Settlements.

That his Majesty by his Royal Commission under the Great
Seal bearing date the 9th day of April in the 4th year of his
Reign and in the year of our Lord 1764 was graciously pleased

to constitute and appoint your petitioner Governor and Commander in Chief in and over the said Island of Newfoundland and the Coast of Labradore to hold and exercise the said place during his Majesty's pleasure.

p. 1040

His Majesty was further pleased by his Royal Instructions to your petitioner bearing date the 27th day of the same Month of April in the 25th Article thereof to direct him not to allow or encourage any thing to be done contrary to the true Intent and meaning of the Statute of William 3^d for regulating the ffishery And in case any thing should happen which might be of Advantage or Security to the said Territories under your petitioner's Government which was not therein or by his said Commission provided for To allow your petitioner to take Order for the present therein Giving to Your Lordships speedy notice thereof to be laid before his Majesty to receive his Ratification thereof if he should approve the same.

*sic.

That to prevent the Disorders and Confusion which your petitioner had received Information to have arisen during the first year of his Government amongst the Fishers and others in the Northern parts of his Government and particularly on the Coast of Labradore your petitioner did think it necessary to give some Order therein and on the 8th April 1765 did issue a Temporary Regulation Whereby after taking Notice that the property of all the Land on the Coast of Labradore was in the Crown and that since the Conquest thereof no part of it had been lawfully granted away And that it had ever been the policy of the Nation to give to his Majesty's British Subjects (in preference* to all others) every Encouragement to carry on the Fishery It was ordered and directed that in Conformity to the Intent and meaning of the said Statute the whole should be publick and free to all the King's British Subjects in preference to all others 'till his Majesty's further pleasure should be known A Copy of which Regulation marked (A) is hereunto annexed.

That afterwards in the Course of the said Year 1765, your petitioner being in the Neighbourhood of the French Islands of S^t Pierre and Miquelon employed in the Execution of his duty for keeping the French within their proper Limits, and for putting a Stop to the Grand plan set on foot by the French for supply^g The British resident Fishers in Newfoundland as well as all the Continent of America with ffrench produce and Manufactures from those Islands and extending the French Fishery beyond their Limits, To the great prejudice of the British Trade and Fishery in those parts, your petitioner discovered it was in part carried on by some smuggling Traders residing at Quebec, who for that purpose had under various unwarrantable pretences possessed themselves of, and claimed as private property, all the Lands Rivers and Islands Commodious for the Fishery on the Labradore Coast within the Government of Newfoundland, to the Exclusion of all others from that Coast, from whence they carried on a

Clandestine Trade with the said French Islands and with the French Ships in the North part of Newfoundland and even directly with Old France, for introducing into Canada and other parts of his Majesty's plantations all Sorts of French produce and Manufactures—Whereupon your petitioner having made a proper disposition of Cruizers about the said French Islands, proceeded directly to Labradore, where he found the above Informations to be true and met with and took one of the Ships belonging to some of those Settlers coming directly from Bourdeaux with a French Cargo and also found those people to be

p. 1041

meer Settlers, who carried on no Fishery at all, (Except an inconsiderable Seal Fishery in the Winter) yet their pretensions were to exclude all other his Majesty's Subjects, and they gave Sanction to French Fishers pretending to be Canadians, to encroach on that Coast To the great prejudice of the Navigation, Shipping, Marine Strength, Trade and Manufactures of this Kingdom, and farther the Coast was resorted to by such mixt Multitudes of the most disorderly crews composed of the lowest of the people from the plantations, all contending together obstructing fighting and robbing each other, and also plundering and illtreating the poor Natives, all scrambling for exclusive possessions of Lands where none such cou'd be allow'd, and destroying the British Adventurers Works and Effects, insomuch that none from Britain dared to go to that Coast Except three Vessels that went immediately under the protection of the King's Ships, and to this Confusion must be added the Circumstance of 100 French Ships, with near 8000 men in the Adjacent part of Newfoundland who mixing with those people from our Colonies and the Canadians, were always encroaching on our Coast and Fishery and combined with them in every kind of Clandestine Trade and particularly with those from Quebec.

That your petitioner after duly reflecting on this disordered State of things, and consulting his Commission, The Kings Instructions and Royal proclamation, and the said Statute or Act of parliament for regulating the Fisheries (which your petitioner conceived to extend to all parts where the King's Subjects had ever had a right of Fishery in these parts) and the Established Customs and Usages under that Statute, And no distinction being made by your petitioner's Commission and Instructions between any part of the Sea Coast or Lands under your petitioner's Government, Your petitioner concluded that if the Coast of Labradore was not comprehended within the meaning of the Statute aforementioned, but that it should be considered as newly taken from an Enemy at the publick Expence, yet that it was not to be scrambled for and taken possession of by force or Stealth, or partially given away by any person whatsoever (without his Majesty's express Authority) to Individuals, more especially as by his said Majesty's said proclamation Settlements were forbid to be

made on the Labradore without a special Licence from the King, and all Settlers were warned to retire therefrom, And your petitioner further concluded that such exclusive possessions as had been taken by the Colonists were an absolute Exclusive of all British Adventurers, and therefore directly contrary and repugnant to the true Intent and meaning of the said Statute, and that as your petitioner was present on the Coast, if he did not immediately remove them according to the directions in the King's proclamation, it might be construed into a Confirmation by your petitioner of their pretensions, and been deemed a Neglect or Breach of his duty laid upon him by the King's Commission and Instructions.

At the same time your petitioner has been informed that Representations have been made to your Lordships of an alledged necessity for Seal Fishers to have exclusive and continued possessions of Tracts of Lands for carrying it on, or otherways that Branch of the Fishery would be lost, And further

p. 1042

that no people but those from Quebec knew how to catch Seals, whereas the long Experience of a far more extensive Seal ffishery carried on in Newfoundland, under the Rules of the aforesaid Act of Parliament which admits of no such propriety possessions there, proves that these are Misrepresentations advanced meerly for introducing Monopolizing projects, to impose on his Majesty's Ministers and to support a most pernicious plan of these Clandestine Traders settled at Quebeck which appears to be to seperate this Branch of the Fishery from the rest, to make it private property and to grant it with the possession of the Coast to the Colonists, and thereby exclude all British Adventurers from the whole Fishery of the Labradore, for wherever such Grants of the Coasts are made no other than the Grantees can carry on any ffishery and shou'd so fatal a Scheme gain Admittance the present System of the Fishery by Ships from Great Britain will be totally at an End.

Upon these Considerations your petitioner conceiving it to be incumbent on him to take Care, not only to give no Sanction to but to prevent any of those people's Schemes so destructive to the British Fishery and Navigation, and at the same time so favourable to the Carrying on Clandestine Trade and to the advantage of France, resolved to take order therein for the present to put a Stop thereto, 'till his Majesty's Commands might be had in future.

It happened that amongst these Settlers were found two men at a place called Cape Charles on the Labradore, the one a Scotchman and the other a Frenchman, who had in behalf of Daniel Bayne and William Brymer Residents at Quebec, taken possession of and held as their property a Tract of about 40 Miles of Sea Coast, with all the Rivers Harbours and Islands adjacent, under a pretended grant from the Military Governor of Quebec at 250 Leagues distance from the place, which was far without the River and Gulph of S^t Lawrence, and even

without the Streights of Belle Isle situated on the Atlantick Ocean, These two men did not nor could indeed use the said large District for the ffishery, (Except taking a few Salmon at the Head of a River) They having neither Ships, Boats, Men, Tackle, Salt, Stages, Flakes or other Necessaries or Materials on the Coast for carrying on the Fishery and having no Vessel by the papers whereof it might appear to whom they belonged, and the few things they had with them appeared to be mostly of French make Especially their Arms of which they had sufficient for a greater Quantity of men and were all French Arms; which Circumstances appeared very suspicious of their being employed by the French, and being questioned about the Natives these men said they were at War with them, and declared they wou'd kill all they could of them.

Notwithstanding such extravagant Claims in direct Opposition to his Majesty's proclamation, and the suspicious Circumstances under which these 2 Men were found, and their own Declarations of being Enemies & Murtherers of the Natives, yet after your petitioner had examined them and explained to them that the Grant under which they claimed was not valid, and being directly contrary to the fishing Statute could not be allowed, and the King's proclamation issued two years before having warned them to withdraw,

p. 1043

your petitioner sent them back to the place and left them there, and they were never afterwards sent for from thence by him.

That afterwards, one of them whose name was William Lead voluntarily quitted the said place with part of the Effects there by reason of the Savages being then come down on the Coast and the Governor of Quebec's Grant being disallowed as aforesaid, And as your petitioner saw the danger these two men were in from a Tribe of 4 or 500 Savages then come upon the Coast and were actually at Cape Charles And the said William Lead having assured your petitioner that he had provided for the Security of the few Effects that then were remaining on the Coast to his own Mind, he having agreed with one Nicholas Darby to take them away for the benefit of the Owners, and who has since repeatedly offered and desired to account with them for the same, Your petitioner at the request of the said Will^m Lead (he representing that it would be for the benefit of his Employers that he should proceed directly to Quebec) gave him an Order bearing date the 28th day of August 1765 to quit the Coast of Labrador and take away the Effects or otherwise secure them A copy of which is hereto annexed markt Letter (B).

That the said order has been since construed by them as a (force upon them to abandon what they call their lawful possessions and their Effects, tho' the Moment Your petitioner knew of these two men and of their having Effects at Cape Charles, Your petitioner dispatched with them Officers and Boats manned and armed expressly for protecting them and their Effects from the Savages which was timely done for the

Savages were actually then come to Cape Charles, and your petitioner thereby preserved the Effects and Lives of those two Men from the Savages, and afterwards at the said William Lead's desire (he having no Men Boats or Vessels on the Coast) Your petitioner gave directions for the Kings Boats to assist in moving the Effects from Cape Charles according to his own Agreement with Nicholas Darby.

For these good Offices your petitioner expected to have received Thanks from them and their Owners in case it should prove that the said persons and their Effects truly belonged to any British fair Trader, but your petitioner never tho't of being prosecuted for it, yet upon your petitioner's Return to England in 1765 a Complaint was made against him to Your Lordships by the said Daniel Bayne & William Brymer and others, and some Enquiries were made into the same by Your Lordships, but nothing fully concluded therein, tho' before your petitioner's Return to Newfoundland in 1766 at an Examination by the Lords of the Privy Council upon sundry matters respecting the said Government, a Minute was made for the Draft of an additional Instruction from his Majesty to Your petitioner respecting the Labradore, but never being carried into Execution Your petitioner was obliged to return to his Government without it, & therefore on Your petitioner's Arrival on the Coast of Labradore that year, he published a Temporary Regulation explaining the Order of the former Year 'till your petitioner should receive further Instructions from his Majesty, A Copy of which Explanatory Regulation is hereunto annexed Marked Letter (C).

In 1767 upon Your petitioner's being returned again to England he was

surprized with an Action brought against him by the said Daniel Bayne and William Brymer in his Majesty's Court of King's Bench at Westminster, for your petitioners having as they alledged, amoved or caused the said William Lead and Francis Carpenter their Servants to amove with their Effects from the said post or place on the Labradore Coast, which they alledged to have been granted to them by the Governor of Quebec, and Alledged that by the said amoval they had sustained great Loss and Damage, which they sued Your petitioner to answer and make Satisfaction for, To which Action your petitioner appeared and pleaded in his Defence his Majesty's s^d Commission and Instructions to your petitioner as Governor of Newfoundland and the Coast of Labrador as aforesaid, And that what he did was as Governor as aforesaid and in Obedience to his Majesty's said Commission and Instructions, and set forth the ffacts of the Case to be as herein before stated, and insisted that the plaintiffs had no right to the said post or place on the Labradore Coast, & therefore hoped that the said Action should be dismissed.

That before any further proceedings were had in the said Suit, the Season for the said Newfoundland Fishery coming on again, Your petitioner was under the necessity of leaving England to go to his said Government, and which he did without receiving any Additional Instructions from the Crown, for want thereof Your petitioner was left exposed to wicked Combinations and vexatious Suits at Law upon matters altogether new and of an unsettled nature, in a newly Ceded Country, and which had taken their rise from the mistaken proceedings of another person viz^t the Governor of Quebec who had not the least power or Authority for what he did, and who was so mislead by those Companys of Clandestine Traders, that they first obtained from him those illegal Grants and Afterwards in resentment for your petitioner's having detected and defeated their pernicious projects, they further obtained his Authority for the most extraordinary proceedings of the Council of the province of Quebec in the year 1765, apparently for supporting those Grants and propagating Clamour and grounding thereon prosecutions against your petitioner by each of the Grantees, and with whom your petitioner has reason to believe several of the Members of that Council were connected and concerned in those Grants.

That in the year 1768, your petitioner being returned to England did before he set out again for Newfoundland, as well for the Encouragement of the Adventurers in the Fishery as for your petitioner's Security in future and for obviating all Doubts about the Invalidity of the Governor of Quebec's Grants and the Fishing Laws extending to the Labradore ffisheries, make application for an Act of Parliament to be passed explaining the said former Act or Statute relating to the Newfoundland Fishery, and to extend the same to the Seas Islands and Coasts of Labradore which is Adjacent to Newfoundland and

separated therefrom by a Streight of only four Leagues and an half broad in some places, and (the obtaining of which Act of Parliament was approved of by the Lords of his Majesty's Privy Council and a Bill was brought into the House for that purpose, but which was afterwards dropt and your petitioner proceeded to Newfoundland in that Year without any new Instructions.

p. 1045

That your petitioner returning again to England in the latter End of the said Year 1768 the said Action at Law was on the 15th day of December last brought on for Tryal before the Lord Chief Justice Mansfield and a special Jury at Guildhall London, when it was proposed by the Court, That the proceeding to the said Trial should be put off as a matter very improper to be canvassed in an Action at Law in that Court, and that instead thereof the parties should lay the whole Case before your Lordships as the most proper Judges and for putting it into a Channel to be settled, and also for giving what Instructions were necessary to future Governors in regard thereto.

*missing.

Your Petitioner has therefore troubled your Lordships with this State of the Case, and humbly hopes it will appear to Your Lordships, that he has acted in this matter agreeable to the Statute, for regulating the Fisheries or at least as that Act has always been understood, and likewise agreeable to his Majesty's Instructions and his Royal proclamation and in obedience and Conformity thereto, and that he shall stand justified and be indemnified by Government against all Damages and Expences.

HUGH PALLISSER.

N.B.—For better explaining the nature situation and extravagant Extent of the several Grants made by the Governor of Quebec, a Chart is annexed* upon which the Extent of each Grant is distinguished by different Colours with an Explanation thereof.

POWNALL TO COOPER,[16 Nov.,
1769.]SIGNIFYING LORD HILLSBOROUGH'S APPROVAL OF GOVERNOR
PALLISER'S CONDUCT, ETC.

Mr. Cooper

C.O. NEWFLD. 1786-1801. VOL. 1. ENTRY BOOK, p. 24.

Whitehall November 16, 1769

Sir,

Having Communicated to the Earl of Hillsborough the inclosed Petition of Hugh Palliser Esq^r late Governor of Newfoundland transmitted to me in your Letter of the 2^d Ult^o I am commanded by His Lordship to acquaint you for the Information of the Lords Commissioners of His Majesty's Treasury that the Case to which the said Petition refers having been sometime ago under the Consideration of a Committee of Council at which. his Lordship was present, the Governor's intentions in the measures complain'd of by Mess^{rs} Bayne & Brymer, appeared in so favorable & honorable a light that it was the unanimous sense of the Committee to propose an accommodation & to recommend to the Treasury to pay whatever Damages should be agreed upon by the Parties & that Gov^r Palliser should be reimbursed all expences he has been at on this Account.

To this Testimony of Governor Palliser's merit Lord Hillsborough desires to add His opinion, that from the Spirit and Ability with which that Gentleman executed the important Trust committed to him, and the attention he at all times shewed to the spirit of his Instructions, he justly deserves their Lordships favor and countenance.

I am &c^a

**PETITION CONCERNING FISHING POSTS ON THE
COAST OF LABRADOR.**B.T. NEWFOUNDL^D. VOL. 20, p. 259. 1770, 9th July.

A Son Excellence Guy Carleton, Capitaine Général &
Gouverneur En Chef de la Province de Québec,
Vice amiral d'Icelle & Brigadier Général des
Armées de Sa Majesté &^c &^c &^c

Les Sujets de Sa Majesté en cette Province, que vous voulés bien honorer de Vôtre Protection, Se Voians privés (par les ordres Et Réglemens du Gouverneur de Terre Neuve) d'Exploiter, ainsi qu'ils ont toujours faits depuis le Commencement de L'Etablissement du Canada, la Pêche Sédentaire du Loup Marin En hiver, Sur les Costes de Mingan & de la Brador, dans le fleuve & Golfe S. Laurent, qui se trouvent par les Nouvelles limites de cette Province, Etre du Gouvernement de Terre Neuve, ont l'honneur de S'adresser très Respectueusement à Votre Excellence, Et vous Suplient de Vouloir bien leur Etre favorable & apuier la Demande qu'ils font à Sa très Gracieuse Majesté, que ces Côtes Soient réunies à cette Province, comm' En faisant une partie indispensable à Son Commerce.

Leur Demande Est d'autant mieux fondée, que Si les Etablissements qu'ils ont faits sur ces Côtes pour la pêche Sédentaire du Loup marin, qui dans tour les Tems ont faits la plus forte partie des Ressources de leur Commerce, par les Retours qu'ils ont procuré; Ne leur Etoient pas rendus, ils se trouveraient dans l'Impossibilité de S'acquitter des sommes considérables qu'ils doivent aux Négocians de Londres. Comment pourroient ils le faire, Si on ôte à cette Province une Branche de commerce qui lui Est propre par sa contiguité, qu'Elle a toujours fait & qui lui Est indispensablement Nécessaire? Cette Pêche Sédentaire du loup marin qui ne Se fait qu'En hiver, depuis le quinze Décembre Jusqu'au trois ou quatre Janvier, Ne peut certainement être préjudiciable En quoique ce Soit à la Liberté des Pêches de Baleines & de moruë qui ne Se font que L'Eté. Les Pêcheurs de Loup marin reviennent à Québec dans le Courant du mois de May, avant que les Vaisseaux Pêcheurs tant à la Baleine qu'a la moruë Soient rendus dans le Golfe, Et n'y retournent que dans le Courant du mois d'octobre pour y passer l'hiver; Les Grèves de tout ce continent Sont par conséquent libres tout l'Eté aux Pêcheurs de la Grande Bretagne, tant pour la fonte des Graisses de Baleine que pour la Sécherie de moruë. Dans

& de moruë Etoient, dans le Golfe & fleuve S. Laurent, libres à tous les Sujets, & les Propriétaires des Etablissemens pour la Pêche sédentaire du loup marin, ne pouvoient rien Exiger de leurs Grèves, quoiqu' Elles leur fussent concédées En Propriété, outre la perte qu'En souffriroit le Commerce, que Deviendroient un nombre de Canadiens Mariniers & Matelots, qui n'aïans d'autres professions & d'autres talens, Seraient forcés de quitter leur païs natal & passer dans d'autres Royaumes, lorsqu'ils N'auront plus la Ressource des dites Pêches? Combien d'ouvriers de toute Espèce Employés & Nécessaires dans l'Exploitation des Pêches du loup marin Se trouveroient Sans Employ! Tous les hommes Ne Sont point propres à la Culture des Terres: D'ailleurs qui pourroit dédommager cette Province de la Sortie du Merain, des feuillards & des Vivres que demandent ces Exploitations, qui Enprocurent le Débouché. L'Exploitation des Pêches Sédentaires du loup marin En hiver, est seulement propre aux Canadiens. Ils en Sont les premiers Inventeurs. Ils Sont Nez dans les Glaces & conséquemment durs au froid qui Est Excessif dans ces Endroits. Cette Pêche qui se fait dans les Glaces & dans la Saison la plus dure de L'année, ne peut être faite par les anciens Sujets. Ils n'y réussiroient pas Jamais les Européens n'ont pû y résister. En frustrer cette Province, Seroit perdre Entièrement L'avantage de ces Pêches, que les Canadiens Seuls en peuvent tirer, y Etans accoutumés & Elevés dès leur tendre Jeunesse. La Pêche finie, les Mêmes Canadiens Egalement propres à la Chasse des Bois, la font, & la majeure partie au Retour de leur hivernement Sont Encor en Etat d'aider à leur famille à augmenter leurs terres.

Les Suplians Se pessuadent que le motif qui Engage le Gouverneur de Terre Neuve à les Exclure de l'Exploitation de leurs Etablissemens, Est peut être la crainte, que Sous le prétexte des Pêches, ils ne fassent un Commerce prohibé avec les Isles S. Pierre & Miquelon, ou autres Endroits à Terre neuve où Se trouvent des Vaisseaux françois en pêche. Ils osent Se flatter que Vôtre Excellence voudra bien donner à cet Egard de fortes assurances, & Répondre pour Eux qu'il N'Est point d'Intérêt qui puisse Engager les Canadiens à rien Entreprendre contre les Défenses de leur souverain. Ils voient avec une Extrême affliction que l'Etenduë de Cette Province a Eté, dans son Entrée, bornée du Côté du nord à la Rivière S. Jean, Sans doute, parceque Sa très Gracieuse Majesté n'Etoit point alors informée que toute la Côte du Nord, jusqu'a la pointe S^t Charles au dessous du Détroit de Belisle, Et même Jusqu'a la Baïe de Kitche Katchou, auoit été En partie concédée par Sa Majesté très Chrétienne à des Canadiens, pour y faire la pêche Sédentaire du loup marin: que toutes ces Concessions tant En fiefs à perpétuité qu'En Rôtieres à un tems limité, Etoient données quant aux fiefs à la charge de la foy & hommage, & quant aux Roture à la charge de Redevances au

château S. Louïs de Québec, qu'Elles En relevoient & que ces Côtes avoient toujours fait partie de cette Province, ainsi qui Vôtre Excellence l'apû. Vérifier dans les Extraits qu'il a fait faire des Regîtres du Conseil Supérieur & dans ceux d'Intendance, dans les quels ces titres sont Regîtrés.

Cette Province a Eté resserrée au préjudice de Son Commerce, Sans que les Canadiens en Aïent Eté instruits. S'ils auoient pû prevoir une telle opération,

p. 1049

Ils auroient prix la Liberté de faire à Sa Majesté leurs très humbles Réprésentations, Et lui auroient fait connoître que cette Province ne pouvoit absolument Se Soûtenir, Si ce continent En Etoit séparé, parceque Sans Son produit, Elle ne pourrait jamais S'acquitter avec la Mère Patrie des Sommes qu'Elle lui doit pour les marchandises qu'Elle En tire qui lui Sont indispensablement Nécessaires. Non Seulement Cette Province Est privée de ce Continent mais Ses citoyens Sont Encor Exclus de faire la pêche & Tuërie de Loups marins, dans les Etablissements qu'ils ont faits Eux mêmes, qui lour appartiennent, par une ordonnance du Gouverneur de Terre Neuve, qui Est d'autant moins fondée sur L'Equité & la Justice, qu'il Est contre le Droit Naturel de Vouloir Empêcher les Natifs d'un Païs, de faire une Pêche que la Providence leur apreparée dans leur Continent, dont Ils Sont les premiers Inventeurs, & qu'ils Exploitent depuis plus de Cent ans.

Les Supliants persuadés & Convaincus qu'ils Sont, de la Justice de leur Demande Et de la Bonté de sa très Gracieuse Majesté, asent se flatter, que Si Vôtre Excellence, En Saqualité de leur Gouverneur, Veut bien, pendant son Sejour à Londres, apüier leurs représentations, que la Demande qu'ils prennent la liberté de faire, que ce Continent dans la Côte du nord Jusqu'a la Baye Kitche Katchou, & les différens Etablissements de pêches Sédentaires du loup marin, Soient rendus & Réunis à Cette Province Et qu'ils En Relévent leur sera accordée, ainsi que la liberté d'Exploiter les dites Pêches ainsi qu'ils ont toujours faits. Et les Suplians Ne Cesseront d'adresser leurs Veux au Ciel pour la Conservation de Vôtre Excellence

PERRAS.

Reced } 1772.
Read June 12. }

V. 42.

[Translation of No. 264.]

B.T. NEWFOUNDLAND. VOL. 20, p. 259. 1770. 9th July.

To His Excellency Guy Carleton, Commander and
Governor in Chief of the Province of Quebec,
Rear- Admiral of the said Province & Brigadier
General of His Majesty's Forces &c &c &c

Whereas His Majesty's subjects in this Province, whom you have been pleased to honour with your protection, find themselves (following the Orders and Regulations made by the Governor of Newfoundland) barred from carrying on, as was done by them at all times since the early settlement of Canada, sedentary seal fisheries, in winter time, on the coasts of Mingan and la Brador, in the river and gulf of St. Lawrence, which coasts, as a result of the new boundaries of the said Province, are under the Government of Newfoundland;

Your petitioners have the honour most respectfully to apply to Your Excellency and most humbly pray that you may be pleased favourably to consider and support their application to His Most Gracious Majesty for the reunion of the said coasts to this Province, as they form a part thereof that is necessary to His Majesty's commerce.

Their request is all the more justified by the fact that should such posts as they formed on the said coasts for sedentary seal-fishing and which, through the profits made from them, were the chief sources of their trade, not be restored to them, they would be unable to pay the large sums of money they owe to the merchants in London. How could they possibly do so when this Province is deprived of a line of commerce that naturally belongs to it on account of being carried on in a contiguous territory, at all times, and that is of an absolute necessity? The said sedentary seal-fisheries are only in operation in winter time, between the fifteenth of December and the third or fourth of January, and, therefore, could be of no prejudice whatever to the freedom of whale and cod fishing which only takes place in summer time. Those engaged in seal fishing return to Quebec during the month of May, at which time the whale and the cod-fishing vessels have not yet reached the Gulf, and they never leave again until October for their winter fishing season. Therefore, throughout the continent, the fishermen have the free use of the beaches both for the reducing of the whale blubber and drying cod-fish. Under the old government the said whale and cod

fisheries in the river and gulf of St. Lawrence were free to all of the subjects and the owners of sedentary seal-fishing posts, although they had been granted the ownership of the beaches, could claim no indemnity for any loss resulting to their trade through the use of said beaches.

What would become of so many Canadian mariners and sailors, who having no other occupation or other training, would be compelled, when no longer able to earn their living from the said fisheries, to leave their native land for other kingdoms? What a large number of workers of every description, now engaged in and required for sedentary seal-fishing would be thrown out of employment! Such men are in no way trained for the tilling of the soil. Furthermore what would make us the loss of this Province of the export duties on the stave-wood, hoop-iron and provisions for which such undertakings provide a market.

The winter operation of sedentary seal-fishing can only be successfully carried out by the Canadians, who first discovered them. Born as they are in cold climes, they are the best suited men for the hardships of winter in this region. This fishery is carried on in icy waters and at the most severe season of the year so that the Canadians alone can withstand the hardships it entails. No former subjects could engage in such fisheries and be successful, and the Europeans never could stand it. To deprive the Province of said fisheries would mean the loss of all benefits obtainable only through the the Canadians who are accustomed to them from their very childhood. The fishing season over, these same Canadians who are also skilled trappers, go hunting in the woods, and when they return from their winter expedition are still in a position to assist their family in developing their lands.

Your petitioners are satisfied that the reason why the Governor of Newfoundland was induced to bar them from the operation of their posts is due to his fear that, under the pretense of fishing, they might carry on illicit trading with the islands of St. Pierre and Miquelon and other points in Newfoundland frequented by French fishing vessels. They venture to hope that your Excellency may be pleased to give positive assurance in this connection and to state in their behalf that no consideration could induce the Canadians to engage in anything contrary to the prohibitions made by their Sovereign.

They view with great regret the fact that the Province, at its entrance from the North side, was bounded by the river St. John, evidently because His Most Gracious Majesty had not been informed at the time that the whole of Côte du Nord, as far as Cape St. Charles, below the Strait of Belisle, and even as far as the Bay of Kitche Katchou, had partly been granted by His Most Christian Majesty to Canadians for the purposes of sedentary seal fishing; that all such concessions, both en fiefs forever and en rôtures for a limited time were made, as to the fiefs, subject to fealty and homage, and as to the rôtures (soccage), subject to the payment of rents at the Castle of St. Louis under the dependency of which they were, and that the

said coasts formed part of this Province as Your Excellency must have ascertained from the extracts you caused to be taken from the Records of the Superior Council and of the Intendance where such titles are registered.

p. 1052

The new boundaries of the Province were settled without the Canadians being informed of the matter. Had they been made aware of it, they could have anticipated such a settlement and would have taken the liberty of submitting their most humble representations to His Majesty and informed him that, if this mainland were detached from its territory and the province practically deprived of the revenue obtained therefrom, it could not subsist, and would never be in a position to pay the Mother Country for the necessary commodities supplied from that source. Not only would the Province be deprived of this mainland, but its inhabitants would be barred from fishing and killing seals in the posts which they established and are their own property, through an ordinance made by the government of Newfoundland, which ordinance is all the less fair and just as it is contrary to common law to prevent the natives of a country from enjoying, on their own territory, a fishery meant to be theirs by Providence and which they have carried on for a hundred years back.

Your petitioners, believing in the fairness of their request and in His Most Gracious Majesty's generosity, venture to hope that, during your stay in London, Your Excellency may be pleased to support their cause, that they shall be granted their request for the return and reunion of this mainland on the Côte du Nord, as far as the Bay Kitchekatchou, to this Province, to be made a dependancy thereof, and also the free operation of their said fisheries as they have always had in the past.

And so in duty bound your petitioners will ever pray for the preservation of Your Excellency.

PERRAS.

V. 42.

No. 265.

EXTRACT FROM

[1772.]

A SHORT ACCOUNT OF THE TERRITORY OF LABRADORE, ITS
INHABITANTS AND PRODUCTIONS, TOGETHER WITH SOME
OBSERVATIONS ON THE DIFFERENT FISHERYS WHICH ARE CARRY'D
ON UPON THAT COAST, AND HOW THE AUTHOR PRESUMES THEY
MAY BE IMPROVED, AND EXTENDED, BY AN OFFICER¹ OF THE
SQUADRON UNDER THE COMMAND OF COMMODORE SHULDHAM.

Humbly inscribed to the Righ Hon'ble
the Earl of Dartmouth.

COL. COR N., VOL. 5.

It was thought necessary to erect at Chateau a Blockhouse for the protection of the Fishery upon this Coast. Doubtless it was a wise procedure. It flattered the Fishery with a Mark of the Attention of Government & was a requisite Encouragement towards promoting its Establishment.

We know that about the time this Fort was erected, the Indians committed some Irregularities, and two or three Men were killed. It was justly thought that a beneficial Fishery might be carried on upon that Coast, and it was certainly very proper to make every probable method for encouraging Adventurers to prosecute it. The Esquimeaux are not very well known at present, but at that time they were believed to be a more Savage, ferocious, cruel people than perhaps they really were. The Merchants dreaded the loss of their Craft, & the Servants considered their lives to be in danger.

Now whether the Fort was capable of effectually preserving either the one or the other, might not be enquired into. It is sufficient if its being built induced them to continue on the Coast, and whether it be really necessary or useless is of no consequence. Its being abandoned may alarm the Fishery. The Fisherman will probably look upon themselves as devoted to Destruction, and perhaps those who are most timourous will refuse to continue on the Coast. If a panick once seizes them, wheter there is occasion or not, is of no signification, the Fishery will be ruined.

* * * *

It must be considered they have been long accustomed to ramble in the Summer & they cannot well transport themselves without Boats. They

¹ The manuscript copy of this paper is endorsed at the end with the following note: "Drawn up probably by Lieutenant Roger Curtis."

know not how to build them, and they are as yet Strangers to Industry. The only means by which they may be acquired. The Esquimeaux live at this Day, as the original Inhabitants of the most polished Nations. They have no care beyond the necessities of life. Let proper Methods be taken wit them, and they will soon be weaned from their Brutality. As you expand their Ideas you will multiply their Necessities, and they will consequently attach themselves to those Occupations by which they may relieve them.

*sic. The have been threatened with punishment if they steal again, and were this Year forbid going to Newfoundland. This Restriction was very displeasing to them, but they submitted with the Appearance of much Anxiety not to offend.

Unless a misunderstanding should arise between us (i.e. between the Esquimaux and the English), it is probable these people will never think of offending again. If they ever do, the mischief will be done by surprise, and then the Fort can be of no Service to whom they attack. It is true the Idea of a Military Guard may awe the Indians, and at the same time it will inspire the Fishermen with confidence, because they will consider the Fort as a place of Refuse* in case of Molestation.

sic. With respect to an European Enemy this Fort perhaps was never meant to be any Safeguard. Its want of Strength & situation render it utterly useless for that purpose. But it is our Happiness that a few Salt fish will never induce a Privateer to visit this Coast at such a Distance from home, and the Ships of War may probably find other Employment. This Fort seems to have been erected purely as an Encouragement to the Fishery, and with a View of restraining the Disorders of the Indians; and consiered in that light, there can be no objection to its plan or Situation. But without meaning to give offence to anybody, we cannot help observing, in its Establishment there is room for vast Amusement.

It has been before hinted that the Fort appeared to be Serviceable only as an asylum, and that for the purpose of preventing and Molestation to the Fishery, it was rather insignificant.

No. 266.

1772.
June 24th.**REPRESENTATION OF LORDS OF TRADE TO THE
KING**

*sic. RECOMMENDING ANNEXATION TO THE PROVINCE OF QUEBEC OF
LABRADOR COAST BETWEEN RIVER ST. JOHN AND STRAITS OF
BELLE ISLE, WITH ADJACENT ISLANDS.

B.T. NEWFOUNDLAND. VOL. 33.

To the King's Most Excellent Majesty.

May it please Your Majesty,

We have had under our consideration a paper communicated to us by the Merchants of Great Britain interested in the Trade to Quebec, intituled, The case of Landholders in Canada, proprietors of Seal-fisheries on the Coast of Labrador, and their Leasees*; as also of the possessors of certain Seal Fisheries on that Coast under grants from the Governor of Quebec, describing the particular nature and circumstances of those fisheries, and setting forth the great loss and detriment which have ensued by those fisheries being made subject to such rules and regulations, as the Governor of Newfoundland has thought necessary to be laid down for the fisheries of Cod and Whale, since the said Coast of Labrador has been annexed to that Government: we have likewise taken into our consideration a memorial presented to Guy Carleton Esquire Your Majesty's Governor of Quebec and signed by Sundry Inhabitants thereof, Subjects of Your Majesty, to the like effect, whereupon we beg leave humbly to represent to Your Majesty,

That while Canada remained in the hands of The French, and the Coast of Labrador was considered as a dependancy thereupon, a fishery for Seals was, amongst other objects of national concern, attempted and brought to a degree of perfection, and the returns from this branch of the exports of Canada amounted annually to about ten thousand pounds sterling. In consequence of these attempts, Grants of several Islands in the River and Gulph of Saint Lawrence, and some tracts on the main land, with the exclusive privilege of Seal-Fisheries &c^a were made in times past by the Crown of France to certain persons, and the rights of property thereby vested in them have passed as Inheritances, and been sold and leased to Tenants at pleasure Various other species of claims have been exhibited as derived from French tenures, which it is needless now to enumerate, and which have passed by succession through different hands; And since the cession of Canada, these fisheries have been again taken up, and sundry of Your

from proprietors under French titles or by grants from Your Majesty's Governor of Quebec for a term certain, or 'till such time as Your Majesty's Pleasure should be known: In confidence of the validity of these tenures, it is stated that many adventurers have followed the established practice of Canada, by purchasing from the former Grantees, the whole of their dwelling Houses, fishing implements, utensils and warehouses appropriated to particular posts or passes, and large sums are said to have been employed in reestablishing these fisheries.

The fishery for Seals it is asserted, cannot be prosecuted in the open Seas and made general like those for Cod and Whales, but it is practised in a manner widely different from any other fishery in the Gulph or River Saint Lawrence, and requires much judgement and circumspection; it is chiefly formed by the contiguity of small Islands or Rocks to the main land, which occasion strong currents called Passes, where only such fisheries can be exercised, and to which the make and contexture of the Netts must be particularly fitted; it is chiefly followed in the Winter Season, and the immediate operation of catching these animals commences in December, and lasts only about fifteen days; but the fishers employed in the business must be at their station in the course of the Month of September, and cannot get away from it before the end of May.

This, it may please Your Majesty, is in brief, the nature of the fishery for Seals, and these the circumstances of the people engaged in that business, as described and explained in the papers under consideration, copies whereof we beg leave hereunto to annex. By Your Majesty's Royal Proclamation of the 7th of October 1763, Your Majesty thought fit to put all the Coast of Labrador, from the River Saint John's to Hudson's Straits, together with the Islands of Anticosti and Madelaine, and all other smaller Islands lying upon the said Coast, under the care and inspection of your Governor of Newfoundland to the end, as Your Majesty therein graciously declares, that the open and free fishery of Your Majesty's Subjects might be extended to, and carried on upon the said Coast of Labrador and the adjacent Islands; And from this period, the Posts and Settlements on the above Coast, and the fisheries thereupon depending, were detached from the Government of Quebec, and became subject to the Ordinances and Regulations of Your Majesty's Governor of Newfoundland.

From the foregoing account of the nature and circumstances of these Posts, and the Fisheries depending thereon, it will, as we humbly conceive, appear, that to subject them to the same Rules and Regulations, as may be well adapted to the fisheries for Cod and Whales, is, in effect, to destroy them: that the Seal-fishery being of necessity a sedentary fishery, requiring great expence, Nets of a particular

quality and construction immediately fitted for the Pass they belong to, employing materials of a bulky nature and requiring Houses for wintering the fishers, cannot be made open and general in the manner of the fisheries above mentioned, nor can the Posts occupied by Adventurers, in this business, be quitted at pleasure, or transferred to first comers, as is practised in the Newfoundland fishery; And accordingly

p. 1057

we find, not only from the papers under present consideration, but from various other documents in Our Office, that many and great complaints have been preferred against the Rules and Regulations, which have been extended to this Coast, since it has been annexed to the Government of Newfoundland; and which Rules being calculated with a view to encourage the two great fisheries for Cod and Whales, and contrived to quicken the activity and emulation of Adventurers from Great Britain, by laying the several Posts and Passes open to the first arrivers, have been found absolutely incompatible with the principles on which the Seal-fishery can alone be conducted. To prevent therefore any further disturbance to Individuals in their private claims and possessions, and to save to the Mother Country the advantages to be drawn from this Branch of Commerce, which seems to be no inconsiderable object, we do humbly submit to Your Majesty, whether it may not be adviseable for Your Majesty to cause to be reannexed to Your Government of Quebec such parts of the said Coast of Labrador, as are situated between the River Saint John's and the Streights of Bellisle, together with the Islands of Anticosti and Madelaine, and all other smaller Islands lying upon the said Coast; for although Your Majesty, from such information, as was before Your Majesty when the Proclamation of the 7th of October 1763 was published, did, upon the gracious motives therein set forth, and with the advice of Your Privy Council, think fit to put that part of the Coast of Labrador under the care and inspection of Your Governor of Newfoundland, yet the experience of succeeding times, and the various inconveniences which have since occurred, and which could not at that period be foreseen, have, as we humbly conceive, reversed the policy of that measure, and made it for your Majesty's Service, and the welfare of Your Subjects to restore the said Coast as far as the Streights of Bellisle, to it's dependency on the Government of Quebec, leaving for the present at least, that part of the Coast of Labrador, which lies between the Streights of Bellisle and Hudson's Streights, and where, we conceive, there are very valuable Cod fisheries under the Government of Newfoundland.

All which is most humbly submitted.

HILLSBOROUGH,
JOHN ROBERTS,
BAMBER GASCOYNE,
ROBERT SPENCER.

No. 267.**REFERENCE BACK TO LORDS OF TRADE.**

FOR FURTHER CONSIDERATION OF REPORT ON CASE OF LANDOWNERS
IN CANADA.

B.T. NEWFOUNDL^D. VOL. 20, p. 317. 1772. Dec. 19th.

At the Council Chamber Whitehall,
the 19th Day of December, 1772.

By the Right Honble the Lords of the Committee of Council
for Plantation Affairs.

His Majesty having been pleased by His Order in Council of the 8th of July last, to refer unto this Committee a Representation from the Lords Commissioners for Trade and plantations upon considering the Case of the Landholders in Canada proprietors of Seal Fisheries on the Coast of Labrador and their Lessees, As also of the possessors of certain Seal Fisheries on that Coast under Grants from the Governor of Quebec— The Lords of the Committee in Obedience to His Majesty's said Order of Reference this Day took the said Representation into Consideration and are hereby pleased to Order that the said Representation be referred back to the said Lords Commissioners for Trade and plantations, who are to confer with His Majestys' Governor of Newfoundland on the Subject of the Seal Fisheries carried on upon the Coast of Labrador, and Report their opinion to this Committee, how far the Seal Fisheries on the said Coast may be relieved from the great loss and detriment, which are represented to have ensued by those Fisheries being made Subject to such Rules and Regulations as the Governor of Newfoundland has thought necessary to be laid down for the Fisheries of Cod and Whale, since the said Coast of Labrador has been annexed to that Government, without prejudice to those Considerations of Policy which induced His Majesty by His Royal proclamation of 7th October, 1763 to put all the Coast of Labrador from the River St Johns to Hudsons Streights together with the Islands of Anticosti and Madelaine and all other smaller Islands lying upon the said Coast under the Care and Inspection of the Governor of Newfoundland.

STEPH. COTTRELL.

[6 Jan. 1773.]

MEMORIAL OF GEO. CARTWRIGHT

PRAYING FOR GRANT OF LANDS ON THE COAST OF LABRADOR, ETC.

p. 321. 1773. Jan 6th.

To the Right Honourable Earl of Dartmouth, His Majesty's
Secretary of State for the American Department, First Lord
of Trade and Plantations, &^c &^c &^c

The Memorial of Geoge Cartwright Esq^r Merch^t

Sheweth

That, in the Spring of the Year 1770, when no British Subject in Labrador would venture to reside farther northward than Chatteau Bay and the islands immediately adjacent, your Lordships' Memorialist, at great hazard and expence settled himself in the River Charles on the said Coast, in order to establish Seal and Salmon Fisheries; to fish for Cod; to carry on the Furring Business; to open a friendly and Commercial intercourse with the Eskimaux Indians with whom we were then upon very bad terms; and to commence, if possible a Shore Whale-fishery.

That Your Lordship's Memorialist has had nothing but a series of difficulties to encounter, and has sustained a variety of heavy losses in these his undertakings; partly from the rigour of the climate; partly from the inexperience common in all new enterprizes; and partly from the unjust and malicious interruption of later adventurers; one of whom, M^r Pinson of Dartmouth, forcibly dispossessed this Memorialist of, and, to his great detriment, detained from him a considerable time, his Salmon fishery in the said River Charles.

That your Lordship's Memorialist seeing no security from the repetition of such like proceedings, there being at this time seated in the posts he furnished with the requisite buildings and erections for the Sealing business, other Crews of the said Pinson, who has not scrupled to declare, as this Memorialist is credibly informed, his fixed resolution of persecuting him by superiour force, until he shall have hunted him off the coast: and this Memorialist thinking it by no means equitable that he should be driven in quest of new discoveries and into fresh difficulties, while another, without toil or risk, shall thus step in and reap the harvest of his past labours, finds himself under the necessity of applying to your Lordship for protection and

encouragement: But, at the same time that the above facts are related, this Memorialist begs to be understood that he has no cause whatever to be dissatisfied with the Governor's Officer upon that Coast for not affording him redress: He does not complain of the breach of any positive law; but of a violation of natural justice in Pinson: and this Memorialist flatters himself that, the following representation of the nature of each distinct branch of the Labradore business, will throw so much light upon it as to dispose your Lordship to believe that, what he has to solicit will be only a reasonable encouragement to every adventurer; of general benefit to Trade; and no way detrimental or injurious to other persons having an inclination to become adventurers on that coast.

The Seal Fishery is of the first importance; and may become extremely valuable if an undisturbed enjoyment can be granted to the discoverer and first occupier; but, if he be open to the invasion of anyone more powerful than himself as soon as he have learnt the advantages of his situation, he will ever be discouraged from embarking in it with spirit, and prevented from bringing it to any degree of perfection. The whole coast of Labrador abounds with Seals, and most so, there is reason to believe, to the northward: as may be inferred from the situations chosen by the several tribes of the native Eskimaux, who depend chiefly upon the seal fishery for their subsistence. But, it is to be observed that, every particular part of the coast requires that the nets be of particular forms and dimensions, according to the depths of water, the width of passes, the confined or extended track of the Seals; that the shore apparatus be likewise contrived differently for different posts; and in short, that the whole business in a great measure, be conducted on principles adapted to the peculiarities of each distinct post: so that nets made for one place cannot be fitted for another without very great loss and inconvenience, & a quantity sufficient for one post may not be half enow for another; and in several other particulars an adventurer, not having a certainty where he shall fix himself, will labour under very great disadvantages. There is so little dependence to be had, from previous observation, of the rout the Seals will take along the shore, that nothing but the experience of several seasons can ascertain the most advantageous mode of intercepting them within any particular tract of the coast, though but of a few miles in extent: so that much labour, fruitless expence and disappointment, must necessarily attend the Seal-fishery in its commencement to those who are real adventurers: but to those indeed, who watch their opportunity of seizing upon posts already prepared to their hands, the case is widely different. These inconveniences have been felt most severely by your Lordship's Memorialist who has spared no cost or pains, having as he verily believes, besides all his own time and trouble since the spring of the year 1770, sunk at least four fifth parts of his capital in trade. This branch, being a winter & spring employment, must be carried on by residents, and not by men carried out annually from Europe, as to the Cod fishery: and therefore, admitting the force of the foregoing

reasons, it would be the ruin of it to make the occupancy of the posts to depend on priority of possession taken by ships arriving on the coast. Here, it may

p. 1061

be necessary to attend to these material distinctions. When the Fishing Act introduced into the Newfoundland Codfishery that Regulation, it was a very proper one; because the intent of it was to give a stimulus to the Adventurer in an infant fishery, as well as to increase the number of British Seamen: in the Labradore Seal-fishery it is evidently a discouragement; and the inuring the fishermen to Voyages on the ocean is not the object here, as they must remain in the country; but not without adding to the shipping & seamen of these Kingdoms, for they thereby increase very considerably both our exports and imports. In the Cod-fishery, this Regulation extends no farther than to give the first comer his choice of a room on the shore, for the curing of his Voyage, which is almost a matter of indifference; but, at Labradore it would extend to determine where he should Kill his voyage, to the exclusion of all others. There, it does not put the excluded person to any kind of difficulty in Catching his fish, as the fishing ground is still open & free to all alike: here, it subjects him to all the disadvantages of being driven in quest of a new Sealery, as pointed out above. Hence it is plain there is no similarity in the two cases. And even in Newfoundland, the right of occupancy for the season, from the priority of taking possession, is very far from universal: nay, throughout that country, the number of Ships' Rooms bears but a small proportion to that of those held, enjoyed and inherited as private property.

The Salmon Fishereies of Labradore are extremely numerous; but the difficulty in approaching the coast for ice all the early part of the summer, and the short continuance of that season, make an essential difference between them and those of Newfoundland. There, the fishing ships from Europe can always take possession early enough in the season: here, they cannot. 'Tis very precarious even in the southern parts, and when the rivers come to be occupied northwards, towards Hudson's Streights, it will be still more so. It may possibly be proper in Newfoundland, where Cod fishing is the grand employment of the people, that the Salmon-fishing should be dependent thereupon (although that may well be disputed), and that it should there fall under like regulations: but, in Labradore, it will in general be found most beneficial that the Cod-fishery be made subservient to the other more certain and important objects; and therefore the present laws of Newfoundland will not, it is apprehended, be found to promote the interests of the Labradore Salmon-fishery, whose natural and necessary connection with the Sealing and Furring, will best point out the proper regulations for its encouragement. It appears, from the best observations which this Memorialist hath been able to make, that a permanent possession is equally necessary in the Salmon-fisheries as in the Sealing Posts; for

the nets in this, as well as in the other, must be made for each particular place; otherwise the advenventurer would be exposed to all the inconveniences above described in the case of the Seal-nets. Dwelling houses, Store houses, Salmon houses, Cooperages, Wharfs, Stages and other erections must be provided in each River; besides boats Stores, Provisions, Craft, &c: hence it is easy to imagine the distress that an Adventurer upon a small capital, or indeed any adventurer,

p. 1062

must suffer, if he be frequently obliged to quit his station and resign the fruits of his industry to a new comer, while he himself is forced to seek another River, to lose great part of the fishing season in erecting all his buildings afresh, and in removing thither his effects ; taking, after all, but the chance of finding it a place proper for his purpose. And the necessity of an exclusive property in the Salmon Streams will be farther manifest, when the close connection or rather union of this fishery with the Sealing Whaling and Furring is duely considered. The Sealing and Whaling must be on the same spot; and the others within their vicinity; in order to yield the mutual assistance which they require one from another. The hands are frequently shifted from one post to another during the course of the year, as the successive employments of consequence, which fall out in different seasons, and the requisite preparations for the same, demand attention: so that to leave them to the perpetual chance of being widely separated would, alone, be an effectual bar to their prosperity and increase.

The Furring Business requires a thorough knowledge of the interior part of the country which, on account of the deep snows and the rigour of the furring season, is only to be acquired by slow degrees. The country furnishes no other subsistence to the furrier than what his traps provide him, and these require a wide extent of ground to have any tollerable success. In order to penetrate to any distance, each furrier (for they all separate and hunt singly) must, at short distances one from another, build himself huts to live in, proof against bad weather, so that he shall never be far from shelter in case of storms. Hence, it is easy to conceive that, to fur that country properly, each adventurer should have an exclusive right: and otherwise that it never will be practiced, except in a very insignificant manner just around the Sealing Posts, by way of something to do at idle times.

The Shore Whale-fishery is an object of great expectation; though it has not as yet been carried on by any native of Great Britain. The Americans have however shewn its practicability and advantages to the westward of Chatteau, and there is no reason to doubt but that it may, with proper encouragement, be extended along the north-east and north coast to a great distance, as it is from thence the Whales come. We purchase much Whalebone from the Eskimaux, particularly from the tribe to which the people now under the care of your

Lordship's Memorialist belong; and they have frequently intimated that they kill as many whales as they think proper. As we have not yet got sufficient insight into the nature of this fishery, it is not attempted independently: and, until further experience, can only be made an appendage to the Sealerly. The proposed mode of practicing it for the present is to provide Whale-boats and Lines at the Sealing Posts, and to employ in the Sealing Crews a proportionable number of Harpooners, Steersmen and Whale-boat men, who have all extra pay. When a Whale shall appear they are to quit the Seal Nets, man the Whale boats and pursue it. But the Sealeries must first be made exclusive property, or else this very desirable appendage cannot be added to them: for it would be only from some particular Sealing Posts that we should have the opportunity of watching

p. 1063

for, or the power of killing, Whales: so that who ever should be subject to be dispossessed of any such Post, and driven to another where there would not be these advantages, could not think of engaging American Whalers in his service, or of being at the expence of boats and geer. If it be asked why it answers to the Americans themselves who do not carry on any Sealeries, it is because they make this Shore-fishery an appendage as it were to their general whaling voyage at sea. Early in the season, and before the Whales are to be found at sea, they are seen to pass along the shore in the Gulf of St Lawrence and the Straights of Belleisle. During this time the Whalers lie with their Vessels in the harbours, & keeping their boats in readiness, look out from the shore for the approach of the Fish, in like manner as is proposed to be done from the Sealing Posts. The Fish being regularly found in the Streights, at the only part of the Whaling Season in which they are not to be met with at sea, is a sufficient reason why the Shore-fishery has not, by these Whalers been extended beyond the Streights to the northward of Chatteau, but from the observation of this Memorialist, from very good intelligence and from the proof to be gathered from our trade with the Eskimaux, it is to be presumed this fishery will be found to attend the progress of our Sealeries, as fast as they shall advance along the coast towards Hudson's Streights.

The Indian Trade with the Eskimaux, could it be brought to any degree of regularity and certainty, would be valuable to this Country, in opening a vent for its Woolens, Hardware & other Manufactures, in exchange for Whalebone, Oil and Furs. It is of great consequence too that it should be so; in order to free our Adventurers in Labradore from the dread of these Savages, which has hitherto been so great a discouragement to all our undertakings in that Country. It totally prevented till lately, and still does prevent in a great measure, the settling of English Sealing & Salmon-fishing Crews; and must continue to operate to the same effect, until a thorough and sincere reconciliation be effected between us, and we have established

with them a free commercial intercourse. This your Lordship's Memorialist hopes he shall be principally instrumental in bringing about, by the pains he takes to conciliate the affection of the Indians: and, next to such means, he apprehends that it will be best effected by making the Sealing and Salmon Posts private property; whereby the proprietors will be induced to settle upon them with powerful crews and will be enabled to strengthen themselves by erecting for their dwellings such houses as will answer the end of Block houses, in case of any alarm from the the Savages. Our fishers, thus protected, will venture to settle where they dare not at present; and the savages will be awed from renewing those attacks, which they have heretofore made with too much success, upon the defenceless huts of the fishermen. Mutual injuries may thus in time be worn out of the memories of both parties: the hope of profit restraining the European, and the fear of punishment the Indian, from taking up arms.

Your Lordship's Memorialist, having drawn this Account within a much narrower compass than a subject of so much importance may possibly require,

at this critical period when the Legislature is about to frame Regulations for the future government of Labradore, begs to assure your Lordship he has been particularly cautious not to deliver any such sentiments as might, in the smallest degree, tend to mislead your Lordship's judgment; and should esteem himself highly criminal were he capable of being knowingly biassed so far towards his own private interest as to endeavour to advance it by prejudicing that of the Public. His representation is of facts, and from the result of his most careful observations: and he cannot but be confident that, those who know most on the subject will most nearly agree with him in opinion: but he thinks it necessary to observe that, he has reason to believe the affairs of Labradore, and consequently its true interests, are not as yet well understood by the Newfoundland Merchants in general, or even by most of those in particular who may have had some concerns there under the conduct of their servants.

And now this Memorial proceedeth to shew

That your Lordship's Memorialist is bold to think he hath done more than any man towards extending the above mentioned branches of commerce along the Coast of Labradore. He took the lead in advancing beyond the protection of His Majesty's Fort at Chatteau, at a time when the last occupiers of the River Charles where he seated himself had been surprized and three of them killed by the Savages; which had struck such a panick into the rest that the post had been abandoned for two years. The first year of his residence there, he prevailed upon nine of the Savages to winter with him, when no other adventurer would run any risk of that kind. The two successive seasons he ventured to pitch his tent in their camp; having never more than a single attendant, and being sometimes alone. He lived amongst them in this manner for some weeks, and very frequently entertained large parties of them at his own house; by which means he at length obtained such an ascendancy over them that they became entirely observant of his commands, and have ever since shewn themselves firmly attached to his person: insomuch that, when he had the misfortune to be burnt out of his house, and at other times when any kind of distress has befallen him, they have melted into tears and given every other demonstration of feeling a real concern; and while Mr. Pinson's servants were in the act of dispossessing him of his salmon fishery and its buildings, it was with some difficulty he could restrain them from revenging him, by the death of his opponents. They never rested until they had made him promise to visit them at their own settlemt, and have given him the most solemn assurances of safety. They seem tollerably well satisfied with England; and now reproach themselves with not crediting the various reports of their country-woman Micoc, with regard to the numbers and power of the English Nation, which they formerly entertained a contemptible opinion of, but now

express their astonishment at, as far exceeding her description: so that their notion of having it at any time in their power to cut off all the English in Labradore, which they did not fail to make known when displeased, will probably give place to ideas of the expediency of keeping well with a people to whom they now say "The Eskimaux are but as Two."

p. 1065

And Your Lordship's Memorialist has no doubt but that, from their treatment amongst us; they will leave England with sentiments of real friendship, tending very much to prevent the bloodshed which has heretofore so frequently happened between us; and to confirm, throughout their whole community, that confidence which a part of them immediately reposed in us upon the return home of Micoc, and to cement between the two nations a cordial and lasting peace.

That this Memorialist can make appear to your Lordship that, he has by great industry & observation, and by many chargeable experiments, invented several considerable improvements in the mode of carrying on the Seal Fishery; whereby it will be managed with greater ease, the oil will be much more pure, and produce a greater profit by at least 20 ^{per} Cent. but that he can reap no benefit from these inventions, nor will they come into general use among our seal fishers, except a full security be given to every adventurer of holding undisturbed possession of his posts; as the first cost of the necessary erections will be very considerable, and take some time to perfect; and must of necessity be provided at every Sealing Post.

That this Memorialist, submitting to the judgment of Your Lordship whether leaving the Stations occupied by the adventurous and laborious discoverer open to every interloper, will not tend to damp the the spirit of enterprize and to distress the industrious; without having any other effect than to encourage, at their expence, the lazy, the cowardly, the avaricious and the oppressor, who have before them immense Tracts of an unoccupied Coast: and submitting likewise all his general reasonings to spew how much adventurers stand in need of His Majesty's protection; as well as the particular pretensions which, individually, he humbly presumes he has to encouragement, he has, in obedience to Your Lordship's generous commands, for which he is truly grateful, taken the liberty thus to approach Your Lordship with a Memorial, flattering himself with an entire confidence that when his case (the common case of every real adventurer) shall have been taken into consideration, and it shall appear to Your Lordship that he is deserving of so much favour, that your Lordship will be pleased to move His Majesty, in his great goodness and known desire to promote the happiness and. Welfare of his subjects, to command that a Royal Grant be made to this Memorialist and his Heirs, of the small Tract of the said Coast of Labradore which lies between Cape Charles & Cape St Lewis; reserving to the Cod-fishers and Whalers by Sea, (not

*sic.

interrupting the Sealing & Salmon fishing within those limits,) every right and privelege that shall be necessary for following those occupations; this being the part he has made it his business to become acquainted with, and within which he has built seven dwelling houses, with suitable Store houses, Fish-houses, Vats, Wharfs and every other erection belonging to the Seal and Salmon fisheries, part of which are now in possession of the above mentioned M^r Pinson.

That, in consideration also of the great national advantage which may reasonably be expected to result from the conduct of this Memorialist towards the Eskimaux he trusts that he shall therein meet with Your Lordship's

p. 1066

approbation, and, provided he shall be so happy, that he shall find, from your Lordship's great benevolence, a disposition in your Lordship to obtain him from Government some assistance towards defraying his Expences on the Indians he has now with him, during their short stay in England, as the maintainance* of them, in such a way as to make them satisfied with their treatment, falls very heavy upon your Lordship's Memorialist after all his losses in Trade.

All which is most humbly submitted by

Your Lordship's most respectful
and most obliged Servant

POWNALL TO PINSON,

INVITING OBSERVATION UPON CARTWRIGHT'S MEMORIAL.

To M^r Andrew Pinson, Merchant, at Dartmouth.

SIR,

The Lords Commissioners for Trade and Plantations having under their consideration, a memorial presented to the Earl of Dartmouth, by George Cartwright Esquire, Merchant, complaining of his having been disturbed by you and your Agents in the possession of a fishing Post occupied by him on the Coast of Labrador in North America, comprehending the Lands and Islands lying between Cape Charles and Cape Lewis, and, praying that he may be confirmed in such possession by His Majesty's Authority; I am directed by their Lordships to communicate to you this application, to the end, that, if you have any objection to the recommending what is proposed by Mr. Cartwright, you may have an opportunity of stating that objection before their Lordships make their Report to His Majesty upon his Memorial, in the preparing of which Report, their Lordships will allow, a reasonable time for an answer to this Letter, which answer you will transmit to me as soon as conveniently may be.

I am, Sir,

Your most obedient humble Servant,

J. POWNALL.

No. 270.**PETITION OF NOBLE AND PINSON TO LORDS OF
TRADE**

TO BE CONFIRMED IN THEIR POSSESSIONS IN TEMPLE BAY.

Copy.

COL. CORRESP. NEWFOUNDLAND. VOL. 6.

To the Right Honorable the Lords Commissioners of Trade and
Plantations.

The Humble Petition of John Noble of Bristol, and Andrew
Pinson of Dartmouth, Merchants and Co-partners.

Sheweth

That your Petitioners two years since laid before your Lordships their humble Petition for a Grant of that part of Temple Bay, called Lance Cove, on the Coast of Labradore, and certain other matters therein specified. That the Reply to such Petition was, that it contained Matters worthy their Consideration; but that it was then too late for their Determination; or, if such Petition should be granted, would be too late for your Petitioners to carry any scheme into Execution; they therefore recommended an early Application the ensuing Fall. Your Petitioners however did not renew their Application, as recommended, chusing to be more certain of the Success of their Scheme of drying Fish on that Coast, which to that time was thought impracticable, and was carried thence to the Coast of Newfoundland for that purpose. Your Petitioners therefore, (one of whom has annually been on the Spott,) being since convinced, that the Cod, and also the Seal and Salmon Fisheries may be carried on there with advantage to themselves, and this Nation in general under proper Encouragements from your Lordships, Beg Leave to acquaint your Lordships, that since that time they have enlarged their Fishery to the annual Employments of 150 Men, with four stout Ships, agreeable to the Act in such case provided; That your Petitioners have cleared and now occupie the said part of Temple Bay, and have at a great Expense built certain Stages, Flakes, Houses, and other fishing Works necessary for carrying on a very extensive Cod Fishery on that Coast, which they presume is their property, agreeable to the Proviso in the Fishing Acts; but should your Lordships be convinced of the Contrary. They humbly and earnestly crave to be confirmed in such their Possessions, free from the Molestation of any other

Person whatsoever.

p. 1069

Your Petitioners now beg leave to assure Your Lordships, that the Cod Fishery on that Coast cannot be carried on with Advantage, unless connected with the Salmon and Seal Fisheries; Your Petitioners therefore earnestly request Your Lordships will confirm to them the Sealing Posts, called Seal Islands, near Cape Charles, which they at present Occupie; and that the rest of the Sealing Posts, (of which there are great Numbers on that Coast hitherto unoccupied,) together with the Salmon Rivers, be laid under the following Restrictions, which with due Submission they refer to your Lordships superior Judgements.

That every Adventurer in the Cod Fishery on that Coast be allowed to take and remain in quiet possession of any Salmon & Sealing Posts, so long as they continue to occupie the same with Ships annually from Great Britain, or Ireland properly cleared out with such equal Number of Men, as they may employ in the Salmon and Seal Fisheries, and those to be actually employed in the Cod Fishery, and Your Petitioners will, as in Duty bound, ever pray.

**REPRESENTATION OF LORDS OF TRADE TO
THE KING**

[2 March,
1773.]

UPON MEMORIALS PRESENTED BY CARTWRIGHT AND MESSRS.
NOBLE & PINSON.

AMERICA AND WEST INDIES, NO. 411. NEWFOUNDLAND, VOL. 1,
p. 148.

Representation of the Lords of Trade.

To the King's Most Excellent Majesty.

May it please Your Majesty,

We have had under Our Consideration the Memorial of George Cartwright Esquire Merchant, setting forth that he has, at great hazard & expence settled himself upon the Coast of Labrador between the Capes Charles & Saint Lewis where he has erected sundry Dwelling Houses, Store houses, and other Conveniencies for the purpose of establishing & carrying on the Seal & Salmon Fisheries & other useful & commercial undertakings that having suffered great Loss and Interruption in his said undertakings by the operation of the Law for encouraging the Trade to Newfoundland, which gives the Election of Posts to the Ship saccording to the priority of their Arrival, he humbly prays to be recommended to Your Majesty to be secured in his said Establishments by a Grant from Your

Majesty of a small Tract of the said Coast lying between Cape Charles & Cape Saint Lewis for the purposes above specified
We have likewise had under our Consideration the Memorial of John Noble of Bristol & Andrew Pinson of Dartmouth Merchants

p. 1070

& Copartners praying to be confirmed in their sealing Posts on the said Coast, & suggesting certain regulations with regard to the Seal & Salmon Fisheries; Copy of which Memorial as likewise of that of M^r Cartwright above recited, We beg Leave hereunto to annex, & humbly to represent to Your Majesty,

That having been attended by the several Memorialists in person, & entered fully into an Examination of the nature & Circumstances of the Fisheries for Seal & Salmon in the Rivers & Bays upon the Coast of Labrador, as likewise of the Fishery for Cod by Ships fitted out from Great Britain, it does appear to Us from the different Seasons proper for these Fisheries, & the different modes of carrying them on, that they may not only be conducted without interruption & detriment to each other, but that the only method of making these undertakings an object of Consideration to the Public, or of advantage to Individuals concerned in them, will be by thus carrying them on in Connection with each other by Ships annually fitted out from Great Britain, & as it does further appear to be manifest, that actual residence & continued possession are essentially necessary to the carrying on the Seal & Salmon Fisheries on the Coast of Labrador, We beg Leave humbly to submit to Your Majesty the following regulation as proper for securing the possessions of persons concerned in the said resident Fisheries of Seal and Salmon on the above Coast Viz. That such of Your Majesty's Subjects of Great Britain & Ireland who have taken or shall hereafter take such actual possession in any of the Rivers & Bays on the Coast of Labrador to the North of the Streights of Bellisle, & who have erected, or shall hereafter erect Houses & Warehouses, & have made or shall hereafter make other Establishments necessary to the carrying on the Seal & Salmon Fisheries, shall be protected in such possession, provided such persons do for the future annually fit out from Great Britain one or more Ship or Ships to be employed in the Cod Fishery on the said Coast of Labradore & provided also, that the greatest Care be taken that the Proprietor or Proprietors of such fishing Posts do not claim or occupy a greater Extent of the Coast within the said Bays or Rivers, than shall in the Judgement of Your Majesty's Governor of Newfoundland or the Officer by him deputed, be thought absolutely necessary in proportion to the Number of Vessels, or Men employed at the said Posts.

Which is most humbly submitted

[Newfoundland.]

RESPECTING CARTWRIGHT'S APPLICATION FOR GRANT OF FISHERIES.

C. O. 391/80. MINUTES OF THE COMMISSIONERS FOR TRADE AND
PLANTATIONS.

18 *February*, 1773.

Their Lordships took into further consideration Mr. Cartwright's Memorial relative to the Seal & Salmon Fisheries on the Coast of Labrador and praying to have a grant of a certain district of that coast, in order to the carrying on the said Fisheries and Mr. Pinson of Dartmouth and Mr. Noble of Bristol, in partnership with Mr. Pinson, attending a memorial of those gentlemen respecting the said Fisheries and suggesting regulations with regard thereto was presented and read; and their Lordships having fully examined into and deliberated upon the nature and circumstances of the said Fisheries, were of opinion. That actual residence and continual possession were essentially necessary to the carrying on the Seal & Salmon Fisheries on the Coast of Labrador. That such of His Majesty's subjects of Great Britain and Ireland, who have taken or shall hereafter take such actual possession in any of the Rivers and Bays on the Coast of Labrador to the North of the Streights of Bellisle and who have erected or shall hereafter erect Houses and warehouses and have made or shall make other establishments necessary to the carrying on the Seal & Salmon Fisheries, ought to be protected in such possession, provided such persons do for the future annually fit out from Great Britain one or more ship or ships to be employed in the Cod Fishery on the said Coast of Labrador, and provided also that the greatest care be taken, that the Proprietors or Proprietor of such fishing Posts do not claim or occupy a greater extent of the coast within the said Bays and Rivers than shall be absolutely necessary in proportion to the numbers of vessels or men employed at the said Posts.

Ordered, that the Draught of a Representation to His Majesty be prepared conformable to the above Resolutions.

[2 March,
1773.]**REPRESENTATION OF LORDS OF TRADE TO
COMMITTEE OF THE PRIVY COUNCIL,**REPORTING UPON RECONSIDERATION OF THEIR REPRESENTATION OF
24TH JUNE, 1772.

B.T. NEWFLD, VOL. 33, p. 247. 1773. March 2nd.

To the Right Honorable the Lords of the Committee of His Majesty's most Honorable Privy Council for Plantation Affairs.

My Lords,

Pursuant to your Lordships Order of the 19th day of December 1772, we have taken into our consideration, an humble Representation of this Board to His Majesty, dated June 24th 1772, respecting the case of the Landholders in Canada, proprietors of Seal-fisheries on the Coast of Labrador and their Lessees, as also, of the possessors of certain Seal-fisheries on that Coast under Grants from the Governor of Quebec, and having conferred with His Majesty's Governor of Newfoundland, on the subject of the Seal-Fisheries carried on upon the said Coast of Labrador, we beg leave to report to your Lordships,

That, we have in pursuance of your Lordships Order reconsidered the proposition made for reannexing to the Colony of Quebec, such part of the Coast of Labrador as lies between the River St. John and the Streights of Belleisle, with the Islands thereunto belonging; and having conversed with His Majesty's Governor of Newfoundland on the subject of the Seal-fishery carried on upon the said Coast of Labrador, we are clearly of opinion, that the regulations which have been made for the encouragement of the fisheries for Cod and Whales, are in their present state, incompatible with that permanent residence and continued possession which are essential to the Seal and Salmon fisheries; and that those fisheries cannot be relieved from the loss and detriment which the proprietors of the different Posts upon that Coast complain of, whilst the regulations abovementioned are continued in force: It was not however upon this ground altogether, that we recommended the re-annexing to Quebec that part of the Coast described in the Representation abovementioned; for when it appeared, upon examination, that a great part of it was claimed as private property under Grants from the Government of Canada, and, that His Majesty was bound by Treaty to admit those claims,

**sic pro*
Ance.

the consideration of Policy was out of the question; and His Majesty could

p. 1073

not, as we conceive in justice, warrant the enforcing any regulations, which both in their nature and principle were subversive of those Rights.

We beg leave however to acquaint your Lordships, that those claims do not appear, upon further examination, to comprehend all the Coast between the River Saint John, and the Streights of Bellisle, and that they extend no further than the Anee*des Espagnols or Bay Phellippeaux; what therefore lies to the Eastward of that limit may, in our opinion, very properly continue within the Government of Newfoundland, and the dis-advantage in point of fishery of re-annexing the remainder to the Government of Quebec, (if any,) will be the less as by far the greater part of it, is rocky and inaccessible, and therefore can be of no use to the Cod-fishery.

We are,
My Lords,
Your Lordships,
Most obedient and most humble
Servants,

SOAME JENYNS,
BAMBER GASCOYNE,
GREVILLE,
W. JOLLIFFE,

C.O. Records, 5/251.
Domestic Despatches, p. 280.

Whitehall 9th March 1773.

SIR,—

It having been represented to the King that several of His Majesty's Subjects, have, with a laudable view to promote the trade and commerce of the Kingdom, been at considerable expence in making establishments on the coast of Labradore to the north of the streights of Belle Isle, for the purpose of carrying on the Seal and Salmon fishery, and therefore that it is equally just and expedient that such persons should be secured in their possessions, as far as the nature and interests of the Fishery in general, upon that coast, will admit; I am commanded by the King to signify to you His Majesty's Pleasure, that such of His Majesty's Subjects of Great Britain, or Ireland, who have taken, or shall hereafter take actual possession in any of the rivers and Bays on the coast of Labradore, or to the north of the Streights of Belle Isle, and who have erected, or shall hereafter erect Houses and Warehouses, and have made or shall hereafter make other permanent Establishments with a view to carrying on the Seal and Salmon Fisherys be protected in such possessions, provided such persons do, for the future, annually fit out from Great Britain, one or more ship or ships to be employed in the cod fishery on the said coast of Labradore; but you are to take the greatest care that the proprietor or proprietors of such fishery posts, do not claim or occupy any greater extent of the shore within the Rivers and Bays on the said coast, than you in your discretion shall judge necessary in proportion to the number of Vessels and Men employed at the said Posts.

I am &c.

DARTMOUTH.

Committee Report for re-annexing to the Government of Quebec such parts of the Coast of Labrador as are situated between the River St^t John and Bay Phillippeaux.

ORDER OF HIS MAJESTY IN COUNCIL

FOR PREPARATION OF AN INSTRUMENT FOR RE-ANNEXING TO THE GOVERNMENT OF QUEBEC SUCH PARTS OF COAST OF LABRADOR AS ARE SITUATE BETWEEN RIVER ST. JOHN AND BAY PHILLIPEAUX, ETC.

P.C. 2. VOL. 117, p. 181.

[Extracted from Privy Council Minutes of 22 April, 1773.]

Whereas there was this Day read at the Board, a Report from the Right Honourable the Lords of the Committee of Council for Plantation Affairs, dated the 7th of this Instant in the Words following Vizt.

Your Majesty having been pleased by Your Order in Council of the 8th of July 1772 to refer unto this Committee a Representation of the Lords Commissioners for Trade and Plantations, dated the 24th of June 1772, Setting forth, That they have had under their Consideration a Paper Communicated to them by the Merchants of Great Britain interested in the Trade of Quebec, intituled, The Case of the Landholders in Canada, Proprietors of Seal Fisheries on the Coast of Labrador and their Lessees; as also of the possessors of certain Seal Fisheries on that Coast under Grants from the Governor of Quebec, describing the particular nature and Circumstances of those Fisheries, and Stating the great Loss and Detriment which have ensued, by those fisheries being made Subject to such Rules and Regulations, as the Governor of Newfoundland has thought necessary to be laid down for the Fisheries of Cod and Whale, since the said Coast of Labrador has been annexed to that Government, That they have likewise taken into their Consideration a Memorial presented to Guy Carleton Esquire, Your Majesty's Governor of Quebec, and signed by Sundry Inhabitants thereof, Subjects of your Majesty, to the like Effect, Whereupon the said Lords Commissioners represent That while Canada remained in the Hands of the French, and the Coast of Labrador was considered as a dependency thereupon, a Fishery for Seals was amongst other objects of National concern, attempted and brought to a Degree of perfection, and the returns from this branch of the Exports of Canada amounted annually to about Ten thousand pounds Sterling; In consequence of these Attempts, Grants of several Islands in the River and Gulph of S^t Lawrence and some Tracts on the Main Land, with the exclusive Privilege of Seal Fisheries &c^a were made in times past by the Crown of France to certain persons and the rights

of Property thereby vested in them have passed as Inheritances, and been Sold and Leased to Tenants at pleasure; Various other Species of Claims have been exhibited as derived from French Tenures, which it is needless now to Enumerate and which have passed by Succession through different Hands; and since the Cession of Canada, these Fisheries have been again taken up, & sundry of your Majesty's Subjects have

p. 1076

Possessed themselves of Posts and Settlements, either in virtue of Leases from proprietors under French Titles, or by Grants from your Majesty's Governor of Quebec for a Term certain, or until such time as your Majesty's pleasure should be known; In Confidence of the validity of these Tenures, it is stated that many Adventurers have followed the Established practice of Canada by Purchasing from the former Grantees the whole of their Dwelling Houses, Fishing Implements, Utensils and Warehouses, appropriated to particular Posts or passes, and large Sums are said to have been employed in re-establishing these fisheries;—That the Fishery for Seals it is asserted, cannot be prosecuted in the Open Seas, and made general like those for Cod and Whales, but is practised in a manner widely different from any other fishery in the Gulph or River St Lawrence, and requires much judgment and circumspection, it is chiefly formed by the contiguity of small Islands or Rocks to the main Land, which Occasion Strong Currents called Passes, where only such fisheries can be exercised and to which the make and Contexture of the Nets must be particularly fitted; it is chiefly followed in the winter Season, and the immediate Operation of Catching these Animals commences in December and lasts only about fifteen Days; but the fishers employed in the Business must be at their Station in the course of the Month of September, and cannot get away from it before the end of May. That this is in brief the nature of the fishery for Seals, and these the Circumstances of the People engaged in that Business, that by your Majesty's Royal Proclamation of the 7th of Oct^r 1763 Your Majesty thought fit to put all the Coast of Labrador from the River St John's to Hudsons Straits together with the Islands of Anticosti and Madelaine, and all other smaller Islands lying upon the said Coast, under the Care and Inspection of your Governor of Newfoundland, to the End as your Majesty therein graciously declares, that the open and free fishery of Your Majesty's Subjects might be extended to, and carried on upon the said Coast of Labrador and the adjacent Islands, and from this period the Posts and Settlements on the above Coast and fisheries thereupon depending were detached from the Government of Quebec, and became Subject to the Ordinances and Regulations of Your Majesty's Governor of Newfoundland. That from the foregoing Account of the nature and Circumstances of these Posts and the fisheries depending thereon it will, as the said Lords Commissioners conceive, appear, that to Subject them to

the same Rules & Regulations, as may be well adapted to the fisheries for Cod and Whales, is in effect to destroy them; That the Seal Fishery being of necessity a sedentary fishery, requiring great Expence, Nets of a particular quality and Construction, immediately fitted to the pass they belong to, employing materials of a bulky nature, and requiring Houses for wintering the fishers, cannot be made open and general in the manner of fisheries above mentioned; nor can the Posts Occupied by Adventurers in the Business be quitted at pleasure, or Transferred to first Comers, as is practised in the Newfoundland fishery; and accordingly they find not only from the papers under present Consideration but from various other Documents in the Plantation Office, that many and great Complaints have been preferred against the Rules and Regulations, which have been extended

p. 1077

to this Coast, since it has been annexed to the Government of Newfoundland; and which Rules being calculated with a view to encourage the two great fisheries for Cod and Whales, and contrived to Quicken the Activity and emulation of Adventurers of Great Britain, by laying the several Posts and Passes open to the first Arrivers, have been found absolutely incompatible with the principles on which the Seal fishery can alone be conducted; to prevent therefore any further disturbance to Individuals in their private Claims and Possessions and to save the Mother Country the Advantages to be drawn from this branch of Commerce; which seems to be no inconsiderable Object; The said Lords Commissioners Submit whether it may not be adviseable for your Majesty to cause to be reannexed to Your Government of Quebec such parts of the said Coast of Labrador, as are situated between the River St: John's and the Straits of Bellisle, together with the Islands of Anticosti and Madelaine, and all other smaller Islands lying upon the said Coasts; for altho' your Majesty, from such information as was before your Majesty, when the proclamation of the 7th of October 1763 was published, did, upon the gracious motives therein Set forth, and with the Advice of Your Privy Council, think fit to put that part of the Coast of Labrador under the Care and Inspection of Your Governor of Newfoundland; Yet the experience of succeeding times, and the various inconveniences, which have since Occurred, and which could not at that period be foreseen, have, as the said Lords Commissioners conceive, reversed the policy of that Measure, and made it for Your Majesty's Service and the welfare of your Subjects to restore the said Coast, as far as the Streights of Bellisle, to it's dependency on the Government of Quebec, leaving for the present at least that part of the Coast of Labrador, which lies between the Straits of Bellisle & Hudson's Streights, and where there are very valuable Cod fisheries, under the Government of Newfoundland;—The Lords of the Committee in Obedience to your Majesty's said Order of Reference, did on the 19th of December 1772, take the

said Representation into Consideration, and thought proper to refer the same back to the Lords Commissioners for Trade and Plantations, to conferr with Your Majesty's Governor of Newfoundland, on the Subject of the said Seal Fisheries carried on upon the Coast of Labrador, and Report their Opinion to this Committee, how far the Seal Fisheries on the said Coast, may be relieved from the great loss and detriment, which are represented to have ensued by those (fisheries being made Subject to such Rules and Regulations as the Governor of Newfoundland has thought fit to be laid down for the Fisheries of Cod and whale, since the said Coast of Labrador has been annexed to that Government, without prejudice to those Considerations of Policy which induced your Majesty by Your Royal Proclamation of 7th October 1763 to put all the Coast of Labrador from the River S^t John's so Hudson's Streights together with the Islands of Anticosti & Madelaine and all other smaller Islands lying upon the said Coast under the Care and Inspection of the Governor of Newfoundland Whereupon the said Lords Commissioners have reported to this Committee, That they have in pursuance of the said Order re-considered the proposition made for re-annexing to the Colony of Quebec such part of the Coast of Labrador, as lies between the River S^t John and the Streights of Bellisle,

p. 1078

with the Islands thereunto belonging, and having conversed with your Majesty's Governor of Newfoundland on the Subject of the Seal Fishery carried on upon the said Coast of Labrador the said Lords Commissioners are clearly of Opinion that the Regulations, which have been made for the encouragement of the Fisheries for Cod and Whales, are in their present State incompatible with that permanent residence and continued possession, which are essential to the Seal and Salmon Fisheries and that those fisheries cannot be relieved from the loss and detriment, which the proprietors of the different posts upon that Coast complain of, whilst the Regulations above mentioned are continued in force; It was not however upon this Ground altogether that they recommended the annexing to Quebec, that part of the Coast described in the Representation above mentioned; for, when it appeared upon examination, that a great part of it was claimed as private property under Grants from the Government of Canada, and that your Majesty was bound by Treaty to admit those Claims, the Consideration of policy was out of the Question; And Your Majesty could not as they conceive, in Justice, warrant the enforcing any Regulations which both in their Nature and principle were Subversive of those Rights;—That those Claims do not appear upon further examination to comprehend all the Coast between the River S^t John and the Streights of Bellisle, and that they extend no further than the Ance des Espagnols or Bay Philippeaux; whatever therefore lies to the Eastward of that Limit may very properly continue within the Government of Newfoundland, & the disadvantage in point of fishery, of re-

annexing the remainder to the Government of Quebec (if any) will be the less, as by far the greater part of it is Rocky and inaccessible, and therefore can be of no use to the Cod Fishery; —The Lords of the Committee upon mature Consideration of this matter, do humbly report to your Majesty, that they concur in Opinion with what is proposed by the said Lords Commiss^{rs} for Trade and Plantations, and to that End, do agree humbly to advise your Majesty to direct your Attorney and Sollicitor General, to prepare and lay before your Majesty in Council a Draught of an Instrument proper to be passed under the Great Seal of Great Britain, for re-annexing to the Government of Quebec, such parts of the said Coast of Labrador as are situated between the River S^t John and the Ance des Espagnols or Bay Philippeaux, together with the Islands of Anticosti and Madelaine, and all other smaller Islands upon the said Coast.

[The above Report is extracted from Minutes of the 7th April 1773.]

His Majesty taking the said Report into Consideration, was pleased with the Advice of His Privy Council, to approve thereof, and to Order as it is hereby Ordered, that His Majesty's Attorney and Sollicitor General, do prepare and lay before His Majesty at this Board a Draught of an Instrument proper to be passed under the Great Seal of Great Britain, for re-annexing to the Government of Quebec such Parts of the said Coast of Labrador as are situated betⁿ the River S^t John and the Ance des Espagnols or Bay Phillippeaux, together with the Islands of Anticosti and Madelaine, and all other smaller Islands upon the said Coast.

PETITION OF JOHN AGNEW AND ASSOCIATES

FOR GRANT OF MINERAL RIGHTS IN THE COUNTRY OF LABRADOR.

To the King's most Excellent Majesty in Council.

The Humble Petition of John Agnew of Sheuchan and
Associates in the County of Wigtown North Britain.

Sheweth

That your petitioners have particular Information that there are several places in the Island of Newfoundland and Coast or Country of Labrador between the River St Laurence and Hudsons Streights where Copper, Copper Ores, and other Valuable Metals and Minerals may be procured which Your petitioners conceive will be highly advantageous to Your Majesty's Kingdoms if in the hands of proper persons.

That your petitioners are willing to hazard a Share of their private property in working such Mines as now are or hereafter shall be discovered in the Island of Newfoundland, and the said Country of Labrador at a certain limited distance not exceeding sixty Miles from the Sea or flowing of the Sea Water on any part of the said Coast of Labrador upon Your Majesty's most graciously condescending to patronize Your petitioners by Your Royal Grant or Charter for that purpose.

Your Petitioners therefore most humbly pray Your Majesty that you would be graciously pleased to grant unto them all Mines, Minerals and Metals already discovered or hereafter to be discovered in the said Island of Newfoundland, or in the said Country of Labrador within the Limits aforesaid under such reservations and restrictions as have been usual in like Occasions. And Your petitioners as in all duty bound shall ever pray, & so forth.

ALEX^R DUN.For John Agnew Esq^r, George Stewart
Esq^r & for myself.

Endorsed:

**LORDS OF TRADE TO PRIVY COUNCIL COMMITTEE
FOR PLANTATION AFFAIRS.**

PRIVY COUNCIL RECORDS, 1 / 60. B. 10.
C.O. RECORDS, 195 / 10.

MY LORDS,

Pursuant to your Lordships Order of the 19th of May 1773, we have taken into our consideration the humble Petition of John Agnew of Sheuchan, and Associates in the County of Wigtown in North Britain, humbly praying, that His Majesty would be graciously pleased to grant unto them all Mines, Minerals, and Metals already discovered in the Island of Newfoundland, and on the Coast or Country of Labrador, between the River S^t Lawrence and Hudson's Streights, at a certain limited distance not exceeding Sixty Miles from the Sea, or flowing of the Sea-water on any part of the said Coast of Labrador, under such reservations and restrictions, as have been usual on like occasions. Whereupon we beg leave to report to your Lordships,

That the proposition contained in the petition, which your Lordships have referred to our consideration, does not in the general view of it appear liable to objection; we beg leave however to observe to your Lordships, that the description of the limits, within which the petitioners propose the Grant to be made to them, appears to us, so far as it regards the Labrador Coast, to be attended with some difficulty; for, as on the one hand the proposing the River Saint Lawrence as the Boundary to the South is not sufficiently precise; so, on the other hand, by extending the Grant Northward to Hudson's Streights, they will take in a very large part of what has been already granted to the Hudson's Bay Company, who are intitled by their Charter to all Mines and Minerals within the Territories granted to them But we see no objection to your Lordships advising His Majesty to grant to the Petitioners all Mines and Minerals, which either have been, or shall hereafter be discovered by them or their Associates within the Island of Newfoundland, and upon the Coast of Labrador between the River Saint John's and the Southern Limits of the Territory granted to the Hudson's Bay Company; etc. . . .

GRANTING MINES AND MINERALS BETWEEN
RIVER ST. JOHN'S AND SOUTHERN LIMITS OF
HUDSON'S BAY COMPANY TO AGNEW &c.**[3 July,
1773.]

PRIVY COUNCIL 2 / 117. p. 239.

At the Council Chamber, Whitehall, the 3rd day of July 1773.

By the Right Honourable the Lords of the Committee of
Council for Plantation Affairs.

Present, etc.

Whereas there was this day laid before their Lordships a report from the Lords Commissioners for Trade and Plantations, dated the 3rd of June 1773 upon the petition of John Agnew of Sheuchan and associates in the county of Wigtown, North Britain, humbly praying that his Majesty would be graciously pleased to grant unto them all mines, minerals and metals already discovered in the Island of Newfoundland or on the coast or country of Labrador, between the river St. Lawrence and Hudsons Streights, at a certain limited distance, not exceeding sixty miles from the sea or flowing of the sea-water, on any part of the said coast of Labrador, under such reservations and restrictions as have been usual on like occasions:—

The Lords of the Committee having taken the said report into consideration, and are hereby pleased to order that his Majesty's attorney and solicitor general do prepare and lay before the Committee a draft of a proper instrument to be passed under the Great Seal of Great Britain, containing a grant to the pet^{rs.} their heirs and assigns, of all mines and minerals which either have or shall hereafter be discovered by them or their associates within the Island of Newfoundland, and upon the coast of Labrador, between the River St. Johns, and the southern limits of the territory granted to the Hudsons Bay Company, inserting in the said draft, the conditions and restrictions proposed in the said Report of the Lords Commissioners for Trade and Plantations, a copy whereof is hereunto annexed. Article (12) contd.
of the Coast of Labrador

which lies between Hudson's Streights and the Streights of Belleisle, to search and explore the great Inlet, commonly known by the name of Davis's Inlet; in order to discover whether the same has or has not any Passage to Hudson's Bay, or any other inclosed Sea.

Article (13th)

You are also to enquire and report to Us by one of our Principal Secretaries of State, whether any or what further Establishment may be necessary to be made, or Forts erected in any parts of Newfoundland, or the other Islands and Territories under your Government, either for the Protection of the Fishery the security of the Country or the establishment and carrying on a Commerce with the Indians residing in, or inhabiting the Coast of Labrador.

I am of opinion while Great Britain preserves the Sovereignty of the Sea she need, or ought not to be at the Expence of erecting any extensive Fortifications upon this Island; where the Climate is so severe that no Work of that kind can be performed without an immense Expence, as this Country does not produce one single material necessary for it; where from the intenseness of the Frosts the repairs must be infinite; where a Garrison must be kept complete however difficult or Expensive, which cannot Act above Five Months in the Year and the other seven totally useless and undisciplined, and by Idleness Drunkenness and irregularity rendered unfit for future service; add to this that, perhaps no Island in the World abounds with more Harbours than Newfoundland, all of which to be properly fortified, would require a much greater Expence than the whole Benefit of the Fishery would defray Those Harbours which are best fortified by nature, ought certainly to be made the Refuge and Rendezvous of the Shipping and not any from its Central situation

answers in this respect, and for this use, so well as St. John's, which at a small Expence may, and I hope is now making, sufficiently defensible against shipping, and while our Fleet main-

You are not to permit the Subjects of any foreign Prince or State whatever, to carry on any Commerce with the said Indians, and to use your best endeavours to conciliate their Affections and to induce them to Trade with our Subjects reporting to Us, by one of our: Principal Secretaries of State, the best accounts you can obtain of the number of

should be allowed some encouragement for wooding, such as shoes, Jacket and Frock.

I am sure none of the Subjects of any foreign Prince or State whatever have had any intercourse or Commerce with the Indians or Savagesects since my Government; few or none of them are now seen upon the Island of Newfoundland, and but few upon that part of the Coast of Labrador frequented by our Shipping. For the Trade carried on with those on the Coast of Labrador, See Art. 25th.

* * * *

ARTICLES OF HIS MAJESTY'S INSTRUCTIONS.

REMARKS.

the said Indians, the places they frequent, the nature and extent of the commerce that is, or may be carried on with them; and how the same may, in your Opinion, be further extended and improved.

* * *

Article (17th)

You are likewise to enquire and report to Us, by one of our Principal Secretaries of State, what is the Extent of the Coast of Terra Labrador, under your Government.

The Island of Resolution lies in Lat^d 65° 44' N° Long^{de} 66° 26' Wt., Burton's Isles lies in Latd. 60° 30' No. Longde. 66° 26' Wt. these Two Islands forms the Entrance of Hudson's Streights. From Burton's Isles to Cape Charles (or the Island off Cape Charles) lying in Lat. 52° 15' No. Longde. 55°: 00 Wt. the Coast extends to the So. Et. or So. 37° 23' Et., 208 Leagues: and from Cape Charles thro' the Streights of Belleisle to St.

John's River, lying in Latd. 50° 35' No. Longde. 61° 56' Wt. 92 Leagues; so that it appears the Coast of Labrador, or from the Entrance of Hudson's Streights to St. John's River, that empties itself nearly opposite to the West End of the Island of Anticosti, is 300 Leagues.

Article (18th)

What is the nature of the Soil and Climate? What are its natural or improved productions? Whether any, and, if any, what parts thereof are adapted to Inhabitancy ?

There is little or no Soil on the Coast of Labrador, and many Leagues a barren and mountainous Rock; the Climate is very Cold from the month of November to May, and very intense when there are Snow Drifts, or Snow Storms. There are no Natural Productions, except the several species of Pine, Spruce and Birch; some shrubbery, such as Currants and Rasberries. No kind of Improved productions, nor no part fit for Inhabitancy, without a Supply of every sort of Provisions.

p. 1087

ARTICLES OF HIS MAJESTY'S
INSTRUCTIONS.

REMARKS.

Article (19th)

What are the principal Rivers, Bays or Harbours, their Situation and Capacity? and what convenience do they Afford either for Navigation or Fishery?

There are several Rivers between Brador and the Bay of St. Louis none of them navigable; within Cape Charles, and the Small Islands near it, there are several places Ships may Anchor in safety. In St. Louis's Bay and Forteau Bay, Ships might Anchor Red Bay and Temple Bay are safe places, but Chateaux or Pitt's Harbour is the largest and best for ships to lye in. There are

salmon in all the Rivers, but in what Quantity is not certain, the greatest number that have been as yet caught, was at Cape Charles and Bay of St. Louis, where a Salmon Fishery is carried on; the other Rivers are very shoal and so much blocked up with loose Rocks, that Nets cant be set without disadvantage. A Cod Fishery might and has been carried on by the French at almost all the places along the Coast. In regard to Davis's Inlet, there is no Person on the Coast can give any account of it.

Article (20th)

What is the nature and extent of the different Fisheries carried on upon that Coast; whether of Whales, Seals, Sea-Cows, or any other Species?

There is a great plenty of Cod Fish to Bay of St. Louis, and likewise several Posts or places for setting of Nets for catching of Seals; from the River of St. John's to the Bay of St. Louis many of which are occupied. Whales pass thro the Streights of Belleisle to the Eastward in the Spring of the Year and several Vessels from New England are fitted and come every Year early in the Spring to catch Whale, and if they do not meet with Success in the Streights, they proceed to the Northward, or sometimes off the Western Islands, or go a Cod Fishing on the Banks to the Southward, as it will not answer the Owners of any Vessel to fit out for Whaling only. There are no Sea Cows on this Coast.

ARTICLES OF HIS MAJESTY'S
INSTRUCTIONS.

REMARKS.

Article (21th)

What establishments have been made for these Fisheries; at what places and under what Authority?

Stages are Built for the Cod Fishery at Cape Charles, Henley Harbour, Temple Bay and St. Modeste, but there are no Fish dried, and cured for a Foreign Market but at the two latter, and I know of no other Authority than Permission of Government. All the other Fish that are caught, are carried to Newfoundland and dried there.

Article (22d)

Whether any places are occupied or Possessed under exclusive Grants, or Leases from the Governor of Quebeck? or claimed or held under any Title derived from the Crown of France, while that Country was in her Possession? if so, by whom, under what Conditions, and for what Term? And if any Rents are reserved, what is the amount; to whom payable and whether any and what part thereof has been paid, and to whom and what remains due?

It cannot be learned there, that ever the Crown of France gave more than two exclusive Grants for any part of Labrador: One of these was in full right for ever the other was for Life only. The first was given to one Bisott a Geographer, who was employ'd surveying the Coast, and this Grant was presented him as a Compliment for his Assiduity and perseverance: it comprehended the whole coast from Mingan to Shecatica. His heir, a daughter was married to one LaFontaine (Secretary to the Governor of Quebeck) who farmed the Seal Posts. LaFontaine died much in Debt, so that for a considerable lapse his Descendants laid no Claim to the Property devolved to them. Neither before nor in the time of LaFontaine, where there any more than three Sealing Posts,

between the Limits of the Grant (vizt.) Great Mecatina, Notagamen and Shecatica, and Notagamen his Successors have sold. The Post of Bradore was the other Grant, which was in favor of a Person named Bruiac or Bruage for his Life only, and this Bruiac has been long Dead.

Article (23d)

What is the extent of each Post so held or claimed, as well along the Coast, as within the Land,

Except the Posts of Great Mecatina & Shecatica, there are none at present held or claimed by any Grant whatever, and the said Posts are now held as publick. At

p. 1089

ARTICLES OF HIS MAJESTY'S INSTRUCTIONS.

REMARKS.

Article (23rd)contd.

the number of Men and Vessels employ'd at each; and the quantity of Fish or Oil produced therefrom? and what is the peculiar Fishery carried on in each?

Mecatina they last Winter, (1772) caught 1,800 Seals, and at Shecatica 391, which might produce 146 H^{nds} of Oil, and employed 26 Men; there is no other than Seal Fishery carried on in that part of the Coast.

Article (24th)

What is the nature and disposition of the several Nations or Tribes of Savages Inhabiting this Country?

The Mountaineer Indians live in separate families by Hunting, and are more civilized than the Esquimaux; between whom their is a perpetual Enmity. The former are very fond of Strong Liquors, and will part with anything to obtain it. The Esquimaux are very Indolent, altho' a wandring People, and live chiefly on Raw Seal, Fish &c. and drink the Oil of them with Pleasure. They live in Tribes & appear to Civilize fast.

Article (25th)

What Traffick or Commerce is or may be established or carried on with those Savages? And if any such Traffick is established or carried on, at what places and under what Regulations?

The Mountaineer Indians, bring Furs of all sorts, and Traffick for it at Brador, and the other Sealing Posts to the Westward of it. The Ougbucktoo Tribe are them that live nearest to Cape Charles to which place, to the Camp Islands that lie near it, and Chateaux they bring Whale Bone, some skins and little Fur, which they exchange for Blankets or any of Wollen Clothing. They have Implements with which they kill Whale, but it does not appear they kill more than one or two in a Year; there is no Regulations in their Traffick, farther than the Merchant and them bargain in the best manner they can; and as they seem to be in want of Woollens, saws, Hatchets, and other utensils in all probability in a few Years they will become more industrious particularly when they find they cannot purchase the above, but by the exchange of Whalebone &c. The Nuninoo Tribe are next to the Northward and among them the Fratrum Unitas are Settled.

[25 Aug.,
1773.]**ROGER CURTIS TO GOVERNOR SHULDHAM.**Sandwich Schooner,
25th Aug., 1773.

ADMIRALTY 1/470.

Sir,

Pursuant to your directions to me dated the 14th July, 1773, I have been up the coast of Labrador as far as Kewedloke—an Indian settlement in the latitude of $58^{\circ} 10'$.

In my progression to the North, I observed that the land became more and more barren, and after you come to the 56th degree of latitude, the sea coast appears a barren rock, being almost totally deprived of that little verdure which is seen on the more southern parts of this immense country.

It is not to be doubted but that many excellent seal fisheries may be established upon this coast:—the cod do not visit these northern parts until late in the season. There are a few excellent salmon rivers, and at Nuckbawk which I apprehend from Indian information to be about the 59th degree of latitude, there are sea cows in the winter. The whales sometimes visit the coast in vast numbers in the fall of the year.

The Moravians are settled within some islands about the latitude $56^{\circ} 50'$ at a place the Indians called Nonyoke, and to which they have given the name of Unity Bay; they have a commodious house surrounded with palisades; they are much respected by the Indians, and have made a surprising progress in civilising, and rendering them good subjects, indeed I am bound in justice to declare that this settlement appears to be of infinite use to the fishery upon this coast as by softening the manners of the savages, the adventurers will run but little risk of future annoyances, and I think extremely deserving of the protection and the encouragement of government.

ROGER CURTIS.

MOLX. SHULDHAM, ESQ.,
Commander in Chief, etc., etc.

No. 282.

**MEMORIAL FROM CITIZENS OF QUEBEC TO LORD
DARTMOUTH.**

To the Right Honb^{le} the Earl of Dartmouth one of his Majesty's
principal Secretarys of State.¹

The Memorial of the Freeholders, Merchants Planters and
others his Majesty's antient and loyal Subjects now in the
District of Quebec in the Province of Quebec in North
America.

Humbly Sheweth.

That after the Capitulation of Canada and the definitive
Treaty of Peace by which this Province was ceded to Great
Britain his Majesty was graciously pleased by his royal
Proclamation of the 7th October 1763, to give express power &
direction to his Governors of the four several Provinces therein
mentioned, (whereof this Province is one) with the advice and
Consent of the Members of his Councils, to summon and call
general Assembly's, for making constituting and ordaining
Laws Statutes and Ordinances for the public peace, Welfare
and good Government thereof as near as might be agreeable to
the Laws of England And also was graciously pleased to
declare and promise, That in the mean time and untill such
Assemblies could be called all Persons inhabiting in or
resorting to the said Colonies should have the enjoyment and
benefit of the Laws of England.

That your Memorialists thus encouraged, having settled
themselves, purchased Lands, planted and improved them, and
engaged deeply in Commerce in this Province, and humbly
conceiving it at this Time seasonable & expedient to supplicate
his Majesty to accomplish his most gracious Promise, Have
prepared their most humble Petition to his Majesty (which they
take the liberty to transmitt herewith to Your Lordship)
praying that he would be graciously pleased to order his
Governor with the Advice and Consent of his Majesty's
Council to call a general Assembly of the People in such
manner and of such Constitution and form as his Majesty in his
royal Wisdom shall think proper to direct.

* * * *

Your Memorialists have also the Honour to represent to
Your Lordship, That the Trade Cultivation and Prosperity of
the Colony have been much interrupted by the sequestration of
the upper Indian trading Posts, Lake

Champlain and the Coast of Labradore from this Government, by which not only the natural resources of the Province have been greatly restrained but many of the Inhabitants as well old as new Subjects have thereby been deprived of their personal Property and even of their real Estates which the latter held and enjoyed for many Years before the Conquest and which the former purchased on the faith of the Capitulation and Treaty of Peace, And Your Memorialists will venture to assure Your Lordship That if the Province is not restored to its antient Limits and the parts which have been dismembered from it reunited to that Government to which nature points they should belong, and all be put under some salutary and well judged Regulations. The Morals of the Indians will be debauched, and the Fur-Trade as well as the Winter Seal Fishery for ever lost not only to this Province but to Great Britain, as neither can be carried on to advantage but by the Inhabitants of Canada.

Your Memorialists might add much more in support of the Subject matter of this Memorial as well as on many other Matters very interesting to the Province, but as your Memorialists will not incroach on your Lordships Time and Patience they conclude by humbly and ardently praying your Lordship to be pleased to lay their most humble Petition herewith transmitted before his Majesty and humbly intreating Your Lordships Intercession and good Offices in that behalf as well as in behalf of the other important Objects pointed out to your Lordship in this their Memorial, And reposing themselves entirely on your Lordships known honour, Understanding and Uprightness.

They as in Duty bound will ever Pray &c—

Quebec 31st Decem^r 1773.

A Committee named at a Meeting of his Majesty's antient Subjects residing in the District of Quebec.	Jenkin Williams John Welles John Lees John McCord Cha ^s Grant Malcolm ffraser Zach. macaulay

EXTRACT FROM MEMORIAL.

IN SUPPORT OF PETITION BY HIS MAJESTY'S SUBJECTS IN CANADA.
CONST. DOCS. [1759—1791], 2nd EDITION, p. 509, CAN. ARCH.

'MÉMOIRE POUR APPUYER LES DEMANDES DES TRÈS
SOÛMIS ET TRÈS FIDÉLES NOUVEAUX SUJETS DE
SA MAJESTÉ EN CANADA.

* * * *

'La colonie, telle qu'elle est fixée maintenant par la ligne de quarante cinq degrés, est trop resserrée dans ses limites. Cette ligne, qui la borne, passe à environ quinze lieües au dessus de Montréal: et cependant c'est de ce seul côté que les terres se trouvent fertiles, et que peut s'étendre avec plus d'avantage l'agriculture. Nous supplions que, comme sous le tems du gouvernement François, on laisse à nôtre colonie tous les païs d'enhaut connus sous les noms de Missilimakinac, du Détroit, et autres adjacents jusques au fleuve du Mississippi. La réunion de ces postes seroit d'autant plus nécessaire à nôtre païs que, n'y ayant point de justice établie, les voyageurs de mauvaise foi, auxquels nous fournissons des marchandises pour faire le commerce avec les sauvages, y restent impunément avec nos effets; ce qui ruine entièrement cette colonie, et fait de ces postes une retraite de brigands capables de soulever les nations sauvages.

Nous désirons aussi qu'il plût à sa majesté re-unir à cette colonie la côte de Labrador, (qui en étè aussi soustraite), telle qu'elle y étoit autre-fois. La pesche du loup marin (qui est le seule que se fait sur cette côte,) ne s'exerce que dans le fond de l'hyver, et ne dure souvent pas plus d'une quinzaine de jours. La nature de cette pesche, qui n'est connuë que des habitants de cette colonie; — — — son peu de durée; — — — et la rigueur de la saison, qui ne permet point aux navires de rester sur les cotés; — — — combinent à exclurre tous les pescheurs qui viennent de l'Angleterre.

* * * *

Fr. Simonnet, &c., &c.'

[*Translation of No. 283.*]MEMORIAL IN SUPPORT OF THE REQUESTS MADE BY HIS MAJESTY'S
MOST OBEDIENT AND MOST FAITHFUL SUBJECTS IN CANADA.

* * * *

'The province, as it is now bounded by a line passing through the fortyfifth degree of north latitude, is confined within too narrow limits. This line is only fifteen leagues distant from Montreal. And yet it is only on this side that the lands of the province are fertile, and that agriculture can be cultivated to much advantage. We desire therefore that, as under the French government our colony was permitted to extend over all the upper countries known under the names of Michilimakinac, Detroit, and other adjacent places, as far as the river Mississippi, so it may now be enlarged to the same extent. And this re-annexation of these inland posts to the province is the more necessary on account of the fur-trade which the people of this province carry on to them; because, in the present state of things, as there are no courts of justice whose jurisdiction extends to those distant places, those of the factors we sent to them with our goods to trade with the Indians for their furs who happen to prove dishonest continue in them out of the reach of their creditors, and live upon the profits of the goods entrusted to their care: which intirely ruins this colony, and turns these posts into harbours for rogues and vagabonds, whose wicked and violent conduct is often likely to give rise to wars with the Indians.

We desire also that his majesty would be graciously pleased to re annex to this province the coast of Labrador, which formerly belonged to it, and has been taken from it since the peace. The fishery for seals, which is the only fishery carried on upon this coast, is carried on only in the middle of winter, and sometimes does not last above a fortnight. The nature of this fishery, which none of his majesty's subjects but the inhabitants of this province understand; the short time of its continuance; and the extreme severity of the weather, which makes it impossible for ships to continue at that time upon the coasts; are circumstances which all conspire to exclude any fishermen from Old England from having any share in the conduct of it.

FR. SIMONNET, &c., &c.

SECOND PERIOD: FROM QUEBEC ACT, 1774, TO
NEWFOUNDLAND JUDICATURE ACT, 1809.

No. 284.

MEMORANDUM ON GOVERNMENT OF QUEBEC.¹

A MEMORANDUM of things necessary for establishing Laws &
Government in the Province of Quebec, either by Act of
Parliament, Order of the King in Council or by the
proposed Council at Quebec.²

First, To get rid of the Proclamation of 1763 with the
Commissions & Ordinances depending thereon and to restore
the old Law and Constitution.

¹ The following memoranda, suggestions, and draughts of bills relating to the Quebec Act, have been found among the papers of Lord Dartmouth, under whom, as Colonial Secretary, the Quebec Bill took shape, and by whom it was finally introduced in the House of Lords on May 2nd, 1774. Most of these are without date, address, or signature, to indicate when, for whom, or by whom they were prepared, nor are they arranged in chronological order. However, by internal evidence, by comparisons between them, and with other documents, and with the aid of a few notes which passed between the parties chiefly concerned in framing the measure, it has been possible to identify most of them and trace the normal order of their development. [Const. Docs. (1759-1791), 2nd edition, p. 533.]

² Canadian Archives, M 385, p. 326. This memorandum would appear to have been the outcome of one or more of the conferences of an inner circle of the Ministry, with special advisers such as Carleton, in dealing with American policy. The features suggested are not in accordance with any one of the Reports on the subject which had been made to the Government. Notwithstanding the numerous declarations, during the previous seven years, that the system of law and government in Quebec was on the point of being settled, the members of the Government chiefly responsible for the policy of the Quebec Act had not apparently given the matter very full consideration before the latter part of 1773, as may be gathered from the following statements. On Aug. 4th 1773 the Lord Chancellor sent the following note to Dartmouth, "The Chancellor's Compliments to L^d Dartmouth, takes the liberty to send him some Papers relative to Canada, which together with the Reports of the Kings Advocate, the Attorney Gen^l & the Sollicitor Gen^l will, he believes, enable his Lordship to form a plan of Government for that Province, fit to be laid before Parliament; & the Chancellor is happy in having received assurance from his Lordship that He means to undertake it." M 384, p.178. On Aug. 26th, Maseres writing to Dartmouth, says: "Mr. Maseres begs leave to acquaint his Lordship that on Tuesday se'ennight (which he apprehends to be since his Lordship left town,) he had the honour of waiting on Lord North by appointment at Bushey Park, to confer with him on the affairs of Quebec; and that Lord North seemed fully determined to do something towards the settlement of that Province

p. 1096

^{2^{dly}} To accommodate the Duties & Taxes paid at the time
of the Conquest to the change of Dominion.

^{3^{dly}} To constitute a Governor and Council at Quebec with
Power to make Laws and Ordinances under such restrictions as
shall be thought necessary.

4^{thly} To erect proper Courts of Judicature. The nearer such Courts are to the Old ones in Form, the more agreeable they will be to the Inhabitants and more likely to have their Effect.

5. To make an Alteration in the mode of trying Capital Offences by allowing the Party the Benefit of being tried by Juries according to the Law of England so as no' Judgement shall, after the Verdict given, be arrested upon any Objection of Informality.

6^{thly} To abolish the use of the Torture & the Punishment of breaking upon the Wheel.

7^{thly} To allow the Inhabitants the Privilege of the Common Law Writ of Habeas Corpus.

8^{thly} To provide, that all Incumbents be nominated by the Governor in Writing under his Hand and Seal, unless the Right of Patronage be in any private Person And that all Incumbents be irremovable except for Misdemeanor to be tried by the Governor and Council.

9th To give all Ecclesiastical Jurisdiction in regard to Marriages, the Probate of Wills, granting Letters of Administration and other Civil Rights, except only in the Case of Tythes to the Courts of Law, and all Questions concerning Tythes to be determined by the Governor & Council.

10th Every Protestant Parishioner to pay his Tythes to the King's Officer towards providing a Maintenance for the Protestant Clergy.

in the next session of parliament, and particularly with respect to the establishment of a revenue and a legislature. His Lordship was clearly of opinion that this ought to be by a legislative council, and not an assembly; and he liked very well the proposal (contained in Mr. Maseres's draught of an act of parliament for establishing such a council,) that they should not be invested with the power of taxation, but only that of legislation, and that the necessary taxes should be laid by the Parliament of Great Britain.

"Lord Mansfield has also very lately declared an intention of reading over all the papers relating to the province of Quebec, and using his endeavours towards procuring a Settlement of it. And, about two months ago, Lord Chancellor made a similar declaration. And the leisure of this season of retirement seems to be favourable to this good design of their Lordships to give this subject a thorough consideration. If therefore, Lord Dartmouth should bring on the determination of this business in the privy council in the course of this vacation, it seems likely that he would meet with a great concurrence and support from his Majesty's other servants and counsellors, and that the whole settlement of that province might be prepared and digested in the manner necessary for the consideration of parliament by the beginning of next Session." M 384, p. 194. [Const. Docs. (1759-1791), 2nd edition, p. 533.]

No. 285.

FIRST DRAUGHT OF QUEBEC BILL.¹

An act for granting for a limited time, therein ment^d Powers of
Legislation to the Governor & Council of His Majesty's
Province of Quebec for the time being—

Whereas His Majesty was graciously pleased, by a Royal Proclamation bearing Date at St. James's the 7th Day of Oct^r in the third year of His Majesty's Reign, to publish & declare, that certain Lands & Countries in America, therein mentioned & described, had been erected into a Province by the name of the Province of Quebec, & that the Gov^r thereof was expressly empowered & directed, by Commission under the Great Seal, that so soon as the State & Circumstances of the said Province would admit thereof, he should, with the Advice & Consent of His Majesty's Council for the said Province, summon & call a General Assembly within the said Province in such manner & form as is used & directed in those Colonies & Provinces in America, which are under His Majesty's immediate Government, & that power had been also given to the said Governor with the consent of the Council & of the Representatives of the People so to be summoned & elected as aforesaid, to make constitute & ordain Laws, Statutes & Ordinances, for the public peace Welfare & good Government of the said Province & of the People & Inhabitants thereof. And Whereas the State & Condition of the said Province of Quebec has not hitherto been, is not now, nor is likely for some time to be such as to admit of a Lower House of Assembly or House of Representatives being convened, conformable to His Majesty's gracious Intentions declared in His Commission under the Great Seal & promulgated in the said Proclamation, by means whereof His Majesty's Subjects in the said Province are & must be exposed to great Inconveniences, the Welfare & Improvement of it obstructed, & a heavy burthen brought upon this Kingdom. In order therefore that these Wants & Defects may be remedied, & the Good Order and Welfare of the said Province provided for. Be it enacted by the King's most excellent Majesty, by and- with the Advice and Consent of the Lords Spiritual & Temporal and Commons in this present Parliament assembled & by the

¹ Canadian Archives, Dartmouth Papers, M 383, p. 51. This draught is evidently the work of Sol. Gen. Wedderburn whose ideas, chiefly, it expresses, as may be gathered from comparing it with his Report and especially with the "Abstract of such of the Regulations proposed in Mr. Solicitor Gen^{ls} Report as it may be expedient to establish by Act of Parliament." See Can. Const'l Doc'ts, 2nd ed., vol. 1, p. 434. This draught however was completely changed, both in form and content, under the direction of Lord Dartmouth, who in turn was influenced by different forces, personal and political. [Const. Docs. *ibid.* p. 535.]

Authority of the same that from & after the Day of it shall and may be lawful for the Governor or Commander in Chief of the said Province of Quebec, for the time being, by and with the *Advice and* Consent of the Council of the said Province for the time being, or the Majority thereof to make constitute & ordain Laws, Statutes and Ordinances, for the public peace, Welfare & good Governm^t of the said Province, and of the people & Inhabitants thereof, in all cases whatsoever. Provided always & be it enacted that the said Council shall consist of not more than 21 nor less than 12 members, & that all Laws Statutes & Ordinances to be made under the Authority hereof, shall be so made & passed in ye s^d Council when not less than 13 of the said Members shall be present. Provided nevertheless, and it is hereby enacted & ordained, by the Authority aforesaid, that no Law, Statute or Ordinance so to be framed & enacted as aforesaid by the said Governor or Commander in Chief & Council as aforesaid, by which, the Life Limb or property of the Subject may be affected or any Duties or Taxes shall be imposed for the public use of the said Province, shall be of any force, validity or effect until approved by His Majesty, & such approbation signified by Order of His Majesty in Council. And be it further enacted by the Authority aforesaid, that Copies of all Laws, Statutes & Ordinances so to be framed & enacted by the said Governor Commander in Chief and Council as aforesaid shall, within three Months from the passing thereof (or sooner if opportunity offer) be transmitted duly authenticated under the Seal of the said Province by the said Governor or Command^r in Chief for the time being to the Commissioners for Trade & Plantations, together with Accounts duly attested of all public Monies levied & expended in virtue of any Law, Statute or Ordinance as aforesaid, in which said Account shall be specified the particular Service to which the said Monies have been issued & applied. And be it further enacted by the Authority aforesaid, that the said Laws, Statutes & Ordinances as also the Accounts abovementioned of all public Monies levied and expended within the said Province of Quebec, shall be laid by the said Commissioners for Trade and Plantations before both Houses of Parliament, as soon as may be after the same shall have been received by them from the said Province as aforesaid. And be it further enacted by the Authority aforesaid that this Act shall continue & be in force for the space of fourteen Years, and from thence to the End of the next Session of Parliament unless His Majesty, His Heirs & Successors shall think fit before the expiration of that Term to direct a Lower House of Assembly or House of Representatives to be convened within the said Province of Quebec in which case the Legislative powers hereby conferred upon the Governor or Commander in Chief & Council, for the time being, shall cease & determine & be of none effect, any thing herein contained to the contrary thereof notwithstanding.

Endorsed:—Dra^t of Bill—
Quebec

No. 286.**SECOND DRAUGHT OF THE QUEBEC BILL.¹**

An Act to remove the Doubts which have arisen relative to the
Laws and Government of the Province of Quebec since His
Majesty's Royal Proclamation of the Seventh day of
October 1763.

Whereas by the Conquest of Canada and the Cession thereof by the Definitive Treaty of Peace concluded at Paris on the Tenth day of February 1763, His Majesty became Intitled to the Sovereignty thereof, *as a Dominion belonging to the Crown of Great Britain, and might alter the Laws and Constitution of the said Province in such manner as He should think most agreeable to natural Justice and sound Policy.* And Whereas many other Countries and Territories, the greatest part whereof lay waste and uncultivated, were likewise ceded by the said Treaty to His Majesty:—And Whereas His said

¹ Canadian Archives, Dartmouth Papers, M 385, p. 300. This is the first draught of the Quebec Bill in which the wording of the Quebec Act as it finally passed begins to appear. That it was drawn by Wedderburn under instructions from Dartmouth, will appear from the following letter from Wedderburn to Dartmouth, dated March 2nd, 1774. "My Dear Lord, I have attempted to express the alterations you were pleased to tell me were desired. to be made in the Bill for Quebeck, But I am very doubtful whether I have succeeded in the Attempt. For I must confess my objections to the alterations and to some parts of the Bill, are much strengthened by the Consideration I have lately given to the subject.

"It seems very strange to have a Criminal Code in which for Treason the Law of England is followed; for other capital offences the Law of France (which avoids all definition) is to define the Crime, and the Law of England to prescribe the punishment and the mode of Trial; In offences not capital, the Crime, its Trial and punishment are all referred to the Law of France which lets in all their arbitrary punishments of cutting out Tongues, slitting noses &^{cc}. I have had much conversation with Mr. Hey who says that the Idea of reviving any part of the French Criminal Law besides the difficulty of uniting It to the Law of England would be as little agreeable to the Canadians as it would to the English Inhabitants. That the former are in general very sensible of the advantages they derive from our Criminal Justice and make very good jurymen. He thinks there would be no objection to adopting the whole criminal Law of England because none has hitherto been discovered, but It would be still better to subject It to the revision of the Council to be established who might by degrees reject all the parts that are unfit for the constitution of Canada. I have with His assistance prepared a clause upon this Idea which is submitted to your Lordship." M 384, p. 251. (The remaining paragraphs of the letter are given as notes on the clauses of the draught to which they refer.)

If we compare this draught of the Quebec Bill with the various Reports of the Board of Trade, the Atty. Gen. of Quebec and the Sol., Atty., and the Advt. Gen. of England, we find that, as declared by Knox, the Under Secretary of State for the Colonies, and a stout advocate of the Ministerial policy towards America, "thus it fell out, that after all the pains which had been taken to procure the best and ablest advice, the Ministers were in a great measure left to act upon their own judgment." See Knox's "The Justice and Policy of the late Act" &c., 1774, p. 9. This will partly account for the great changes in the measure between this draught and the form in which it was passed. [Const. Docs., p. 536.]

day of October, in the third year of His Reign, Reciting that great part of the said acquisitions had been cast into four distinct and separate Governments, called Quebec, West Florida, East Florida, and Grenada. And that other parts had been annexed to the Governments of Newfoundland, Nova Scotia and Georgia, And further Reciting that it would greatly contribute to the speedy settling of the said new Governments that His Majesty's loving Subjects should be Informed of His Paternal Care for the Security of the Liberty and Property of those, who were and should become Inhabitants thereof, His Majesty thought fit to Publish and Declare, that He had in the Letters Patent under His Majesty's Great Seal of Great Britain, by which the said Governments were constituted, given express Power and direction to his said Governors of the said Colonies respectively that so soon as the state and circumstance of the said Colonies would admit thereof, They should, with the advice and consent of the Members of His Majesty's Council, Summon and call General Assemblies within the said Governments respectively in such manner and form as was used and directed in those Colonies and Provinces in America, which were under His Majesty's immediate Government; with Power to make constitute and ordain Laws, Statutes and Ordinances for the Public peace, Welfare and good Government of His Majesty's said Colonies and of the People and Inhabitants thereof; as near as might be, agreeable to the Laws of England and under such regulations and restrictions, as were used in other Colonies, and that in the mean time and until such Assemblies could be called as aforesaid, all Persons Inhabiting in or resorting to His Majesty's said Colonies, might confide in his Royal Protection for enjoying the benefit of the Laws of His Majesty's Realm of England. And that for such Purpose, His Majesty had given power under His Great Seal, to the Governors of his said Colonies respectively, to Create and Constitute (with the advice of His Majesty's said Councils respectively) Courts of Judicature and Publick Justice, within His Majesty's said Colonies, for the Hearing and determining all Causes, as well Criminal as Civil, according to Law and Equity; and, as near as might be agreeable to the Laws of England; with Liberty to all Persons, who might think themselves aggrieved by the Sentence of such Courts, in all Civil Cases, to appeal under the usual Limitations and restrictions to His Majesty in His Privy Council.

And Whereas such commissions were accordingly passed under the Great Seal of Great Britain to the respective Governors of the said Provinces and amongst the rest to the Governor of Quebec, requiring among other things, that each member of the Assemblies so to be called, should take the Oaths commonly called the Oaths of Allegiance Supremacy and Abjuration; and to make and subscribe the Declaration against Transubstantiation, mention'd in an Act of Parliament made in the Twenty fifth Year of the Reign of King Charles the Second Intituled "An Act, for preventing Dangers which

may happen by Popish Recusants."

And whereas by an Ordinance made and Published by the Governor and Council of Quebec, bearing date the seventeenth day of September in the

p. 1101

Year of Our Lord One thousand seven Hundred and sixty four, several Courts of Criminal and Civil Jurisdiction were created, with Power to proceed according to the Laws of England, and agreably to Equity, having regard nevertheless to the Laws of England as far as the Circumstances and then present situation of things would admit.

And whereas several Commissions were, in pursuance thereof given and granted under the Great Seal of the said Province of Quebec to Chief Justices and other Judges and Justices, to hold the said Courts and exercise authority by virtue of the same.

And whereas great Doubts have arisen whether the whole Law of Canada was subverted and the Law of England introduced by the said Proclamation to take place as the Constitution of that Country till an Assembly should be called And also whether the Legislative Ordinances issued by the Governor and Council under the Kings Authority since the Proclamation were valid or void and by reason of such Doubts great confusion and uncertainty path arisen and distracted the Minds of the People of the said Province.

And Whereas the Plan of Civil Government proposed by such Construction of the Proclamation and which bath been attempted to be carried into Execution in manner above mentioned is inapplicable to the Condition and Circumstances of the Province of Quebec which did contain at the Conquest thereof above One Hundred Thousand Inhabitants professing the Roman Catholick Religion and enjoying an established form of Constitution and a System of Civil and Criminal Law by which their Persons and Property had been for ages protected governed and ordered.

May it therefore please your most excellent Majesty, That it may be Enacted; And it is hereby Enacted by His Most Excellent Majesty, by and with the advice and Consent of the Lords Spiritual and Temporal and Commons in Parliament assembled, and by the Authority of the Same, ^{x. a} ¹ That the said Proclamation so far as the same relates to the Civil Government & Administration of Justice of and in the said Province of Quebec and the Commissions have been granted to the Governors of the said Province of Quebec for the time being, and *the said Ordinance* ³ ² made by the said

¹ These marks have no reference connected with them either in the margin or at the foot of the draught; but they evidently refer to an additional clause or clauses to be introduced by

which the limits of the Province would be greatly extended. The proposal for an extension of the limits, which was largely adopted in the third draught of the bill, is given in the paper which follows this draught.

² This figure, which is in the original, seems to have no special significance, as the changes here introduced are but slight; it probably refers to some remark on the ordinance.

³ Wedderburn, in his letter to Dartmouth, cited in note 1, p. 536, comments on this as follows:— "Mr. Hey mentioned to me two objections to the former part of the Bill which I think are material. The Proclamation, Commissions &^{cc} are annulled and by the next Clause It is declared that 'His Majesty's subjects in Canada shall enjoy their Laws and Customs as beneficially as if the Proclamation had not been made and as is consistent with their Allegiance and Subjection to the Crown and Parlia-

p. 1102

Governor and Council of Quebec *bearing date the Seventeenth day of September in the year of our Lord one Thousand, seven Hundred and sixty four; and all other Ordinances* relative to the Civil Government and Administration of Justice in the said Province and all Commissions to Judges and other officers, in pursuance thereof, be, and the same are hereby Revoked, Annulled and made void from and after the day of next.

And be it further Enacted by the Authority aforesaid, That His Majesty's Subjects of and in the said Province of Quebec, as the same is described in, and by the said Proclamation and Commissions And also of all the Territories part of the Province of Canada at the time of the Conquest thereof which His Majesty, His Heirs or Successors may think proper to annex to the said Government of Quebec may have hold and enjoy their Property, Laws, Customs, and Usages, in as large, ample and beneficial manner, as if the said Proclamation, Commissions Ordinances and other Acts & Instruments had not been made, and as may consist with their allegiance to His Majesty and subjection to the Crown and Parliament of Great Britain³ (*see* previous page).

vide¹ Class A.

And Whereas the Abolition of the use of the torture and of those severe punishments to which the Inhabitants of Canada were formerly exposed and the Introduction of a more mild and certain Law in criminal cases would be highly beneficial to them and they are truly sensible of the same, Be it therefore Enacted by the Authority aforesaid that no Crimes or Offences shall be High Treason or Misprision of Treason in the Province of Quebec and the dependencys thereof, But such as are high Treason or Misprision of High Treason by the Laws and Statutes now in force in Great Britain; and that the said Laws and Statutes shall be used and observed in Cases of High Treason and Misprision of High Treason in all respects whatsoever. And be it further Enacted That in regard to all other offences for which by the Laws in force in Canada and on the said 13th September 1759 the Offender was liable to suffer the pains of Death the party accused shall be tried and acquitted or condemned and punished, according to the Laws of England. Provided always that where by the Laws of England the benefit of Clergy is allowed upon any Conviction the Offender in such case shall only be fined and Imprisoned or bound to his good Behaviour, And Provided also That no

Judgement shall after the Verdict given, be arrested upon any objection of Informality in the Indictment or Discontinuance in the Record.

ment of Great Britain.' These words he thinks will much perplex the Canadian. Is his Religion lawful or tolerated, or unlawful. Are the rights of Succession, of Marriage, of Contract, that have accrued since 1764 and been enjoyed according to the Law of England rescinded, for the act is in some measure declaratory as to the sense of the Proclamation.

What is to be the condition of the English Canadian? Is he or is he not included in the description of His Majesty's Subjects of and in Canada? He thinks it would be much better to express clearly what rights shall be restored to the Canadian and that He would be better satisfied with a less extensive and a more certain Provision for him." M 384, p. 253. Can. Arch.

¹ This refers to the new clause drawn by Wedderburn and Hey, as indicated in note 1, p. 536, which was substituted for this section in the third draught, and which provided for the complete retention of the criminal law of England. See third draught.

p. 1103

And whereas it may be necessary to ordain many Regulations for the future Welfare and good Government of the Province of Quebec, the occasions of which cannot now be foreseen nor without much Delay and Inconvenience provided for, without entrusting that Authority for a certain time and under proper Restrictions to Persons Resident there.

And Whereas it is at present inexpedient to call an Assembly Be it therefore Enacted by the Authority aforesaid That it shall and may be lawful for His Majesty His Heirs and Successors by *his or their Letters Patent¹ under the Great Seal of Great Britain* to constitute and appoint a Council for the affairs of the Province of Quebeck and its dependency to consist of such Persons resident there not exceeding () nor less than () as His Majesty His Heirs and Successors shall be pleased to appoint and *of such other Persons resident there as upon the death removal, or absence, of any of the Members thereof, shall be nominated by His Heirs or Successors under His or their Sign Manual to supply the vacancy*; Which Council so appointed and nominated or the major part thereof shall have full Power and Authority to make Ordinances for the Peace, Welfare and good Government of the said Province in all cases whatsoever, with the consent of His Majesty's Governor or Commander in Chief or in his Absence of the Lieutenant Governor for the time being.

Provided always That every Ordinance so to be made shall within () months be transmitted by the Governor Commander in Chief or in his absence by the Lieutenant Governor and laid before His Majesty for his royal approbation and if His Majesty shall think fit to disallow thereof The same shall cease and be void from the Time that His Majesty's Order in Council thereupon shall be promulgated at Quebec And Provided also That no Ordinance touching Religion or by which any Punishment may be Inflicted greater than fine or imprisonment for Three Months, or by which any Duty, Tax, or Rate may be Levied shall be of any force or effect until the same shall have received His Majesty's Approbation And Provided also That no Ordinance shall be passed at any

Meeting of the Council except between the day of and
the day of unless upon some urgent occasion, in which
Case every Member thereof resident at Quebeck or within
Miles thereof shall be personally summoned by the Governor
or in His absence by the Lieutenant Governor to attend the
same.

¹ Concerning this section, Wedderburn, in his letter to Dartmouth, cited in note 1, to Second Draught of the Quebec Bill, says:—"The empowering His Majesty to create the Legislative Council by Letters Patent instead of appointing It directly by the Act of Parliament seems to me an immaterial Alteration, supposing that it is necessary (as I conceive it is) to describe in the Act the Powers and Authority of that Council. In either way the Nomination of the Members must be vested in the King and no greater Power in effect is acquired by the first mode than by the latter tho' in appearance the Power of erecting a Legislative Council seems to import more than the power of naming the Members and will from the appearance excite more opposition.

"The latter Clause I take to be unnecessary as I do not see how the Act restrains the King from appointing Judges and erecting Courts of Justice, I have therefore drawn It as a saving and not as an enacting Clause." M 384, p. 252. Can. Arch.

And be it further Enacted &c^a That nothing herein contained shall extend or be construed to extend to prevent or hinder His Majesty His Heirs and Successors by his or their Letters Patent under the Great Seal of Great Britain from erecting, constituting and appointing such Courts of Criminal, Civil and Ecclesiastical Jurisdiction within and for the said Province of Quebeck and its dependencys and appointing from time to time the Judges and Officers thereof as His Majesty His Heirs and Successors shall think necessary and proper for the circumstances of the said Province.

C

PROPOSED EXTENSION OF PROVINCIAL LIMITS.¹

The Limits of the Government of Quebec as declared in the Proclamation of 1763 are as follows, Vizt. “bounded on the Labrador Coast by the River St. John, & from thence by a line drawn from the head of that River thro' the Lake of St. John to the South end of the Lake Nipissing; from whence the said Line crossing the River St. Lawrence and the Lake Champlain in 45 Degrees of No Latitude, passes along the High Lands which divide the Rivers that empty themselves into the said River St. Lawrence from those which fall into the Sea; and also along the North Coast of the Bay des Chaleurs, and the Coast of the Gulph of St. Lawrence to Cape Rosiers, and from thence crossing the Mouth of the River St. Lawrence by the West end of the Island of Anticosti terminates at the aforesaid River of St. John.”

The Kings Servants were induced to confine the Government of Quebec within the above Limits, from an apprehension that there were no Settlements of Canadian Subjects, or lawful possessions beyond those Limits, and from a hope of being able to carry into execution a plan that was then under Consideration for putting the whole of the Interior Country to the Westward of our Colonies under one general control & Regulation by Act of Parliament². It was also conceived that there was no claim of Possession on

¹ Canadian Archives, Dartmouth Papers, M 385, p. 346. The boundary line as here proposed, indicates the limits within which it was desired to confine the English colonies. That it was largely adopted, despite the opposition of some supporters of the Ministry, will be seen from the third draught of the bill which follows. No clue is given as to the author of this proposal but, as maybe observed from a letter of Dartmouth to Cramahé of Dec. 1st, 1773, (See Can. Const'l Doc's., 2nd ed., vol. 1, p. 485) this extension of the limits of the Province, like the Establishment of the Roman Catholic religion, was represented as a direct concession to the Canadian noblesse and clergy in response to their petition.

² For the actual statement of the reasons for this policy, see the papers relative to the establishment of civil government in Quebec. [Const. Docs., p. 542.]

the Coast of Labrador to the East of the River St. John, and therefore from an apprehension that a valuable Cod Fishery might be carried on upon that Coast, it was annexed to the Government of Newfoundland.

The plan for the regulation of the Interior Country proved abortive & in consequence thereof an immense tract of very valuable Land within which there are many Possessions and actual Colonies existing under the Faith of the Treaty of Paris has become the Theatre of disorder & Confusion leading to causes that must affect the public Tranquility and weaken the Authority of this Kingdom, whilst those Colonies which exist under the Faith of the Treaty remain either without the protection or the control of Civil Government.¹

It has also been discovered that there are a variety of claims to possessions upon the Coast of Labrador between the River St. John and the Straits of Belle Isle, and that by far the greatest part of that Coast is impracticable for a Cod Fishery and can only be used for that species of sedentary Seal Fishery which is in its nature inconsistent with the Regulations of the Fishery at Newfoundland.

In order therefore to obviate the dangers and disadvantages arising from the present defective state of the Interior Country. To give force and effect to the Power and Authority of the Crown within it. To give scope to the many Commercial advantages which may be derived from it. To extend the benefits of Civil Government to the Settlements of Canadian Subjects that have been formed in the different parts of it,² and to give Stability & advantage to the Sedentary Fisheries on the North side of the Gulph of St. Lawrence, it is proposed that the

Limits and Boundaries of the Government of Quebec shou'd be altered and enlarg'd in the following manner, that is to say,

That the said Government should be bounded on the side of His Majesty's other Colonies by a Line drawn from the Head of Bay Chaleurs (including the North side of the said Bay and all the Lands between that and the River

¹ This is a matter on which a great variety of evidence is recorded and many different opinions expressed. The chief of these references are scattered throughout the letters and reports contained in the State Papers of the Q series, the Home Office Papers, and the Haldimand Papers, some of which are duplicates. [Const. Docs., p. 542.]

² In addition to the statements made in such letters as that of Dartmouth to Cramahé of Dec. 1st, 1773, (see p. 485) we find the statement of Wm. Knox the Colonial Under Secretary, after the Quebec Act was passed, that "the whole of the derelict country, is, by the first clause of the Act, put under the jurisdiction of the Government of Quebec, with the avowed purpose of excluding all further settlement therein, and for the establishment of uniform regulations for the Indian trade." "The Justice and Policy of the late Act" &c. p. 20. See also notes to Lord Hillsborough's objections to the Quebec Bill, &c., *post*. [Ibid. p. 543.]

St. Lawrence) along the High Lands which divide the Rivers which empty themselves into the River St. Lawrence from those which fall into the Atlantick Ocean until the said line reaches lake Champlain in 45 Degrees of No Latitude.

The said line to be continued from thence in a direct course to the first spring or Head of Hudson's River, and from thence in a direct course to the entrance of Lake Ontario from the said River St. Lawrence. That the said Line should pass from thence across the said Lake to the Mouth or entrance of the Strait of Niagara and should pass along the East side of the said Strait until it falls into the Northern Boundary of the Province of Pennsylvania, and from thence it should follow the course of the said Boundary line as well on the North as the West, to the Point where it intersects the River Ohio, and so following the course of the said River, from the said Point to its confluence with the River Mississippi. That the said Government should comprehend all the Coast of Labrador as far East as Esquimaux River & be bounded on the North by a Line drawn due West from the mouth of the said River to the southern Limits of the Territory granted to the Hudsons Bay Company and to follow the course of the said Limits as far as the River Mississippi, the said River to be the Boundary on the West from the point where it is intersected by the Southern Limits of the Territory granted to the Hudson's Bay Company as aforesaid, as low down as the Mouth of the River Ohio.

Endorsed:—Paper relative to the extension of the Limits of Quebec.

No. 288.

C

THIRD DRAUGHT OF THE QUEBEC BILL.¹

An Act for making more effectual Provision for the Government of the Province of Quebec in North America; and for removing Doubts which have arisen relative to the Laws and Constitution of the said Province since His Majesty's Royal Proclamation of the 7th of October 1763.

Whereas His Majesty by His Royal Proclamation bearing date the 7th day of October in the Third year of His Reign, thought fit to declare the

¹ Canadian Archives, Dartmouth Papers, M 385, p. 311. The alterations and additions by which the second draught was developed into the third are given in part of the notes on the second draught. Other explanations are furnished in the memorandum which follows this draught of the bill.

Provisions which had been made in respect to certain Countries, Territories and Islands in America Ceded to His

Majesty by the Definitive Treaty of Peace concluded at Paris on the 10th day of Febr'y 1763 And Whereas by the Arrangements made by the said Royal Proclamation a very large part of the Territory of Canada, within which there were several Colonies and Settlements of the Subjects of France who claimed to remain therein under the faith of the said Treaty, was left without any Provision being made for the administration of Civil Government therein, and other parts of the said Country where sedentary Fisheries had been established and carried on by the subjects of France, Inhabitants of the said Province of Canada under Grants and Concessions from the Govern^r thereof, were annexed to the Gov^t of Newfoundland, and thereby subjected to regulations inconsistent with the nature of such Fisheries. May it therefore please your most excellent Majesty that it may be enacted; and it is hereby enacted by The Kings most excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons in this present Parliament assembled, and by the authority of the same That all the said Territories, Islands and Countries, heretofore part of the Province of Canada in North America, extending Southward to the banks of the River Ohio, Westward to the banks of the Mississippi and northward to the Southern Boundary of the Territory granted to the Merchants Adventurers of England trading to Hudsons Bay, and which said Territories, Islands and Countries are within the limits of some other British Colony as allowed & confirmed by the Crown, or which have since the 10th Feby 1763, been made part of the Government of Newfoundland, be, and they are hereby annexed to, and part and parcel of the Province of Quebec as created and established by the said Royal Proclamation of the 7th of October 1763, for and during His Majesty's Pleasure; And Whereas the Provisions made by the said Proclamation in respect to the Civil Government of the said Province of Quebec and the Powers & Authorities given to the Governor & other Civil Officers of the said Province by the Grants and Commissions issued in consequence thereof, have been found upon experience to be inadequate to the State & Circumstances of the said Province the Inhabitants whereof amounting at the Conquest to above One hundred Thousand Persons professing the Religion of the Church of Rome and enjoying an established form of Constitution & system of Laws by which their Persons and Property had been protected, governed and ordered for a long series of years from the first Establishment of the said Province of Canada, Be it therefore further enacted by the Authority aforesaid, That the said Proclamation so far as the same relates to the Civil Government & Administration of, Justice of & in the said Province of Quebec, & the Commission under the Authority whereof the Government of the said Province is at present administered & all & every the Ordinance & Ordinances made by the Governor & Council of Quebec for the time being relative to the Civil Government & Administration of Justice in the said Province and all Commissions to Judges & other Officers thereof, be, and the

same are hereby revoked, annulled & made void from and after the Day of next.

p. 1108

Subject to the King's Supremacy, as declared & established by an Act made in the first year of the Reign of Queen Elizabeth, over all the Dominions & Countries which then did or thereafter should belong to the Imperial Crown of this Realm

And be it further enacted by the authority aforesaid that His Majesty's subjects professing the Religion of the Church of Rome of & in the said Province of Quebec as the same is described in & by the said Proclamation and Commissions, and also of all the Territories part of the Province of Canada at the time of the Conquest thereof, which are hereby annexed during His Majesty's Pleasure to the said Government of Quebec may have, hold & enjoy the free Exercise of the Religion of the Church of Rome, *so far* as the same is not inconsistent with the Kings Supremacy as established by act of Parliament and that Clergy & other Religious of the said Church may hold receive & enjoy their accustomed Dues & Rights *with respect to such Persons only as shall possess the said Religion*. Provided nevertheless that no thing herein contained shall extend or be construed to extend to the Disabling His Majesty's His Heirs or Successors from the making such Provision for the Maintenance & Support of a Protestant Clergy within the said Province as He or they shall from time to time think necessary & expedient.

And be it further enacted by the Authority aforesaid that all His Majesty's Canadian Subjects within the Province of Quebec, & the Territories thereunto belonging, may also hold, and enjoy their Property & Possessions together with all Customs & Usages relative thereto, and all other their Civil Rights in as large ample & beneficial manner as if the said Proclamation, Commissions, Ordinances & other Acts & Instruments had not been made, and as may consist with their Allegiance to His Majesty & Subjection to the Crown and Parliament of Great Britain.

For which purpose be it further enacted by the Authority aforesaid that, in all matters of controversy relative to the Property & Civil Rights of any of His Majesty's Subjects whether Canadian or English, Resort shall be had to the Laws of Canada and not the Laws of England for the Decision of the same, and all Causes that shall hereafter be instituted in any of the Courts of Justice to be appointed within & for the said Province by His Majesty, His Heirs & Successors, shall, with respect to such Property & Rights be determined by th a Judges of the same agreeably to the said Laws & Customs of Canada & the several Ordinances that shall from time to time be passed in the said Province by the Gov^r Lieut-Gov^r or Commander in Chief by & with the advice & consent of the

Legislative Council of the same to be appointed in manner herein before mentioned & by no other Laws Customs or Usages whatsoever.

¹ This clause which is written in the margin of this draught of the bill appears in the body of the fourth draught.

Provided always that it shall & may be lawful to & for every Person in the said Province, whether Canadian or English, that is Owner of any Goods or Credits in the same, and that has a right to alienate the said Lands, Goods or Credits in his Life time by Deed of Sale, Gift or otherwise to devise or bequeath the same at his or her death by his or her last Will & Testament to such Persons, & in such manner as he or she shall think fit, any Law, Usage or Custom; heretofore; or now prevailing in the Province, to the contrary hereof in any wise notwithstanding. And provided also that nothing in this Act shall extend or be construed to extend to any Lands that have been granted by His Majesty or shall hereafter be granted by His Majesty His Heirs & Successors to be holden in free & common soccage¹ & that it shall & may be lawful to & for any of His Majesty's Subjects at his, her or their respective Ages of 25 years to change the Tenure of Estate held of His Majesty, His Heirs or Successors into free & common soccage by any deed executed in the presence of two Witnesses & presented to the Chief Justice of the Province who shall summon a Jury to assess the sum to be paid to His Majesty in lieu of the Profits of the Seigniory & upon Payment thereof shall direct the Deed to be enrolled & the same being enrolled the Land shall from thenceforth be held as Lands in free & common soccage are held by the Laws of England.

And Whereas the Certainty & Lenity of the Criminal Law of England & the Benefits and Advantages resulting from the use of it have been sensibly felt by the Inhabitants from an Experience of more than nine years, during which it has been uniformly administered. Be it therefore enacted by the Authority aforesaid. That the same shall continue to be administered, and shall be observed as Law in the Province of Quebec and its Dependencies as well in the description & quality of the Offence, as in the method of Prosecution & Trial, and the Punishments & Forfeitures thereby inflicted to the exclusion of every other rule of Criminal Law, or mode of Proceeding thereon which did, or might prevail in the said Province before the year of Our Lord 1764. Anything in this Act contrary thereof in any respect notwithstanding Subject nevertheless to such Alterations & Amendments as the Gov^r Lieut Gov^r or Commander in chief of the s^d Province, by & with the advice & Consent of the Legislative Council of the said Province hereafter to be appointed, shall from time to time cause to be made therein in manner herein after directed.

And Whereas it may be necessary to ordain many Regulations for the future Welfare and good Government of the Province of Quebec, the occasions of which cannot now be foreseen, nor without much Delay & Inconvenience be provided for without intrusting that Authority for a certain time & under proper Restrictions to Persons resident there

And whereas it is at present inexpedient to call an Assembly; Be it therefore enacted by the Authority aforesaid that it shall & may be lawful

¹ The remainder of this clause is left out in the 4th draught, in accordance with the criticisms of Hillsborough and Carleton, as accepted by Dartmouth. See p. 573 & note 1, p. 554. Const. Docs.

p. 1110

for His Majesty, His Heirs and Successors by Warrant under His or Their Signet, or Sign Manual and with the Advice of the Privy Council to constitute and appoint a Council for the Affairs of the Province of Quebec & its Dependencies to consist of such Persons resident there, not exceeding (23) nor less than (17) as His Majesty, His Heirs and Successors shall be pleased to appoint, and upon the Death, Removal, or Absence of any of the Members of the said Council, in like manner to constitute & appoint such and so many other Person, or Persons as shall be necessary to supply the Vacancy, or Vacancies; which Council so appointed & nominated, or the major part thereof shall have full Power and Authority to make Ordinances for the Peace, Welfare and good Government of the said Province, with the Consent of His Majesty's Governor, or in his absence of the Lieutenant Governor or Commander in Chief for the time being.

Provided always That every Ordinance so to be made shall within Months be transmitted by the Governor or in his Absence by the Lieutenant Governor or Commander in Chief for the time being, and laid before His Majesty for his Royal Approbation; And if His Majesty shall think fit to disallow thereof, the same shall cease & be void from the time that His Majesty's Order in Council thereupon shall be promulgated at Quebec And provided also, That no Ordinance touching Religion, or by which any punishment may be inflicted greater than fine, or imprisonment for three Months shall be of any force or effect until the same shall have received His Majesty's Approbation: And provided also that no Ordinance shall be passed at any Meeting of the Council except between the day of and the day of unless upon some urgent occasion, in which Case, every Member thereof resident at Quebec, or within Miles thereof shall be personally summoned by the Governor, or in his absence by the Lieutenant Governor, or Commander in Chief for the time being to attend the same.

And be it further enacted &c^a That nothing herein contained shall extend or be construed to extend to prevent or hinder His Majesty His Heirs or Successors by His or their Letters Patent under the Great Seal of Great Britain from erecting, constituting & appointing such Courts of Criminal, Civil and Ecclesiastical Jurisdiction within and for the said Province and its Dependencies, and appointing from time to time the Judges & Officers thereof as His Majesty, His Heirs and Successors shall think necessary & proper for the Circumstances of the

said Province.

No. 289.

NOTES ON THIRD DRAUGHT OF QUEBEC BILL.¹

The first preamble, and enacting clause of the present Bill are entirely new, and are introduced in order to annex to Quebec during The King's Pleasure the Territories therein described, which are now, for the greatest part, without either the protection or comtrol of any Government whatever and for the rest subjected to the incompetent and improper Jurisdiction of Newfoundland. This possibly might have in general been done by the sole authority of the Crown, but it is conceived that it would have been liable to doubts that cannot exist in the present mode which is conceived to be more effectual, & of more proper notoriety.

The whole preamble of the former Bill, reciting and condemning the Proclamation and other consequential Acts of Government is omitted, and in lieu of it a very short preamble introduced stating the general inadequacy of those Regulations to the present State and Circumstances of the Colony.

The first enacting Clause of the present Bill does not materially differ from the first enacting Clause of the other, the only difference is that it does not revoke any other Commission to the Governor but the one now existing.

The Second and Third Clauses of the present Bill are proposed by M^r Hey in the place of the Second Clause in the old Bill that restores to the Canadians generally their Property, *Laws*, Customs and Usages, including as it is conceived under the word *Laws* not only all Civil Rights, but also all Ecclesiastical Laws and Authorities incident thereto, which general Provision is restrained by the present Act to the free Exercise of the Romish Religion, as far as is consistent with the King's Supremacy, exempting Protestants from Payment of Tythes and making the Laws and Customs of Canada in Civil Cases the Rule for Judgement in the Courts, under certain Limitations & Exceptions in respect to disposition of Property by will, and a mode of changing the Tenure of Lands held by Seigniority into Common Soccage.

The fourth Clause of the present Bill introduces the whole Criminal Laws of England which by the Corresponding Clause of the old Bill was only in part introduced & under Limitations.

The rest of the Clauses in both Bills respecting the Legislative Council are very much the same; there is no material difference except by the new Bill their appointment is to be by sign Manual in like manner as Councillors in other Colonies are appointed—by the former Bill they were to be

appointed under the Great Seal of Great Britain, which besides deviating from the rule in other Cases is liable to other obvious Objections.

Endorsed:—Notes of Alterations in the Quebec Bill.

¹ Canadian Archives, Dartmouth Papers, M 385, p. 337. These notes are evidently by Sol. Gen. Wedderburn, as may be gathered from his criticisms on the second draught of the bill addressed to Lord Dartmouth.

No. 290.

**THE CLAUSE CONCERNING RELIGION IN THE
THIRD DRAUGHT.¹**

The Proviso in favour of the Protestant Subjects of Quebec, if it is intended to operate only as a saving to the clause which gives to the Canadians the free exercise of their Religion appears to me to be unnecessary—from a Church merely tolerated, as the Romish Church is by this Act, There can be little occasion to resort to any special protection, immunity or Privilege in behalf of any body, for existing only by Permission of the state, it can claim nothing, enforce nothing, exercise no controul or Authority over its own members but by consent, & it should seem useless to reserve to others by express Provision of Law, what cannot be taken from them but by their own choice & approbation.

In this light therefore the clause seems to be unnecessary.

But if it is intended to operate as a saving to the clause immediately preceding which gives the Canadians the Enjoyment of their ancient civil Rights customs and Usages, I apprehend it will be found an Exception as large as the Rule; and leave it still in doubt, whether in a matter of civil Right the Canadian or English Law where they differ together with the form & mode of Proceeding, shall have the Preference. A Case which came before me in Judgement, & which is very likely to happen again will possibly put the objection I mean to state in a clear light before your Lordship.

By the custom of Paris which your Lordship, I presume, means to restore, the Mason Carpenter & other Artificers employed in building a House for another, Have, by an implied Contract between them & the owner for whom they build, of which they need only make a minute in a Notary's Office a mortgage upon the house which no incumbrance whatever prior or subsequent can Affect, but they may follow their demand thro an hundred mesne assignments into the hands of the present Possessor, & insist upon its being sold to pay them upon failure of the Person with whom they first contracted to build. should those Canadian Artificers bring an action in their usual form (wholly different from our own) against an Englishman who had purchased such a house for a Valuable consideration, might not He, & would not He be authorized to say, I will not answer in this mode of Process nor be bound by this Law?

¹ Canadian Archives, Dartmouth Papers, M 385, p. 340. It appears very probable, from the reference in the second paragraph, as well as from the whole tone

and purpose of the proposals, that these criticisms were made by Lord Mansfield, and this is confirmed by his letter to Lord Dartmouth; see note 1 to Lord Hillsborough's Objections to the Quebec Bill, &c., *post*.

p. 1113

Every *Privilege Protection & advantage of what Nature soever or kind* that I am intitled to by the Laws & Constitution of the Realm of England, are expressly reserved to me, amongst which I reckon the Tryal by a Jury as an Eminent one. Let these men bring their Ejectment upon their mortgage Title & let the trespass be enquired into by a Jury according to the good old forms & usages of the Realm of England, & not by Laws & in a mode of Proceeding unknown & not used there & which derogate from the Rights of a british subject.

What answer could' be given to a demand of this kind which would not militate either with the Law or the Exception & who would say which was intitled to the Preference?

And with submission to your, Lordship I do not see how it is possible to alter the Provisional clause to any advantage or find any form of words to reconcile it in substance with the other.

Whatever is to operate as an Exception to a positive general Law ought I apprehend to be clearly & expressly pointed out. it is your Lordships Intention (I presume) to revive the whole canadian Law in matters of a civil Nature, to make it the general law of the country to govern british as well as canadian Property by its Rules, if your Lordship intends any reservation with respect either to the Laws or the Administration of them, in favour of the british subjects, it must, I apprehend be clearly ascertained where & in what instances it should take Place. a General reservation like that contained in the clause will either operate nothing, or go to the destruction of the whole. for if the Legislature does not draw the Line I know not well how any Judge can do it.

The Legislative Council cannot do it. They cannot restrain or define privileges reserved by the Act of Parlt. nor as I should conceive even explain or determine them.

With great submission therefore to your Lordships better Judgment I conceive that clause must be wholly struck out or more particularly explained.

Will your Lordship permit me to add a word or two upon the subject of Religion as it is affected by this Act of Parliam^t.

That your Lordship intends only a bare Toleration for the R. C. Religion without any maintenance or support for the Clergy appears obvious from the manner of penning the statute.

The Clause which mentions & allows the Exercise of Religion is totally silent with respect to the Clergy or any right belonging to them & the cautious use of the words *civil Rights* in the clause that restores them to their old Laws & customs, seems to distinguish & exclude Ecclesiastical ones.

But will your Lordship (upon reflection) think it sufficient barely to tolerate a large & powerful Body of Men the R. C. Clergy in Canada, in the exercise of their Religion, without any other means of support than what is to arise from the

Voluntary contribution of their Parishioners, or does your Lordship apprehend any mischief or great inconvenience would arise from acknowledging their right to a decent & moderate maintenance under the sanction of a british Act of Parliament.

p. 1114

To say nothing of the discontent it would occasion will your Lordship think it quite consistent with the terms of the treaty—under which the property of the Clergy as well as Laity seems to have been reserved to the owners—& the Right to a decent support by Tithes seems to be as much the Property of the Clergy, as the seigneurial lands of the seigneurs, or any lay Property whatsoever of a Layman.

Power & Authority neither belongs to them by treaty nor is it consistent with a Protest^t Govt. to suffer them to be retained—but subsistence seems to be their right, & under this Idea, I have taken the Liberty to make an additional clause, reserving the Tithe of Protestants for a Protestant clergy when his Majesty shall think proper to intitle any to demand it.¹

For the manner in which the whole of what your Lordship gave me when I had the Honour to be with you on Saturday will then stand I refer your Lordship to the Paper itself

¹ This is evidently the clause which has been incorporated into the third draught of the bill and which makes provision for the collection of tithes by the Roman Catholic clergy, and reserves the right to provide for a protestant clergy as well. On April 28th the following note was sent from Lord Mansfield to Lord Dartmouth:—“My Lord I rec^d the enclosed Dr^t last night at 10 o'clock— I have read it over. * * * * * I would suggest two alterations upon the Plan as it stands—One, which I have just put into the Dr^t in a piece of Paper relative to the Supremacy— I mean it to avoid, what L^d North & y^f Lo^d seemed very desirous of avoiding the necessity of the Canadian Gentlemen taking the Oath of Supremacy. The other relates to the Right of Tithes &^{ce} depending upon the Man's professing the Popish Religion. Any man who denies professing it will be excused. They should pay to the Priest till the time is ripe for their paying to the Minister of some other Religion. * * * * * Your Lo^{ps} most ob^t hu. Serv^t., Mansfield.” M 384, p. 268. To this Lord Dartmouth made the following reply

“L^d Mansfield

1 May 1774

“My Lord

“I have laid before his Majesty's Confidential Servants the alteration your Lord^{ps} has been so good to suggest in the Quebec Bill, & they were unanimously of opinion to adopt the first relative to Supremacy. The other they thought unnecessary, because it is his Majesty's Intention to make immediate provision for a Protestant Clergy, from the tithes of the Estates of Protestants so that none can elude the payment by denying the Profession of the Popish Religion. Their Lord^{ps} thought fit to alter the stile of the clause w^{ch} enacts the free exercise of the Romish Religion to make it declaratory—this, we conceive, will obviate any doubts that might have been created by it, & prevent any ill consequences, it might be thought likely to have in other parts of his Majesty's Dominions. With these alteration I hope the Bill will have your Lord^{ps} approbation. I have the Honour to be &^{ce} D.”

M 385, p. 278. The suggestion with reference to the oath of supremacy which Lord Mansfield had enclosed, is preserved in the Dartmouth Papers, endorsed “Clause (A),” M 385, p. 329. This was introduced as it stands into the Quebec Bill while going through Parliament, and provides a special oath for the Roman Catholics, instead of that of the 1st of Queen Elizabeth.

First enacting Clause.

**LORD HILLSBOROUGH'S OBJECTIONS TO THE
QUEBEC BILL IN ITS PRESENT FORM.¹**Third & fourth,
enacting Clauses.

The extention of the boundaries to the North so as to comprehend the Labrador coast his Lordship approves, but has insuperable objections to the extention to the Mississippi and Ohio. His reasons as far as I can recollect them are these. If an extention of the boundaries for the sake of Jurisdiction only over the Inhabitants was intended. There is no occasion for doing it by Act of Parliament as it is in the power of the Crown at present to give such jurisdiction if thought fit. And it is better to do it by the authority of the Crown *only*, because the jurisdiction so given may be limited & restrained in such manner as to answer all the purposes of Government and to avoid the inconveniencies with which a general extention or annexation will be attended.

2. Proviso of 5th
Enacting Clause.

But from the Terms in which the extention is made and what is said in the subsequent Clauses his Lordship supposes that it is intended to make Parliament *declare* that it is right and proper to *settle* The Territories annexed, for these Lands & Inhabitants are put in exactly the same state as those within the present Limits. An inducement is held out to the Roman Catholick subjects of Quebec and to all other Roman Catholics to remove into these annexed Countries by granting them the French Laws & Customs of Canada and the Free exercise of their Religion.

If this be the case every reason & argument his Lordship had to offer against the Ohio Grant urges him with Tenfold strength to oppose this proceeding.

His Lordship objects to the granting of any Lands in the Province in free & common Soccage & refers to a Report of the Board of Trade for his

3. Proviso to the 5th
Clause.

¹ Canadian Archives, Dartmouth Papers, M. 385, p. 356. As the accompanying letter will show, these objections of Hillsborough and Carleton to parts of the third draught of the Quebec Bill were stated in their present form by Wm. Knox, the Under Secretary of State for the Colonies. "My Lord In consequence of my having sent Lord Hillsborough a Copy of the Quebec Bill by Your Lordship's Orders, I had a message from his Lordship this morning and lest I should not be able to find your Lordship before dinner I have put down upon the inclosed paper what I collect to be his sentiments respecting the Bill. I have also added what Gen^l Carleton beggd I would mention from him to your Lordship respecting one Clause. I have ventured to point out such Amendments as would in my opinion render the Bill unexceptionable to both, and without injuring any of your Lordships purposes. I must however acquaint your Lordship that Lord Hillsborough said he had not sufficiently considered all other parts of the Bill having had it only yesterday afternoon, but that if he found anything else to wish alter'd, he would communicate his ideas thro' me to your Lordship as he desired to do those I have stated. Your Lordships very faithful and obedient Servant. Will Knox 30th April 1774." M 385, p. 270.

3^d Proviso to the 5th
Clause.

reasons for continuing the French mode of Seigneuries as the most fit for the purposes of Government & as corresponding with the whole scope & purpose of the Bill.

These reasons are still more forceable for leaving out intirely the provision for converting Lands held in Seigneurie into Free & common Soccage. His Lordship thinks the Crown ought not to change those Tenures even when the Lands come into the hands of English subjects, much less relinquish all right of continuing them, and vesting a power in the French as well as English possessors to compel the Crown to change them at their pleasure.

General Carleton makes the same objections to these Proviso's as Lord Hillsborough does, and adds with respect to the latter That the French Seigneurs do not now desire to change their Tenures. That they should be sensible of the favour and ask it before it is granted. That even when that comes to be the case The Crown can change the Tenure whenever it is thought fit to do so without this clause and can make a proper discrimination in granting the favour to those only who by their conduct may merit it. That the Tenure by Seigneurie gives the Crown great power over the Seigneur, which power will be done away by changing the Tenure into free & common Soccage. That the Evil disposed Seigneurs will therefore be the first to avail themselves of the permission to change their Tenures in order to get rid of that power and be able to do mischief with less restraint.

The Amendments which will be the consequence of adopting what appears to be the Ideas of Lord Hillsborough are these, To leave out in the Preamble from the words *Territory of Canada* to the words *where sedentary Fisheries*, And in the first enacting clause after the words *Canada in North America* insert *as described in the said Proclamation and extending northward to the Southern boundary &c.* leaving out the intermediate words *Southward to the Banks of the River Ohio, Westward to the banks of the Mississippi.*

These amendments will obviate the objections to the First Third & Fourth Enacting Clauses.

By leaving out the 3rd Proviso to the 5th enacting Clause General Carleton's objection will be wholly obviated and the most material part of Lord Hillsborough's will be also removed, for although they both *wish* the Lands may be hereafter granted in Seigneuries as heretofore yet they do not stand out to limit the Crown from granting them otherways if thought fit.¹

¹ As indicated in the reply of Lord Dartmouth which follows, the amendment indicated in this paragraph was made in the fourth draught of the bill, but the amendment with reference to the boundaries was not accepted.

[1 May,
1774.]**DARTMOUTH'S REPLY TO HILLSBOROUGH.¹**L^d Hillsborough.

1 May 1774.

My DEAR LORD, M^r KNOX has stated to me your Lordp^s two objections to the Canada Bill, w^{ch} I propose to lay before the House of Lords tomorrow & I have communicated them to the Cabinet, who are unanimously of opinion that the extension of the Province to the Ohio & Mississipi, is an essential & very useful part of the Bill; it provides for the establishment of civil government over many numerous settlements of french subjects, but does by no means imply an intention of further settling the Lands included within this extension, & if it is not wished that British Subjects should settle that country nothing can more effectually tend to discourage such attempts, w^{ch} in the present state of that Country, y^r Lordp^s knows very well, it is impossible to prevent. Y^r Objection to The clause allowing a change of Tenure their Lordp^s thought proper to come into & it is accordingly struck out of the Bill.

I am, my dear Lord,

Y^r &c &c.

No. 293.

**THE QUEBEC BILL AS RETURNED FROM THE
COMMONS.²**

A Bill intituled An Act for making more effectual Provision for the Government of *Quebec*, in *North America*.

N.B.—The Words printed within Crochets [], in [Old English] Letter, denote what was left out by the Commons, and those printed with a Parenthesis in (Italick), what have been inserted by them.

Whereas His Majesty, by His Royal Proclamation, bearing Date the Seventh Day of *October*, in the Third Year of His Reign, thought fit to

¹ Canadian Archives, Dartmouth Papers, M. 385, p. 276.

² Canadian Archives, Dartmouth Papers, M 385, p. 283. On June 13th the Quebec Bill was returned from the Commons with the following note:—"My Lord. I have Lord North's orders to transmit to Your Lordship the inclosed papers being the Quebec Act compleat as it passed the House of Commons this day, and have the Honour to be with the highest respect My Lord Your

certain Countries, Territories, and Islands in *America*, ceded to His Majesty by the definitive Treaty of Peace concluded at *Paris*, on the Tenth Day of *February*, One thousand seven hundred and sixty-three:

And whereas, by the Arrangements made by the said Royal Proclamation, a very large [Part of the Territory of Canada], (extent of Country), within which there were several Colonies and Settlements of the Subjects of *France*, who claimed to remain therein under the Faith of the said Treaty, was left, without any Provision being made for the Administration of Civil Government therein, and [other] (certain) Parts of the [Said Country] (Territory of Canada), where sedentary Fisheries had been established and carried on by the Subjects of *France*, Inhabitants of the said Province of *Canada*, under Grants and Concessions from the Government thereof, were annexed to the Government of *Newfoundland*, and thereby subjected to Regulations inconsistent with the nature of such Fisheries:

May it therefore please Your most Excellent Majesty,

That it may be enacted; and be it enacted by the King's most Excellent Majesty; by and with the Advice and Consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the Authority of the same. That all the [said] Territories, Islands, and Countries, [heretofore Part of the Province of *Canada*], in *North America*, [extending Southward to the Banks of] (belonging to the Crown of *Great Britain*, bounded on the South by a Line from the Bay of *Chaleurs*, along the High Lands which divide the Rivers that empty themselves into the River *Saint Lawrence*, from those which fall into the Sea, to a Point in Forty-five Degrees of Northern Latitude, on the Eastern Bank of the River *Connecticut*; Keeping the same Latitude directly West, through the Lake *Champlain*, until, in the same Latitude, it meets the River *Saint Lawrence*; from thence up the Eastern Bank of the said River, to the Lake Ontario; thence through the lake

Lordships Most Faithful and most obedient humble Servant John Robinson.” 13th June 1774. M 385, p. 282. As the note at the head of this document indicates, by reference to the two sets of brackets, it expresses at once the fourth draught of the bill, as it was introduced to the House of Lords on May 2nd., and such amendments and additions to it as were made while it was passing through the Commons and were accepted by Lord North, the Prime Minister. In addition to the alterations already noticed in connection with the criticisms on the third draught of the bill, and the introduction of a clause in the latter part of the bill relating to taxes or duties, a few other slight changes will be observed, as between the third and fourth draughts. Several of the changes made after the bill reached the Commons were undertaken by the Government itself, notably the new form of oath drawn up by Lord Mansfield and accepted by the Government. In the Dartmouth Papers two other clauses are given, marked (b) and (c), which were incorporated into the bill during its sojourn in the Commons. That marked (b) is the last clause in the bill, and relates to the regulation of trade. That marked (c) is the clause in the fifth paragraph of the bill safeguarding any right, title, or possession acquired under any grants made prior to this act. The additions and amendments introduced into the bill while in the Commons, as well as the numerous criticisms and amendments rejected by the Government, can best be followed in Cavendish's Debates on the Bill, which is indispensable to a proper understanding of the policy of the measure.

Ontario, and the River commonly called *Niagara*; and thence along by the Eastern and South Eastern Bank of Lake *Erie*, following the said Bank, until the same shall be intersected by the Northern Boundary, granted by the Charter of the Province of *Pensylvania*, in case the same shall be so intersected; and from thence along the said Northern and Western Boundaries of the said Province, until the said Western Boundary strike the *Ohio*: But in case the said Bank of the said Lake shall not be found to be so intersected, then following the said Bank, until it shall arrive at that Point of the said Bank which shall be nearest to the North Western Angle of the said Province of *Pensylvania*; and thence by a right Line to the said North Western Angle of the said Province; and thence along the Western Boundary of the said Province, until it strike) the River *Ohio*, (and along the Bank of the said River) Westward, to the Banks of *Mississippi*, and Northward to the Southern Boundary of the Territory granted to the Merchants Adventurers of *England* trading to *Hudson's Bay*; and [which said] (also all such) Territories, Islands, and Countries, [are not within the Limits of some other *British* Colony, as allowed and confirmed by the Crown or] which have, since the Tenth of *February*, One thousand seven hundred and sixty-three, been made Part of the Government of *Newfoundland*, be, and they are hereby, during His Majesty's Pleasure, annexed to, and made Part and Parcel of, the Province of *Quebec*, as created and established by the said Royal Proclamation of the Seventh of *October*, One thousand seven hundred and sixty-three.

(Provided always, and be it enacted, That nothing herein contained relative to the Boundary of the Province of *Quebec*, shall in any wise affect the Boundaries of any other Colonies.)

(Provided always, and be it enacted, That nothing in this Act contained shall extend, or be construed to extend, to make void, or to vary or alter, any Right, Title, or Possession, derived under any Grant, Conveyance, or otherwise howsoever, of or to any Lands within the said Province, or the Provinces thereto adjoining, but that the same shall remain and be in Force, and have Effect, as if this Act had never been made.)

And whereas the Provisions made by the said Proclamation, in respect to the Civil Government of the said Province of *Quebec*, and the Powers and Authorities given to the Governor and other Civil Officers of the said Province; by the Grants and Commissions issued in consequence thereof, have been found, upon Experience, to be inapplicable to the State and Circumstances of the said Province, the Inhabitants whereof [amounting] (amounted) at the Conquest, to above [One hundred] (sixty-five) thousand Persons, professing the Religion of the Church of *Rome*, and enjoying an established Form of Constitution, and System of Laws, by which their Persons and Property had been protected, governed, and ordered, for a long Series of Years, from the first

Establishment of the said Province of *Canada*; be it therefore further enacted by the Authority aforesaid, That the said Proclamation, so far as the same relates to the said Province of *Quebec*, and the Commission under the Authority whereof the Government of the said Province is at present administered, and all and every the Ordinance and Ordinances made by the

p. 1120

Governor and Council of *Quebec* for the Time being, relative to the Civil Government and Administration of Justice in the said Province, and all Commissions to Judges and other Officers thereof, be, and the same are hereby revoked, annulled, and made void, from and after the First Day of *May*, One thousand seven hundred and seventy five.

And for the more perfect security and Ease of the Minds of the Inhabitants of the said Province, it is hereby declared, That His Majesty's Subjects professing the Religion of the Church of *Rome*, of, and in the said Province of *Quebec*, [as the same is described in and by the said Proclamation and Commissions, and also of all the Territories, Part of the Province of *Canada*, at the time of the Conquest thereof, which are hereby annexed, during His Majesty's Pleasure, to the said Government of *Quebec*], may have, hold, and enjoy, the free Exercise of the Religion of the Church of *Rome*, subject to the Kings Supremacy, declared and established by an Act made in the First Year of the Reign of Queen *Elizabeth*, over all the Dominions and Countries which then did, or thereafter should, belong to the Imperial Crown of this Realm; and that the Clergy of the said Church may hold, receive, and enjoy their accustomed Dues and Rights, with respect to such Persons only as shall profess the said Religion.

Provided nevertheless, That [nothing herein contained shall extend, or be construed to extend, to the disabling] (it shall be lawful for) His Majesty, His Heirs or Successors, [from making] (to make) such Provision (out of the rest of the said accustomed Dues and Rights,) for the Encouragement of the Protestant Religion, and for the Maintenance and Support of a Protestant Clergy within the said Province, as he or they shall, from Time to Time, think necessary and expedient.

(Provided always, and be it enacted, That no Person professing the Religion of the Church of *Rome*, and residing in the said Province, shall be obliged to take the Oath required by the said Statute, passed in the First Year of the Reign of Queen *Elizabeth*, or any other Oaths substituted by any other Act in the Place thereof, but that every such Person, who by the said Statute is required to take the Oath therein mentioned, shall be obliged, and is hereby required to take and subscribe the following Oath before the Governor or such other Person, or in such Court of Record as His Majesty shall appoint, who are hereby authorised to administer the same; *videlicet*,

“I A. B. do sincerely promise and swear, That I will be faithful, and bear true Allegiance to His Majesty King *George*,

and Him will defend to the utmost of my Power, against all Traiterous Conspiracies and Attempts whatsoever, which shall be made against His Person, Crown, and Dignity; and I will do my utmost Endeavour to disclose and make known to His Majesty, His Heirs, and Successors, all Treasons, and Traiterous Conspiracies and Attempts, which I shall know to be against Him, or any of Them; and all this I do swear, without Equivocation, mental Evasion, or secret Reservation; and renouncing all Pardons and Dispensations from any Power or Persons whomsoever to the Contrary.

So help me God.”

p. 1121

And every such Person who shall neglect or refuse to take the said Oath before mentioned, shall incur and be liable to the same Penalties, Forfeitures, Disabilities, and Incapacities, as he would have incurred and been liable to, for neglecting or refusing to take the Oath required by the said statute, passed in the First Year of the Reign of Queen *Elizabeth*.)

And be it further enacted by the Authority aforesaid, That all His Majesty's *Canadian* Subjects within the Province of *Quebec*, the Religious Orders and Communities only excepted, may also hold and enjoy their Property and Possessions, together with all Customs and Usages, relative thereto, and all other Civil Rights, in as large, ample and beneficial Manner, as if the said Proclamation, Commissions, Ordinances, and other Acts and Instruments, had not been made, and as may consist with their Allegiance to His Majesty, and Subjection to the Crown and Parliament of *Great Britain*; and that in all Matters of Controversy relative to Property and Civil Rights, Resort shall be had to the Laws of *Canada*, (as the Rule) for the Decision of the same; and all Causes that shall hereafter be instituted in any of the Courts of Justice, to be appointed within and, for the said Province by His Majesty, His Heirs and Successors, shall, with respect to such Property and Rights, be determined [by the Judges of the same], agreeably to the said Laws and Customs of *Canada*, [and the several] (until they shall be varied or altered by any) Ordinances that shall, from Time to Time, be passed in the said Province by the Governor, Lieutenant Governor, or Commander in Chief for the time being, by and with the advice and Consent of the Legislative Council of the same, to be appointed in Manner hereinafter mentioned.

(Provided always, That nothing in this Act contained shall extend, or be construed to extend, to any Lands that have been granted by His Majesty, or shall hereafter be granted by His Majesty, His Heirs and Successors, to be holden in free and common Soccage.)

Provided [always] (also) That it shall and may be lawful to and for every Person that is Owner of any Lands, Goods, or Credits in the said Province, and that has a Right to alienate the said Lands, Goods, or Credits, in his or her Lifetime, by Deed of Sale, Gift or otherwise, to devise or bequeath the same, at

his or her Death, or by his or her Last Will and Testament; any Law, Usage, or Custom heretofore or now prevailing in the Province, to the Contrary hereof in any-wise notwithstanding.

[Provided also, That nothing in this Act contained shall extend, or be construed to extend, to any Lands that have been granted by His Majesty, or shall hereafter be granted by his Majesty, his heirs and Successors, to be holden in free and common Soccage:] (Such Will being executed either according to the Laws of *Canada*, or according to the Forms prescribed by the Laws of *England*.)

And whereas the Certain and Lenity of the Criminal Law of England, and the Benefits and Advantages resulting from the Use of it, have been sensibly felt by the Inhabitants from an Experience of more than Nine

Years, during which it has been uniformly administered; be it therefore further enacted by the Authority aforesaid, That the same shall continue to be administered, and shall be observed as Law, in the Province of Quebec, as well in the Description and Quality of the Offence, as in the Method of Prosecution and Trial, and the Punishments and Forfeitures thereby inflicted, to the Exclusion of every other Rule of Criminal Law, or Mode of Proceeding thereon, which did or might prevail in the said Province before the Year of our Lord One thousand seven hundred and sixty-four; any Thing in this Act to the Contrary thereof in any Respect notwithstanding; subject nevertheless to such Alterations and Amendments, as the Governor, Lieutenant Governor, or Commander in Chief for the Time being, by and with the advice and Consent of the Legislative Council of the said Province, hereafter to be appointed, shall, from Time to Time, cause to be made therein, in Manner herein-after directed.

And whereas it may be necessary to ordain many Regulations, for the future Welfare and good Government of the Province of *Quebec*, the Occasions of which cannot now be foreseen, nor without much Delay and Inconvenience be provided for, without intrusting that Authority for a certain Time, and under proper Restrictions, to Persons resident there:

And whereas it is at present inexpedient to call an Assembly; be it therefore enacted by the Authority aforesaid, That it shall and may be lawful for His Majesty, His Heirs and Successors, by Warrant under His or Their Signet, or Sign Manual, and with the Advice of the Privy Council, to constitute and appoint a Council for the Affairs of the Province of *Quebec*, to consist of such Persons resident there, not exceeding Twenty-three, nor less than Seventeen, as His Majesty, His Heirs and Successors, shall be pleased to appoint; and, upon the Death, Removal, or Absence of any of the Members of the said Council, in like Manner, to constitute and appoint such and so many other Person or Persons as shall be necessary to supply the Vacancy or Vacancies; which Council, so appointed and nominated or the major Part thereof, shall have [full] Power and Authority to make Ordinances for the Peace, Welfare, and good Government of the said Province, with the Consent of His Majesty's Governor, or, in his Absence, of the Lieutenant Governor, or Commander in Chief for the Time being.

Provided always, That nothing in this Act contained shall extend to authorise or impower the said Legislative Council to lay any Taxes or Duties within the said Province, (such Rates and Taxes only excepted, as the Inhabitants of any Town or District within the said Province, may be authorised by the said Council to assess, levy, and apply, within the said Town or District, for the Purpose of making Roads, erecting and repairing publick Buildings, or for any other Purpose

respecting the local Convenience and Oeconomy of such Town or District.)

Provided also, and be it enacted by the Authority aforesaid, That every Ordinance so to be made shall, within Six Months, be transmitted by the Governor, or, in his Absence, by the Lieutenant Governor or Commander in

p. 1123

Chief for the Time being, and laid before His Majesty, for His Royal Approbation; and if His Majesty shall think fit to disallow thereof, the same shall cease and be void from the Time that His Majesty's Order in Council thereupon shall be promulgated at *Quebec*.—

Provided also, That no Ordinance touching Religion, or by which any Punishment may be inflicted greater than Fine or Imprisonment for Three Months, shall be of any Force or Effect, until the same shall have received His Majesty's approbation.

Provided also, That no Ordinance shall be passed, at any Meeting of the Council, (where less than a Majority of the whole Council is present, or at any Time), except between the First Day of *January*, and the First Day of *May*, unless upon some urgent Occasion; in which Case, every Member thereof, resident at *Quebec*, or within Fifty Miles thereof, shall be personally summoned by the Governor, or, in his Absence, by the Lieutenant Governor or Commander in Chief for the Time being, to attend the same.

And be it further enacted by the Authority aforesaid, That nothing herein contained shall extend, or be construed to extend, to prevent or hinder His Majesty, His Heirs and Successors, by His or their Letters Patent, under the Great Seal of *Great Britain*, from erecting, constituting, and appointing, such Courts of Criminal, Civil, and Ecclesiastical Jurisdiction, within and for the said Province of *Quebec*, and appointing, from Time to Time, the Judges and Officers thereof, as His Majesty, His Heirs and Successors, shall think necessary and proper, for the circumstances of the said Province.

(Provided always, and it is hereby enacted, That nothing in this Act contained shall extend, or be construed to extend, to repeal or make void, within the said Province of *Quebec*, any Act or Acts of the Parliament of *Great Britain* heretofore made, for prohibiting, restraining, or regulating the Trade, or Commerce of His Majesty's Colonies and Plantations in *America*; but that all and every the said Acts, and also all Acts of Parliament heretofore made, concerning or respecting the said Colonies and Plantations, shall be, and are hereby declared to be, in Force, within the said Province of *Quebec*, and every Part thereof.)

Finis.

Endorsed:—A Bill,

(with emendations;)
Intituled

An Act for making more effectual Provision for the
Government of the Province of *Quebec*, in *North America*.

1774.]

No. 294.

DEBATE ON THE QUEBEC BILL, 1774.

EXTRACTS FROM CAVENDISH'S DEBATES OF THE HOUSE OF COMMONS
ON THE BILL, SO FAR AS RELATES TO THE BOUNDARIES.(*).

Thursday, May 26, 1774.

On the order of the day, for the second reading of the Bill “for making more effectual provision for the Government of the Province of Quebec, in North America,”⁽¹⁾.

LORD NORTH.⁽²⁾

* * * *

The first thing objected to by the honourable gentleman⁽³⁾ is, the very great extent of territory given to the province. Why, he asks, is it so extensive? There are added, undoubtedly, to it two countries which were not in

(*) Published by J. Wright, Editor of the Parliamentary History, Etc., London, 1839.

¹ The bill was brought into the House of Lords by the Earl of Dartmouth, on the 2nd of May. It passed without opposition, and without any witnesses having been called to support the allegations upon which it was founded, on the 17th of the same month. On the 18th of June, it was returned to the House of Lords, with the amendments introduced by the House of Commons; and then the Earl of Chatham, though extremely ill at the time, came down to oppose it, stating, in a short speech, his conviction, that “it would involve this country in a thousand difficulties; that it was a most cruel, oppressive, and odious measure, tearing up justice and every good principle by the roots; that the whole of it appeared to him to be destructive of that liberty, which ought to be the groundwork of every constitution; and that it would shake the affections and confidence of his Majesty’s subjects in England and Ireland, and finally lose him the hearts of all the Americans.” The bill was passed by a majority of nineteen; the contents being twenty-six, the non-contents seven. The minority consisted of the Duke of Gloucester, the Earls of Chatham, Coventry, Effingham and Spencer, and the Lords Sandys and King.

On the 22nd of June, the Lord Mayor, attended by several aldermen, the recorder, and upwards of one hundred and fifty of the common council, went up with an address and petition to the King, supplicating his Majesty not to give his assent to the bill. On their arrival at St. James’s, the Lord Chamberlain acquainted them, by order of the King, that “as the petition related to a bill agreed on by the two Houses of Parliament, of which his Majesty could not take notice until it was presented for his royal assent, they were not to expect an answer.” The King, who was then on the point of going down to Westminster to prorogue Parliament, immediately proceeded to the House of Lords, and gave his assent to the Bill; observing, that “it was founded on the clearest principles of justice and humanity, and would, he doubted not, have the best effect, in quieting the minds and promoting the happiness of his Canadian subjects.”—Extract from Editor’s Preface; Cavendish, *op. cit.*, pp. iii-iv.

p. 1125

the original limits of Canada, as settled in the proclamation of

1763; one, the Labrador coast, the other, the country westward of the Ohio and the Mississippi, and a few scattered posts to the West. Sir, the addition of the Labrador coast has been made in consequence of information received from those best acquainted with Canada, best acquainted with the fishery upon that coast, who deem it absolutely necessary for the preservation of that fishery, that the Labrador coast should no longer be considered as part of the government of Newfoundland, but be annexed to that country. With respect to the other additions, three questions very fairly occur. It is well known that settlers are in the habit of going to the interior parts from time to time. Now, however undesirable, it is open to Parliament to consider, whether it is fit that there should be no government in that country, or, on the contrary, separate and distinct governments; or whether the scattered posts should be annexed to Canada. The House of Lords have thought proper to annex them to Canada; but when we consider that there must be some government, and that it is the desire of all those who trade from Canada to those countries, that there should be some government, my opinion is, that if gentlemen will weigh the inconveniences of separate governments, they will think the least inconvenient method is to annex those spots, though few in population great in extent of territory, rather than to leave them without government at all, or make them separate ones. Sir, the annexation likewise is the result of the desire of the Canadians, and of those who trade to those settlements, who think they cannot trade with safety as long as they remain separate.

Tuesday, May 31.

Mr. BAKER presented a petition to the House from Thomas Penn, esq., on behalf of himself and of John Penn, esq., true and absolute proprietaries of the province of Pennsylvania, and the three lower counties of Newcastle, Kent, and Sussex, in Delawar, in America, setting forth:—

“That his late Majesty, King Charles the Second, by letters patent under the great seal, bearing date the 4th day of March, in the 33rd year of his reign, was graciously pleased to grant unto William Penn, esq., (late father of the petitioner Thomas Penn, and grandfather of the petitioner John Penn), in fee, the said province of Pennsylvania, the extent and bounds whereof were expressed in the said letters patent; and taking notice of the bill; for making more effectual Provision for the Government of the Province of Quebec, in North America; and alleging that, from the best observations which have been made, and the most correct maps which have been laid down of those parts, and from other evidence, it appears that the river Ohio intersects a very large tract of the north-western, western, and south-western parts of the said province, as granted by the said letters patent, the limits or boundaries whereof in that part have not, as yet, been allowed and confirmed by the Crown; and that, in order to have the limits and boundaries of the said province ascertained, the petitioners did, on the 27th day of

March, 1773, present a petition to his

p. 1126

Majesty in Council, praying that his Majesty would be graciously pleased to appoint such disinterested persons in those parts, as his Majesty should think proper to join with such persons as should be named by the petitioners, to mark out and ascertain the northern, western, and south-western boundaries of the said province; which petition has been referred, by his Majesty, to the consideration of the lords commissioners for trade and plantations, and is now under consideration of that board; and that the petitioners conceive that the said bill will be injurious to them, if it should pass into a law, without containing some provision, that the same may not affect the petitioners' rights under the said letters patent: And therefore praying, that the description of the territories, islands, and countries, to be annexed to the said province of Quebec, may be so confined, as not to affect the petitioners' said province; or that a provision may be made in the said bill, that the same shall not affect the petitioners' province, granted to them by the said letters patent; and that the petitioners may be at liberty to be heard by their counsel, upon the matter of their petition."

Lord NORTH.—I do not rise to oppose bringing up this petition. It was never intended that the bill should intrench upon other colonies. Whenever any proposal is made to us, whatever can tend to secure Pennsylvania and the other proprietaries, shall meet with no opposition from me. The demand is so just and so reasonable, that, without hearing counsel, it ought to be complied with.

Mr. EDMUND BURKE.—I am glad to hear the noble Lord say this. There are several other colonies anxious to petition; but if, in the committee on the bill, satisfaction is given, there will be no need of bringing up their petitions.

Mr. BAKER.—It would be too much for me to say that the petitioners do not desire to be heard by counsel; for no gentleman can answer for what may be done in the committee. If, upon the report, nothing is done satisfactory to the petitioners, then I shall move, that they may be heard by counsel. Their intention was to be heard by counsel in the committee; what they have to state is very short.

Mr. EDMUND BURKE.—The boundary line of the colony of New York does come within the line marked out by the bill; and the proclamation has departed from the limitary line there, as well as in the other parts. All I wish upon the part of that colony is, that they should not suffer any injury by this irregularity.⁽¹⁾

Lord NORTH.—I have no objection to their being heard by

counsel; but it is better for the petitioners to be heard upon the report, if they should not have satisfaction in the committee.

¹ Mr. Burke was, at this time, member for Wendover. He was also agent for the colony of New York in this country.

p. 1127

Mr. BAKER.—I trust such alterations may be made in the committee, as may make it unnecessary to have them heard at all.

The petition was ordered to lie upon the table, until the report be received from the committee of the whole House, to whom the bill is referred; and that the petitioners be then heard by their counsel, if they think fit.

* * * *

Captain PHIPPS.⁽¹⁾—From what has just passed, I think this will be a proper time to express my doubts, as to the propriety of going into the committee upon this bill.

* * * *

I should have expected that evidence would have been taken in the place where the bill originated, from all persons who have filled high offices there, or resided in the country; but none such have given evidence in the other House. You are now going into a committee, without having such evidence brought here. I should have expected some evidence, that the fisheries of this country would have been injured by the coast being put under the government of Newfoundland. I should have expected that three or four persons now in England, would have been called to the bar to give evidence, as to how far the sedentary fishery upon the coast, supposed to be in the hands of the Frenchmen—how far that fishery ought to be so preferred, as to destroy the fishery of this country. I should have been glad, if the merchants of Poole and the merchants of the western counties in England, had given evidence as to how far the taking away that fishery from the government of Newfoundland, was proper—whether there should not be a fleet to watch the French fishermen; who certainly will be favoured in preference to our own. They will be instrumental in carrying on smuggling, which will give the scale against the English who come there: if so, the French, will carry on what trade they please there; and the governor will be debarred from protecting the English fishery, because it is put under another power. I should have expected some evidence to have been brought to that point.

Friday, June 3.

The order of the day being read for going again into the committee upon the bill, the House resolved itself into the said committee. As soon as the Chairman had taken the chair, General Carleton was called in and further examined.

* * * *

¹ The Honourable Constantine John Phipps, eldest son of Constantine, first Lord Mulgrave, of New Ross, in the county of Wexford. He was a captain in the royal navy; in

which station he made a voyage, in 1773, to discover the existence of a north-east passage into the South Seas, of which he published an account in the following year. He afterwards filled successively the offices of first Lord of the Admiralty, Joint-paymaster of the forces, Lord of Trade and Plantations, and Commissioner of the India board. He died in 1792, without issue, and was succeeded in the Irish barony by his brother Henry, father of the Marquis of Normanby.

p. 1128

Further Examination of General Carleton.

Have you adverted to that part of the bill describing the boundaries which the province of Quebec is to have for the future?—Yes.

* * * *

What inconvenience arises, in your opinion, from the limits given to Canada in the proclamation?—I had frequent complaints from the Canadians, that the province cut off in that manner, and contracted, deprived them of the greatest part of their property, which was promised to be protected. The English, as well as the Canadians, complained that their property went up to the upper country, and that, if the persons entrusted with this property did not, of their own accord, act honestly, they had no means of procuring justice.

What do you mean by that property? Was it the property of lands granted to them by the King of France; or what?—Lands granted to them by the King of France, and the profits of the land.

Was any part of this land cultivated and inhabited by Canadians? I never examined that matter thoroughly. Whether their demands were just or not just, it was without my reach. I know, from very good information so far, that there were, upon the Labrador coast, certain posts established, where they carried on the sedentary fishery and trade with the Indians. I believe very little is cultivated upon that side; nor do I think the country capable of much cultivation.

* * * *

Was the information respecting the seal fishery from your own knowledge?—From the best information I could pick up. That system of fishery which compelled the people to remove from Newfoundland, could not be applicable to the sedentary fishery.

* * * *

Monday, June 6.

The House resolved itself into a committee on the bill, Sir Charles Whitworth in the chair. The preamble being postponed, and the first clause read, viz:—

“And whereas, by the arrangements made by the said royal proclamation, a very large part of the territory of Canada, within which there were several colonies and settlements, of the subjects of France, who claimed to remain therein under the faith of the said treaty, was left, without any provision being made for the administration of civil government therein, and other parts of the said country where sedentary fisheries

had been established and carried on by the subjects of France, inhabitants of the said province of Canada, under grants and concessions from the government thereof, were annexed to the government of Newfoundland, &c. be it enacted, that all the said territories, islands, and countries, heretofore part of the territory of Canada, in North America, extending southward

“to the banks of the river Ohio, westward to the banks of Mississippi, and northward to the southern boundary of the territory granted to the merchants adventurers of England trading to Hudson's Bay, and which said territories, islands, and countries, are not within the limits of some other British colony, as allowed and confirmed by the Crown, or, which have since the 10th of February 1763, been made part of the government of Newfoundland, be, and they are hereby, during his Majesty's pleasure, annexed to, and made part and parcel of the province of Quebec, as created and established by the said royal proclamation of the 7th of October, 1763—”

Lord NORTH.—There are great difficulties, as to the mode of proceeding. I apprehend the alteration I am about to propose will save every right where there is a right. I will explain the amendment I intend to make; if that should not give satisfaction, gentlemen will state what it is they propose to substitute in its stead. We shall then ascertain how far we shall be able to make anything more precise. The question is an extremely difficult one. It is usual to have different boundaries laid down indifferent manners. Where the King is master of the country, there they are drawn by his Majesty's officers only; where there has been any grant or charter, and it has been necessary to draw a boundary line, then, not only his Majesty's officers but commissioners have been appointed, and together they draw a line, subject afterwards to an appeal to the privy council; therefore, that distinction is made here. It is intended, immediately after the passing of this act, to go on with the project of running the boundary line between Quebec and New York and Pennsylvania, &c., belonging to the Crown. This is made to prevent the province of Quebec from encroaching on the limits of any of those grants, where no boundary has been settled. I find many gentlemen are desirous of having something still more precise, if possible. To this I have no objection; but we are so much in the dark as to the situation of this country, that it is not possible to do anything more safe, than saving the rights of the other colonies, leaving them to be settled on the spot by commissioners. Persons possessing local knowledge can act better than we can. For that reason, I propose to leave out the words, “heretofore part of the territory of Canada,” and insert “extent of country;” and also to leave out the words “said country,” and insert “territory of Canada.”

Mr. EDMUND BURKE.—We are now settling the clause that is to give limits to the excellent system of government about to be provided for the Canadians by this bill. But, in order to ascertain more precisely what those limits are, I should be glad to get some further information, and I shall move you, that Mr. Pownall be called to this committee: no man is more able, no man more willing to give that information. I move, “That John Pownall, esq., under secretary for the American colonies, do attend this committee.”

Lord NORTH.—I do not exactly see what the honourable gentleman's object is in calling Mr. Pownall; but if the limits can be rendered more clear

p. 1130

and distinct by so doing, it is possible I shall be very willing to have him before us. To what point does the honourable gentleman mean to examine him?

Mr. EDMUND BURKE.—I will give the noble lord all the satisfaction in my power. I wish the attention of the committee, as I distrust my powers of explanation, when applied to such an object. The impropriety of the bill has taken its course already. If we had originated this measure above stairs, where maps might have been laid upon the table, no doubt the whole dispute of this day would have been avoided. I shall ask for the attention of the committee; partly that they may understand me; partly that I may understand myself. In the first place, when I heard that this bill was to be brought in on the principle that parliament were to draw a line of circumvallation about our colonies, and to establish a siege of arbitrary power, by bringing round about Canada the control of other people, different in manners, language, and laws, from those of the inhabitants of this colony,—I thought it of the highest importance that we should endeavour to make this boundary as clear as possible. I conceived it necessary for the security of those who are to be besieged in this manner; and also necessary for the British subject, who should be restricted within the limits to which he was meant to be restricted, and not be allowed to venture unknowingly into the colony to disturb its possessors. I wish these limits to be ascertained and fixed with precision, for the sake of both parties. Having this object in my view, I shall first consider the line drawn in the proclamation of 1763. It was drawn from a point taken in the lake called Nipissim: that lake stands to the north of this point. I entreat the attention of the committee; for the escape of a word is the escape of a whole argument. Sir, this boundary was fixed by a line drawn obliquely from lake Nipissim, which line crossing the river St. Lawrence and the lake Champlain, formed an angle in the latitude of forty-five degrees. This constituted the south-west boundary of Canada: Beyond that the province was to extend no further; and, confined within this limit, it remained from the year 1763 to this time. That was then the boundary of Canada; and when that boundary was formed, that was the boundary of the government; and that boundary was fixed there, because it was the boundary of the possession. There was then no considerable settlement to the southwest of that line. This line the people of Canada acquiesced in. They have since come before his Majesty's government, and have laid before it a complaint in which they state, that this was a line drawn especially for the purpose of territorial jurisdiction, and the security of property; but they

represent that it is a line ill suited for a growing country. They do not complain that they have not the legal limits, but they complain of the climate to which they are restricted. "The province," they say, "as it is now bounded, by a line passing through the forty-fifth degree of north latitude, is confined within too narrow limits; this line is only fifteen leagues distant from Montreal: and yet it is only on this side that the lands of the province are fertile, and that agriculture can be cultivated to much advantage." Sir, if no injustice will thereby be done to any one, I don't know a more reasonable request, than that their complaint

p. 1131

should be attended to. I am not one who opposes the principle of the bill throughout: if I opposed the principle throughout, I should not oppose it in this stage; it would be irregular. So far as this bill conveys to the natives of that country every right, civil and religious, held either by the great charter of nature, or by the treaty of 1763, or by the King's proclamation, or by what above all it ought to be held by, the lenity, the equity, the justice of good government—I would give the enjoyment of those rights in the largest and most beneficial manner; but the very same line of justice which I would extend to the subjects of Great Britain ought not, in my opinion, to be conceded to the old Canadians.

Having drawn the line that best becomes the regulation of right, the question comes now—whether what they ask is a favour which can be granted them, without doing a material injury to the most substantial rights of others?—whether the effect of the power given by this clause may not be to reduce British free subjects to French slaves? Now, if the line drawn from lake Nipissim is to be altered, at whose expense will it be altered? The colony of New York claims all the country south of that line, till it meets with some other British colonies of known boundaries; and these are claims which ought at least to be heard, before the people of that colony are handed over to the French government.

However, after this line had been settled to forty-five degrees, it was found that the French and English maps differed very considerably as to the position of this degree; and this difference occasioned a great deal of confusion, so that the colony of New York, which bounds next to Canada, had perpetual controversy about the limitary line. Though they agreed that the line should be settled to forty-five degrees, they never agreed where the forty-fifth degree of latitude was. To remedy this confusion, in 1767, the colonies by a very provident order of the Crown, determined to hold a meeting on the frontiers, at which they took an actual observation, and fixed the latitude of forty-five degrees to the head of the northern part of lake Champlain. When they had fixed this limit, the colony of New York gave up all that part included in the triangle, the base of which was a line drawn through the angle of forty-five degrees. All this was given up for the sake

of peace. A definition of that line so settled was brought home and submitted to the board of trade; who examined it, and reported that they thought it a proper line to be drawn; which report was confirmed by his Majesty in council. Having got that line drawn, a parallel was to be run from east to west, till stopped by some other colony; but when the line was fixed of forty-five degrees, the line itself was not drawn, but only the point settled from whence it should be drawn. The east line, however, is actually drawn on the map; but the line on the north-west part was left totally undefined—the point being fixed simply to the head of lake Champlain. The consequence was, that the whole west boundary of New York extending about two hundred miles, a little more or less, including all the best settled part of that province, and inhabited by various persons, civil and military—all this has been supposed to go under that description to the province of Quebec, by the provisions of

p. 1132

this bill. To those who objected to so frightful a conclusion, it was said, it was in the power of the Crown, after this act, to adjudge to this province what belonged to it, on the other side of the line. The first thing that occurred to me, after hearing this declaration was, that a law-suit would be the beginning of this happy settlement; and that the claim between Canada and New York, which cost so much blood formerly, would now give rise to an interminable series of law-suits.

With very uneasy sensations on this head I came down to the House. The noble lord showed me the amendment, which by no means relieved my apprehensions. The reason why I feel so anxious is, that the line proposed is not a line of geographical distinction merely; it is not a line between New York and some other English settlement; it is not a question whether you shall receive English law and English government upon the side of New York, or whether you shall receive a more advantageous government upon the side of Connecticut; or whether you are restrained upon the side of New Jersey. In all these you still find English laws, English customs, English juries, and English assemblies, wherever you go. But this is a line which is to separate a man from the right of an Englishman. First, the clause provides nothing at all for the territorial jurisdiction of the province. The Crown has the power of carrying the greatest portion of the actually settled part of the province of New York into Canada. It provides for individuals, that they may hold their property; but they must hold it subject to the French laws, subject to French judges, without the benefit of the trial by jury. Whether the English mode of descent is better than the French, or whether a trial by a judge is better than a trial by a jury, it is not for me to decide: but an Englishman has a privilege that makes him think it is better; and there is, Sir, as much reason to indulge an Englishman in favour of his prejudice for liberty, as there is to indulge a Frenchman in favour of his prejudice for slavery.

The bill turns freedom itself into slavery. These are the reasons that compel me not to acquiesce by any means, either in the proposition originally in the bill, or in the amendment. Nay, the proposition in the amendment is a great deal worse; because you therein make a saving of the right of interference with, and may fix your boundary line at the very gates of New York, perhaps in the very town itself, and subject that colony to the liability of becoming a province of France. It was this state of things, Sir, that made me wish to establish a boundary of certainty. The noble lord has spoken upon the occasion with a great deal of fairness. He says, that if any gentleman will find a boundary of certainty, he will accept it. Whether, if we shall be able to find such a boundary, the colony of New York will be satisfied with it, I know not; but, speaking here as a member of parliament, I do think the colony had better have a boundary much less in extent, yet reduced to such a certainty, that they may exactly know when and where they cease to be English subjects. The boundary originally settled between Canada and New York, by Governor Murray and General Carleton, gave a very considerable part of what New York was entitled to contest with the Crown, under the first proclamation. That was given up. I am glad the noble

p. 1133

lord has got a map before him. They gave up a vast extent of country. I recommended them to give up for peace all that part which lies between that country and the river St. Lawrence, and to take their departure from a line drawn through Lake Champlain in forty-five degrees of latitude, as far as the river St. Lawrence, then following the course of that river through lake Ontario and lake Erie to make it the western bound of the colony of Pennsylvania. These limits and bounds would give New York a territory sufficient to enable it to meet every exigency of government: it would give it a territory saleable and valuable; it would give the Crown a boundary of certainty; it would give the people of Canada a certainty of knowing upon what side of the water their territory began; and it would give the subjects of Great Britain a power of knowing where they can be free. If the noble lord gives me this boundary, he takes off the northern part of the objection; and, in that case, I shall not call upon Mr. Pownall. If the noble lord does not admit this description to be clearly expressed, there are persons enough able to do it; for it is ridiculous to imagine, that any sense can be conceived, and not expressed in parliamentary words.

In the next place, Sir, having explained myself as well as I can, without having a map in every gentleman's hands who hears me, I shall now only say one word to the noble lord's objection. He does not know enough of the state of that country to be able to adopt the line which he has drawn whereas nothing can be more geographically distinguished than water and land. This boundary is physically distinguished; it is astronomically distinguished. It has been fixed by actual

observation, and agreed upon by the surveyors. We have everything that geography, astronomy, and general convenience stronger sometimes than either can give, to make this boundary definite.

I shall, therefore, now move the boundary which I have proposed, viz., “by a line drawn from a point on the east side of Lake Champlain, in 45° north latitude, and by a line drawn in that parallel west to the river St. Lawrence, and up that river to Lake Ontario, and across that lake to the river Niagara, and from Niagara across Lake Erie, to the north-west point of the boundary of Pennsylvania, and down the west boundary of that province, by a line drawn from thence till it strikes the Ohio.” If the noble lord admits this proposition, the committee will, no doubt, be able to express it in proper words; if not, I must beg that we may receive information from a gentleman who can abundantly inform the House, who has a greater knowledge of the subject than any gentleman within this House, and who is as ready to communicate it as any man I ever knew.

Lord NORTH.—What has passed between us, the honourable gentleman has stated fairly. We agree in principle, and I hope we shall succeed in drawing a clear boundary line; but I am doubtful whether a clear boundary line can be drawn by parliament. It strikes me, that the only method is to leave it to be drawn after the passing of the act—leaving it in such a manner, that the line when drawn shall actually form a clear line between the province

of Canada and New York. The line, as far as it appears by the map, is very distinct. The objection I have is precisely what the honourable gentleman has mentioned. I am not clear whether there are not upon the south-east part of the river St. Lawrence Canadian settlements. I have been informed there are. I am sure there are no New York settlements in that part of the world. I think it more prudent to have the boundary line settled upon the spot; reserving, in the act, all those lands that have been granted, under any authority, to the old settlers. If any line can be drawn, I have no doubt the Canadians will prefer their own laws. At first sight, I have no objection to the words proposed, and, if the honourable gentleman desires it, I shall also not object to the witness being called in, nor indeed to any evidence, not likely to involve us in difficulties, that may be calculated to settle a distinct line for the security of the province. It is my opinion, that all this uninhabited country added to Canada, or added to New York, should not be immediately considered as country which the government are to grant away. I do not think that we at all endeavour to discourage settlements, by making those regulations. I hope there will be great caution and restriction on the part of governors against making grants in this western country. The necessity of settling the government goes upon other principles, which I shall have occasion to enter into in the course of the debate; but at present I rise up to confirm the declaration I have made, that if a clear line can be made to the satisfaction of gentlemen, so that they are not likely to involve themselves by drawing a line in Westminster which would be better drawn in America, I shall not opiniatre it, but shall be very thankful to the gentleman who can draw that line.

Mr. EDMUND BURKE.—I shall satisfy the noble lord that there is no inconvenience in the world in drawing this line; no injustice in the world to the Canadians; more injustice in drawing an imaginary line, that may involve the whole colony of New York in confusion. I should be extremely tender of the privilege of the subject; and therefore I would not disturb any man living in his property. But the fact is, that no man is injured by what I propose; but by what the noble lord proposes, if Canada is in future to have boundaries determined by the choice of the Crown, the Crown is to have the power of putting a great part of the subjects of England under laws, which are not the laws of England. The government of France is good—all government is good—but, compared with the English government, that of France is slavery. We have shed oceans of blood for that government, and are ready, I hope, to shed oceans of blood again for it. Upon the noble lord's proposition, half the colony of New York may be adjudged, and some of it must be adjudged, to belong to the colony of Canada. The fate of forty or fifty thousand souls is involved in this question. At present the colony of New York is the

Crown's. The noble lord may adjudge it to belong to Pennsylvania; but he cannot deprive it of the laws of England. Now, however, by an act of parliament, he is going to do so. The Crown has the power, at a stroke, to reduce that country to slavery. It is the power of a magical word; which I hope I shall

p. 1135

never see any where exercised but in the playhouses. This is a possible case; the other is certain—that a few Frenchmen may happen to be considered as Englishmen. The noble lord does not suppose there are many. The parties here are English liberty and French law; and the whole province of New York, further than it is defined by actual bound, is in the power of the Crown, not to adjudicate, but to grant, and hand over to the French. I do not suppose, if the Crown were under the necessity of adjudging, that it would adjudge amiss; but it is in the power of the Crown to grant even its power of adjudging. When put on the English side, they are put in the power of the laws; when put on the French side, they are put out of the power of the laws. Let us consider, then? whether it is not worth while to give a clear boundary, and to let man know whether he is or is not an Englishman. I shall take the sense of the committee upon it. I am as much in earnest as ever I was in my life. I have produced a practical idea—I can produce practical words.

After a long and desultory conversation, the words proposed by Mr. Burke were inserted. The words—

“Until it strike the Ohio; and along the bank of the said river, westward to the banks of the Mississippi, and northward, to the southern boundary of the territory granted to the Merchants Adventurers of England trading to Hudson's Bay; and also all such territories, islands, and countries, which have, since the 10th of February, 1763, been made part of the government of Newfoundland, be, and they are hereby, during his Majesty's pleasure, annexed to, and made part and parcel of the province of Quebec.” —were next read.

Sir CHARLES SAUNDERS.¹—I rise to say a few words upon this part of the clause. Though I dislike the whole of it, I shall speak only to that part which relates to the fishery. Your annexing the liberty of fishing to Canada, will take the fishery from the mother country; will take it to America. That part carried on by Canada must go to the French, and thereby be very detrimental to this country. In the first place, no return is ever made here; in the next place, you lose the employing of your own shipping, the furnishing the men with materials, and breeding your seamen. The liberty of fishing should remain under the inspection of the governor of Newfoundland. The act of King William is the best for the fishery: if you give up this, I am afraid you will lose your breed of seamen, and I know no way that this country has of breeding seamen but two; one the fishery, and the other the coasting trade. All other trade is at

the expense of men, and whatever hurts your fishery must reduce the naval force of this country. Sir, the fishery is worth more to you, than all the possessions you have put together. Without that fishery your possessions are not safe; nor are you safe in your own country.

¹ This distinguished naval commander was, at this time, member for Heydon. He died in the following year, and was interred in Westminster Abbey, near the monument of his friend and "brother of the war," General Wolfe.

p. 1136

Instead of doing anything to hurt your fishery, new methods should be taken to rear more seamen. God knows, how much you'll find the want of seamen, whenever this country finds it necessary to equip its fleets! For these reasons, I am against annexing the liberty of fishing to Canada, and I hope that this clause, for this reason, will not pass.

Mr. GASCOYNE.—I agree with the honourable admiral; but I do not conceive, from what I have learned, that the liberty of fishing given in the clause has anything to do with that sort of fishery the honourable admiral means. They are sedentary fishers, taking seals and sea-cows. It does not appear, that there is any cod fishery along that coast.

Mr. PRESCOT.¹—As I have, in the course of business, some knowledge of the question before the House, I can take upon me to say, that the honourable gentleman who spoke last is mistaken. From the first conquest of the coast, there were several cod-fisheries near the strait of Belleisle. Whether they are continued I cannot say, but I believe they are. A relation of mine, much concerned in the fishery, a Captain Darby, was examined by the board of trade in my presence. The French may possibly have interfered with us. It may become a valuable fishery. The evidence was, that the fish was of a better kind, and ought to be encouraged for the Spanish market. It would be better to unite this fishery to the government of Newfoundland. We ought to discourage carrying on the fishery of the continent of America with Europe; as it gives rise to a great deal of contraband trade.

Sir CHARLES SAUNDERS.—I should not have troubled the committee, if I had not been sure of what I said. We have had a man-of-war there, ever since that country has been put under the inspection of the governor of Newfoundland; who has settled all disputes, agreeably to the act passed in the reign of King William; and that is the reason I mentioned that act.

Lord NORTH.—If the consequence stated by the honourable gentlemen is likely to ensue, and there is no method of preventing it, undoubtedly it is a consideration of most serious importance. But this liberty of fishery was grounded upon two points, and for two reasons: the first and principal reason was justice; the other was the nature of the fishery, which is

supposed to be peculiar to the fishery of that coast. When Canada was conquered, and Montreal surrendered upon capitulation—while the inhabitants of Canada were secured in their property, there were at that time grants for fishing for seals and sea-cows; which grants were profitable to the Canadians, and were as much secured to them as any other species of property. They let the fishing-coast from time to time upon lease. These expired about the year 1762, and new leases were granted. The seal and sea-cow fishery was, I understand, entirely sedentary; carried on in the little creeks between the coast and the island. It is a sort of decoy for fish. It is a decoy that requires

¹ George Prescott, esq., of Theobald's, in the county of Herts; grandfather of the present Sir George Prescott, and founder of the banking-house of Prescott, Grote and Co.

p. 1137

all the nicety, all the care, all the silence possible. The trade cannot be carried on by competition. It must be carried on separately and distinctly, or the fishery will be ruined. It requires all the people to go away at a certain time in September, and return in December; and therefore it must be carried on by persons who stay there in the winter. The ship fishers, I mean those who go from this country to that, have been permitted to fish in different harbours; but the competition almost entirely destroyed the fishery. It is therefore obvious, that this fishery cannot be carried on in the manner of the Newfoundland fishery, and consequently cannot be subject to the laws of that fishery. This was the reason for inserting this clause; but if it has a tendency to destroy the cod fishery, and diminish our stock of seamen, it ought not to stand in the bill. I do not, however, conceive that giving this right to the inhabitants of Labrador will have any such effect.

Captain PHIPPS.—Let us consider, Sir, whether it be politic to suffer this cod fishery on the coast of Labrador to be in the hands of the Canadians. The consequence will be, that the French will be received in Canada with open arms; that they will carry their manufactures thither; and that an intimate intercourse will be kept up between the two countries, to the great injury of the English settlers. They will also have opportunities of stirring up discontents among the Indians. All this shews the necessity of another bill, placing these fisheries under the government of Newfoundland. As far as my little experience in my profession goes, I do not hesitate to declare, that this clause, while it will be one of the severest blows this country ever met with, will be one of the most material benefits that ever accrued to France.

Mr. COOPER.—It is not the intent of this clause to protect the sedentary fishery to the injury of the other. Suppose, therefore, a proviso were added, that nothing in this act should extend to prevent the government of Newfoundland &c. If I am rightly informed, the cod fishing is not carried on at the

same time. If so, it may be fixed at a season which shall not interrupt that carried on in the same situation by the sedentary fishers. As to the condition of our navy, I have the satisfaction of stating, that the number of seamen has greatly increased of late years.

Capt. PHIPPS.—It is impossible to carry on the sedentary fishing, without a property on the waterside. The clause will destroy the right of those who come to try for fish there, and will occasion endless disputes. If any sedentary fishing is necessary, it ought to be put under the government of St. John's. The mischiefs that may arise from this clause should be frequently rung in your ears, until they make an impression upon you.

Mr. PRESCOT.—The cod fishery and the seal fishery are carried on upon the same coast. It is usual for them to leave some of their people there in the winter. It is for the interest of this country, that they should be detached from the government of Canada; they should, therefore, have a government to protect them in winter as well as in summer.

p. 1138

Mr. BYNG.—We have heard a great deal of the small number of Protestants in Canada. That is one reason why the sedentary fisheries should be put under the government of Newfoundland; for unless that is done, we are handing more of our people over to the Canadian laws.

Lord NORTH.—The last alarm is not well founded. The British may and will carry on the fishery to Canada. The law they are under at present is rather more arbitrary than the Canadian law.

Sir CHARLES SAUNDERS.—I do not see how it is possible to carry on the fishery there. Where are the disputes to be decided? At Quebec? The distance of the fishery from Quebec is so great, that the loss of time and the expence would ruin any fishery in the world; whereas the governor of Newfoundland, upon any dispute arising, can settle it in half-an-hour; neither time, trouble, nor expence, is lost; immediately they go to work again. I never knew a trial to last half-an-hour in my life.

Lord JOHN CAVENDISH.—I do not know the question at present. No question has been put upon the clause. I hope we are not quite ready to agree to it. This whole description of Canada goes very much against my judgment. I will, however, say a few words to the particular clause. The remedy proposed seems to fall short of the necessity of the case. I think this proviso would not reach the point. I believe the only pretence the governor of Newfoundland had for extending his authority there, was, that by the proclamation this coast was put under

his direction; but when this authority shall be withdrawn by an act of parliament, he will have nothing to do with it. It will be left to doubt. The seal fishery had better be provided for by itself, than that this great nursery of our seamen should be endangered.

Mr. THOMAS TOWNSHEND, jun.—This, Sir, is undoubtedly a very material part of the bill, and we have had both sides of the question stated to us. The honourable admiral has told us, that that great nursery of British seamen will be in much danger from the passing of this clause. The noble lord on the other side, and the honourable secretary of the treasury, have not denied any one of the assertions which have come from the gentlemen of the navy, and from the honourable member concerned in the trade under the gallery. The noble lord has obliged the committee with a very agreeable description of the seal fishery; he has told you a great deal of the animal itself. He says, that the decoy requires great nicety and care, and all the silence possible, and therefore he proposes, that Frenchmen not being noisy, not being loquacious, it is better to trust that fishery to them, than leave it to the English. The honourable secretary to the treasury has congratulated the country upon the great increase of seamen, which he attributed to the favourable state of the Newfoundland fishery. Sir, I believe the seal fishery has been carried on by the French since the peace; now, from the very nature of the sedentary fishery, if once they are established there, if once they have a property in the stations, they must have the refusal of the market; they

must set out with an advantage over the individuals that come from this country. Is it necessary to take great pains to show you that they have their eyes upon this country; that there is no part of their trade to which they pay more attention; that they will strive to avail themselves, from the similarity of manners and religion, of every opportunity of introducing their fishery, to the exclusion of that carried on by British subjects? Is it necessary to say that French manufacturers will, by this means be introduced into Canada? If the noble lord has a mind to regulate the seal and sea-cow fishery, for God's sake let him confine this bill to one or two points, and leave the rest to a future session. Surely this cannot be too great a compliment to pay to that fishery which is of so much importance to us. The very existence of this nation depends on its naval power; and everybody knows that the great foundation of the British navy are the fisheries and the coasting trade.

Mr. EDMUND BURKE.—I cannot think that the gentlemen opposite will not give way to so reasonable a request. We have proceeded with this mischievous bill thus far. Is not this enough, without obliquely bringing into it another branch—without deranging the whole nautical policy of the country? It is true, that the government of Newfoundland is of a more arbitrary nature than that of Quebec; a military officer, living on board a man-of-war, being the governor of that place? But to say that these people will, by the bill, be put in a better condition, is to say nothing to the purpose. They are sent there to form a nursery for the navy; and that is the best government for them which best accomplishes that end. Cannot the government of Quebec be settled without this clause? The best way would be to bring in a separate bill for Newfoundland; and then the sedentary and the transitory fisheries, would be legitimate objects of inquiry; but here, while we are discussing the boundaries of Canada, we find ourselves in the middle of the fisheries on the banks of Newfoundland. Let trade be regulated upon principles of trade, government upon principles of government, and the navy upon principles best calculated to rear recruits for the navy; but let us not jumble together, in so oblique a manner, parties so very discordant. Let us not, for the sake of hooking in the fishery, give a boundary to Canada which is by no means necessary or expedient, and thereby create further difficulties.

The SOLICITOR-GENERAL.⁽³⁾—It is extremely difficult, upon such a point as this, to contend, or to appear to contend, against the authority of the honourable gentleman, to whom it may, perhaps, be very truly said, that this country owes all the fishery it has upon the coast of Newfoundland. Yet I will beg the indulgence of the committee while I state, in a few words, how the different opinions entertained upon it may, in my view of them, be recontiled. It is not, I maintain, foreign to the purpose of this bill, to consider whether it is better to annex the Labrador coast to Canada, or to throw it into

³ Alexander Wedderburn. He was appointed Solicitor-general in 1771, and held the office till 1778, when he was advanced to that of Attorney-general; and, in 1780, was made Chief Justice of the Court of Common Pleas, and raised to the peerage by the title of Baron Loughborough: in 1793, he was appointed Lord Chancellor, which high situation he held till 1801, when he was created Earl of Rosslyn. He died in 1805.

p. 1140

any other government. To come to a correct conclusion, the committee should take into its consideration the present state of that coast, and the manner in which the fishery is carried on.

In 1763, the coast of Labrador was made part of the government of Newfoundland. Upon that coast an advantage is to be derived by fixing a fishery, to be exercised at a particular season of the year, which does not interfere with the regular cod fishery; and if this object is obtained, it is so much gain to the country. But, though annexed to the government of Newfoundland, gentlemen know that the governor stays there no longer than to the end of the fishery: after that time there is no resident government; so that the Labrador coast must either be annexed to the government of Newfoundland or to that of Quebec, or there must be an especial governor appointed for that district. If annexed to the government of Quebec, there will be magistrates, under the authority of the governor, acting there to inquire into and settle any disputes that may happen. The cod fishery, as exercised there, I take to be a subject perfectly distinct. I think no evil could arise to that fishery if, by express words, the government of Newfoundland had the same power and authority given to them upon the coast of Labrador as is given, by the act of King William, with regard to the Newfoundland fishery; and I shall submit these words—"Provided always, that nothing shall extend to take from the powers of the governor of Newfoundland, during the season of fishery, all persons concerned in the cod fishery; but that they be extended to the cod fishery in the territories last before mentioned."

Captain PHIPPS.—These words will not at all cure the evil; because the residents, who carry on the sea-cow and seal fishery, will have possession of the land, and will thereby have every opportunity of carrying on the cod fishery with impunity, to the injury of this country. My learned friend holds out a plausible protection to the cod fishery, and at the same time cuts it up by the roots.

Mr. CAVENDISH, after some further debate, divided the committee on the question that that part of the clause which relates to Newfoundland should stand part of the bill: Ayes, 89; Noes 48. (1)

Friday, June 10.

Sir CHARLES WHITWORTH reported to the House the amendments which the Committee had made to the bill. The first clause being read, there was much puzzling about settling the boundary line. Mr. Edmund Burke, Mr. Jackson, Mr.

Baker, and Sir Charles Whitworth went up stairs, in order to settle it, while the House was supposed to be proceeding upon it. The House continued for at least half an hour doing nothing in the meantime. The difference was, whether the tract of country not inhabited should belong

¹ “The danger of losing the fisheries, and the feeble manner in which the proviso was supported, induced me to vote against the words being in the bill.”—H. C.

p. 1141

to New York or Canada? At five o'clock, Mr. Edmund Burke returned with the amendments; some of which were agreed to, others not. The following is the clause as finally agreed to by the House:—

“That all the territories, islands, and countries in North America, belonging to the Crown of Great Britain, bounded on the south by a line from the Bay of Chaleurs, along the high lands which divide the rivers that empty themselves into the river St. Lawrence from those which fall into the sea, to a point in forty-five degrees of northern latitude, on the eastern bank of the river Connecticut, keeping the same latitude directly west, through the lake Champlain, until, in the same latitude, it meets the river St. Lawrence; from thence up the eastern bank of the said river to the lake Ontario; thence through the lake Ontario, and the river commonly called Niagara; and thence along by the eastern and south-eastern bank of lake Erie, following the said bank, until the same shall be intersected by the northern boundary, granted by the charter of the province of Pennsylvania, in case the same shall be so intersected; and from thence along the said northern and western boundaries of the said province, until the said western boundary strike the Ohio; but in case the said bank of the said lake shall not be found to be so intersected, then following the said bank until it shall arrive at that point of the said bank which shall be nearest to the north-western angle of the said province of Pennsylvania, and thence, by a right line, to the said north-western angle of the said province; and thence along the western boundary of the said province, until it strike the river Ohio; and along the bank of the said river, westward to the banks of the Mississippi, and northward to the southern boundary of the territory granted to the merchants adventurers of England trading to Hudson's Bay; and also all such territories, islands, and countries, which have, since the 10th of February 1763, been made part of the government of Newfoundland, be, and they are hereby, during his Majesty's pleasure, annexed to, and made part and parcel of, the province of Quebec, as created and established by the said royal proclamation of the 7th of October 1763.

“Provided always, that nothing herein contained, relative to the boundary of the province of Quebec, shall in anywise affect the boundaries of any other colony.”

No. 295.

**EXTRACTS FROM
CONSIDERATIONS ON THE RIGHTS AND
INTERESTS
OF ADVENTURERS IN THE LABRADOR
FISHERIES.***

BY LIEUT. JOHN CARTWRIGHT.

(Sent to Lord Dartmouth.)

* * * *

78. When Labrador first came into our hands and the arrangements we have spoken of took place, it still required some consideration and prudence to be able to turn this acquisition to the best account. Having already as extensive a fishery in Newfoundland, as we could well occupy, it was not immediately apparent by what means we should avail ourselves of those of Labrador. We there found a few Canadians scattered along the coast in the gulph of St. Lawrence, and along the Straits of Bellisle, who carried on the Seal and salmon fisheries: and we understood besides, that the french had occasionally fished for cod from a few particular parts. The prospect of meeting other salmon streams along the unoccupied parts of the coast was encouraging, and the sealing posts, affording specimens of a fishery which depended not upon the accident of there being fresh water rivers, and in all probability abounding more and more in proportion as we should advance towards the north, promised no inconsiderable returns to the adventurer: but the informations concerning the cod fishery, carried with them no reasons for believing it was worth while to quit the certainties of Newfoundland, for the hopes of better things in Labrador. Besides, there was ample room in Newfoundland for its improvement; and it had perhaps been wiser to have seen well to it's prosperity there, by a thorough reformation of those enormous abuses which had crept into it, and still continue its canker worm and its disgrace, than to have been at any pains to have extended it, in such a state, to Labrador. But other sentiments at that time prevailed; and the protection of the king's ships in 1764 and 1765, together with that spirit of enterprize which distinguishes the commercial part of the british nation, induced some few to make trial of the cod-fishery about Chatteau Bay. Various was the success of these experiments; but they ended in giving currency to an opinion, that this was a good station to fish from in the latter part of the season, at a time that the fishing in the northern parts of Newfoundland was generally experienced to fail; as this was observed to do in the early part.

79. Thus then, it was now thought to be seen how we might best begin to avail ourselves of Labrador; by making it's cod fishery an appendage to that of Newfoundland; and the seal and salmon branches subordinate again to the cod fishery; and Henley Harbour, defended by Chateau Island, was approved of as a convenient port for mooring the ships and manufacturing the fish. It was accordingly resorted to with eagerness; in so much that in a short time it was quite crowded; but these adventures, like the leading experiments, were attended with various success; sometimes being very very profitable, and sometimes attended with great loss. However these attempts served to enlarge our knowledge: the experience of every day tending to remove former prejudices and to methodize future conjectures; as well as to lead on towards farther discoveries. The seal and salmon fisheries, upon examination, appeared to be of much more value, than had at first been apprehended; as well as far less precarious and expensive than the cod fishery. The country likewise produced good samples of fur, besides which, there was a traffick opened with the Eskimaux Indians; and some reason to look for the establishment of a Whale-fishery; so that, upon the whole, the merchants promised themselves, from appearances, no inconsiderable advantages, as soon as they should be able to effect proper settlements, and be put in a capacity of reaping the benefit of their labours by suitable assistance and protection from government.

* * * *

91. Experience hath taught us, on the contrary, that the seal fishery is the grand staple of Labrador; every successive season showing its great importance more and more: and that the next in rank and consequence is the salmon fishery, as abounding to a considerable degree, and not being subject to much uncertainty; while the cod fishery is so expensive, and so precarious, except at a few particular stations westward of Chateau, as to make it the height of rashness for any one to practice it, unless it be in a subordinate way, as employment for the labourers during the intervals in their other occupations.

* * * *

108. But not to forget my hints and sketches towards a plan for regulating the fisheries of Labrador, they are as follows—
Let it be enacted.

* * * *

That all the land backwards through the whole extent of every sealing post, to the distance of one mile from highwater mark, shall be accounted as part of such post and belong in full right to the proprietor: except that a right be reserved of cutting wood for the use of His Majesty's Ships or Forts; and a general right of free passage to all through every uninclosed part of the same; and excepting also that a right be reserved to any* cod-fisher of

* 'Tis probable that it will rarely happen that cod-fishers should thus interfere with Sealers; for, if a post be advantageously situated for both fisheries, the first occupant will undoubtedly erect works for, and carry, on, both: so that it may possibly be thought unnecessary to leave the posts open in this respect to any other than the first proprietor.

p. 1144

erecting upon and adjoining to the same; every building and work necessary in the cod-fishery; and of cutting wood sufficient for such buildings and works upon the shore, and for fuel; but nothing more.* But the Seal-fisher being the proprietor of the soil, that his necessary works and erections shall not be encroached upon, or interfered with, by those of the cod-fisher, nor he be any way obstructed by him in the execution of any part of his business.

* * * *

109. Let it be enacted— 1st. That any qualified person, having possessed himself by premier seisin, limitation and occupancy, of any river, rivulet or brook as a salmon fishery, shall hold the same to himself and his heirs for ever on the same conditions as a sealing post is to be held upon (as expressed in art. 2d, 3d, 6th, 8th, 9th, 10th, 11th.) with this difference only, that instead of the regulation in the 4th and 5th articles of the foregoing section, the following shall in this case take place; viz.

2d. Every distinct river, rivulet, and brook shall be accounted a separate salmon fishery; and the inferior shall never be esteemed dependent upon the superior except united in the possession and real occupancy of the same proprietor: so that the minor streams, if unoccupied, may be taken possession of by another, notwithstanding the principal river into which they empty themselves shall be in the hands of a proprietor. But then the proprietors of these lesser streams shall confine themselves in fishing to the same; and the proprietors of the rivers into which they flow shall not by nets or works of any kind block up the mouths of these lesser streams so as to prevent the salmon from running into the same; but shall leave a clear passage into them wide enough at least for a skiff to row in and out with room for her oars on each side.

3d. All that part of the land bordering on every river so occupied as a salmon fishery, which shall be more than a quarter of a mile below the upper salmon house upon the same, & shall be free and open to the use of the publick for the general service of the cod fisheries, navigators or others, (except it become appropriated for the use of other fisheries). Then the land on each side of the river, from the said limit of the free and open part upwards, by the fishing house, and so along the course of the river for three miles in length, that is to say, a quarter of a mile below the said salmon house, and two miles and three quarters above the same towards the river's source, shall belong to the proprietor of the salmon post; and this property shall likewise extend one mile from the water backwards, on each side of the river. Except it would interfere with a like property on the other side of an isthmus or point as aforesaid, in which case to be equally partitioned longitudinally as aforesaid. But such property in the land shall

not extend in length higher than or beyond the source of any river, although it shall be less than three miles from the limit abovementioned. A free

* Wood of a tolerable size is scarce in this country: so that 'tis reasonable he who has the property in the soil should not be obliged to accommodate the cod-fishers farther than is necessary; as they can repair to the unappropriated places for timber and plank for boat building masts, oars &c.

p. 1145

road and passage to all through every unenclosed part of the same being reserved as above, and the same to hold good in every other appropriation of land.

110. Let it be enacted— 1st That any qualified person may possess himself of any post for Whale fishing under the same conditions and limitations exactly as of a sealing post, and with all the same priveleges; agreeable to the first clause (108) and no person but the proprietor of such whaling post to have a right to take possession of or to occupy any part of the same for a Seal-fishery.

* * * *

112. Let it be enacted—1st That every proprietor of land under the sanction of any of the foregoing clauses shall have the sole right of furring, hunting, and shooting within the same.

2d. That, in the unappropriated part of the Country, the Furrier shall have a permanent property in all death-fall paths pit falls, traps and snares; in all tilts, huts, and other works necessary or useful to a furrier which he hath made, raised or constructed, on condition of continuing to occupy the same.

3d. That upon non-occupancy for three successive winter seasons they shall revert to the publick.

4th. That every furrier who shall discover and* mark before any other, any beaver house, shall have a property in the same for the season, commencing the 1st September and ending the 31st March.

5th. That every wilfull destroyer or robber of any Beaver house, Deathfall path, pitfall, trap or snare; tilt, hut, or other work belonging to the furring business, shall upon conviction render damages sevenfold; and be incapable ever afterwards of exercising the business or of enjoying any of the rights and priveleges of a furrier in Labrador.

113. Let it be enacted—1st That the Cod-fishers shall have a right to fish for bait in all places and to draw their sains to the shore if necessary; except only that they shall not have a general liberty of interfering with the salmon nets; but, in case of occasion, may remove any salmon net once in every day, in order to draw a sain. That in this case they shall have the trouble of removing it and, when they have drawn their own net, of replacing it in a proper manner and that it shall not be displaced more than one hour at a time, nor more than once a day; under a penalty of one quintal of merchantable dry cod fish for every trespass or illegal removal. And if they shall do any wilful damage, to the said nets, or wilfully injure or

obstruct the salmon fishery in any other particular, that they shall upon conviction pay seven fold for the same. Nor shall they set any bait net across any

* This is a law among the furriers themselves; but the dishonest, being liable to no punishment, frequently break it. The necessity of it arises from this, that after the discovery of a beaver house, time, ingenuity, and security from interruption, are necessary to the trapping of the beavers one after another.

p. 1146

river or stream in which there is a salmon fishery from side to side, so as to obstruct the entrance of the salmon; nor shall any of their bait nets, crossing the stream and moored, be put out within a quarter of a mile of any salmon net; nor shall they, under pretence of taking bait, have a right to catch salmon at all within any salmon fishery; but all such salmon as shall be caught in their nets shall upon demand be delivered to the proprietor; on penalty of being ever after excluded from taking bait in that river or stream.

114. Let it be enacted that every property now held of any lands in Labrador, or that may hereafter be acquired, shall be registered with the Governor or his officers appointed for that purpose either in Labrador, Newfoundland, or London, within eighteen months at the farthest after a day appointed, or after the time of taking possession; and that the parties shall make oath, if required, to the truth of their registry.

1774]**DARTMOUTH TO LORDS OF THE ADMIRALTY,**

SIGNIFYING THE KING'S PLEASURE THAT GOVERNOR SHULDHAM
SUPERINTEND FISHERIES ON COAST OF LABRADOR AS WELL AS
THOSE OF NEWFOUNDLAND.

C.O. (51) VOL. 120. 1274. ADMIRALTY.

Whitehall, 16th June 1774.

Lords of the Admiralty.

MY LORDS,

I have not failed to lay before the King Your Lordships' Letter to me of the 9th of last Month, desiring to know His Majesty's Pleasure, whether you should make any Alteration in, or addition to the Instructions under which Commodore Shuldham sailed last year to New-Found-Land.

Since the date of that Letter a Bill has been under the Consideration of, and has passed both Houses of Parliament, by which the Coast of Labrador, made part of the Government of Newfoundland, by the Royal Proclamation of the 7th of October 1763, is re-annexed to the Government of Quebec.

In consequence of this Regulation, when the Act shall have been passed, all Authority on that Coast given to Commodore Shuldham, in his Capacity of Governor, will cease: But it is the King's Pleasure that he do, as Commander in Chief of His Majesty's Ships employed for the Protection of the Fisheries, superintend those on the Labrador Coast, as well as those of Newfoundland; and that he do, in a particular manner, give all possible Encouragement & Protection, as well to the Seal & Sea Cow Fisheries, as to the Cod Fisheries carried on by the King's Subjects from this Kingdom, on such parts of the Coast, as are not claimed as private Property, under regular Canadian Titles; and that he do also protect and countenance, as much as in him lays, the Establishments, formed under the King's Authority, by the Society of the Unitas Fratrum to the Westward of the Straits of Belle Isle.

I am, &c^e

DARTMOUTH.

Draft.

Endorsed.—Dra^t to Lords of the Admty
Whitehall, 16th June 1774. Ent^d.

[3 August,
1774.]**INSTRUCTIONS TO MR. ALEXANDER GED**

By His Excellency Molyneux Shuldham, Esquire, Governor
and Commander-in-Chief, etc., etc.

COLONIAL OFFICE RECORDS. 194/73. Enclosed E.

3rd August 1774.

Whereas, by my order of the 30th August, 1772, I appointed you Commander of York Fort, established at Pitt's Harbour, in Chateaux Bay, on the Coast of Labrador, with the garrison for the defence of it, consisting of twenty men belonging to His Majesty's Ship Panther, for the protection of His Majesty's subjects concerned in the Fisheries established on, and the Fishing Ships resorting to that coast. And whereas the Right Honorable the Lords Commissioners of the Admiralty have been pleased to signify to me, that the Earl of Rochford, one of His Majesty's Principal Secretaries of State, hath acquainted them, by his letter, of the 16th June last, that a Bill hath been under the consideration of, and has passed, both Houses of Parliament, by which the Coast of Labrador, (made part of the Government of Newfoundland by the Royal Proclamation of the 7th October, 1763) is re-annexed to the Government of Quebec, in consequence of which regulation, when the Act shall have passed, all authority on that Coast given to me in my capacity as Governor will cease. But that it is His Majesty's pleasure that I do, as Commander of the Ships employed for the protection of the Fisheries, superintend those on the Labrador Coast as well as those of Newfoundland; and that I do in a particular manner, give all possible encouragement and protection as well to the Seal and Sea-Cow Fisheries as to the Cod Fisheries, carried on by the King's subjects from Great Britain, on such parts of the Coast as are not claimed as private property, under regular Canadian titles; and that I do also countenance and protect, as much as in me lies, the Establishments formed, under the King's authority, by the Society of the Unitas Fratrum, to the westward of the Straits of Belleisle. You are hereby required and directed to take particular care that His Majesty's pleasure, in regard to the several particulars aforementioned, be strictly complied with, as far as is dependent on you as Commander of York Fort, and conformable to the instructions you have already received from me for your government in that capacity. And you are to hold yourself, with the Garrison under your command, in readiness to be relieved whenever you shall receive orders for that purpose;

having the strictest attention to the care of the provisions, ordnance, and other stores committed to your charge; and keeping a very particular account of the expenditure thereof.

Given under my hand, at Saint Johns,

3rd August, 1774.

Duplicate.

My Lord,

I have the honor to acquaint Your Lordship of my arrival at this Place in his Majesty's Ship Panther the 2nd Instant, when I resumed the Government of this Island and its Dependencies, the different Fisheries of which, from all the Enquiries, I have yet been able to make, I have the pleasure to inform your Lordship are in their usual State, and the Inhabitants as well as other Persons concerned in them, Quiet and satisfied in their several Departments: His Majesty's Ships and Vessels under my Command are all arrived and employed on their respective Stations, and from the information of their Commanders, the French Subjects behave with Conformity to the stipulations of the Treaties subsisting between the two Crowns in that part of the Island allotted to them for carrying on their Fishery.

I need not inform your Lordship, that a Blockhouse, called York Fort, is erected and established in Chateau Bay on the

Coast of Labrador, which is garrisoned with Twenty Men from His Majesty's Ships under my command, for the protection of the Persons concerned in the Fisheries on that Coast, and in consequence of my Instructions from the Lords Commissioners of the Admiralty of the 17th June last, importing, that a Bill hath been under the consideration of, and has passed both Houses of Parliament, by which the Coast of Labrador, (made part of the Government of Newfoundland by the Royal Proclamation of the 7th October, 1763) is re-annexed to the Government of Quebec; in consequence of which Regulation, when the Act shall have been passed all Authority on that Coast given to you in your capacity of Governor will cease, I have sent an Order (Copy of which I send your Lordship enclosed), to the Officer Commanding that Fort, for his Government, and shall continue to protect and superintend the different Fisheries carried on upon the Coast of Labrador, as well as those of Newfoundland, agreeable to the said Instructions. I have the honor to be My Lord,

Your Lordship's Most Obedient and most humble Servant,

M. SHULDHAM.

Rt. Hon. The Earl of Dartmouth.

DARTMOUTH.**

LABRADOR, DARTMOUTH PAPERS, 1774, SEPT. 12TH, pp. 116-224.

Charles Harbour

12th Sept. 1774.

My Lord

* * * *

As Your Lordship kindly gave me leave to inform you of the success and progress of the fisheries on this Coast, I think myself peculiarly happy in enjoying such an indulgence, and shall endeavour to give Your Lordship all the information in my power.

When first I came, in the year 1770, the fisheries were on the decline; all the Newfoundland Merchants, except Noble & Pinson were grown tired of them finding it would not answer their end to carry on business here without erecting a variety of buildings, and being liable to loose them all the next Season, if any other Vessel should arrive before them; they therefore contented themselves with sending their Boats to catch fish when the Season was over in Newfoundland, and withdrew all their people towards the latter end of September. Mr. Pinson hearing that great Voyages of Seals had always been Kill'd on this Coast, and finding that Codfish were plentiful about Chateau as in Newfoundland, determin'd to remove the greatest part of their business from Couche hither; they having four Vessels, and determining to send them out every Spring as early as possible, were not afraid of loosing their possessions by the prior arrival of any other, and saw they should be able to seize all the best Posts, by getting first on the Coast, but the murder of Mr. Darby's Crew at Cape Charles by the Indians, deter'd him from extending their business farther from Chateau than Bad-Bay, a place net quite a mile's distance from the Blockhouse; that, and Seal Island Chateau, were the only Sealing Posts, without the Streights of Belleisle, in possession of the English when I came, and they had not one Salmon Post.

I settled in Charles River, the Salmon season being then over made preparations for the Winter, fix'd a Sealing Crew at Seal Island, Cape Charles, & kept a Sawing, and a Furring Crew in Charles River. In 1771 I established a Salmon fishery in Charles River, a Cod fishery at this place, kept one Crew Sealing on the Island, and another Boatbuilding in St. Lewis's Bay. The same year Noble & Pinson built a Cod-fishing room in Lance Cove, Temple Bay, kept a boat building Crew, and continued their two Sealing Posts as before.

The next Spring (1772) finding that I liv'd undisturb'd by the Indians, and observing how much those People were reform'd by the pains I had taken with them, they took the advantage of my Vessel's not arriving, owing to her being cast away on the Island of Fogo on the Coast of Newfoundland, and seiz'd upon both my Sealing, and Salmon Posts, which obliged me to establish new ones, the former in White Bear Sound, the latter in the River Colleroon, which empty's itself into the head of St. Lewis's Bay. Noble & Pinson the same year held their former possessions except Seal Island Chateau (which was taken from them by Mr. Slade) and fix'd another Sealing Crew in Lance Cove: These viz: four Sealing and two Salmon Posts were all that were occupied at the time I first troubled Your Lordship for redress and protection; at the same time setting forth that the establishing property was the only effectual way to encourage Adventurers, and make the fisheries flourish. The event has fully prov'd the truth of my assertions, for the resolutions of Your Lordship's Board, and His Majesty's Order in Council in consequence thereof, were no sooner known than no less than two Salmon and five Sealing Posts were added to the former number, yet, notwithstanding the above order, Noble & Pinson took the advantage of my misfortune last year, in being delay'd coming out, by the sickness and death of the Indians, and dispossessed me of my Salmon Post in the Colleroon, but this Summer the Governor has been pleased to restore both that, and Charles River to me again, and confirm'd them in the possession of Seal-Island, to which, I cannot help thinking, I have a prior, and better title than they.

This Year Seven new Salmon rivers have been occupied, and there will also be some more Sealing Posts, but how many I do not yet know, our House have taken up one.

Last Winter prov'd a very bad one for the Seal-fishery, all the Adventurers in that branch lost a deal of money. This summer has turn'd out well for both salmon and Cod-fish. The latter begins to revive again, and Your Lordship may depend upon it 'tis not only unnecessary, but even impolitic to force people into that branch of business, as it must of course increase in proportion to the Sealing with all Adventurers from Great Britain, but those from Quebec, I fancy will never enter much into it, as their Servants are hired on different terms, and they rather chose to return to their family in Summer, than remain here to go through the drudgery of a Cod-fishery. The obliging all who keep business here, to have annually one, or more Vessels regularly clear'd out from Great Britain &c. is a point which, in my private opinion, ought by no means to be dispens'd with.

I find that this Coast is now annex'd to Quebec, and that the Canadians are to be reinstated in all their former possessions. This, I'm afraid, will affect many of us greatly, particularly our House, as we have put ourselves to a very great expence in erecting Houses, and other conveniences, and may possibly be

oblig'd to quit all, in favor of a Canadian, who may produce an old, unheard of Grant which he never made use of. Charles river is the only place we have that ever was occupied by them, and that only occasionally. As it will be a difficult matter for all the British

p. 1153

Adventurers to meet in order to consult on a Memorial, I take the liberty of humbly requesting the favor that Your Lordship and Your Board will take us under your protection, and do with us as it shall seem best.

His Majesty having now an incontestible right of disposing of any part of this Coast by Grant, I once more renew my request to Your Lordship to procure me all that part of the Coast, contain'd between Cape Charles and Cape St. Lewis, and the Islands which ly within those limits, reserving to all people a right of carrying on a Cod-fishery in any part thereof, and cutting what wood they may have occasion for, for the use of the same.

We have lately sent a Crew to Sandwich Bay, to take possession of the rivers there, and Kill Furs this Winter. The Esquimaux Indians have not been near us this Summer, the great indulgencies the Moravians met with from Government have enabled them to engross all the Trade of those People to our no small disappointment and loss, for we have upwards of £30 in goods on our hands which are not saleable anywhere else.

We should have occupied three more Salmon rivers this Summer but unfortunately the Vessel, which one of my Partners and myself were coming out in ran upon a Rock off the Lands end, and 'twas a miracle she carried us safe into Cork where we were oblig'd to leave her, and purchase another, in which we proceeded to this place, and had the misfortune to carry away our Masts about half Seas over; these accidents caused so much delay, 'twas too late in the season to attempt new Rivers.

Our Shalloway is this instant return'd from Sandwich Bay where she left our Furriers in possession of the Salmon Rivers; they saw no sign of any European ever having dwelt there; it is a place much frequented by the Nescaupick Indians, a People who subsist by hunting, they are good Furriers, speak broken French, are Roman Catholics, and have traded with the Canadians many years. One family have been here this Summer and sold us about fifty pounds worth of Fur.

Next Summer I propose taking a cruise as far to the Northward as the Season will permit, to visit all the Indian Tribes, and try if I can find out proper places for Summer Sealeries, and Whale fishery. Enclos'd is a List of all the Posts occupied by those British Merchants who carry on business without the Streights of Belleisle.

Wishing Your Lordship a good winter, and that Health and Happiness may attend yourself, and family, I beg leave, with the utmost respect and gratitude, to subscribe myself

My Lord
Your Lordships
much obliged and most Obedient
Humble Servant

GEO: CARTWRIGHT

[2 Dec.,
1774.]**REPORT *re* AGNEW'S GRANT.**

PRIVY COUNCIL 2 / 118. pp. 283-286.

See also C. O. RECORDS 195 / 10.

At the Council Chamber, Whitehall, the 2nd day of December
1774.

By a Committee of the Lords of his Majesty's most Honourable
Privy Council for Plantation affairs.

Present, etc.

Your Majesty having been pleased by your order in council of the 19th of May 1773 to refer to the Lords Commissioners for Trade and Plantations the humble petition of John Agnew of Sheuchan and associates in the county of Wigton in North America * humbly praying that your Majesty would be pleased to grant unto them all mines, minerals and metals, already discovered or hereafter to be discovered in the island of Newfoundland and on the coast or country of Labrador between the River St. Lawrence and Hudsons Streights, at a certain limited distance not exceeding sixty miles from the sea or flowing of the sea-water on any part of the said coast of Labrador under such reservations and restrictions as have been usual on like occasions, with directions to them to consider thereof, and report their opinion thereon to this Committee.

Whereupon the said Lords Commissioners have reported:

That the proposition contained in the petition does not in the general view of it appear liable to objection, but observe that the description of the limits within which the petitioners propose the grant to be made to them, appears so far as it regards the Labrador coast, to be attended with some difficulty, for, as on the one hand the proposing the River St. Lawrence as the boundary to the South is not sufficiently precise, so, on the other hand, by extending the grant northward to Hudsons Streights they will take in a very large part of what has been already granted to the Hudsons Bay Company, who are entitled by their charter to all mines and minerals within the territories granted to them; but they see no objection to advising your Majesty to grant to the petitioners all mines and minerals, that either have been or shall hereafter be discovered by them or their associates within the Island of Newfoundland and upon the coast of Labrador between the River St. John's and the southern limits of the territory granted to the Hudsons

Bay Company; Provided such grant be accompanied with the following condition and restrictions, viz.:—

First. That the petitioners shall annually lay before your Majesty in

* Must be mistake for North Britain; every other case North Britain.

p. 1155

Council an account, attested upon oath, of the state of their works, the number of persons employed therein, the quantity of ore, mineral, and metal dug up, and to what places exported.

Second. That in case the petitioners shall not lay before your Majesty in Council satisfactory proof of their having within seven years from the date of their charter caused diligent search to be made for, and used their endeavours to discover some mine or mines, and shall not within fourteen years from the said date lay full evidence, if required, before your Majesty as aforesaid, of their having opened, dug, and effectually worked some mine or mines or extracted some mineral, or metal, then and in either case upon an order or declaration of your Majesty in Council the Letters Patent shall cease, determine and become void.

Third. That there be reserved to your Majesty, your heirs and successors, one tenth of all ores, minerals and metals that shall be discovered, dug up or extracted by the pet^{rs}.

Fourth. That the said grant shall be made without prejudice to any right or possession of your Majesty's Canadian subjects, which may be claimed by them upon the coast of Labrador in virtue of the late Treaty of Paris.

Fifth. That a proper clause be inserted in the grant such as your Majesty's law servants shall judge proper, and effectual for preventing any establishments being made by the grantees to the prejudice and obstruction of the fishery.

Sixth. That it be expressly provided; that the said grant shall not be construed—to extend to prevent your Majesty, your heirs and successors from granting to any other persons within the said limits a liberty of searching and digging for minerals and metals; Provided such persons do not search for or dig within four miles of any shaft, pit, or place, where the petitioners or any of them, or their agents now have or hereafter shall have discovered any mine or mines, minerals or metals, or ores whatsoever.

The Lords of the Committee did on 3rd July 1773 take the said Report into consideration, and thought proper to order your Majesty's Attorney and Solicitor General to prepare a draught of a proper instrument to be passed under the Great Seal of Great Britain, containing a grant to the petitioners their heirs and assigns of all mines and minerals, which either have, or shall hereafter be discovered by them or their associates within the island of Newfoundland and upon the coast of Labrador between the River St. Johns and the Southern limits of the territory granted to the Hudsons Bay Company, inserting in the said draught conditions and restrictions proposed in the

said report of the Lords Commissioners for Trade and Plantations; And your Majesty's Attorney and Solicitor General, having accordingly prepared a draught of a grant to pass the Great Seal, of such mines, minerals and ores, and of a licence to dig and search for the same for the term of nine hundred and ninety nine years. The Lords of the Committee taking the same into consideration do agree humbly to lay the same draught of a grant before your Majesty for your Royal confirmation. [See also P.C. 1/60.]

**PRIVY COUNCIL ORDER ABOUT MINERAL GRANT
TO AGNEW &c.**

[2 Dec.,
1774.]

PRIVY COUNCIL 2/118, p. 289.
See also C. O. RECORDS 15/29.

At the Court of St. James's, the 2nd day of December 1774.

Present, etc.

Whereas there was this day read at the Board, a report from a Committee of the Lords of His Majesty's most Honourable Privy Council for Plantation affairs dated this day, upon considering the draft of a grant prepared by his Majesty's attorney and solicitor general of all mines, minerals, metals and ores whatsoever within the island of Newfoundland or upon such part of the sea coasts of Labrador, as lie within sixty miles of low water mark of the open sea, between the river St. John and the Southern limits of the territory granted to the Hudson Bay Company unto John Agnew of Sheuchan in the county of Wigtown in Scotland, George Stewart of the county of Wighton and Alexander Dunn, collector of the customs of the Island of Newfoundland Esqre., their executors, administrators and assigns, for the term of nine hundred and ninety nine years, under the reservations and upon the conditions therein expressed and contained.

His Majesty taking the same into consideration, is pleased with the advice of his Privy Council, to approve of the said draft (which is hereunto annexed), and to order as it is hereby ordered, That the Right Honourable, the Earl of Dartmouth, one of His Majesty's principal Secretaries of State, do cause a warrant to be prepared for passing a grant under the Great Seal of Great Britain conformable to the said draft.

[28 April,
1775.]**EARL OF DARTMOUTH TO LORDS OF ADMIRALTY.**

C.O. RECORDS 5/121.

Whitehall, 28 April, 1775.

MY LORDS,—

I have not failed to lay before the King your Lordship's Letter to me of the 24th Instant, desiring I would receive, and communicate to you, His Majesty's pleasure, whether you should make any alteration in, or addition to the Instructions given last year to the Commander of His Majesty's Ships upon the Newfoundland Station.

Upon this occasion, I have it in command from the King, to send your Lordships, Extracts of such parts of His Majesty's Instructions to His Governor of Quebec as relate to the Fisheries upon the Coast of Labrador and Islands adjacent thereto, from which your Lordships will observe, that tho' that Coast and those Islands have by Act of Parliament been re-annexed to the Province of Quebec, yet it is His Majesty's intention, that no material alteration should be made in the regulations, which had been wisely adopted for the encouragement and advantage of the Fisheries carried on there, whilst they remained parts of the Government of Newfoundland and therefore it is His Majesty's pleasure that you do instruct Rear Admiral Duff to make these Fisheries particular objects of his attention and enquiry, affording them every reasonable and necessary protection, and transmitting to your Lordships in order to be communicated to me for His Majesty's Information, the fullest reports of the state, condition and progress thereof. It is also His Majesty's Pleasure, that Rear Admiral Duff should likewise be instructed to give such support and protection to the Establishments of the Society of the Unitas Fratrum upon the Coast of Labrador, as shall correspond with His Majesty's gracious intention towards that Society, expressed in the Instructions to Gov^r. Carleton and in my letter to your Lordships of the 16th of June 1774.

*(Enclosure in No. 302.)***PETITION OF WM. BURGESS FOR GRANT OF
FISHING POST ON COAST OF LABRADOR.**

CAN ARCH. Q 11, p. 142.

The Right Honourable the Earl of Dartmouth;
one of His Principal Secretaries of State.

The Memorial of WILLIAM BURGESS of London Merchant

Humbly Sheweth—

That your Memorialist having been some years concern'd in the Fishery on the coast of Labrador under the controul of the Governor of Newfoundland, is in a great measure prevented carrying his undertakings to any extent unless favor'd by Government with a Grant of Land because, on that part of Labrador for which he now petitions to obtain Seals & other animals that breed in those Seas, it is necessary to keep a Settlement the year round to be ready for the opening of the Ice in the Spring, inhabited by a number of settlers; & to build such places for shelter as may secure them from the inclemency of the weather, & the Incroachments and Depredations of the Indians who wander about that Country, & who have at times cut off many people which might have been averted by this plan of settlement.

Your Memorialist begs leave to represent, that to accomplish his Design he must be at a considerable expence to raise those buildings, & victual & cloath the people, & the only chance he can see of reimbursing this expence, is by a grant confirming it to him, securing a certain possession—& that this design when put into execution will be of great advantage to the Commerce of this Nation, as the produce of it will be a supply of Oils for the lamps of this metropolis & other Cities of the Kingdom—Sealskins &c. besides the shipping & seamen necessary for carrying it on from hence,

The Situation your Memorialist petitions for is on the Coast of Labrador beginning at Island point to the Northward of petit Modeste crossing the river Desfrancois southward to a point of Land call'd Ance-du-Loup including the small Islands of grand —& petit St. Modeste.—this coast is inhospitable & the Islands barren sands unfit for Cultivation.

Your Memorialise humbly hopes that your Lordship will

consider the reasonableness of his plea & grant him his petition.

London May 1775.

1775.]

No. 305.

**EXTRACT FROM
LETTER FROM GEORGE CARTWRIGHT TO LORD
DARTMOUTH.**Sandwich Bay
14th Sept. 1775.

LABRADOR, DARTMOUTH PAPERS, 1775, SEPT. 14TH, pp. 134-142.

My Lord

I received with the greatest pleasure Your Lordships favor of the 17th of April last, and beg your acceptance of my sincerest thanks for the honor you have done me by writing so long and kind a Letter.

The Seal fisheries all over this Coast and Newfoundland failed entirely last winter; the Oil Killed by all the Crews will not pay one half the damage of the craft, yet the assurances the Adventurers have of being protected in the enjoyment of their Posts have made them fit out again this Season with as much spirit as if they had been successful last. Several new Posts will be established, but how many I could not learn as I have been here most parts of the Summer; We have taken one near this place. Five new Salmon Rivers have been fish'd this season, and turn'd out well, but as it always must be with new establishments, the most advantage has not been made of them for want of their being in proper order. Next year if no new regulations are made prejudicial to our interests every branch of the fisheries will be increas'd near one fourth of what they are at present. I know of some Posts taken on this side the Seal-Islands which are thirty Leagues to the Northward of Chateau. We built a new Cod Stage this Spring and Mr. Coghlan an other, the season was very late but it proved a good one at last. The lee continued much longer on the Coast than usual, I am inform'd many Ships have been lost on the Newfoundland Coast, one of ours received a good deal of damage, and I was catch'd with it at Mid summer, forc'd on shore on the Isle of Ponds, lay three Days upon rocks wedg'd in with lee and had a Gale of wind with frost and snow the whole time, the boat open'd and leak'd so fast I expected she would have fallen asunder every instant, I was oblig'd to heave half the cargo, which was Salt in Hogsheads, overboard, it was twelve days afterwards before we were able to proceed, & then ran through large pieces of scatter'd Ice as close as we could steer through it for eleven Leagues with a fresh of wind in dread every minute of either striking upon it and foundering, or its closing and squeezing us to pieces. We should have occupied an other Salmon River, but for a melancholic affair which happen'd to the furring Crew we sent here last, year,

they wasted their provisions, were starved to Death before I got round with a supply.

p. 1161

We have taken possession of all the Salmon Rivers in this Bay; and shall keep twenty-seven people here this winter to put them in order for next Season and have order'd ninety four new nets to be on purpose for them besides eighteen we had out this Spring. I am told that both Mr. Pinson and Mr. Coghlan, hearing how well this place turn'd out, intend sending Crews round next spring to dispossess us, pretending that we did not occupy the other four rivers this summer they have as good a right to them as us, but as we first discover'd them, have set up our marks, order'd nets and every requisite for fishing them next Season, and keep an extraordinary number of hands here this winter in order to prepare them in time, and they have never have been here, or even knew of them but from the report of our Servants, I am well assured Your Lordship will not allow of such proceedings.

* * * *

Your Lordship's
Most oblig'd and
Most Devoted
Humble Servant

GEO. CARTWRIGHT.

DUFF TO CARLETON,

[15 Sept.,
1775.]

RELATIVE TO WITHDRAWAL OF GARRISON AND STORES FROM YORK
FORT.

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND, VOL. 6.

St. John's,
15th September, 1775.

SIR,

I am to acquaint your Excellency that on my leaving England I received His Majesty's Commands that the Garrison of Seamen and Marines, now doing duty at the Blockhouse called York Fort, established on the Coast of Labrador, should be withdrawn upon my return from my Station, and in case I should be of opinion; that the Continuance of an establishment of this kind, should be of publick advantage, I was instructed upon the present Garrisons being withdrawn, to place in the said Fort a non Commission Officer and a few private Men of the Detachment of Troops, now doing duty in the Island of Newfoundland. In consequence of these Commands, immediately on my Arrival in this Country, I directed Captain Parker of His Majesty's Sloop Martin, one of my Squadron stationed for the Superintendance of the Fisheries on the Coast of Labrador to endeavour to procure me the Sentiments and opinions of the several Merchants and Traders there on the above matter, that I might be the better enabled to form a proper Idea of what should be most necessary to be done for the protection and interest of His Majesty's Subjects engaged in the aforesaid Fisheries, particularly such of them whose employments require their Residence in Labrador during the Winter. Captain Parker accordingly has furnished me with Letters from the Principal Merchants concerned in the different Fisheries upon the Coast of Labrador, saying that a Garrison in York Fort during this Winter would not contribute to the protection and safety of the Winter residents on that Coast, and his own opinion concurring therewith, and considering what a small number of the Military is now left in Newfoundland, I have not thought it necessary to send the party above mentioned, but have given Orders for the Garrison now in York Fort to be withdrawn, and have directed the Cannon to be secured in the Blockhouse, and the other Ordnance Stores to be returned into the Charge of the Ordnance Storekeeper at this place.

I am, with great Regard and Esteem,

Sir,
Your most obedient humble servant,
ROBERT DUFF.

His Excellency Guy Carleton, Governor, &c. &c.
Quebec.

DUFF TO DARTMOUTH,[14 Nov.
1775.]

REPORTING ON WITHDRAWAL OF GARRISON, ETC., FROM YORK FORT.

COL. COR. N'FOUNDL'D. VOL. 7.

Portsmouth,

14th November, 1775.

MY LORD

Captain Parker, Commander of His Majesty's Sloop Martin, who has been stationed this Summer on the Coast of Labrador, having, in pursuance of my Directions to him, made a very strict and particular enquiry respecting the establishment of the Blockhouse called York Fort on the said Coast, and procured Letters containing the Sentiments and opinions of the principal Adventurers in the Fisheries there with regard to the same, which, with Captain Parker's own opinion thereon, concurring that this Blockhouse is not, at the present period, of any Moment to the Settlers in Labrador; and on my considering what a small Number of the Military are now left in Newfoundland; I have thought proper, My Lord, to cause the people who composed the Garrison of the aforementioned Blockhouse to be withdrawn, the small species of Ordnance Stores which remained in it to be brought to St' John's, and delivered into the charge of the Ordnance Store-keeper there, and the Cannon with their Carriages, together with the Building, to be secured in the best Manner possible during the ensuing Winter, and untill your Lordship shall be pleased to signify His Majesty's pleasure in what manner the same are to be disposed of. This Matter My Lord, I have not failed to communicate by Letter to the Commander in Chief of His Majesty's Forces in North America and the Governor of Quebec, to whom I have given a particular Account of the Steps I have taken therein. I am, with the greatest Respect,

My Lord

Your Lordships

Most Obedient and most

humble Servant

ROBERT DUFF.

The Right Honorable The Earl of Dartmouth.

No. 310.**THE PARTICULARS OF THE CASE OF NICHOLAS
DARBY, MERCHANT.**

RECORDS OFFICE. REFERENCE C.O. 5/114.

He was the first Person who began to Establish a Fishery on the Coast of Labradore from Great Britain. He first embarked in this Hazardous undertaking in the year 1765, taking with him 150 men, All his Majesty's European Subjects, and found that Coast to answer the highest Expectation, he had formed of the Richness of its Fishery for Whale, Seal, Cod and Salmon but not being able to prevail on any of his Men to Winter there he sustained a considerable Loss during the Winter by Burning of his Houses and, Boats and Destruction of, his Salt by the Esquemaux Indians. This check did not however Intimidate him from prosecuting his Designs but having commenced Partnership with Mr. Michael Miller a very eminent Merchant at Bristol in order to enlarge his Capital, he embarked the following Summer 1766 with 180 men from England, and Ireland and an outset in Vessels Fishing Tackle &c to the amount of upwards of £8000 which can be produced by an account of Particulars, He was then encouraged by Governor Palesser who assured him he should have his particular attention and protection. This year he met with Tolerable Success and the most flattering prospect of future Advantages and some of his men consented to winter there but not being accustomed to the nature of the Fisherys on that coast in the Winter Season (and having no French or Canadian to Instruct them in the art of that Fishery he sunk a considerable sum). In the year 1767 he still pursued his Fishery with 160 Men, and in October of the same year the Esquimaux Indians came down upon a Party of his Men who were making preparations for the Whale and Seal Fisherys, murdered three of the said Men, and drove the rest from their post, they then Burned and Destroyed his Boats and Effects—which Effects amounted with the Disappointment of wanting them to more than £4000; This Disaster entirely dissolved the Partnership of the said Michael Miller and Company; In the year 1768 the said Darby applied to King and Council for some Relief setting forth his Losses that he sustained from these Wild Lawless People but had not any Relief; In the year 1769 he rose some Friends which enabled him to fit out from London in a small way and he sailed from the Port of London in May of the same year in a Vessel properly qualified with a Fishing Certificate &c he then proceeded to the Coast of Labradore and dispatched a Vessel in July with a cargo of Wet Fish for the London Market. This Vessel intituled him to take a proper place to carry on the Whale and Seal Fishery in the Winter which he did agreeable to the

on that Coast but as he had attempted several times to carry on the Winter's Fishery by people from Great Britain and had failed in the Execution of the same from want of their being acquainted with the Nature of the Fisherys on that Coast he then engaged one Lawrence Bidy with two or three more Canadians on Shares to carry on the Seal Fishery on the usual Custom and Method as they had when the French was possessed of that Coast, those men had wintered on that Coast more than 18 years when the French was in possession of Canada and they assured him at the time of his engaging them that they had taken the Oaths of Allegiance and that they were happy to serve as Subjects of Great Britain and during their Servitude they behaved with the greatest respect and obedience to him, Lieutenant Samuel Davis who had then the command at York Fort was acquainted at the time the said Darby Engaged those Men as was Captain Chapman of Ottolons Sloop of War who then had the Station on that Coast and several more Gentlemen employed in his Majesty's Service and the said Davis Chapman and others never once pretended to hinder the said Darby from employing the said Lawrence Bidy and those others beforemention'd till on or about the 11th August 1770 when Lieutenant Samuel Davis found that the said Lawrence Bidy and others had made a great Voyage, killing upwards of 1500 seals which would contain near 50 Tons of oyl with Skins &c. would amount to near £1000 a large sum taken merely by the knowledge of this Lawrence Bidy and others mentioned, and eight English or Irish which made the Complement of said Darby's Crew to 12 in number—about the said 11th August as the said Darby was sending his Oyl to Bradore a Post belonging to John Lymburner a Merchant in Quebec, and had agreed with one William Grant Agent to the said John Lymburner that the said Darby's Oyl should be shipt of for London. That on said 11th August about 8 o'clock in the Evening the said Samuel Davis came to the House of Nicholas Darby aforesaid at Forteaux Bay with about 12 Marines under his Command with Bayonets fix't and then Entred the said Darby's House with two of his Marines, pretending that he came in search of contraband goods and the said Samuel Davis with one of his men searched the said House but found nothing contraband therein. Whereupon the said Samuel Davis proceeded to the said Darby's Warehouse where he seized all the said Darby's Oyl to the amount of about 145 Casks with about 1500 Seal Skins with Boats Cordage &c. The said Darby asked the said Davis in a civil manner if he had either Gov^r. Byron or Captain William's authority for acting as he did; said Davis answered that he neither wanted Byron nor William's Orders for the colour of his Coat was sufficient to convince the said Darby of his authority he then called the said Darby an Impertinent puppy or to that effect and that he would send him off the Coast in Irons and Flog him as a Justice of

Peace and the next day he sent an Officer of Marines to Bradore, and brought off 39 Casks of oyl which in a piratical manner took off the post of John Lymeburner Merchant in Quebeck the said John Lymeburner's man came the next day to Forteaux Bav and made a Demand of the said 39 Casks which he refused to deliver and the

p. 1168

Ex. : said Davis then took all the said Darby's Oyl and what Effects the Boat would carry and proceeded to Ghatteaux Bay leaving an officer of Marines in possession of Darby's House and Effects that remained the said Darby was drove to the greatest Distress in attempting to pursue his Oyl and seek for Justice in a small open Boat; and on his applying to the said Davis for a Passage round to Saint John's with his Oyl which the said Davis refused, the said Darby then asked the said Tavis for one of his large Boats He then told Darby that he had forfeited all his Boats and Effects for employing three Frenchmen and Threatened him the second time to Flog him and that he might starve on the Coast like a Villain as he was for all which proceedings the said Darby is now deprived of all his Substance and drove of the Coast with only one single Dollar in his Pocket and is now in London destitute of Friends or money for other Particulars he refers to the affid^{ts}. of three of the said Darby's servants which are sworn before Lord Mansfield as well as the Certificate from Captain Williams Commanding Officer on the Coast when the said Davis took Darby's Oyl which is hereunto annexed.

The Draught of an additional Instruction to the Governor of Newfoundland directing him to receive the King's Tenth of all such metals, ores and minerals as shall be extracted from the mines granted to John Agnew, Esqre., and others, having been prepared pursuant to order by the minute of the 24th February last was approved; And a report to the Lords of the Committee of Council for Plantation affairs, accompanying the same was signed.

[July 3,
1778.]**PETITION OF MERCHANTS FOR SUPERINTENDENT
OF FISHERIES ON COAST OF LABRADOR.**

C.O. RECORDS, 42/37, p. 659.

To the Right Honourable Lord George Germain,
One of His Majesty's principal Secretaries of State.

The Petition of the Merchants concerned in the Fisheries on
the Coast of Labradore—on behalf of themselves and their
Correspondents in Canada.

Humbly Sheweth

That ever since the said Coast has been put under the
Government of Quebec, no notice has been taken thereof, nor
has any steps whatever been taken for the protection and
encouragement of said Fisheries. That for want of a Super-
Intendant or some person with proper powers for the above
purposes and to prevent or settle disputes that naturally arise
and which are more frequent where there is no legal authority
the produce of those Fisheries has been gradually reduced, and
is now only about one third of what it was some years ago.

Your Petitioners are of opinion that any Person vested with
proper powers to reside for two Months in the Summer on the
above Coast would sufficiently answer the purposes they have
in view And they humbly pray your Lordships will take the
same into your Consideration, and recommend such an
appointment—which will prove the most effectual means of
promoting and extending the Fisheries on that Coast.

And your Petitioners as in duty bound; &c.

ROBT. HUNTER.
JAMES MATHER.
DUNLOP WATSON.
DAVIS STRACHAN.

Endorsed: Petition of the Merchants

DATED 12TH AUGUST, 1778, PROVIDING FOR THE ESTABLISHMENT OF A
LIEUTENANT GOVERNOR OR SUPERINTENDENT OF FISHERIES ON
THE COAST OF LABRADOR.

B. 222, p. 49.

(G. R.)

Whereas the Merchants concerned in the Fisheries on the Coast of Labradore on behalf of themselves and their Correspondents in Canada, have represented the great want of a Superintendent or some person with proper powers for the protection and encouragement of the said Fisheries. And Whereas We have taken the same into our royal consideration, and conceiving that a Lieutenant Governor, or Superintendent of the Fisheries on the said Coast, would be of equal Utility there, as at the Bay of Gaspée, where such an Officer is appointed; We have been graciously pleased to consent to the Establishment of a Lieutent. Governor or Superintendent of Fisheries on the said Coast of Labradore. And Whereas a yearly Sallery of Two Hundred Pounds is inserted upon the Establishment of Civil Officers for our Province of Quebec, to the Lieutenant Governor or Superintendent at Gaspée, And we being of Opinion with the advice of the Commissioners of Our Treasury, that a like Sallery shall be annexed to the Office of Lieut. Governor or Superintendent of the Fisheries on the Coast of Labradore. Our will and pleasure is that the Lieutenant Governor or Superintendent of the Fisheries on the Coast of Labradore be established at a Yearly Sallery of Two Hundred Pounds accordingly; and our Will and pleasure further is that out of any revenue arising unto us within our said Province of Quebec, or out of such other Monies, as by an Act intituled an Act for making more effectual Provision for the Government of the Province of Quebec in North America, have been granted, & appropriated to the use & service of our said Province, You do issue & pay, or cause to be issued & payed unto the Lieutenant Governor or Superintendent of the Fisheries on the Coast of Labradore for the time being, or to their Assigns, the Annual Sum of Two hundred Pounds, the same to commence from the day of the date of our Commission, appointing such Lieut. Governor or Superintendent, & to be payable & paid Quarterly or otherwise as the same shall become due, during our pleasure.

And this shall be as well to you for making such payment, as to our Auditors & all others concerned in passing your Accounts for allowing the same thereupon a sufficient Warrant. Given at our Court at St. James's the Twelfth day of August 1778 in the Eighteenth Year of our Reign.

By His Majesty's Command

No. 317.

**LORD GEORGE GERMAIN TO GOVERNOR
EDWARDS.**

ORDNANCE FOR LABRADOR.

RECORD BOOK, Volume 7, page 170.

Whitehall, 2nd April, 1779.

SIR,

Your predecessor Vice Admiral Montagu, in Order to encourage the Occupiers of the principal Fishing Ports on the Island of Newfoundland, and the Labrador Coast to throw up some Works for security of their Craft and Stages, against the attacks of Privateers and the absence of the King's Ships gave them reason to expect they should be supplied with Arms and Ammunition for their defence, and for that purpose retain'd about forty Pieces of Iron Ordnance, which had been Ordered to be sent to Quebec last year, His Majesty approving of this measure has been graciously pleased to direct the Board of Ordnance to send out to Newfoundland 700 stand of Small Arms & with a proportion of Ammunition to be distributed by you, with the Iron Cannon among the principal Fishermen according as they shall appear to you to merit, taking an obligation from them to return the Small Arms and Cannon to the King's Stores when peace shall be restor'd.

Among those who by their own exertion have intitled themselves to particular notice is Mr. Coghlan, who carried on the most considerable Fishery on the Coast of Labrador from whence he beat off the Rebels Privateer Commanded by Grimes last Year, and he has engaged upwards of 250 Men to submit themselves to military discipline, and assist him in the defence of His Posts the next Season, he is therefore desirous of obtaining twelve pieces of Cannon and 250 Musquets with Ammunition in proportion, and as he has given so good a proof of his determination to use them properly, I think his request ought to be complied with.

I am, &c.,

GEORGE GERMAINE.

Governor Edwards.

24 May,
1788.Captain Cartwright's
application for
Touktoke Bay.

The Report of the Committee on Captain Cartwright's application, for a Grant at Touktoke Bay on the Coast of La Bradore, and an exclusive privilege of fishing in that Bay, with the translation, again read; Ordered—that it be referred to the consideration of the whole Council in Committee, to report upon with all convenient speed.

24th May, 1788.

The Report of the Committee of the whole Council to whom was referred The Report of the Special Committee upon Captain Cartwright's application for the exclusive Property of Touktoke Bay, on the Coast of Labrador, and for a Grant of Lands there; read as follows, viz.:—

To His Excellency The Right Honourable Guy Lord Dorchester, Captain General & Governor in chief of the Colonies of Quebec, Nova Scotia & New Brunswick and their dependencies; Vice-Admiral of the same; General and Commander in chief of all His Majesty's forces in the said Colonies and the Island of New Foundland, &c. &c. &c.

Report of the whole Council, in Committee, to whom by Your Excellency's order in Council of the 20th of March last, was referred. The Report of the Special Committee upon Captain Cartwright's application for the exclusive property of Touktoke bay, on the Labrador Coast, for the purpose of a Fishery, and for a Grant of Lands there. The Committee met, at the Council Chamber Thursday the 3d of April 1788.

Present:

The Honourable Henry Hope Esquire Lieut. Governor.

William Smith Esquire Chief Justice.

Edward Harrison	Paul Roc De St. Ours
John Collins	Francis Baby
Adam Mabane	Jos. De Longueuil
J. G. C. De Lery	George Davison—Esquires
George Pownall	Sir John Johnson Bart.
Picotte De Bellestre	Chas. De La Naudiere
John Fraser	René Am. De Boucherville
Henry Caldwell	&
William Grant	Le Cte. Dupré—Esquires.

His Honour The Lieut. Governor in the Chair.

The Report of the special Committee was read in both Languages, by the Clerks.

The 36th Article of His Majesty's Instructions to Your Lordship dated at St. James's the 23d. of August 1786 with a translation was read, whereof follows a Copy:—

“On all such parts of the Coast where there are no Canadian possessions, and more especially where a valuable Cod-fishery may be carried on, it will be your duty to make the interest of our British Subjects going out to fish there, in Ships fitted out from Great Britain, the first object of your care, and as far as circumstances will admit to establish on that Coast the regulations in favour of British Fishing ships which have been so wisely adopted by the Act of Parliament passed in the Reign of King William the Third, for the encouragement of the Newfoundland fishery; and you are on no account to allow any possession to be taken, or Sedentary fisheries to be Established, upon any parts of the Coast, that are not already private property, by any persons whatsoever, except only such as shall produce annually a Certificate of their having fitted out from some port in Great Britain.”

And Your Excellency's order of Reference to the Special Committee dated the 25th of June 1787, read in the following words, viz:—

“25th June 1787.

“His Excellency communicated to the Council a letter from Lord Sydney, dated Whitehall 5th April 1787 concerning Captain Cartwright's

application for a Grant, and the exclusive property of Touktoke bay, on the Labrador Coast, for the purpose of a fishery, with several other papers upon that subject;— Referred to the Committee named the 31st of May for the Fisheries.“

The Lieutenant Governor proceeded to read over, a second time, the Report of the special Committee, by paragraphs. The first part read in the words following:—

“At a Committee of Council appointed to consider the Subject of the Fisheries in the Province, and to whom was referred sundry papers, transmitted by Lord Sydney one of His Majesty's principal Secretaries of State, relative to an application made by Captain Cartwright for a Grant in Sandwich-bay and for the exclusive property of Touktoke-bay, both on the Coast of Labradore.

“Present:

“Messieurs Finlay
Dunn
Harrison, Pownall,
Grant
Baby &
Dupré

“Who beg leave to report to His Excellency The Right Honourable Lord Dorchester,

“That they have attentively perused the papers referred to them, and beg permission to lay before Your Lordship, a concise sketch of Captn. Cartwright's case, taken from his own statement.”

In the year 1770 he embarked in England, and sailed for Charles-River on the Coast of Labrador, on a scheme to prosecute very extensive fisheries on that shore.

In 1771 he established a Seal-Fishery at Cape Charles, a Salmon Fishery in Charles River, and Cod Fishery round Charles Harbour. He explored a considerable extent of Coast in order to discover the Scites for Sedentary fisheries, and with a view to secure a friendly intercourse with the Esquimaux Indians.

He exerted himself by every means in his power, for thirteen years, to improve the fisheries on the Labrador Coast; but tho' his unwearied endeavours benefited the Mother Country they ended in *his* ruin; for after struggling with unforeseen crosses, he and those concerned with him, sunk upwards of £20,000. He represents that repeated Shipwrecks, Depredations of the Enemy, Fire, and the Manouvres of Messrs. Noble & Pinson (sedentary Fishers on that Coast) obliged him to abandon Labrador, and on his return to England he was made a Bankrupt.

He sets forth that the discoveries he made, extended the Fisheries on that coast for more than seventy leagues, and that by his success in gaining the confidence of the Esquimaux, and in bringing about a friendly intercourse between that Nation and the Mountaineers—the fur trade is greatly increased, and the King's Subjects frequenting that Coast, now pursue their business unmolested by the Natives.

Captain Cartwright seems to think that he is intitled to some recompence for the advantages he has procured to the Mother Country, and he wishes to have it in his power to look for a fortune on that Coast where he lost one, and with that intent he prays for a Grant in Sandwich bay which Noble & Pinson now possess, notwithstanding 'twas he who first Established a Seal fishery there. He says it would be but rendering him bare justice, and a merited punishment of that House for their reprehensible conduct towards him; and he further prays to have the Exclusive right to Touktoke-bay with all the Islands there in lying, and a tract of Land running half a mile back from high water mark, all round the Bay; his sole view in praying for this Grant is to carry on the seal Fishery, and a Trade with the friendly Indians, who reside chiefly in that bay. He pretends that if they are left open to the inroads of petty Adventurers, these people will be totally undone by getting nought in Exchange for their commodities but Rum, whilst they stand in need of coarse cloth, blankets, and other English manufactures.

Lord Sydney's Letter of the 5th of April last, notes that His Lordship would be very glad to favour Captain Cartwright's wishes, if it could be done without affecting the property of other people.

The Lieutenant Governor after having read the foregoing part of the Report of the special Committee, proceeded to read the following paragraph,

It is to be presumed that though Captain Cartwright may have been the first to establish a Seal-fishery in Sandwich-bay, Noble & Pinson could not have set themselves down there, whilst Capt. Cartwright occupied it, according to the rules established for regulating the Fisheries on that Coast.

The Question was put “Whether this Committee concur in opinion with the special Committee on the foregoing clause, or not?”— Debates arose—It was carried in the affirmative by 16 Ayes agst. 2 Naves.

COLONEL CALDWELL

and

Mr. JUDGE MABANE in the Negative.

The Lieutenant Governor then read the next paragraph in the words following,

“From the want of Information respecting the local

situation of Touktoke-bay, the Committee cannot with any accuracy ascertain whether the Canadian Grants extend so far, but they have understood that Cape Charles is the furthest establishment for the fishery of Seals, made under the antient Government. The Committee conceive from the Circumstances related in Captain Cartwright's case, of Canadians

p. 1182

having wintered in Touktoke-bay in 1785 and 1786, and of two Englishmen having been there in great distress, that it is an inlet of the Sea ten leagues deep, within the great Esquimaux bay, far North of Cape Charles, where a Canadian Crew, fitted out from hence, actually did winter, and where two Englishmen were cast on shore and suffered great hardship.

The Question of concurrence was put on this paragraph, and it was carried unanimously in the affirmative.

The Lieutenant Governor read the following paragraph.

“By the 36th Article of His Majesty's Instructions to Your Lordship bearing date the 23rd of August 1785, the Committee find that possession is not to be taken or sedentary fisheries established, on any parts of the Coast of Labrador, except by such as shall produce a Certificate of their having fitted out from some port in Great Britain.”

Then the Lieutenant Governor proceeded to read the following paragraph,

“The Committee therefore humbly conceive that if it shall be Your Excellency's desire to grant Captain Cartwright's prayer for the Touktoke fishery, with an extent of Land half a mile in depth from High-water mark all around the Bay, with its Islands, the Possessor, whilst the 36th Article of His Majesty's Instructions is in force, could not exclude Adventurers fitted out in Britain from establishing fisheries in such parts of the Bay as might remain unoccupied by him, notwithstanding any grant of the shore made to him.

And the Question of concurrence was put thereon. It was carried unanimously in the Negative, without a division.

The Lieutenant Governor read the next paragraph in the following words,

“It seems to the Committee that the appointment of Justices of the peace (as Captain Cartwright wishes) on that extensive Coast, where there's no civil Officer to support the authority of a Magistrate, by executing his Warrants, nor places for holding Offenders in confinement, would answer but little purpose in checking improper proceedings in that distant part of the province.

The Question of concurrence was put, and carried unanimously in the Affirmative.

The Lieutenant Governor then read the last paragraph of the Report in the words following,

They most humbly submit whether a small armed Vessel commanded by an officer of Your Excellency's appointment, and in the Commission of the peace, might not be of service in cruising along that Coast, visiting each

fishing post frequently in the course of the summer, punishing small offences according to Law, and bring up all atrocious Offenders in the Fall to be tried. And this mode might be followed until a better could be adopted for regulating the affairs of that Coast. At present the Committee are not sufficiently informed of the situation of things in that quarter to qualify them to propose a better plan than this temporary expedient, which would in the mean time shew the Fishermen and others, that Offenders will not escape unpunished.

Council Chamber } The question of concurrence was put,
24 May, 1788. } and carried unanimously in the
Negative adjourned, May 1st.

[1791(?)] The same Members except the Chief Justice, Judge Fraser and Sir John Johnson met & humbly submit the above to Your Excellency's consideration.

By order of the Committee
(signed) HENRY HOPE Lt. Govr. & Chairman.

HOUSE OF COMMONS.**

COLONIAL OFFICE RECORDS 325/7.

Undated, Circa 1792.

The Committee appointed to enquire into the state of the Trade to Newfoundland, and to report the same, as it shall appear to them, to the House; and who were empowered to report their proceedings, from time to time, to the House;

* * * *

John Reeves Esqre., Chief Justice of the Island of Newfoundland being called on was asked if he had any information to give to the Committee respecting the government and the administration of justice of the Island of Newfoundland. He desired to be permitted to deliver in the following paper of remarks.

* * * *

Another point to which I beg leave to draw the attention of the Committee is the perfect condition of those who carry on the fishery on the coast of Labrador. Although this is not within the commission of the Governor of Newfoundland, yet it so happens that he is the only person who is in the way of knowing anything about it. The ship which is sent round the French limits never fails of looking in on some part of the Labrador coast; and it appears from the representations of the captains who command those ships, that there is great need of some authority to interpose, and see justice done between master and servant, at least as much need as there ever was at Newfoundland. The employment and relation of persons is the same; the abuses and grievances are the same; amongst these is that old one of keeping servants on the coast from year to year; all which is more uniform and insurmountable, in proportion as the merchants are few, and can therefore combine to keep all their people in a more absolute state of dependence.

The coast of Labrador is under the government of Canada; but the influence it feels from a center so far removed is very small; in truth, there is no government whatsoever on the coast of Labrador, as I am informed by those who have been there.

This coast was, after the Peace 1763, put under the Governor of Newfoundland, it being very properly thought that, as a fishery, it would make a natural appendage to this government. But the Governor, having set about

p. 1186

applying to the seal fishery on that coast the system of laws made for Newfoundland, which upon consideration, were

thought not adapted to the fishery on that coast; it was judged proper to disjoin it from the Newfoundland government; and this was accordingly done by Stat, 14 Geo. III. for new modelling the Government of Quebec; and in the same Act, power was given to His Majesty to re-annex it again to the government of Newfoundland, when he should so please.

It may perhaps be doubted, whether this was the only or best way of curing the evil; and it is very much to be wished, that this measure was reconsidered, and some plan devised for affording to that deserted coast, something like the effect of a civil government.

[10 Jan.,
1798.]**CAPTAIN AMBROSE CROFTON'S REPORT TO
GOVERNOR WALDEGRAVE.**

RECORD BOOK, ST. JOHN'S NEWFOUNDLAND. Volume 14, page 122.

SIR,

During my continuance in Temple Bay a large Shallop arrived from the Northward, with and belonging to a Tribe of Esquimaux Indians, consisting of six men, five women, and seven children, they were on their passage to the Harbour of Bradore, where it was their intention to remain the Winter with the English Fishermen, and to be employed in the Seal Fishery. They had been so provident as to bring with them some Oil and Whalebone, to barter for English Provisions and necessaries, which they are now very partial to, preferring European Cloathing to the Seal Skin dresses they formerly appear'd in, and are now so much civilised as to abhor raw meat and always dress their victuals in a very decent manner, having several cooking utensils with them. They have likewise laid aside the Bow and Arrow for Musquets & are excellent Marksmen.

The devastation committed by the French Ships in this Place, I suppose has discouraged the original Proprietors, Messrs. Pynsant and Noble, from carrying on Trade with any Spirit, having only one Shallop fishing here this Summer, which has discouraged the Indian Trade, as those People now require cloathing, Biscuit, Powder & Shot, &c. and from their present deportment, it's most probable that in future they will become a very great acquisition to our Commerce. I am sorry to observe that want of knowledge of their language, and their short stay, prevented my obtaining all the information respecting them that I wish'd, but am confident they are Numerous, being not less than Four Thousand along the Coast to the Southward of the Moravian or Unitas Fratrum Settlement, of whom they seem not to have any knowledge. Mr. Noble's Agent who resided here the three last winters, has not seen more than twenty Esquimaux Indians at one time at that Place. He says they form themselves into small Tribes under the Control of a Chief of their own choosing, to whom the most implicit obedience is paid, and are strictly honest and well behaved, which I had an opportunity of observing, having the whole Tribe to visit me twice on Board the Pluto, and sent them on Shore much pleased with their reception.

I likewise beg leave to make known to you that the Esquimaux Indians are more inclined to pursue Commerce at a greater distance than any others that I have met with, not being particularly partial to their own Country, as the first object is to

obtain a large Shallop sufficient to transport not less than six men with their Wives and Children. The one that I met with had six Canoes hoisted in, and for those Shallops they pay a considerable amount in Oil, Whalebone and Furs. A Merchant from Quebec who has a small settlement about seventy leagues to the Northward of Temple Bay, has

p. 1190

hitherto been the principal supplier but from the great alteration I have observed in the Esquimaux Indians since I met them twenty years ago, it's probable in a short time they will navigate the Coast in Vessels of their own construction, as I discovered in their Shallop, Carpenter and Shipwrights Tools of all discriptions. Before I conclude my observations respecting the Coast of Labradore, I think it proper to acquaint you that Vessels from the United States of America have arrived here every Year since the Treaty of Peace, with that country and as there has been no Ship hitherto appointed to attend their Motions, it's most probable they take every opportunity of Trading with the Indians. I have likewise heard that they have interrupted the British in the Salmon Fishery, having placed their Nets in Rivers which our Fishermen consider contrary to Treaty, Harbours, Bays and Creeks being particularly specified, Rivers not being mentioned.

It will therefore be satisfactory to have the Right of Fishing in Rivers more fully explain'd as reference will be made to the first Officer that happens to be on the spot during the time of catching Salmon, which was finish'd before my arrival on the Coast of Labradore, and the American vessels departed.

Having caused the British Colours to be hoisted and formally retaken possession of the Coast in His Majesty's Name, and obtained every information in my power respecting the state of the fishery's along the Coast of Labradore (Viz No. 3 which I had the honor of sending you at St. John's) I took advantage of the first Easterly wind on the 25th August, and passed through the Streights of Bellisle close along the Labradore Shore, as far as the Esquimaux Islands, without meeting any particular circumstance & then cross'd over to Point Rich on the Island of Newfoundland, look'd into the Bay of Ingornactroix & from thence close along shore to the Bay of Isles, without meeting any appearance of Inhabitants.

* * * *

The 5th Article which relates to the Americans fishing at Newfoundland, seems not perfectly understood with respect to the Salmon Fishery, as on the Coast of Labradore and most parts of Newfoundland those Fish are caught in Rivers, where I have been informed the Americans have placed their Nets, although Coasts and Bays and Creeks are particularly mentioned which excludes them from the Salmon Fishery, therefore the Officer that may be employed on that Coast must expect reference made to him.

Having mentioned the state of the Magdaline Islands in the

preceding part of this Narrative, it will be unnecessary saying anything on that head.

The 6th Article particularly specifying the Coast of Labradore, has been in a great measure reply'd to, have only to observe that from its great extent there are sufficient and convenient situations for many adventurers, and I hope that the state of the Esquimaux Indians may be greater inducement to trade on that Coast than formerly. I am sorry to observe that the British have not attempted a Whale Fishery, although the Americans constantly send Vessels to Hermitage Bay, Newfoundland, and this year two small Schooners from Boston between the 11th May and 7th of August, killed

p. 1191

nineteen Whales which produced 374 Barrels of Oil. The Crew did not receive Wages, were on shares, and provided their own Provisions.

My reply to the 19th Article is, that it has been a constant practice, for the last four years, and I believe long before that time to sell, Mortgage and Lease Houses, Lands, &c. in all parts of Newfoundland, particularly at St. John's, where Public Notice is frequently given of such proceedings, and even from the Supreme Court of Judicature, the High Sherriff has received Instructions to sell Houses &c. when the defendant was not otherways able to pay. In short landed Property in Newfoundland is now considered as valuable there, as in any part of England, and the Rents are no where now regularly paid, but should an investigation take place with respect to the landed property & Houses, it would be very difficult for many of the Proprietors to prove a Title.

When I was at the Coast of Labradore, I made enquiry concerning the Society of Unitas Fratram, but could not receive any information respecting them, therefore conclude their Settlement is farther North, than were Messrs. Noble & Pysant have any trade, but apprehend information respecting them may be obtained in London.

Having reply'd to the several Articles of Instructions in succession, it only remains for me to speak more fully to the latter part of the 17th Article, which require that I should consider and make report of such measures as it may be proper to pursue for the prosperity of the Trade and Fishery, which in my opinion now becomes a very difficult task.

The Island of Newfoundland having more the appearance of a Colony than a Fishery, from the great number of People that have annually imperceptibly remain'd the Winter, who now have Houses, land and Families, it's true those people are employed in the Fishery, but so much attach'd to Newfoundland, that it's with the greatest difficulty a few of them can be persuaded to make a voyage to Market, even in a Vessel belonging to the Island, and the population of this Island has rapidly increased, that in a few years an extensive Fishery may be carried on there by the Inhabitants alone, without receiving annual supplies of Men from England and

Ireland, as heretofore. This Idea certainly makes landed property so desirable, and consequently the great object of being a Nursery for Seamen, and having an opportunity of making use of those Men during War, is totally frustrated by the fishermen remaining at Newfoundland the Winter, who are now so numerous, that it would be a serious and difficult task to dispossess them. This great evil has arisen from the land being cultivated and Houses suffered to be built.

Sir,

Your most obedient and most humble Servant,

To

(Signed) AMB.

CROFTON.

[9 Sept.
1807.]H.M. Ship
Topaze.**GOVERNOR HOLLOWAY TO LORD CASTLEREAGH,**

SUGGESTING RE-ANNEXATION TO NEWFOUNDLAND.

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 19, page 197.

Fort Townshend, 9th Sept. 1807.

MY LORD,

By His Majesty's Ship Topaze I have the honour to relate to Your Lordship a circumstance which I feel of importance for Your Lordship's consideration.

The Americans that fish on the coast of Labrador having long since been suspected (and upon good information) of carrying great quantities of Provisions as well as other contraband Articles, which they sell and barter to the British Merchants who with great facility tranship them in small quantities to this Island.

It has been usual for the Commander in Chief of Newfoundland to send Vessels to the Coast of Labrador, not only to protect His Majesty's Subjects, but the Commanders also have orders, to prevent any illicit Trade between them and other Powers.

The Adonis Cutter Lieutenant McKillop, a few days since detained two American Vessels upon correct information, of their having sold and bartered a great quantity of Provisions and other Articles, and had laden with Fish, not caught or cured by the people of the United States: they are sent here for adjudication where it is alledged they cannot be tried as the Offence was committed without the Jurisdiction of this Government, if they are liberated it will be giving great encouragement to the Americans to pursue this system which must prove highly injurious to this Majesty's Commercial Interest. It is impracticable at this Season of the year to send Vessels to Quebec and it would also be attended with great inconvenience in the event of liberation from the situation of that Port.

The Coast of Labrador was formerly annexed to this Government, and, I understand by my Papers from the Admiralty was removed to Quebec on account of a few Grants to Individuals, which extend but to a small District. I therefore humbly beg leave to suggest to Your Lordship the advantage which will arise to His Majesty's Government by annexing the Coast of Labrador to this Command as the most effectual mode of suppressing this Illicit Trade which otherwise will prove a great evil to the Trade of Great Britain.

I have the honor to be,
My Lord,

Your Lordship's most obedient humble servant,

J. HOLLOWAY.

The Right Honorable Viscount Castlereagh.

No. 329.

[18 Nov.
1808.]**GOVERNOR HOLLOWAY TO LORD CASTLEREAGH.**

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 20, page 113.

Isis at Spithead,
18th Nov. 1808.

MY LORD,

Having this Year had more time to examine and reflect on the Observations made by my two Predecessors, together with the pointed Remarks made by the Lords of Privy Council on the subject of the State of Newfoundland, which were communicated to me on my appointment to that Government, I cannot but lament that it was ever recommended to His Majesty's Ministers by my Predecessors to grant Leases of Land on that Island: it was striking at the Root of the Law which had for so many Years regulated this Fishery as a Nursery for Seamen, and meant to discountenance Residency; the great and improper Increase of which tends to Colonization; it likewise gives the Inhabitants a kind of Sanction, to claim from Occupancy, Lands that are no longer used for the Fishery, for which purpose alone they received their Grants from the different Governors, agreeably to His Majesty's Instructions; consequently can have no legal Right to sell, mortgage, lease and transfer, as is now become a daily Practice. This subject requires most serious Consideration, and I shall be happy to meet their Lordships on it whenever it may suit their Conveniency.—This Island is utterly incapable of raising sufficient Food for its own Consumption, and the Inhabitants will most probably look where they ought not for Supplies. I have read with great Attention the Remarks made on my Predecessors' Observations, by the Lords of Council for Trade and Foreign Plantations, and am fully convinced that they are perfectly correct in their Opinion whenever the Ancient System is departed from and Colonization encouraged.

* * * *

If it is their Lordships' intention (and I am every day more and more convinced of its propriety,) to annex the Coast of Labrador to the Government of Newfoundland, as heretofore, it will be necessary to include it in the new Judicature Act.—At present the most atrocious Deeds may be committed, and the

Lease Money.

Offenders go unpunished, Irregularities being constantly practiced; as also by the Americans who frequent that Coast, which I have no Authority to take Cognizance of, although only to be detected by my Cruizers; Quebec being too remote for the Establishment of any Civil or other Authority.—The number of Vessels from the United States frequenting or

Coasts of Newfoundland and Labrador, have been but few in comparison with former Years; the number this Year not having exceeded two or three hundred.

* * * *

I have paid out of the Lease Money the several sums as directed by Your Lordship's letter dated 10th June last, and a stated Account with Copy of the said Letter is herewith annexed in Appendix C, several Persons are in Arrear for Lease Rents alluding that they have not yet inclosed the Ground, which till done is a Plea for non payment, such an Excuse having been accepted by my Predecessor.—How far this may be allowable, and what steps should be taken, I have for Your Lordship's Decision, and further Instructions thereon.

I have the honor to be, My Lord,

Your Lordship's most obedient humble servant,

J. HOLLOWAY.

ENCLOSING PAPERS RE SEIZURE OF AMERICAN SCHOONER "MALINDA."

RECORD BOOK, ST. JOHN'S, Nfld. VOL. 20, page 136.

Hatchet's Hotel, 24th. Jany. 1809

SIR,

I have the honor to inclose to you a parcel of Papers from N^o 1 to N^o 8, which relate to a Seizure of an American Schooner named the Melinda, made on the Coast of Labrador by Lieut. McKillop, Commanding His Majesty's Schooner Adonis, and sent by him to St. John's for adjudication; but the Vice Admiralty Court there, not having Jurisdiction over the Coast of Labrador, the Vessel alluded to has lain ever since in St. John's Harbour waiting for some steps to be taken by Government in her behalf— It was too late in the Season of 1807 after her arrival at St. John's to have sent her to Quebec, and the last year she was not in a state to go with safety.— These circumstances together with the accompanying Papers will shew that this Seizure was a proper Detection of an illicit Trade carried on at Labrador, and that the steps pursued by the Captors were proper, who had no Means or Alternative of bringing this Business to a legal Decision.

I therefore have to solicit their Lordships that the whole of these Papers may be laid before Sir William Scott, that he may see the hardship of the case, and decide thereon accordingly, in order that the Captors might be exonerated from any Consequences that might be incurred by this unavoidable Delay.

I have the honor to be

Regd. 16 August, 1815.

**REGISTRY OF DEEDS AND COMPANIES, SUPREME
COURT, ST. JOHN'S, NEWFOUNDLAND.**VOLUME 8, LABELLED "MISCELLANEOUS DEEDS, 1813 TO 1815, p.
504.

Be it remembered that on the sixteenth day of August One thousand eight hundred and fifteen, The Honorable Caesar Colclough Chief Justice of the Island of Newfoundland, Etc., etc., here recordeth, that on this day came Mr. James Milledge, of Saint John's, Newfoundland, Merchant, and brought certain instruments of writing which he prayed might be recorded in His Majesty's Supreme Court Newfoundland, and they are recorded in these words, vizt:—

This Indenture made the fifth day of April in the year of Our Lord one thousand eight hundred and fifteen, Between Thomas Slade of the Town and County of Poole, Merchant of the one part and John Slade of the same place, merchant of the other part. Witnesseth that the said Thomas Slade in consideration of the sum of Five shillings of lawful British money to him in hand paid by the said John Slade, at or before the Execution hereof the receipt whereof is hereby acknowledged. Hath granted, bargained and sold and by these presents, Doth grant, bargain, and sell unto the said John Slade All that his, the said Thomas Slades one undivided Moiety or half part and all other his the said Thomas Slades right, title and interest of in and to All those fishing Rooms, Messuages, or Dwelling houses, plantations, storehouses, flakes, stages, wharves, buildings, beaches, lands and premises, situate, lying and being at or near Twillingate in the Island of Newfoundland, and Battle Harbour on the Coast of Labrador in North America commonly called or known by the name of Slade Rooms and premises and now in the occupation of the said John Slade and Thomas Slade. And also of and in all rivers waters, banks, fishing, woods, rights of pasturage and other rights and privileges thereto respectively belonging and appertaining or to or with the same or any part or parcel thereof held, used, occupied or enjoyed or known as part, parcel, or member thereof. And also of and in all Gardens, orchards, backsides, Lands, tenements, meadows, pastures, feedings, trees, woods, ways, paths, passages, waters, fishhns,

rights, privileges, profits, advantages, hereditaments and appurtenances whatsoever to the said several fishing rooms or plantations and premises or any or either of them belonging or in any wise appertaining and to the reversion and reversions, remainder and remainders, rents, issues and profits thereof and of every part and parcel

p. 1203

thereof To have and to hold the said one undivided moiety or half part and all other the Estate right and interest of the said Thomas Slade herein before granted, bargained and sold, or intended so to be of in and to the Fishing rooms, or plantations and all and singular other the hereditaments and premises herein before described or mentioned to be situate at Twillingate and Battle Harbour aforesaid and of in and to their and every of their appurtenances unto the said John Slade, his Executors, Administrators and Assigns from the day next before the date hereof for and during and unto the full end and term of one whole year from thence next ensuing and fully to be completed and ended. Yielding and paying at the expiration thereof the rent of one pepper corn only if demanded To the intente that by virtue of these presents and of the statute made for transferring uses into possession. He the said John Slade may be in the actual possession of the said Moiety and premises hereby granted, bargained and sold with their and every of their appurtenances and every part and parcel thereof and may be enabled to accept and taken a grant and release of the reversion and inheritance thereof to him, his heirs and assigns to the only proper use and behoof of him the said John Slade, his heirs and assigns for ever.

In Witness whereof the said parties to these presents have hereunto set their hands and seals the day and year first above written.

**PETITION OF PHILIP BEARD AND CO. TO HIS
ROYAL HIGHNESS THE PRINCE REGENT IN
COUNCIL.**

**THE HUMBLE PETITION OF PHILIP BEARD AND CO.
OF DARTMOUTH.**

Sheweth—

That your Petitioners are proprietors of a Fishing Establishment situate at Sandwich Bay in Lat. 55 upon the Coast of Labrador.

That finding their rights envaded by transient Vessels from Nova Scotia and the United States no Kings Ships having been stationed upon that Coast for the protection of Persons who like your Petitioners have Permanent establishments there since the Summer of 1816, and that your Petitioners will therefore be obliged to abandon their establishments and Fishing Trade unless protection be afforded them.

Your Petitioners humbly beg leave to bring the subject under your Royal Highness consideration, and deeming it necessary to this end to state to your Royal Highness the origin and progress of their said Fishery at Sandwich Bay, and the grounds of their exclusive right thereto, your Petitioners most respectively beg leave to represent that by the Act 10 and 11 Wm. 3 Cap. 25 it was declared within the realm of England or the Dominions thereunto belonging to Trade and Fish freely at and about the Island of Newfoundland and the adjoining Islands and that aliens or Strangers should be excluded from such trade and Fishery.

That by the Act 49 Geo. 3, Cap. 27, Labrador was annexed to and made part of the Government of Newfoundland and remains so at present time.

That in the Year 1770 Mr. George Cartwright sailed from England and took possession of several Posts on the Coast of Labrador for the purpose of prosecuting the Cod Salmon and Seal Fisheries, and was the first Settler there.

That the said George Cartwright having contracted a friendship and resided some time with the Esquimaux Islands during which time he had several Vessels employed in the Fisheries, he ultimately settled in Sandwich Bay (the spot now occupied by your Petitioners) and built convenient Houses on

the different Rivers in the Bay, and also at its entrance for the various purposes of the Fishery.

That in order to prevent himself from interruption the said Cartwright in the Year 1772 made application to the Right Honorable the Earl of

p. 1209

Dartmouth, then President of the Board of Trade, and in consequence a proclamation was issued the following Fishing Season whereof the following is a copy.

VIDE RECORDS, Vol. 5, page 167.

That protected by said proclamation Mr. Cartwright continued to enjoy the peaceable possession of His Salmon Fishery in the Rivers at Sandwich Bay, his cod fishery at the entrance thereof, and his sealing posts on the usual Coasts, strictly conforming to the stipulations of having his shipping every Season from England and returning thither at the end of it, leaving a sufficient number of Artificers and Men to protect his possessions from the Natives and to prepare necessaries of Wood and for repairing the Stages in the Spring.

That during the American War his said Settlements were plundered by the Crew of the Boston Privateer Minerva, when Mr. Cartwright's property to a large amount being carried off he was ruined and became a Bankrupt.

That upon this occasion the said Settlements at Sandwich Bay were purchased of his assignees by Messrs. Noble Pinson and Co. of Dartmouth who thereupon rebuilt the Warehouses necessary for the Fishery and continued to carry on the Fishery regularly until the Year 1811, and 1812. When the Partnership being dissolved the Settlements at Sandwich Bay were assigned to Messrs. Noble and Hunt as their part of the concern who continued the Fishery until the Year 1816, when the Establishment was sold to your Petitioners, and who have since annually carried on Fishing thereat as required by the Proclamation of the Year 1773. That in the Month of July, 1816, your Petitioner per Beard went out to Sandwich Bay with three Vessels and about 80 men, in order to prosecute the Fishery when he found that a Mr. McPherson had arrived from Nova Scotia and had taken possession of part of the Bay, and was Fishing for Salmon, and preventing the Salmon from taking the usual course to the Rivers which had been for so long a period uniformly Fished by your Petitioners predecessors. Your Petitioners also found that a Vessel had arrived from Halifax in Nova Scotia.

That However His Majesty's Ship "Hazard," commanded by Capt. Cookesley (who had appointed Surrogate for Labrador Coast by the Governor of Newfoundland) having

arrived out soon after a representation Was made to him of these encroachments upon your Petitioners Fishery, whereupon Capt. Cookesley compelled the Vessel to desist, but did not think himself authorised to send away Mr. McPherson, but previously to leaving the Harbour issued certain general instructions wherein it was declared that no strangers are to lay down their Nets within three miles on either side the Boundaries of Rivers Fished by the proprietors that is, so long as the said proprietors do actually Fish the same.

p. 1210

That notwithstanding with these directions as no King's Ships has been stationed upon the Coast since the "Hazard," and the distance from the seat of Government at St. John's is so great as Five Hundred Miles, the rights of Your Petitioners are violated with impunity by Vessels from various parts the Masters whereof place their Nets at the Mouths of the Rivers and Bays, and thereby destroy the Salmon Fishery which is the principal object of your Petitioners in their said Establishments.

That the consequence is that instead of the annual average of 750 Tierces of Salmon as caught prior to 1817, the quantity caught last Year was only 450 to 250 Tierces having been caught by Mr. McPherson and by Vessels from the United States and from Nova Scotia, at the very Mouths of the Rivers and Bays, and your Petitioners are therefore under the apprehension of being obliged to relinquish their Property and Fishery altogether, it being impossible for them successfully to compete with Vessels, which are neither fitted out from nor are required to bring their Cargo to Great Britain.

Your Petitioners therefore humbly submit the matter to your Royal Highness wisdom, and earnestly solicit that protection may be afforded them and which appears to your Petitioners to be more necessary at the present time, as the first article in the Convention recently concluded with the United States considers to the Americans the liberty to take Fish of every kind on that part of the Coast of Labrador on which your Petitioners Establishment is situated, in common with the subjects of His Britannic Majesty.

Your Petitioners therefore humbly pray that protection may be afforded them by such a grant of the Settlement to your Petitioners by a specific deed (subject to the stipulations of the Proclamation of 1773) as shall enable them to enforce by Legal process a just regard to their rights and privileges as the Proprietors of the said Fishing Establishments in Sandwich Bay.

And your Petitioners as in Duty bound will ever pray.

&c.

&c.

&c.

(Sgd) C. HAMILTON.

[11 June,
1819]**ORDER BY GOVERNOR HAMILTON TO CAPTAIN
GORDON.**

RECORD BOOK, ST. JOHN'S NEWFOUNDLAND VOLUME 30, p. 169.

By Sir Charles Hamilton, Bart. Vice Admiral of the Blue, and Commander in Chief of His Majesty's Ships and Vessels employed and to be employed at and about the Island of Newfoundland &c. &c.

Having communicated with His Majesty's Sloop Carnation as directed by my Order No. 1, of this date, you are hereby required and directed to proceed in His Majesty's Ship Tamar under your Command to the Coast of Labrador for the protection of the fisheries carried on by His Majesty's Subjects, visiting for that purpose the different Establishments from Lat. 55° if you should find any so far North, South and Westward to Esquimaux Bay on the same Coast in the Gulf of St. Lawrence, or as much further towards Mount Joli as our fisheries may extend, and deciding in conformity with your duty as a Surrogate and Justice of the Peace, any Causes or Complaints that may be brought before you.

You will endeavour to obtain the most correct Information of which Circumstances will admit of the number of Fishing Vessels and Subjects of the United States of America employed in fishing on the Coasts of Labrador, and the part of the Coast of this Island which that nation has the privilege by Treaty of using, and also of the Fishery of the French, carefully observing the Instructions you have received respectively concerning them. Reports on these heads you will make as conveniently as you can correspondent to the accompanying form.

If you should find it necessary you are authorised to take a Pilot for the Coasts to which you are bound, and to bear him on the Books of the Ship you Command for Victuals only for which Service he will be paid at the rate of 5/— per day, and you are to discharge him with Triplicate Certificates the moment you are able to dispense with his assistance.

You will continue on this Service until the decreasing state of your Provisions shall in your opinion make it proper to return to St. John's for a further supply.

Given under my Hand on board the
Sir Francis Drake in St. John's
Harbour the 11th June, 1819.

C. HAMILTON.

To the Hon. John Gordon,
Captain of His Majesty's Ship Tamar.
By Command of the Vice Admiral,

P. C. LE^{GE}YT.

N.B.—You will receive herewith a Commission authorising you to collect the Greenwich Hospital duty to which you will have due attention.

14th June,
1819.**NORTH AMERICAN FISHERIES ACT 1819. 59 GEO.
III. C. 38 (IMPERIAL).**Convention, dated
20th Oct., 1818.

An Act to enable His Majesty to make Regulations with respect to the taking and curing Fish on certain Parts of the Coasts of *Newfoundland, Labrador*, and his Majesty's other Possessions in *North America*, according to a Convention made between His Majesty and the United States of *America*.

Whereas a Convention between His Majesty and the United States of *America*, was made and signed at *London*, on the Twentieth Day of *October* One thousand eight hundred and eighteen; and by the First Article of the said Convention, reciting that Differences had arisen respecting the Liberty claimed by the United States for the Inhabitants thereof to take, dry, and cure Fish in certain Coasts, Bays, Harbours, and Creeks of His *Britannic* Majesty's Dominions in *America*, it is agreed, that the Inhabitants of the said United States shall have for ever, in common with the Subjects of His *Britannic* Majesty, the Liberty to take Fish of every Kind on that Part of the Southern Coast of *Newfoundland* which extends from *Cape Ray* to the *Rameau* Islands, on the Western and Northern Coasts of *Newfoundland*, from the said *Cape Ray* to the *Quirpon* Islands, on the Shores of the *Magdalen* Islands, and also on the Coasts, Bays, Harbours, and Creeks from *Mount Joly* on the Southern Coasts of *Labrador*, to and through the Straits of *Belleisle*, and thence northwardly indefinitely along the Coast, without Prejudice however to any of the exclusive Rights of the *Hudson's Bay* Company; and it was also by the said Article of the said Convention agreed, that the *American* Fishermen should have Liberty for ever to dry and cure Fish in any of the unsettled Bays, Harbours, and Creeks of the Southern Part of the Coast of *Newfoundland* above described, and of the Coast of *Labrador*, but that so soon as the same, or any Portion thereof, should be settled, it should not be lawful for the said Fishermen to dry or cure Fish at such Portion so settled, without previous Agreement for such Purpose with the Inhabitants, Proprietors, or Possessors of the Ground: And whereas it is expedient that His Majesty should be enabled to carry into Execution so much of the said Convention as is above recited, and to make Regulations for that Purpose; be it therefore enacted by the King's most Excellent Majesty, by and with the Advice and Consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the Authority of the same,

His Majesty in council may make Regulations for carrying the Convention into Effect.

Foreign Vessels not to fish within a certain distance of any British Harbour in America not included in the Limits prescribed by the Convention;

under Penalty of Confiscation.

That from and after the passing of this Act, it shall and may be lawful for His Majesty, by and with the Advice of His Majesty's Privy Council, by any Order or Orders in Council to be from Time to Time made for that Purpose, to make such Regulations, and to give such Directions, Orders and Instructions to the Governor of *Newfoundland*, or to any Officer or Officers on that Station, or to any other Person or Persons whomsoever as shall or may be from Time to Time deemed proper and necessary for the carrying into Effect the Purposes of the said Convention, with relation to the taking, drying, and curing of Fish by Inhabitants of the United States of *America*, in common with *British* Subjects, within the Limits set forth in the said Article of the said Convention, and hereinbefore recited; any Act or Acts of Parliament, or any Law, Custom, or Usage to the contrary in anywise notwithstanding.

Not to extend to Vessels of any Power entitled thereto by Treaty.

American Fishermen may enter such Harbours for the Purposes of repairing or watering, subject to

II. And be it further enacted, That from and after the passing of this Act it shall not be lawful for any Person or Persons, not being a natural-born Subject of His Majesty, in any Foreign Ship, Vessel, or Boat, not for any Person in any Ship, Vessel, or Boat, other than such as shall be navigated according to the Laws of the United Kingdom of *Great Britain and Ireland*, to fish for, or to take, dry, or cure any Fish of any Kind whatever, within Three Marine Miles of any Coasts, Bays, Creeks, or Harbours whatever, in any part of His Majesty's Dominions in *America*, not included within the Limits specified and described in the First Article of the said Convention, and hereinbefore recited; and that if any such Foreign Ship, Vessel, or Boat, or any Persons on board thereof, shall be found fishing, or to have been fishing, or preparing to fish within such Distance of such Coasts, Bays, Creeks, or Harbours, within such Parts of His Majesty's Dominions in *America* out of the said Limits as aforesaid, all such Ships, Vessels, and Boats, together with their Cargoes, And all Guns, Ammunition, Tackle, Apparel, Furniture, and Stores, shall be forfeited, and shall and may be seized, taken, sued for, prosecuted, recovered, and condemned by such and the like Ways, Means, and Methods, and in the same Courts, as Ships, Vessels, or Boats may be forfeited, seized, prosecuted, and condemned for any Offence against any Laws relating to the Revenue of Customs, or the Laws of Trade and Navigation, under any Act or Acts of the Parliament of *Great Britain*, or of the United Kingdom of *Great Britain and Ireland*; provided that nothing in this Act contained shall apply or be construed to apply to the Ships or Subjects of any Prince, Power, or State in Amity with His Majesty, who are entitled by Treaty with His Majesty to any Privilege of taking, drying, or curing Fish

such Regulations as may be issued to prevent the abuse of the Treaty.

on the Coasts, Bays, Creeks, or Harbours, or within the Limits in this Act described.

III. Provided always, and be it enacted, That it shall and may be lawful for any Fisherman of the said United States to enter into any such Bays or Harbours of his *Britannic Majesty's Dominions in America* as are last mentioned, for the Purpose of Shelter and repairing Damages therein, and of purchasing Wood and of obtaining Water, and for no other Purpose whatever; subject nevertheless to such Restrictions as may be necessary to

p. 1214

Penalty on Persons refusing to remove, or disobeying Orders, 200*l.*

prevent such Fishermen of the said United States from taking, drying, or curing Fish in the said Bays or Harbours, or in any other Manner whatever abusing the said Privileges by the said Treaty and this Act reserved to them, and as shall for that Purpose be imposed by any Order or Orders to be from Time to Time made by His Majesty in Council under the Authority of this Act, and by any Regulations which shall be issued by the Governor or Person exercising the Office of Governor in any such Parts of His Majesty's Dominions in *America*, under or in pursuance of any such Order in Council as aforesaid.

IV. And be it further enacted, That if any Person or Persons, upon Requisition made by the Governor of *Newfoundland*, or the Person exercising the Office of Governor, or by any Governor, or Person exercising the Office of Governor, in any other Parts of His Majesty's Dominions in *America* as aforesaid, or by any Officer or Officers acting under such Governor, or Person exercising the Office of Governor, in the Execution of any Orders or Instructions from His Majesty in Council, shall refuse to depart from such Bays or Harbours; or if any person or Persons shall refuse or neglect to conform to any Regulations or Directions which shall be made or given for the Execution of any of the Purposes of this Act; every such person so refusing or otherwise offending against this Act shall forfeit the Sum of Two hundred Pounds, to be recovered in the Superior Court of Judicature of the Island of *Newfoundland*, or in the Superior Court of Judicature of the Colony or Settlement within or near to which such Offence shall be committed, or by Bill, Complaint, or information in any of His Majesty's Courts of Record at *Westminster*; One Moiety of such Penalty to belong to His Majesty, His Heirs and Successors, and the other Moiety to such Person or Persons as shall sue or prosecute for the same: Provided always, that any such Suit or Prosecution, if the same be committed in *Newfoundland*, or in any other Colony or Settlement, shall be commenced within Three Calendar Months; and, if

commenced in any of His Majesty's Courts at *Westminster*,
within Twelve Calendar Months from the Time of the
Commission of such Offence.

THIRD PERIOD: TO CANADA TENURES ACT, 1825.

No. 340.**HAMILTON TO BATHURST,**REPORTING HIS INTENTION TO SEND CAPT . BUCHAN TO GROS WATER
INLET, LABRADOR TO INVESTIGATE TIMBER RESOURCES.

RECORD BOOK, ST . JOHN'S, NFLD. VOL. 31, p. 83.

No. 41.

Fort Townshend, St. John's,
Newfoundland, 13 January 1820.

MY LORD,

* * * *

It has also been represented to me that there is an extensive inlet on the Coast of Labrador called Gross Water which is said to abound with very fine fir Timber fit for Naval purposes, and it is my intention, if the force sent out will admit of it, to employ Captain Buchan whose experience and abilities are well adapted to such an expedition on this service next summer. I have lately heard that he is safely moored and covered over in the River Exploits.

* * * *

I have the honor to be with great respect,
My Lord, Your Lordship's most obedient
humble servant,

C. HAMILTON.

To the Right Honorable
The Earl Bathurst K.G., &c &c &c.

[15 June,
1820.]**REGULATIONS FOR THE SALMON AND HERRING
FISHERIES IN SANDWICH BAY.**

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 31, page 182.

By His Excellency Sir Charles Hamilton Bart., Vice Admiral
of the White Governor and Commander in Chief in and
over the Island of Newfoundland & its dependence &c.

Whereas many complaints have been made to me of
improper practices in the mode of conducting the Salmon and
Herring fisheries on the Coast of Labrador, particularly in
Sandwich Bay, I the Governor aforesaid do publish the
following regulations, and hereby order and direct that the
strictest attention be paid thereto, by all persons whomsoever
resorting thither during the fishery season.

Nets whether for taking Salmon or Herring are not to be
laid down within forty yards of each other. Salmon Nets laid
down at this distance are not to exceed thirty fathoms in
length, nor Herring Nets twenty fathoms, otherwise they will
be seized, and not permitted to be laid down again until
reduced to the proper size, but this is not intended to prevent
nets of any length being laid down at such a distance from
others as not in the least to interfere with them.

Nets are not to be laid down after Sunset, nor hauled before
Sunrise, observing the following stated hours for the time of
the rising and setting of the Sun viz.—

July Sunrise ½ past 3.

Sunset ½ past 8.

August Sunrise 4 o'clock.

Sunset ½ past 7.

September & as long
after as the fishery Sunrise, 7 o'clock.
may continue to be Sunset, 5 o'clock.
governed by Sunrise
and Sunset.

These regulations are applicable only to such parties as
intermix in fishing. The proprietors of settled fisheries are at
liberty to lay down their nets in such manner. as they may
think proper, but it is strongly recommended

Monday morning, in order that means may thereby be afforded to a portion of the fish to get up the River to spawn.

In order to prevent disputes respecting the settled fisheries in the said Bay, I do hereby further also order that no strangers shall lay down their Nets within three miles on either side of the boundaries of Rivers fished by the proprietors so long as the said proprietors shall actually continue to fish the same, and I do further establish the boundaries of the undermentioned Rivers as follows viz.—

Eagle River, Eastern Boundary .. Coopers Island.

Western do. .. Separation Pt.

White Bear, Eastern Boundary .. Separation Pt.

River Western do. .. Dove Pt.

Paradise River, Eastern Boundary .. Duck Island.

Western do. .. Red Island.

Given under my hand at Fort Townshend St.
John's, Newfoundland, 15 June 1820.

C. HAMILTON.

By Command of His Excellency
P. C. LeGeyt.

[1 February,
1821.]**REMARKS BY JAS. IRVINE OF QUEBEC**

ON ACT 49 GEO. III. CAP. 27.

C.O. RECORD 42/189. LOWER CANADA, 1821.
PUBLIC OFFICE AND MISCELLANEOUS.

Memoranda humbly submitted, and referred to, by Mr. Irvine, in his letter to Henry Goulburn Esquire, of the 1st of February 1821.

By An Act of the Imperial Parliament, the Coast of Labradore, from the River St. John's to Hudson's Straits, together with the Island of Anticosti, and other smaller Islands along that Extensive Coast, are annexed to the Government of Newfoundland and all crimes and Misdemeanors, as well as civil Suits, originating on the said Coast or Islands, are made cognizable in this Courts of Newfoundland.

This Enactment, it is believed, originated from an application made on behalf of the Merchants of Newfoundland, setting forth that the Courts in that Island could not take cognizance of any Crime or Misdemeanor committed by their people who were employed in the Fisheries upon the said Coast of Labrador and the adjacent Islands and praying that Jurisdiction might be given to the Courts in Newfoundland for the hearing of, and adjudging upon, all Crimes and Misdemeanors Committed by their people upon the Coast and Islands aforesaid.

It must be manifest, how much greater and more serious injury has been created by the Enactment that followed that application, to the Proprietors and Lessees of the Soil, lying within the said Coast and Islands, who are all Residenters in Lower Canada, and from whence they carry on their Trade and fisheries in those parts, than could possibly have given rise to the said application from Newfoundland.

Prior to the Conquest of Canada, His most Christian Majesty had made grants and "Concessions," of all the Coast, (or the greater part thereof) And of the Islands, in question, to divers of his Canadian Subjects, who established Fisheries and Trading Posts thereon:—Without perhaps, adverting to this Circumstance, His Britannic Majesty thought fit on the Cession of Canada, to annex these Territories, to the Government of Newfoundland, by His Royal Proclamation bearing date on the 7th day of October 1763.

His Majesty's Canadian Subjects, then felt, as they do now; the hardship of having their property separated from the Government under which they lived, and put under another

Jurisdiction, thereby subjecting them to Laws and Regulations incompatible with their Tenures and Usages,—And, upon

p. 1219

a representation of their call the said Coast and Islands were re-annexed by a subsequent Act of Parliament, to the then Province of Quebec.

These Lands and Islands were originally granted “en Fief” or “Seigneurie” and have passed by sale and otherwise, from one possessor to Another, to this day: the Proprietors still residing in Lower Canada. The Seigniorie of Mingan, extending perhaps fifty Leagues along the Labradors Coast, is at present held on Lease from the Crown (of this Seigneurie about the two thirds of the front fall on the Newfdld. side of the R. St. John) by the Company Commonly called the North West Company of Montreal, who carry on the Fisheries and Fur Trade on that Coast and the interior; Many other Fisheries and trading posts are Established and carried on by the people of Canada as well on the Main Land, as on the Islands, and as far as Esquimaux Bay on the outside, North of the Straits of Bellisle, and on the Island of Anticosti, some Families, (two I think) are supported and paid by the Government of Canada, and furnished with Provisions and other Articles for the relief of Shipwrecked Mariners and others, when unfortunately cast upon that Island.

A number of Vessels and Boats, with their Crews and equipments, belonging to Quebec, are necessarily employed in these Establishments all their “outfits,” in goods and provisions, go from Quebec: the Returns are made to Quebec, and the men employed belong to, and are paid in Quebec:—

In short, the Territories in question are so dependent upon Lower Canada for everything, that whenever an Embargo has been laid up, on the exportation of Provisions from the Province, since the Act first before mentioned was passed, it has always been found necessary to insert a proviso in favor of the Labradore Coast and Islands, to save them from Starving.¹

¹ During the War of 1812-1814 between Great Britain and the United States, several embargoes were laid on the exportation from Canada of wheat and other exportations, but on all those embargoes an exception was made permitting the supply of such articles to “those parts of the Coast of Labrador which are occupied as Trading Posts and Fisheries, and have recently been annexed to our Government of Newfoundland.” The following is a copy of the proclamation which laid the first embargo.

A PROCLAMATION

(Can. Arch. Rep. 1921, pp. 168-9.)

Province of
Lower-Canada. } GEORGE PREVOST.

GEORGE the THIRD of the Grace of GOD, of the United Kingdom of Great Britain and Ireland, King, Defender of the Faith: To all our loving subjects, and to all others to whom these presents may concern, Greeting:—Whereas War has been declared and now exists, between the United Kingdom of Great Britain and Ireland and the Dependencies thereof, and the United States of America and their Territories;—And the exportation of Grain and Provisions of any description whatsoever, from our Province of Lower Canada, may at this time prove highly injurious to the interest of Our Empire, and to the welfare of our loving subjects in the said Province. We have thought fit, by and with the

advice of Our Executive Council of Our said Province of Lower Canada, to issue this Our Royal Proclamation, and to order, and we do hereby order, that an Embargo be forthwith laid on all Wheat, Flour, and Meal of every kind, Barley, Rye, Oats, Pease, Potatoes, Biscuit, Salted Pork and

p. 1220

Under such circumstances, it may naturally be supposed that many Crimes go unpunished: and, many who suffer by trespass, and other Wrongs, cannot obtain redress, the seat of Justice in Newfoundland being so very remote, that no Man from Canada will think of resorting to it, and the former Jurisdiction of our Canadian Courts, in such cases, is now unfortunately taken from them. And in matters of Civil Actions, relative to the Lands situated on the said Coast and Islands, it is a Query, how far the Courts in Newfoundland would be competent to hear and determine questions arising on these Lands held “En Fief” the proprietors of which, in Common with their fellow Subjects of Canada, have from His Majesty's benevolence, the guarantee of the French Law, so far as these Laws existed in Canada at the time of the Conquest, as the Rule of trial in all such cases.

It has already been observed, that these Lands and Islands are held, “En Fief” or, by Seigniorial Tenure, wherefore upon a change of property by sale or any transaction equivalent to a sale, a mutation Fine, styled a “Quint” is payable to the Crown. And, to complete his Title, the new Proprietor, is bound under the said Laws to perform “Fealty and Homage” to the King, or to His Majesty's Representative administering the Government: to pay this Fine and perform this Homage, and thereby to be duly and legally put into possession, the parties must now go near one thousand

Beef, from any port or place, in and within Our said Province of Lower Canada, to any Country, place, Kingdom, Dominion, or Territory whatsoever: And we do hereby strictly prohibit and forbid the sailing or departure of any ship or ships, vessel or vessels, having on board any of the before mentioned articles, from any port or place aforesaid, in and within our said Province of Lower Canada, to any such place, Country, Kingdom, Dominion or Territory aforesaid, save and except such vessels having on board so much of the before recited articles, as may be necessary only for the supply of those parts of the coast of Labrador, which are occupied as Trading Posts and Fisheries, and have recently been annexed to our Government of Newfoundland, and also in like manner necessary for the supply of the settlements of our Island of Anticosti; in the Gulph of St. Lawrence. And it is our will and pleasure, and we do hereby order, that the said Embargo do continue and remain from the date of these presents; until the TENTH day of SEPTEMBER next ensuing, of all which our loving subjects, and all others concerned, are to take due notice and govern themselves accordingly; we by the tenor of these presents firmly enjoining and commanding them, and all and every our officers and ministers whatsoever, to be in all things, and to the utmost of their power, aiding and assisting in the due execution of this Our Royal Proclamation.—In Testimony whereof, we have caused these our letters to be made patent, and the Great Seal of our said Province of Lower Canada to be hereunto affixed Witness our trusty and well beloved Sir George Prevost, Baronet, Captain General and Governor in Chief, in and over our Provinces of Lower Canada, Upper Canada, Nova-Scotia and New-Brunswick, and their several Dependencies, Vice Admiral of the same, General and Commander of all our Forces in the said Provinces, and in the Islands of Newfoundland, Prince Edward, Cape Breton and the Bermudas, &c. &c. &c. at our Castle of Saint Lewis, in our City of Quebec, in our said Province, the Thirty-first Day of March, in the Year of Our Lord, One Thousand Eight Hundred and Thirteen, and of Our Reign the Fifty-third.

Jno. TAYLOR, Depy. Secy.

G.P.

Similar Proclamations containing the like exception respecting the coast of Labrador were issued on the 8th of September, 1813; the 15th of October, 1813; the 4th of April, 1814, and the 21st of September, 1814. *Vide*, Can. Arch Rep. for 1921, pp. 172-173, 176-177, 183-184; 188-189.

p. 1221

miles by Sea to Newfoundland, the proprietor being no longer under the Government of Canada; the hardship of which is self evident:

Here another question may possibly arise, how far the Governor of Newfoundland under those Laws which Govern that Island, could legally receive such fealty and homage, and duly invest the purchaser in the property under the Rules prescribed by the French Law, as in force in Canada?

For the reasons herein set forth, and others that might possibly be urged, it is hoped that the said Act, in so far as relates to the Coast and Islands in question may be repealed, and the said Territories re-annexed to the Province of Lower Canada, to which they appear naturally, and of right, to belong.

All which is most humbly submitted by

JAMES IRVINE

A Member of His Majesty's Executive Council for
the Province of Lower Canada; And, of the
Legislative Council, of that Province.

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 32, page 39.

His Majesty's Brig Clinker,
Ivertoke Inlet, 24 July, 1821.

SIR,

I arrived in the entrance of this Inlet the 12th inst., having but light and variable winds from our leaving St. John's, passage extremely difficult from the quantity of ice on the Coast, had we not run inside the Islands from Spotted Island to Ivertoke, we could not have proceeded, as we skirted along 30 miles of field Ice, and I found after anchoring at Grady Harbour, one of the Islands at the entrance of the Inlet, farther to the Northward navigation yet unopened. From the 13th to the 23rd I have been employed in ascertaining the extent and source of this Inlet. I run up in the Brig 140 miles from N.N.W. to W. & S. distance across from 3 to 20 miles in widest part, thence I proceeded in a shallop (which a Canadian Merchant kindly offer to accompany us) with Canoes to the source, where we arrived at a Grand Waterfall or rapids, one backing the other 90 feet high. I have had communication with the Red Indians, at first they hid themselves from us, after a little coaxing and as far as we were able gave them to understand we came to assist them, they became in a short time familiar, next day I prevailed on them to come on board, 7 Canoes of them visited us. I regaled them with plenty of beef, pudding and grog, three accompanied us up the river, 50 miles from the Brig. The Canadians have extensive establishments in the Salmon fishery, but their principal gain is the Fur Trade with the Red Indians. The Fishing (Cod) Establishments up the river for 40 miles are numerous principally Americans for the Season. I am now at Anchor, in a place called the Narrows. I expect to be enabled to proceed for Port Manvers about the 1st August. This goes by a Shallop to Sandwich Bay for the first conveyance.

I have the honour to be, Sir,
Your most obedient humble servant,
(Signed) WM. MARTIN.To Sir Charles Hamilton Bart.,
Commander in Chief.

Quebec, 10th March, 1824.

MY LORD,

I have the honour to transmit to Your Lordship copy of an address presented to me by the Legislative Council of this Province setting forth the evils and inconveniences that have arisen from the Separation of a portion of the Coast of Labrador and the adjacent Islands, from Lower Canada of which they once formed a part, and praying that the same may be re-annexed to this Province; And as I am myself convinced that this representation is well-founded in every respect, I beg leave to give it my strongest recommendation and support.

I have the honour to be, etc.,

DALHOUSIE.

The Right Honourable

The Earl of Bathurst.

[25 Feb.
1824.]**No. 345.****ADDRESS OF LEGISLATIVE COUNCIL OF LOWER
CANADA TO LORD DALHOUSIE.**

COLONIAL OFFICE RECORDS 42/200. LOWER CANADA 1824.

DESPATCHES.

23 February, 1824.

To George Earl of Dalhousie, G.C.B., Captain General
and Governor in Chief in and over the Province
of Upper and Lower Canada, etc., etc., etc.

May it please Your Excellency,

We His Majesty's most dutiful and loyal Subjects the Legislative Council of Lower Canada in Provincial Parliament assembled, beg leave to approach Your Excellency humbly to represent, That prior to the Cession of Canada to the British Crown, His most Christian Majesty had made Grants and Concessions within those parts of the Coast of Labrador lying between the River Saint John and Hudsons Streights of a great part thereof, and of the Island of Anticosti and other small Islands lying on the said coast, to divers of His Canadian subjects under Titles "*en fiefs et Seigneurie*," and that through the benevolence of His late Majesty when passing the act of 14th Geo. III, Cap. 83, which re-annexed the said Coast and Islands to the Government of Canada then the Province of Quebec, the benefit of the ancient Laws of Canada their usages and customs relative to their Property and Possessions were secured to the proprietors of the soil within the Coast and Islands aforesaid, equally with their fellow subjects in Canada.

That the act of His Late Majesty 49 Geo. III, Cap. 27th, intituled "an Act for establishing Courts of Judicature in the Island of Newfoundland and the Islands adjacent, and for re-annexing part of the Coast of Labrador and the islands lying on the said Coast to the Government of Newfoundland," has in its operation so separated the Coast and Islands aforesaid from the Province of Lower Canada and placed them under another Government and Jurisdiction that the Proprietors of the soil lying within the Coast and Islands aforesaid most of whom it is believed are resident in Canada, are thereby subjected to Laws and regulations incompatible with their Tenures and usages and which virtually amount in certain cases to a denial of Justice,

a situation which the benign Government of His Majesty never could have contemplated when the said Act was passed into a Law.

That the said separation from this Province of the Coast and Islands aforesaid tends to produce great and serious impediments and difficulties to the Trade and Fisheries carried on from Quebec thereto.

That Vessels and Boats with their crews and equipments belonging to Quebec are necessarily employed in the said Trade and Fisheries because their outfits in goods and provisions are sent therefrom and the returns thereof are brought to that Port, that it may reasonably be supposed under existing circumstances many crimes go unpunished, and many individuals who suffer from Trespass and other wrongs cannot without much sacrifice of time and money obtain redress owing to the great distance from Quebec of the Courts in Newfoundland, to which they would be obliged to have recourse for Justice and in cases relating to real property held under the Tenure before mentioned, it may be doubtful how far the Laws governing His Majesty's Courts in Newfoundland might enable them to grant redress.

That such is the dependance of the Coast of Labrador and Islands aforesaid upon this Province even for articles necessary for subsistence, that since the period of passing the Act of 49 Geo. III. Cap. 27th, it has invariably been deemed expedient and needful whenever an Embargo has been laid upon the exportation of Grain, flour and provisions from this Province, to insert a Proviso in the Proclamation in favour of the said Coast and Islands to prevent the Inhabitants of those places suffering from want of food, as they could not have obtained their supplies elsewhere.

We therefore respectfully entreat Your Excellency that the above representations may be laid at the foot of the Throne, with our humble prayer that His Majesty will be graciously pleased to recommend to His Parliament the revision and repeal of the aforesaid Act of His Late Majesty of Glorious Memory (49 Geo. III, Cap. 27th) in so far as that Act relates to the separation from the Government of Lower Canada of those parts of the Coast of Labrador from the River Saint John to Hudson's Streights and the Island of Anticosti and all other small Islands lying on the said Coast, and which re-annexes the said Coast and Islands to the Government of Newfoundland, and also for the repeal of that part of the aforesaid Act which gives Jurisdiction to His Majesty's Courts in the said Island of Newfoundland to hold Plea of all Crimes and Misdemeanours committed and of all suits and complaints of a Civil nature arising within such parts of the Coast of Labrador from the River Saint John to Hudsons Streights and the said Island of Anticosti and all other smaller Islands so re-annexed to the Government of Newfoundland by the said Act.

Legislative Council Chamber,

RECOMMENDING MODIFICATION OF LOWER CANADA'S CLAIM
RESPECTING ANNEXATION OF COAST OF LABRADOR TO THAT
PROVINCE.

[DALHOUSIE PAPERS.]

12, Bury Street,
St. James,
25th March 1825.

MY LORD,

I had yesterday the honour of receiving your Lordship's letter of the 21st. I am obliged now to trouble you with a matter which 'though of very little importance in itself requires your Lordship's decision. It relates to the application made by the Legislative Council, by an address in the Session of 1824 for the re-annexation of the whole coast of Labrador, up to Hudson's Streights, to the Province of Lower Canada. I have drawn up a statement of the pretensions advanced on the part of Lower Canada and of Newfoundland, which I enclose. The question is whether the claims of the former should not be cut down, and confined to that part of the coast lying West of Bay Forteau—Isle au bois, or Ance à Sablon, inclusive (it is no matter which boundary is taken) so as to comprehend the last Canadian fishing post of any importance on that Shore, and to leave to Newfoundland its most Westerly fishing establishment. This question it is necessary to solve now, both on account of the Act which is to be brought in for re-annexing to Lower Canada what she ought to have, and on account of the necessity of making out Sir Thomas Cochrane's Commission as Governor of Newfoundland—which must be delayed until the true boundary of his Government in that quarter is fixed. The question however is one that no authority short of your Lordship's—acting for Lower Canada—can determine.

The fact appears to be that the Council asked more than they would have done had they been aware of the actual circumstances, but they acted upon general and vague information—or notoriety—without particular evidence—and without knowing how far the interests of the Province were at all concerned in regaining the coast beyond Mingan. I think the real interests of the Province will be amply covered by re-annexing to it all within the limits I have mentioned, and that this will be perfectly satisfactory to all parties, and perfectly equitable.

If such is your Lordship's opinion, and you will be good

enough to intimate it to me in the first place, both the Act and Sir Thomas's commission will go

p. 1227

forward, and an official statement of the question will be afterwards made to you for an official answer. This reference I make merely for the purpose of expediting the business. Mr. W. Horton wishes to bring in the Act before the recess if possible.

* * * *

I am, My Lord,
Your Lordship's obliged & devoted servant,
A. W. COCHRAN.

TRANSMITTING MEMORIAL OF CHAMBER OF COMMERCE, ST. JOHN'S,
NEWFOUNDLAND, RELATIVE TO RE-ANNEXING COAST OF
LABRADOR TO GOVERNMENT OF LOWER CANADA.

Received June 20 1825

C.O. 194. VOL. 71.
1121 Newfoundland.

St Johns Newfoundland
20th May 1825

SIR,

In the absence of His Excellency the Governor, I beg to transmit to your care a Memorial from the Chamber of Commerce to the Right H^{ble} Earl Bathurst relative to the re-annexing the Coast of Labrador to the Government of Canada—a subject, which is considered so intimately connected with the welfare of the Trade and Fisheries prosecuted by many of the Inhabitants of this Island that, I flatter myself it will obtain His Lordship's consideration, and be a sufficient apology for the trouble I again give to you

I have the honor to be

Sir

Your most obed^t H^{ble} Serv^t

JAMES CROSS

President of the Chamber of Commerce
St. John's Newf^dLand. L.S.

To

R. J. Wilmot Horton Esq^r M.P.
Under Secretary of State for the Colonial Department.

[20 May,
1825.]**MEMORIAL OF CHAMBER OF COMMERCE, ST.
JOHN'S, NEWFOUNDLAND,**

*sic.

OPPOSING PROPOSAL TO RE-ANNEX COAST OF LABRADOR TO
GOVERNMENT OF LOWER CANADA.C.O. 194. VOL. 71.
1121 Newfoundland.in JAS. CROSS.
Received June 20, 1825.To The Right Honorable Earl Bathurst K.G. His Majesty's
Principal Secretary of State for the Colonial Department,
&^a &^a &^aThe Memorial* of the Chamber of Commerce of Saint Johns
Newfoundland.

Humbly Sheweth

That your Lordships Memorialists having observed by the public Newspapers that leave has been granted to bring a Bill into Parliament to annex part of the Coast of Labrador to the Government of Canada, and not knowing how much of the said Coast it may be intended to comprehend in such Bill, beg leave to state to Your Lordship the very great importance to these Fisheries of continuing under the Government of Newfoundland all such parts of that Coast as are resorted to from hence

That between Sixty and Seventy Vessels are annually fitted out from the Port of Saint Johns alone, and nearly two hundred from Conception Bay employing together nearly Five thousand Men in the Labrador Fishery, besides which others proceed thither from other parts of the Island-and that of late Years, the Bank Fishery having been less productive than formerly the Vessels employed therein are for the most part sent to the Labrador in the Summer Season.

That since the cession to France of the North part of this Island (usually denominated the French Shore) nearly all the Vessels employed in the Seal Fishery are afterwards sent to the Labrador, and that the Seal Fishery has lately assumed a degree of importance which entitles it to the highest consideration, having this Spring yielded employment to Five Thousand Men at a Season during which this Climate would afford them no other means of support.

That the Fishery at Labrador commences at a later period of the Season than on the Shores of this Island now occupied by

the British, and affords time for the Seal Fishery to be fully completed, as that to the French Shore

p. 1233

*sic. formerly did, and that the Labrador and Seal Fisheries are thereby well adapted to each other: and that moreover the Vessels which are necessary for the Seal Fishery would now be absolutely useless in any other branch of the Cod Fishery than that to Labrador, and so remain unemployed except during the continuance of the Seal Fishery which is but two Months in the Year and for the single use of which their Owners could not afford to keep them—whence it will appear to Your Lordship that every impediment to the Labrador Fishery path a direct tendency to reduce the Seal Fishery.

That the whole business of supplying these Fisheries is involved in a course of Settlement to be made in the fall of the Year, the supplies being advanced in the Spring by the Merchants to the Fishermen on credit, and for the most part entirely on the faith of the Voyage; that it would therefore be absolutely impossible to continue this Fishery in any place beyond the reach of our Supreme Court of Judicature; which has moreover by a long course of decisions become the depository* of all its customs and usages; and that the several Laws made for the protection of the Fisheries, being engrafted on those customs and usages, are, and only can be applied or properly understood within the Government of Newfoundland.

That the annexation to Canada of any part of the Coast of Labrador usually resorted to from hence would oppose such difficulties to the settlement of Accounts as necessarily to lessen the confidence and ultimately destroy the Credit upon which the Fisheries are carried on and without which they could not subsist, and that this evil could not be remedied, even by the establishment/of Courts of Judicature on that Coast, because the greater number of Causes should originate in the Courts here where the transactions have taken place and because the Appeal from Labrador Courts it is apprehended would after such annexation lie to Quebec, whither it would be equally impossible for Plaintiff or Defendant to repair.

That every event of a Criminal Prosecution would also be attended not only with great inconvenience but with absolute ruin to many individuals should they be carried from their Fisheries on the Labrador to Quebec for the purpose of giving evidence on such prosecutions; whereas they always return here in the regular course of their business at that Season of the Year in which it is usual for our Supreme Court to hold its sittings of Oyer and Terminer.

Your Lordship's Memorialists therefore humbly pray that the Coast of Labrador may be continued under the Government of Newfoundland as settled by the Act 49 Geo. 3 Cap 27

And your Memorialists will ever pray

JAMES CROSS

President of the Chamber of Commerce of
St John's Newfoundland.

St Johns
Newfoundland

[1825.]

MEMORANDUM BY R. WILMOT HORTON

ON THE PROPOSED BILL (THE CANADA TENURES BILL, 1825).

C.O. 42. VOL. 207.

1st The first object of the Canada Tenure Bill is to enable His Majesty, when granting to the Superior Lords a release of their feudal burdens, to impose on them an obligation of making a corresponding concession in favor of their own tenants.

The Act of the 3 Geo: 4th (the Canada Trade Bill) enabled the King to make releases in favor of the Lords; but did not impose a corresponding obligation upon them. The effect therefore was, that the Agricultural Population might remain subject to all those feudal duties by which the progress of Agriculture was impeded, while the Lords were exempted from all their feudal duties to the Crown.—

It is proposed therefore by the present Bill, to give to the Censitaire a right of action against the Lord, if the latter shall refuse to release his own feudal rights, after having himself obtained a release from the King as Superior Lord.—

If the Lord and the Censitaire cannot agree respecting the price to be paid for this release, it is proposed to invest the Supreme Court with the power of appointing arbitrators.

To prevent the inconvenience which might arise from this commutation, it is provided that public notice shall be given to all Mortgagees, and other persons having charges upon the feudal rents & dues to be extinguished. Their dissent will prevent the commutation, until their claims upon the property are paid off or arranged. Their assent will of course remove the difficulty.

A provision is also made for saving the rights of reversioners, and others interested in the property, who do not join in the release of the feudal rights to the censitaire.

*an error for 1809.

2^{ndly} It has been a question much agitated in Canada, whether if Land were granted by the Crown to be held in free & common soccage, it would pass by descent, or by Deed, according to the Law of England, or the Law of France. It is proposed to enact that the alienation and descent of such Lands, shall be regulated by English, & not by French Law.

p. 1235

3^{rdly} Certain parts of the Coast of Labrador, were settled by French Canadians, & the Lands are held upon French tenures.

—It is therefore highly convenient that this part of the Labrador Coast should be annexed to the Government of Canada. But the Act of 1747* annexes the whole of this Coast to Newfoundland. Therefore, without the assistance of Parliament, it is impossible to carry this object into execution.—The Bill therefore provides, that the Coast shall be divided at a point which the Governors of the respective Colonies have fixed upon.—The point of division is the point at which the Canadian Settlements end.—

4^{thly} In the Province of Lower Canada there are large Tracts of Land upon which no Settlement duties have been performed, & which are therefore forfeited to the Crown. It is stated that this circumstance has greatly retarded the advance of the Province. But the Canadian Legislature will not apply a remedy. It is therefore proposed to enable the King to appoint Commissioners of locheat, who will proceed according to the rules of the Law of England, in similar cases.

5th There being no person in the Province of Lower Canada competent to make a Surrender of any part of the Clergy reserves, cases continually occur in which the progress of public Buildings, & other public objects, are impeded from the impossibility of making exchanges of Land with the Clergy, when it is necessary to take possession of a part of the Clergy Reserves. It is therefore proposed to enable the Bishop of Quebec to carry such exchanges into effect in compliance with any requisition made upon him for that purpose by the Bishop.

[29 Dec.,

DUPLICATE DESPATCHES, ST. JOHN'S, NFLD, FROM 1818-1827.

Saint John's,
29th December 1825.

SIR,

In consequence of there not having been any Surrogate at the Labrador for some time past I have reason to think that many disputes will arise at the opening of the next Fishery respecting the property usually deposited there during the winter, as it has been very much the practice of late for the person who arrives first to take forcible possession of every article to which he has or believes himself to have any sort of claim. I would therefore beg leave to suggest to your Excellency the propriety of directing the Judge of the Labrador to proceed thither at the very commencement of the Fishing season, as I am satisfied that his presence there, at that period, will have a powerful tendency to redress that lawless disposition which the circumstance I have already adverted to has occasioned. In other words I conceive that it will be necessary for Captain Paterson to leave this place about the 10th of next June and to continue at the Labrador until the latter end of September. He will of course be obliged to visit several different Harbours, and it will consequently be requisite that there should always be a Vessel in readiness to carry him from one Port to another.

I have the honour to be,

Sir,

Your most obedient humble servant,

(Signed) R. A. TUCKER,

Chief Justice.

His Excellency

THE GOVERNOR.

Copy of Thomas Reeves' agreement for 1828/9/30/1.

This is to certify that it is hereby agreed between Arthur Hunt and Thomas Reeves to the following effect, namely, Arthur Hunt does hereby agree to give Thomas Reeves the right of fishing Sand Hill Brook on the following terms, that is Thomas Reeves is to go there and take charge of the place with everything that may be there. (Inventory to be taken of the same) taking care of the same and keeping the place etc in thorough repair and fish the brook to the utmost of his ability. In consideration of which the said Thomas Reeves is to be allowed in account one half of the salmon that may be caught provided the whole of the salmon so caught is delivered without any embezzlement whatever to Arthur Hunt or whom he may appoint. It is further agreed between the said parties that the expenses attending fishing the brook, such as nets, twine, and cordage shall be equally divided, also one man's wages and provision which Arthur Hunt is to send there the summer to help fish the said brook. Respecting the winter, Arthur Hunt allows the said Thomas Reeves the use of the traps that may be there, or so many of them as he may want on

the following hire, namely one-third of the fur that may be caught provided also the whole of the fur is delivered to Arthur Hunt for any default or non-

Continued for 1829/30/31.

It is hereby agreed between C. and E. Hunt and Co. of Sandwich Bay of one part and James Edward of the other part, that C. and E. Hunt and Company shall let on hire, and E. and E. Hunt and Co. of Sandwich Bay do hereby agree to let to James Edwards for five years from the date of this agreement the salmon fishery in Paradise Brook with the houses, nets, and other property mentioned in the inventory at foot on the following terms.

The said James Edwards shall properly fish the brook for salmon to the utmost of his power and keep the house, craft and other property in good condition, the expense of keeping the same in repair and of providing for any new craft, such which may be found necessary shall be borne one third by C. and E. Hunt and Co. and two thirds by James Edwards.

The whole of the voyage to be delivered to C. and E. Hunt & Co. who shall be allowed one-third of the same for rent of the post share of the expenses etc., James Edwards to be allowed in account for the remaining two thirds of the same price as C. and E. Hunt and Co. give their other dealers.

In case either of the parties wish to determine this agreement they shall be at liberty to do so giving six months notice to the other at the end of which the place shall be given up to C. and E. Hunt and Co.

C. and E. Hunt and Co. shall also supply James Edwards with goods for trading with the Mountaineers, the whole produce of which shall be delivered to C. and E. Hunt and Co. who shall allow James Edwards for one half of the same at same price as given to other dealers, the other half of the produce to be allowed C. and E. Hunt and Co. and the expenses of the trading to be divided equally between the parties.

[1841 (?)]

Dumplin Island, 14th September 1833.

C. AND E. HUNT AND COMPANY,
JAMES EDWARDS.

[NOTE.—The following agreement was apparently made at
Dumplin Island in 1841.]

It is hereby agreed between C. and E. Hunt and Co. and Henry Ferris for the latter to go to Eagle River the winter and there build a Salmon House, and preserving House etc. and recover the Dwelling House, the Salmon House to have a good loft and be made perfectly tight in the roof and sides of the loft, the preserving house to be build as large as possible a loft and partition to be put in the Dwelling House and the whole to be finished in a strong and workmanlike manner, in consideration of which Henry Ferris is to be paid by C. and E. Hunt and Co Ten Pounds sterling and provided with Provisions, Nails and Board, the latter to be sawed by James Martin and Ml. Turner. It is further agreed for Henry Ferris to fish in White Bear River the Summer for Salmon one sixth of his catch if it exceeds six tierces to be allowed C. and E. Hunt and Co. as hire, if less than six tierces nothing.

[2 Sept.,
1853.]

[10 May,
1837].**REPORT OF A COMMITTEE OF THE EXECUTIVE
COUNCIL, LOWER CANADA.**

C.O. RECORDS 45/121.

May it please your Excellency

The Committee have taken into consideration your Excellency's Reference of the Memorial of Samuel Robinson of Spar Point outfitter in the Labrador Fisheries and also the Petition of certain Inhabitants of the place commonly called Labrador on the North Coast of the River S^t Lawrence soliciting the interference of His Majesty's Government for the purpose of regulating the rights of the People concerned in the Fisheries in that Quarter and settling the disputes that arise among themselves respecting the Privilege of Fishing and also between them and interloping Foreigners.

The Committee have obtained information respecting these remote Settlements from such Individuals in Quebec as were capable of affording it, and they have been led to enquire into the origin of the Establishments and the manner in which they have been carried on. It appears that the Fisheries on that part of the Coast of Labrador have been carried on by outfits from Quebec from an early period after the Conquest.—By His Majesty's Proclamation of October 1763 the whole Coast from the River S^t John to Hudson Straits was placed under the (*sic*) and Inspection of the Governor of Newfoundland with a view as therein stated that an open and free Fishery might be carried on by His Majesty's Subjects on that Coast.

In pursuance of this Proclamation Regulations were made in the year 1765 by the Governor of Newfoundland and were published in this Province for the Regulation of that Fishery and for settling the Rights of the Persons engaged in it, but these Regulations soon became the subject of a remonstrance addressed to the Government of this Province on the part of the Merchants concerned in that Fishery.

From that period however the Government of Newfoundland appears to have continued to exercise jurisdiction over that Coast and in 1809 by an Act of Imperial Parliament it was severed from Lower Canada and annexed to the Government of Newfoundland from whence periodical visits appear to have been made by Persons holding authority as Surrogates which enabled them to settle disputes among the Inhabitants and owners of the Fishery.

In 1835 (? 1825) however an Act of the Imperial Parliament was passed reannexing to Lower Canada those parts of the Labrador Coast from the River S^t John to the anse à Sablon

which had been annexed to Newfoundland

p. 1242

by the Statute of 1809 within which Limits all the Persons who have signed the Petition before the Board appear to be settled.

From the information received by the Committee it appears that there are eight or ten sedentary Fishing Establishments on that part of the Coast the supplies for which are principally drawn from Quebec, and the Persons engaged in these pursuits amount to several hundreds, some of them have resided there many years and the Trade is of considerable value to the Province but none of them appear to have any legal Title to the Soil except that of occupation and possession, beyond the limits of the Seigniorship of Mingan nor any legal means of securing their Rights from Encroachments, except by resorting to the Courts at Quebec to ascertain their possession and Privileges; nor is there any Person resident there clothed with public authority either on Civil or Criminal matters, and the Rights of Individuals seem to depend on ancient usage among themselves.

The Committee have not been able to ascertain whether in the Interval between 1809 and 1825 any local Regulations were made by the Government of Newfoundland applicable to these Settlements and it might be susceptible of doubt whether such Regulations if made could be considered as in force since the annexation of that Territory to this Province and altho' by the 56th 57th 58th & 59th Articles of the standing Royal Instructions to your Excellency some security was intended to be afforded to the actual possessions and Property of His Majesty's Canadian Subjects on that Coast the Committee do not perceive that there is any effectual power vested in His Majesty's Government to interfere for the relief or protection of the Petitioners otherwise than by the appointment of a Justice of the Peace, for the Provincial Act relating to the trial of small Causes, even if it could be brought into operation in these Settlements would not appear to be applicable to the difficulties of which the Petitioners complain. The Committee therefore cannot advise your Excellency to adopt any measure of Executive Authority, but they consider it highly important both to the adjustment of these local difficulties among the resident and transient subjects of His Majesty engaged in these Fisheries and also the protection against the Encroachments of Foreigners to which it appears that they are greatly exposed in violation of public Treaties that the subject should be brought before the Legislature in order to the adoption of some efficient Regulations respecting it.

All which is respectfully submitted to your Excellency's Wisdom.

By Order

Signed: W. SMITH,
Chairman.

[16 Sept.,
1841.]**GOVERNOR SIR JOHN HARVEY'S PROCLAMATION
OF HIS APPOINTMENT.**GOVERNMENT RECORDS, ST. JOHN'S, NEWFOUNDLAND.
Volume 43, page 307.

PROCLAMATION.

By His Excellency Major General Sir John Harvey,
 L.S. Knight, Commander of the most
 Honorable Military Order of the Bath, Knight
 J. Harvey. of the Royal Hanoverian Guelphic Order,
 Commander Governor and Commander in Chief in and over
 the Island of Newfoundland and its depend-
 encies.

WHEREAS Her Majesty by Her Commission made Letters Patent bearing date at Westminster the twentieth day of July in the Fifth year of Her Reign, hath been graciously pleased to appoint me to be her Governor and Commander in Chief in and over the Island of Newfoundland and the Islands adjacent, and all the Coast of Labrador, from the entrance of Hudson's Straits to a line to be drawn due North and South from Ance Sablon, on the said Coast, to the Fifty-second degree of North Latitude, and all the Islands adjacent to that part of the said Coast of Labrador, as also of all Forts and Garrisons erected and established, or which shall be erected and established within the said Island and its Dependencies aforesaid; I have therefore thought fit, by and with the advice of Her Majesty's Council, to publish this my Proclamation, in order to make known to all Officers and Ministers, Civil and Military and to all the Inhabitants of this Government that in pursuance of Her Majesty's said Commission I have this day assumed the administration of the Government of the said Island and its Dependencies; and all persons are hereby enjoined and commanded strictly to conform themselves thereunto accordingly.

Given under my Hand and Seal at the Government House at St. John's, in the aforesaid Island, the 16th day of September, 1841, in the Fifth year of Her Majesty's Reign.

By His Excellency's Command,
 JOSEPH TEMPLEMAN,
 Pro. Secy.

[28 June,
1845.]**No. 360.****GOVERNOR SIR JOHN HARVEY TO LORD
(? STANLEY).**

DESPATCHES FORWARDED, ST. JOHN'S, NEWFOUNDLAND, 1845.

No. 45.

Govt. House,
28 June, 1845.

MY LORD,

The Bishop of this Diocese having apprised me of his intention of visiting the Western Coast of this Island in the course of the present Summer & of his expectation that he will be solicited by the Clergyman & Congregation of the Bay of St. George to consecrate the Church which has been erected in that place, an application which he should feel himself embarrassed in complying with under the circumstances in which these poor people have placed themselves without some authority from me.

I have accordingly placed in the hands of the Bishop of which I have the honour to enclose a copy & in which your Lordship will I trust perceive that I have endeavoured to avoid any direct recognition of any Settlement, viz. Her Majesty's Subjects on that part of the Coast otherwise than as fishermen resorting to it for the purpose of exercising their concurrent right of taking fish during the season, and I am quite convinced that not only will no umbrage be taken by the French authorities of this proceeding but that they will hail with satisfaction any measures on the part of those of this Island which may tend to establish any thing like control over persons who have, as they believe, placed themselves beyond the reach of all laws, human and Divine.

With regard to that part of the Coast of Labrador which is included in my Commission as Governor of Newfoundland and its Dependencies, I have abstained from including in it the Warrant to the Lord Bishop as well in consequence of the uncertainty which he feels as to whether it be that his Commission should be coextensive with mine. Labrador not being named in it, as from my own recollection that before the erection of this Island into a separate Diocese, that of Quebec extended and included not only the whole of the Coast of Labrador but all the Hudson Bay Settlements and those on the Western shores of Davis's Straits.

This however is at present a matter almost wholly unessential as there is no considerable settlement of British subjects, except those of the Indians, & those of the Moravians on any part of the Labrador Coast, which accordingly the Bishop does not propose to visit.

I have &c.

(Signed) J. HARVEY.

No. 361.[26 Oct.,
1848.]**BISHOP OF NEWFOUNDLAND TO EARL GREY.**

C.O. RECORDS 194 / 130.

St. Johns, Newfoundland,
26th Oct. 1848.

MY LORD,

I have the honor to inform your Lordship that I have this summer visited, as part of my Diocese, the coast of Labrador, with the view of ascertaining the moral and religious conditions of the inhabitants, and the best manner of meeting their wishes and wants. May I be permitted to mention that for some time a doubt existed whether Labrador, (being on the American Coast) was to be regarded as part of my Diocese. Neither Lord Stanley, nor the Archbishop of Canterbury at the time of my appointment could inform me—and I cannot say that I have been able to obtain any positive instructions to this very day. I have therefore gone upon the presumption that as the Labrador coast is included in, or under, the Government of Newfoundland, it ought also be under the Bishop's superintend once. And, having ascertained that the Bishop of Montreal did not regard it as in his Diocese or intend to visit it, I determined that it should no longer remain neglected.

* * * * *

My visitation (of the Labrador Coast) has extended from Blanc Sablon, where the Government of Newfoundland commences on the South, to Sandwich Bay on the North. Within those limits or a little farther only to the North, a line of coast stretching nearly 250 miles, (without taking into account the circuit of Bays and Harbours), I have found upwards of twelve hundred settled inhabitants, while in Summer probably as many thousand (12,000) are fishing on the coast for several months.

Nearly all the settled inhabitants are or profess to be, or at least profess a desire to be members of the Church of England, but very few of them had ever, before my visit, seen a Clergyman of our Church. Seventeen years ago Mr. Archdeacon Wix called at one settlement, I presume in a Ship of War. Eight years ago a Roman Catholic clergyman visited several harbors—but with those exceptions I do not know, that within the last 20 years, any clergyman has been on the shore. At the present time there is no Schoolmaster, or Minister of Religion, or teacher, of any character or denomination, till you come to the Moravian establishments at Nain and Hopedale. And the nearest of these is 300 miles beyond the limits of my visitation; though I believe my Diocese extends even to them, and beyond them.

I am unwilling to weary your Lordship, but I pray to be allowed to mention the means which seem to me necessary, and which I should desire to take, if it were in my power, to improve the moral and religious condition of the poor people. .

. . * * * * *

My desire then would be to place three clergymen on the shore.

The First should have his headquarters at Forteau, and the Labrador coast, from Blanc Sablon to Chateau Bay (about 75 miles), and the opposite coast of Newfoundland (about 40 miles) should be under his pastoral superintendence. His settled, though scattered, flock would number 400 all the year—and in summer many more. The next Clergyman should be placed at Battle Harbor and have the shore from Chateau Bay to Seal Islands (the latter included) in his charge—a distance of 85 miles—with 400 settled inhabitants and immense numbers (not less than 5000) fishing all the summer on the coast. This charge would include 3 merchants' establishments. Battle Harbor is the most populous and most important place on the whole shore.

The third Clergyman might reside in Sandwich Bay and have the whole of that and of the next (Eskimaux) Bay under his charge and superintendence, and consider his Mission to extend from Seal Islands to Cape Harrison, about 100 miles, with about 500 inhabitants, Eskimaux and Anglo-Eskimaux. In Eskimaux Bay the Hudson's Bay Company have an establishment.

I should desire also to put a School and Schoolmaster in Deacon's orders at Battle Harbour, at which children from neighbouring islands, to the distance of 30 or 40 miles on either side, might be lodged as well as educated. There is no other way in which the scattered families can obtain instruction. At present, I need hardly say, with the exception of a few English settlers, they are all in complete ignorance.

I am in great hopes that the inhabitants and merchants will exert themselves to make what provision they can towards the support of the Clergy and Schoolmaster. There will be some considerable difficulty in making the commencement and raising the necessary buildings.

* * * * *

I have &c.

No. 43.

Downing Street,
28th April, 1879.

SIR,

I have the honor to transmit to you a copy of a letter from the Foreign Office, enclosing the translation of a note from the German Ambassador, enquiring whether there would be any objection on the part of Her Majesty's Government to the establishment of a German Consulate in Labrador, and, if not, whether the appointment of Mr. Bourguin to that port would be approved.

Before replying to the Secretary of State for Foreign Affairs on this subject, I should be glad to be informed whether your Government have any objection to this appointment, or to the establishment of the Consulate at Nain.

You will observe that the German Ambassador is anxious to receive the answer of Her Majesty's Government, in order to admit of the appointment being made before the 15th of June. It would be advisable therefore that you should return a reply to this despatch by telegram.

I have, &c.,

April 23rd, 1879.

SIR,

I am directed by the Marquis of Salisbury to request that you will lay before Sir Michael Hicks Beach the accompanying translation of a note from the German Ambassador, in which he enquires whether Her Majesty's Government would make any objection to the establishment of a German Consulate in Labrador, and whether, in case of their not objecting, they would approve of the appointment of M. Bourguin, President of the German Moravian Missionaries. His Excellency also enquires whether the Consulate might be placed at Nain.

I am to call attention to His Excellency's request that an early answer may be returned to his note.

I have, etc.,
(Signed) T. V. LISTER.

The Under Secretary of State,
Colonial Office.

[April 18,
1879.]**No. 364.****COUNT MUNSTER TO THE MARQUESS OF
SALISBURY.***Translation.*

German.
German Embassy,
April 18th, 1879.

MY LORDS,

The Secretary of the German Moravian Fraternity has applied through me to the Foreign Office at Berlin, to solicit the appointment of a German Consul in Labrador.

The following reasons seem to favour the institution of the Consulate. The Mission of the German Moravian Fraternity consists of about forty German Missionaries, who wish to retain the German nationality for themselves and their families. Now, the fulfillment of this wish would be very much facilitated by the appointment of a Consul, and the Missionaries would thereby be released from many a difficulty. At present St. John's is the nearest German Consulate, but there is no regular postal communication between

that town and Labrador, the Consulate there is of no use to the Mission. Moreover, there is no official at all of any kind in Labrador, so that it is impossible to obtain legally valid papers. Only lately it happened that a Missionary in Labrador was unable to make arrangements concerning a small estate in Germany, because he could not procure in Labrador any document that the German authorities would recognize as a general power of attorney. A Consulate would also be very serviceable for the issue of certificates of births and deaths.

Before an answer is returned to the application from the Secretary of the German Moravian Fraternity, the Imperial Government would be thankful for the favour of a communication from your Excellency, stating whether there is any objection on the part of the Royal British Government to the admission of a Consul in Labrador. At the same time, I would enquire of your Excellency whether the eventual appointment of Bourguin, the President of the Mission, would be approved; he was born in Livonia on the 26th of November, 1833, and whether the Royal British Government would be satisfied if the seat of the Consulate were at Nain. An answer to these queries would be considered a favour.

As there is direct communication between Europe and Labrador only once a year, and the ship engaged therein leaves the German coast on the 15th of June, I would respectfully request your Excellency to oblige me with a reply as soon as possible, so that the appointment of the Consul may, if feasible, be made before the departure of the ship.

With the, &c.,

(Signed) MUNSTER.

The Marquess of Salisbury,
&c., &c., &c.

COLONIAL OFFICE RECORDS 194/16. T. 87.

31 March, 1766.

SIR,

Please to acquaint the Right Honble. the Lords for Trade & Plantations, that in Order to put a Stop to the many Murthers, Robbery's and other disorders comitted on the Indian Inhabitants on the coast of Labradore within my Government, by a Bandetti Lawless People resorting thither, from the Plantations, particularly those from New England and the Winter Inhabitants from Newfoundland, I Judged it became my Duty, was Absolutely necessary and strictly Justifiable and Lawfull, to lay some Restrictions on them by the Regulations I made for that Coast the last year, till His Majesty's Pleasure should be known; this I understand hath been represented to His Majesty's Ministers, by one Mr. Milner and others, as Arbitrary, op[p]ressive and Injurious to the rights and Liberties of British Subjects.

In the year 1764 a Vessel belonging to Boston or Marble Head, after Robbing, Plundering and otherwayes Ill treating the Indians on the Coast of Labradore, took away five of them, who they either Murther'd or carry'd home to make Slaves of; the Name of the Vessel or of the Master I have not been Able to Learn, but the Mate of her was Named Coffen and is now Master of a Vessel from Nantucket.

The last year a Schooner from Boston at Mingan and other Places on the said Coast, strip'd and Plunder'd all the Indians they met with, of their Furs, etc. I have not yet been able to get either the Name of the vessel or the Master, but my informer one Mr. Limeburner, who is a Man of Credit, informs me, that the Master produced a Licence from Governor Bernard to go to that Coast to Trade with the Indians, under Sanction of which, they comfit these violences.

The last year I went to Pitts Harbour on the said Coast, and met with a Tribe of about 500 Indians, whilst I was treating and making Peace with them, and in Pursuance of His Majesty's Instructions, endeavouring to Conciliate their affections towards His Subjects, for Introducing an Intercourse and Commerce with them, by kind treatment and fair dealing, and sent them away well pleas'd therewith, some new England vessels and Inhabitants Boats from Newfoundland, one of which belong'd to Mr. Milner went contrary to my Orders, along the Coast from whence those People came, and from what

I have heard since I left that Coast, I have too good reasons for thinking, those Indians at their return would find their Old People, Wives and Children, who they left at home, Robbed, Murther'd and some carry'd away.

In the year 1763, a Brig named the Decoy, William Knight Master, belonging to New York, the first Mate named Fenny, the Second Mate named John Pringle, the Owners named Farmer and Phinzance, went to the Coast of Labradore, met with a large tribe of Indians, after three days friendly communication and Traffick with them, they contrived to haul their Ship close to the Shore where those Poor Creatures were Encamp'd, who intending no harm and suspecting none, assembled together to look at the Ship, and several of them mix'd with the English on board of her, when, on an apointed Signal being given, they made a General discharge of Guns, Swivels and small arms amongst the Indians, and of those on board, they stabb'd and killed about Eleven, and took Seven alive, then put to Sea, afterwards reflecting on what they had done, and dreading a discovery, they made the Seven who they had kept alive Jump overboard with weights about them, this account with many more horred Particulars, I have from a Man who was one of the Crew of that Vessel at the time, was with me the last year belonging to the ship I then comanded and he shew'd me the Spot where this Bloody transaction hapen'd, he is now in London, and will attest the truth of it.

They (the People from New England) set fire to the woods along that Coast, in Order to discourage and disapoint Adventurers Ships from Britain undertaking the Fishery there, I saw a tract of above Ten Miles of Wood that was Burnt by them the last year a little before my Arrival.

Another time a Winters Crew surpriz'd a party of Indians, and Surrounded them so that there was only one way for them to escape up a steep cliff, three of them who could not get up after several attempts and tumbling down, surrendered themselves, one of the Gang cry'd out to their leader, Master, don't let us kill them, they can't escape, the other answered No, what spare an Indian, and fir'd upon them, as the rest did, and kill'd them all three. Such are all our settlers and Inhabitants in Newfoundland, these and the others aforemention'd from the Colony's, are the People who I have banish'd from Labradore, till His Majesty's Pleasure is known, and these are the People in behalf of whom, a Petition is to be brought into Parliament by way of Complaint against me, for what is call'd by Mr. Milner, Partial, Arbitrary, Opressive Orders, suspending and controlling Acts of Parliament, interdicting the Lawfull Commerce of the Subjects of this Kingdom, and denying them the Rights and Priviledges belonging to British Subjects, but they are unworthy of that Name, they are a disgrace to human Nature, they are a Scandal to the Country to which they belong.

I am, Sir,
Your most obedient Servant,

HUGH PALLISSER.

No. 373.

[13 Sept.,
1773.]**GOVERNOR SHULDHAM TO SECRETARY OF STATE.****SECRETARY—IN LETTERS.**

ADMIRALTY 1/470.

"Panther", St. John's,
13th September, 1773.

Sir,

In my letter to you of the 26th June, I acquainted you for their Lordships' information, of my intention as soon as I had settled the operation of the squadron, and the causes depending in the courts of Justice, of visiting the coasts of Labrador and some other parts of my Government, from which service I returned to this place a few days ago; my first visitation was to the harbour of Croque on the North East part of this island where the subjects of France have a right to catch and cure their fish, and where I found them without any material complaint either of or from them; I then proceeded to Chateaux Bay on the coast of Labrador, and agreeable to their Lordships orders to me of the 12th of May last, I settled the different branches of the fisheries carried on there with all the impartiality in my power and I hope to the general satisfaction of the adventurers.

I have also in obedience to their Lordships' orders of the 12th May, given strict orders to the commander of the Cruizer stationed at the Magdalen Islands, to take the most effectual care for the support and protection of the establishment formed there by Mr. Read and for preventing the disorders and abuses complained of by him.

Immediately on my arrival here this year, I sent a very sensible officer of squadron in a small vessel, to explore that part of the coast of Labrador to the northward of the streights of Belle Isle, to visit the society of the Unitas Fratrum, settled there for the propagation of the Gospel amongst the savage inhabitants of that country, and to offer them any reasonable assistance they might stand in need of, for promoting the laudable object of their mission; and I have the satisfaction of informing you, that they have made great progress in civilizing and instructing those barbarous people, that they are obeyed, respected and beloved by them, and that they have no doubt, but that their undertaking will be attended with every public and commercial advantage expected by Government to be derived from it.

p. 1255

Herewith, Sir, I send you a short narrative of the

observations of Mr. Curtis the officer I sent upon this service (No. 1) together with a copy of a letter (No. 2) from Captain Morris of his Majesty's sloop "Otter," stationed on the coast of Labrador, representing his having seized, in obedience to the orders he was under, several French fishing boats which he found fishing at the island of Belle contrary to treaty.

On complaint having been made me some weeks ago by a French merchant employed at a fishery at a port about twenty leagues from hence, that some of our lawless and disorderly subjects who continue here the winter, had, in his absence destroyed his fishing room and other conveniences.

I sent a Lieutenant in a small vessel to find out the offenders, bring them to punishment and oblige them to make restitution for the injury they had committed, which I make no doubt he has effectually performed, a circumstance I only trouble you with, as an instance to their Lordships that no attention is or will be wanting to preserve the harmony and friendship subsisting between the two Crowns.

His Majesty's sloop the "Otter," having performed the service upon which she has been employed this season, I have ordered her captain to proceed forthwith to Portsmouth. Herewith I send you the state and condition of His Majesty's ship "Panther", and am, Sir,

Your most obedient humble servant,

M. SHULDHAM.

HAMILTON TO R. WILMOT.**

COLONIAL OFFICE RECORDS 194/66.

Answer to No. 1.

No. 6 Foley Place,
London.

SIR,—

Called on by you to make my observations on the accusations in an anonymous pamphlet written with all the rancour and malice of personal enmity.

The Admiral has always been appointed Receiver of the Greenwich Hospital Dues and is entitled to 7½ per cent., but these perquisites have always been given to the Secretary. A difference of opinion has lately existed respecting the liability of those boats now in general use at Newfoundland, but these dues have been paid for nearly a century and I am not aware that the objections made are valid. But if the collection from such boats is illegal, either the question ought to be tried, or the dues relinquished. The statement with regard to the surrogates being collectors of Greenwich Hospital Duty is untrue, with one only exception, that only of the officer employed on the coast of Labrador, for in all districts of Newfoundland there are resident collectors wholly unconnected with the Navy, and they all have the Acts of Parliament and opinion of His Majesty's law officer for their guidance.

None of the Commanders of the Men of War have anything to do with the Collection of the Duty, except the one employed on the Coast of Labrador, where there is no resident Collector, and the amount generally received on that Station is from £20 to £30 the percentage on which is usually given to the Clerk for the trouble of keeping the accounts.

(Signed) HAMILTON.

ROBT. WILMOT, Esq.
Under Secretary of State, etc.

[25 Nov.
1823.]

GOVERNOR HAMILTON TO EARL BATHURST.

No. 121. Ranger at Sea,
25 November, 1823.

My Lord,

I have the honor to transmit herewith for your Lordship's information returns of the Fishery and Inhabitants, and of the imports and exports of the Island of Newfoundland for the Year ending 30 June 1823. These returns do not of course include the result of the Cod Fishery of the present Season, which I have the satisfaction to state has been very abundant the Spring Seal Fishery though on a comparison of Last Year's not so considerable nevertheless produced nearly 200,000 Skins and 2,300 tons of Oil.

I am etc.,

(Sgd) C. HAMILTON.

The Right Honorable,
The EARL BATHURST, K.G.

[25 Nov.,
1823.]**GOVERNOR HAMILTON TO THE SECRETARY OF
THE ADMIRALTY.**

ADMIRALTY 1/479.

Ranger, at Spithead,
30 November, 1823.

Sir,

I have the honour to report to you for the information of the Lords Commissioners of the Admiralty, etc.

Having ordered Lieutenant Cany (?) of the Pelter Gun brig, in the course of the service on which he was employed on the coast of Labrador to proceed up the Invucktoke Inlet, to cut a couple of spars as samples for the Navy Board, I have forwarded in a small box to your address, a chart of that inlet to be laid before their Lordships. There are also on board the Ranger two other boxes, addressed to you, one containing some specimens of the several species of spruce and other trees he found there, and the other some geological specimens collected by him on the different parts of the Labrador coast which he requested might be forwarded to their Lordships.

I think it right to remark that the subjects of the United States of America have not yet availed themselves of the privilege granted to them by the Convention of 1818, of drying fish on that part of Newfoundland lying between Cape Ray and the Rameau Islands, nor have I learnt that they have had any fishing vessells on that coast, though they continue to prosecute their fishery on the Labrador with great effect.

I have the honour to be, etc.,

C. HAMILTON, Vice-Admiral.

29 October
1841.**SIR JOHN HARVEY TO LORD STANLEY.**C.C.N.,
Vol. 89.

("REPORT, October 29, 1841, etc.," Vol. M. 778A, pp. 67-71.)

My principal object will be personally to ascertain the condition and wants of the great number of Persons (and their families) engaged in the Fisheries upon the Labrador Coast, and from whom it would scarcely appear to consist with justice to compel the payment of duties without in return affording them protection, instruction, Spiritual Consolation and legal redress of wrongs and injuries—from those in a word from whom the blessings of Civil Government appear substantially to have been withheld.

It has been humanely suggested that until some permanent arrangement can be made, the despatch of a Vessel from hence, having on board a surgeon, a Missionary, a Schoolmaster, and a Stipendiary Magistrate, to remain upon the Coast during each fishing Season would be attended with great benefits to the Fishermen and their families, but even this, as every other measure of advantage and relief to this Colony must await the restoration to it of its representative constitution to it.

I have the honour to be, my Lord,
Your Lordship's
Most obedient humble Servant
J. HARVEY.

The Right Hon. Lord Stanley,
etc., etc.

Extract: Government House, Newfoundland,
October 29, 1841, No. 16.

Sir John Harvey to Lord Stanley.

[4 May, 1848.]

GOVERNOR LE MARCHANT TO EARL GREY.

C.O. RECORDS 194/1.

Government House,
St. John's, Newfoundland,
4th May 1848.

MY LORD,

Herewith I have the Honor to forward to your Lordship the Blue Book for the year 1847, at the same time accompanied with my report upon the state of the Colony throughout that year, as also its present condition and its future prospects.

* * * * *

Labrador.

In pursuance of the power conferred upon the Governor by the 18th Section of the Judicature Act (5th Geo. IV., c. 67) a Court of Civil jurisdiction was established for those parts of the Labrador within the limits of this Government, presided over by one Judge at a Salary of £700 Sterling, and having as Officers a Clerk and Registrar at a Salary of £150 and a Sheriff at a Salary of £100. This Court heard and determined in a summary way all suits and complaints of a civil nature arising within the limits of its jurisdiction, and for this purpose visited all the different Harbours on the Coast once a year during the months of August, September and October. An Appeal lay from the decisions of this Court to the Supreme Court of Newfoundland in matters at issue above £50, and in cases affecting the title to lands and tenements, rights of fishery, annual rents and matters where rights in future might be bound.

This Court was in existence from the year 1826 to 1834, when it was abolished by the Local Act 4 Wm. 4th, c. 20, which repealed so much of the Judicature Act as provided for its Establishment.

Since 1834 the Labrador Coast has been entirely without any provision for the local Administration of Justice, and although a very extensive fishery is annually carried on there by the Inhabitants of this Island, and there are moreover many permanent settlers, there is not even a single resident Justice of the Peace.

* * * * *

[29 Aug.,
1879.]**GOVERNOR GLOVER TO SIR M. E. HICKS BEACH.**

29th August, 1879.

Sir,

Having received information from Mr. Fortescue, Justice of the Peace at Rigolette, Labrador, and from the Rev. W. C. Shears, of the total failure of the salmon fishery this season, and the consequent prospect of starvation of the inhabitants of Hamilton Inlet, Labrador, during the approaching winter; and as I have not yet visited this part of my Government which I fear has heretofore been very much neglected, I am this day proceeding in H.M.S. "Druid," accompanied by one of my Ministers to inspect the neighbourhood of that locality and am taking with me fifty barrels of flour and two barrels of molasses, supplied by the Government in case immediate assistance may be needed.

I shall furnish a full report of that part of the Colony on my return to St. John's, on or about the 9th September.

Trusting that this may meet your approval.

I have &c.,
(Sd.) J. H. GLOVER.

The Right Honourable
SIR M. E. HICKS BEACH, BART.

[18 Dec,
1880.]**J. H. GLOVER TO THE EARL OF KIMBERLEY.**Newfoundland.
No. 156.

18 December 1880.

10 Nov. 1880.
Encl. No. 1.

SIR,

I have the honour to forward, for Your Lordship's information, a copy of a letter addressed to me by the Naval Commander in Chief of this station in connection with the visit of H.M.S. "Flamingo" to Hamilton Inlet, Labrador, during the recent fishery season, and calling my attention to an opinion expressed by Commander Hall, R.N., that, as numerous disputes respecting land or water rights may arise in that district, he (Commander Hall) submits it is desirable that early next year a member of the Supreme Court, or other person invested with the necessary authority to settle land and fishery disputes should visit Hamilton Inlet.

1 Dec. 1880.
Encl. No. 2.

2. I also enclose a copy of my letter to the Commander in Chief in reply, together with copies of various documents relating to this subject.

Enclosures
Nos. 3-8.
N.B.—These
enclosures
throughout not
available without
much further search
—probably in Record
Office, London.
(Sgd.) C.W.H.
St. John's.

3. I would observe that up to this moment neither myself nor my Government have received any information in regard to disputed rights of land or fishery on the Coast of Labrador which would necessitate the holding of the Supreme Court in that portion of my Government and the Collector of Customs, who visited the district referred to in the Revenue Cruiser in the course of last summer, and who remained at Rigolet from the 5th to the 18th of August, reports that the only dispute brought to his notice was between one Rich and a man named Flowers, who were fishing the Jordan Brook. Flowers had a fleet of three salmon nets, Rich had two, and the latter lifted Flowers third net as being set contrary to custom.

4. The Collector of Customs further states that Mr. Fortescue, Justice of the Peace at Rigolet, made no observations to him in regard to any disputes or disturbances in Hamilton Inlet, and the Honourable Stephen Rendell, the Agent for Messrs. Job Brothers in St. John's when handing to my Private Secretary the original letters he had received from Mr. Fortescue (see enclosure No. 4) remarked that he did not consider the question as mooted by Mr. Fortescue in these letters as of sufficient importance, to trouble either the Governor or the Government with it,

5. The question of an exclusive right to a sea fishery, as put forward by Mr. Fortescue, is contrary to the law of Newfoundland, and the statement that a case of this nature was decided by the Supreme Court in 1874, is incorrect, inasmuch as the Attorney General in his letter to me on this subject (see enclosure No. 3.) states that he is unable to discover, nor does he believe, that any claim to an exclusive right of fishery in Jordan's Tickle has ever been preferred in the Supreme Court.

6. The Coast Fishery Act, Cap. 102, of the Consolidated Statutes of 1872, amended in Act 38 Vic. Cap VII, recognises no exclusive or private rights of fishery, but provides only as to distance between nets. (See section 10 of the Consolidated Statutes.)

7. It would appear that the letters from Mr. Fortescue to the Hon. S. Rendell, previously referred to (see enclosure No. 4) were given by the latter gentleman to the Paymaster of H.M.S. "Druid" and through that Officer reached Capt. Kennedy, R.N., who subsequently called upon me, and after reading certain extracts from them, stated that he was prepared to send a ship to Hamilton Inlet to put things right.

8. I am at a loss to conceive why the whole of the information obtained by Captain Kennedy through his Paymaster was withheld when it was unreservedly given to me some time afterwards by Mr. Rendell, or why Captain Kennedy should be desirous of interfering in a matter upon which I had previously expressed an opinion, without being desired to do so by me at the request of my Government.

9. I at once placed before my Council such information as Captain Kennedy could be induced to give me, and with a view to minimise any injury or injustice that might arise through the hasty action of any (Officer) Official sent to Hamilton Inlet, a minute (see enclosure No. 5) was framed pointing out that no Justice of the Peace had any authority whatever to interfere between occupants and the claimants of land or water privileges. A copy of this Minute was transmitted to Captain Kennedy with a request (see enclosure No. 6) that, in the event of his sending a ship to Labrador, it might be notified to the Officer Commanding for his guidance, and also to Mr. Fortescue J.P. at Rigolet.

10. My Government called upon Mr. Fortescue for an explanation of the statements put forward by him in his letters to Mr. Rendell, and I now enclose a copy of this correspondence. (See enclosure No. 7.)

11. The Opinion relative to rights of fishery referred to by Mr. Fortescue as having been expressed by me, was not contrary to the Colonial Statutes to which neither Capt. Kennedy nor Commander Hall appear to have given any of

their attention, and these officers would seem to have confined themselves to the statements of Mr. Fortescue the Agent of the Hudson's Bay Company. who was naturally interested in obtaining the exclusive right to a fishery that he was about to purchase on behalf of the Company which he represents,

p. 1264

12. If however any expression of action of mine, supported by a Minute of my Executive Council, shall have prevented the perpetration of a grave wrong against ignorant and struggling fishermen, and that the free use of an open run of the sea between Jordan Island and the mainland, shall have been secured for the enjoyment of rich and poor alike, subject only to the proviso laid down in Cap. 102, section 10 of the Consolidated Statutes, I may be well content to pass without further comment the injudicious attempt on the part of the Officer Commanding the fishery squadron to support, at the expense of poor fishermen, a large and influential Company in their endeavour to obtain the exclusive right to a fishery within my jurisdiction, and common to all.

I have &c.,
(sd.) J. H. GLOVER.

The Right Honourable
The Earl of Kimberley.

TEMPLE BAY, LABRADOR,

AND

THE GOVERNOR'S REPLY.RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 4, page 48.
Pitts Harbour, Labrador,
23rd July, 1767.To His Excellency Hugh Pallisser,
Governor of Newfoundland & Labrador, &c., &c.

Whereas the Woods in Temple Bay were last night set on Fire by some People belonging to some Whaling Vessels from the Plantations, contrary to the Statute of the 10th & 11th of William 3rd, We the Undersigners Masters of the Said Whaling Vessels, beg leave to assure Your Excellency that it was not wilfully nor maliciously done, that We have the utmost abhorance to all such audacious unlawfull proceedings as have been practiced on this Coast contrary to the said Statute, and to the exceeding great prejudice of ye Publick, and assure Your Excellency that you may always depend on our strictly conforming to your Regulations for preventing them, and the like shall never happen in future within your Government from negligence in us, which we are sensible is equally prejudicial to the Publick, as if done wilfully; and as your Officer can testify that immediately on his coming to us with your Order, we took every possible means in our Power to stop the Progress of the Flames & our People are now actually employ'd therein, therefore when we have succeed in totally extinguishing the Fire according to your Orders, We humbly intreat you will be pleased to forbear any further proceedings for this offence against the said Statute, and if you please to permit us to proceed on our respective Voyages, We will enter into any obligations you please to prescribe for conforming to what we have above promised.

ISAAC FREEMAN, Master of the Speedwell of Boston.

BENJ'N. BERRY, Master of ye Good Intent of Boston.

JOS'H. DOANS, Master of ye Sarah of Boston.

Sloops.

To the owners of the
three for-going
Whaling Vessels.

New England Whaling Vessels, who with many others were concerned and present at doing the mischief therein mention'd, the rest escaped before they could be apprehended, and left the Woods Burning, upon these three acknowledging their fault, and appearing to be penitent and sincere in what they promised, Gov'r. Pallisser (tho' he was by no means satisfied that the woods was not set on fire wilfully) permitted them to proceed on their Voyages, in confidence that the Gentlemen in Boston concerned in those Vessels, will testify their disapproving all such proceedings of the Masters of their Vessels on this Coast, by turning them out of their employ, which if they do not do, more rigorous measures must be pursued in future, without shewing so much regard to the Interest of the Employers; there is some room for hoping this may be prevented, since the Whalers in general have behaved this Year more orderly, and with fewer insolences and Provocations to the King's Officers than heretofore, and such of them as have been question'd and talked to by the Governor himself have promised to behave in future within this Government better, and as become good Subjects, & acknowledge the advantages they find by submitting to the Government Established here, for immediate decisions of disputes that arise amongst themselves in the course of their Whale Fishing, which otherways would be totally stop'd, by all kinds of violences and mischiefs ensuing amongst a multitude of such Crews of the most disorderly People from the different neighbouring Colonies, all disputing, contending and obstructing each other, none but a few from New England have been offenders this Year, who still are the most difficult to reduce to Order, such is the baneful effects of one or two turbulent spirits, capable of infecting a whole People.

This is address'd to you by the Governor's direction as Owners of the three above Named Vessels, for your particular information, and of any others concerned in the Whale Fishery, to whom you may please to communicate it, hoping thereby to find assistance for stoping those disorders, and that the Masters of the Whalers from New England may be instructed by their respective Owners, to behave when within this Government, as becometh them. To what I write by ye Govrs Orders, I have only to add, that,

I am Gentlemen,

COGHLAN OF FOGO AND GOVERNOR MONTAGU,****ABOUT THE INTERFERENCE WITH COGHLAN'S
FISHERIES ON LABRADOR.****No. 392.****JEREMIAH COGHLAN TO GOVERNOR MONTAGU.**

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 7, page 52.

Fogo, August 30, 1777.

May it please Your Excellency,

Having already done myself the Honour of writing you at large by this conveyance, being one of My Sealing Schooners called—the Advice, I am under the disagreeable necessity of laying before you an Account of some Illegal proceedings which have happened of late at my Settlements on the N.E. Coast of Labrador: referring to the farther—relation of such given by my Agent at that place which I now hand you, and first begging leave to pray you will excuse my troubling you on this occasion, I shall take the liberty of communicating to you the Mode of my first establishing a Fishery at the former Coast, flattering myself that your Excellency, in your wise consideration will judge it equitable to confirm the possession granted unto me by your Predecessor, as you find in every respect I make use of the same to the no small Advantage of supporting so valuable a Nursery to the British Marine.

Early in the Government of my very respected good friend Sir Hugh Pallisser, and by His recommendation I was the first English Subject that settled in the Seal Fishery at Chateaux, so long back as the year 65, and finding it most eligible to pursue the Cod and Salmon Fisheries farther North on the said Coast, I fitted out an armed Sloop to guard against the Esquimaux Indians, and having Lord Rutherford on board, then Lieutenant of the Niger, the late Sir Thomas Adams, Commander at Chateaux, the said Sloop proceeded on a Discovery from the former Port to Cape Charles, Alexis St. Frances, and Porcupine Bays, on the North Coast of Labrador, and on her return encouraged by Sir Thomas Adams, I communicated my intentions to Sir Hugh Pallisser of Settling a Residence at the former places, for the

purpose of carrying on a Cod and Salmon Fisheries, in whose answer to me on the occasion he says “pursue your undertakings on the Coast of Labrador which are highly recommendary to me, and no after Commer, shall dispossess you.” Still the Difficulty of getting proper People at that time to reside at the said Places was a hard task, however in 1769; being join'd by a Captain Cartwright, of the Army, and a Lieut. Lucas of the Navy, who were acquainted on the Coast, we formed a Settlement at Cape Charles, and fitted out an Armed Schooner to go among the Northern Tribe of the Esquimaux Indians to trade, the said Schooner having been unluckily lost, and Lieut. Lucas in her, who was a Man of Honour, I thought it most advisable to dissolve my connections with Mr. Cartwright having been subject to a heavy loss, each Persons settlements being allotted on the Coast of Labrador, he remained with Cape Charles and Sandwich Bay Rivers, confirmed by Lord Dartmouth, then at the head of the Board of Trade, and I kept possession of Alexis and the other Rivers to Porcupine Bay, a little at this side of Mr. Cartwright, since which possession our Labours have differed very widely, as I have employed four times the number of hands, being Bread in this Business, and of course added more to the increase of Seamen; pursuing both the Salmon, Cod, Furring and Sealing Business, with old experienced Men carried from hence to instruct the young beginners; New Comers not being content to have the same opportunity of exploring the Coast, and making a Trial of new found Rivers. In 1775 one Baskomb, a Salmoner employed by a Mr. Hooper of Poole without any proper Authority, while my People were gone to their Store Home for Salt, opposed them by setting Salmon Nets at the Mouth of one of my Rivers, but on my representing such to Lord Shuldham, I obtained an Order from Capt. Parker of His Majesty's Ship the Martin, then at Chateaux, to cause immediately said Baskomb to quit and leave me all the Salmon he had taken, since that time I have remained in peaceable possession of all my Posts, on the Coast of Labrador, occupying the same with Industry, having had this year two Ships there cleared out of England, the one called the Admiral Montague and the other the Young Joseph, for which Ships with my Winter Residence I had 100 Men employed in the Seal and Cod Fisheries & 40 men in the Salmon and Furring Business, occupying all my Posts with a proper Discipline and Decorum; and in Course subject to the greatest expense of erecting Buildings and other necessary Works, for the purpose of carrying on my Business to the best advantage, all which I take the liberty of referring to your Excellency, and I am now come to inform you of the cause of my present application to you in consequence of the following Letter received from my Agent at Spear Harbour, entrance of Alexis River, Labrador.

[22 August,
1777.]

SIR,

Your having suffered John Peaton, Salmon Catcher for you at the exploits to come to this Coast in your Brig, Joseph, he is likely to be very prejudicial to your ensuing years Business, as the said Peaton being divested of every sensation of Gratitude, due to you for the Opportunities given him to serve himself by being concerned on the Half Shares with you, he has so inflamed the minds of all your Salmon Catchers and Furriers, as well as Sharemen, with the notion of going in future on their own accounts, and keeping possession of your Posts in his and their Names, so as to have all the Emoluments arising therefrom to themselves apart from you, in expectation of your not having it in your power to provide understanding men to make use of the Salmon Rivers within your limit on this Coast, that owing to such an unwarrantable Carriage in him, joined by a few others, I fear it will be out of my power to make things agreeable among the People, as the said John Peaton has already hired your Servants that were Salmon Catching at Alexis and Black Bear Rivers (though not for some time entitled to their discharge) and he has engaged them to go the Winter to your Settlements at Sandy Hill Cove in Porcupine Bay, to be employed in Salmon catching the Summer ensuing, saying he has nothing to fear, as their Voyage will be made and he will get a small vessel out of England to protect him, before you can dispossess them next Season, in consequence of which I have been obliged to come under terms of letting many of your old Servants to be half concerned with you the approaching Season, otherwise you must have the trouble of providing others, and it would be some time before they can be acquainted on this Coast, all which I think proper to lay before you, and hope you will put it in my power to prevent this evil arising to your Business under my direction, as I think it a great hardship that these People who were your Servants this Season should have an Opportunity of dispossessing you the next. I may as well claim a right to carry on your Trade myself—likewise it is a great stop to Industry to have those kind of Masters or Planters residing at Newfoundland to mix at this Place among Ship Fisheries as they are prone to indulge a great means of encouraging Sloth; And, further this Peaton has taken all the Servants Wages connected with you and hired by him into his own hands the better to be enabled to oppose you in your residence, so that if he does not succeed the poor deluded fellows will be great sufferers, as your presence here will be a great ease to me, and likewise to be very serviceable to yourself I shall, I shall Sir humbly wish for your appearance and am

Your faithful Servant,

(Signed) TIMOTHY SHEA.

From the foregoing information your Excellency can readily judge what a prejudice such proceedings in those People I encouraged to be industrious in my Business (by

giving them as a consideration an extraordinary part of

p. 1272

the profits on their labour) must be to me if not put a stop to; and as I ever understood from my first settling on that Coast, that no Person had a right of Possession or residence there but such as were protected annually by Ships fitted out from Great Britain, as also that in Consequence of my having been one of the first settlers on the North part of said Coast, which I explored at a very great expence my said Possessions were confirmed to me. I beg leave to trouble your Excellency to grant me such redress as may appear to you equitable, and as those kind of People were forbidden in Sir Hugh Pallisser time to reside on the Coast of Labrador, except employ'd under the protection of a British Ship Fishery, I further pray you to grant me and order to cause them to evacuate my Settlements, except they continue employed under the protection of a British Ship, and not as Planters or Residents, according to the Custom of this country which is pursuant to the late regulations made for the Coast of Labrador. The Peoples names that have taken upon themselves to reside as Planters on my Settlements are John Peaton, John Wrixson, John Nooks and William Phippard, Salmoners, with sundry other of my Servants hired by them, and John Dean, William Measey and George Marsh, Sealers. These People were hired by me and carried from thence as understanding Men in the former Business, and in consideration of their being industrious I allowed them a Share or part of the Profit of their Labours, and as is too much the case with People of their uneducated principles I have experienced the treatment before mentioned from them.

I am at a loss how to apologize for giving your Excellency the Trouble of the foregoing information only flattering myself that your wonted readiness to encourage the industrious will excuse the liberty now taken by

Your Excellency's most obliged and very humble servant,
(Signed) JEREMIAH COGHLAN.

To His Excellency John Montagu, Esq.,
Governor, &c. &c.

SIR,

In answer to your several Letters dated the 20th, 29th & 30 Ultimo, I am to acquaint you that I have been obliged to appoint Lieut. Schomberg Commanding the Labrador Schooner to be my Surrogate on that part of the Coast of this Island, laying between St. John's and Fogo, not being able to

spare a Man of War, as has been customary.

p. 1273

I am sorry to hear you are so unhappily circumstanced with respect to your Servants employed on the Coast of Labrador, and particularly so, as that Coast and Islands have by a late Act of Parliament been reannexed to the Province of Quebec, which puts out of my power as Governor to render you any Service.

I have ordered Lieutenant Schomberg to attend you to your settlement there and to give you every assistance in his Power consistant with my Instructions.

I have also inclosed you an Order to empower you to claim payment for the French Salt taken by the Inhabitants of Twilingate, White Bay &c. &c., as mentioned in your Letter of the 20th Ultimo, with full power to attach their Effects if they refuse to comply with what has been Customary.

I am also to acknowledge the receipt of your Bill on London for fifteen Pounds on Account of the Whale Oil found on your part of the Coast.

I am, Sir,
Your most humble servant,
J. MONTAGU.

To Jeremiah Coghlan, Esq.,
Island of Fogo.

[27 Sept.,
1777.]

No. 394.

N

LIEUT. SCHOMBERG TO GOVERNOR MONTAGU.

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 7, page 71.
Labrador, Fogo Harbour,
27 Sept., 1777.

SIR,

I arrived at Fogo on the Morning of the 15th Instant, and immediately communicated my Orders from you to Mr. Coghlan who has given over his intention of going to the N.E. Coast of Labrador, as a Schooner of his arrived here from thence a few Days ago, and has given some satisfactory accounts relative to Mr. Coghlan's settlements on that Coast, by his desire and according to your Excellency's Order, I thought it my Duty to make some enquiry into the Circumstances, and found these Servants of Mr. Coghlan to be the very Crew who were dispossessed by those complained of, and from what I could learn from them, it appeared to be not only a Breach of Trust, but a most Illegal proceeding.

Mr. Coghlan has sent the Schooner with the same Crew to the Dispossessed Settlement to procure Furs this Winter, and by a Brig of his which Sailed at the same time, I sent the inclosed Order; It will I flatter myself meet with your Excellency's approbation, and I think it strictly conformable to the Orders and Instructions I received relative to my Proceedings on that Coast.

From Complaints made me by Mr. Coghlan concerning some French Salt which was left on the Coast of Newfoundland, to the Northward of this Island and plundered by many of the Inhabitants of Twilingate, Mr. Coghlan desired my Assistance in procuring him the Collection of the accustomed Duty of Five Shillings per Hogshead, which he had found some Difficulty in as well

as those who possessed the Salt positively denying it, the Mr. Coghlan at the same time had not only taken some of it now in his possession, but had also been credibly informed of their having Cured their Fish with it this Year.

Mr. Coghlan likewise complained to me of the irregularity of collecting the Greenwich Hospital Money at the same place. From these Complaints, I thought it a Duty incumbent on me to visit Twilingate, provided it would not interfere with the Surrogatory Business, and accordingly sailed for that Port, with Mr. Coghlan on board, the 20th in order to settle the Disputes, about an Hour after I left Fogo, it came on a very hard gale to the E.N.E., and so exceeding thick, as to render it unsafe, running in for the Islands, I with the advice of Mr. Coghlan put back, and the Wind continuing in the same Quarter, with as thick Weather, for three of four days, I thought it most Advisable to dispatch a Man who was recommended by Mr. Coghlan, in order to make some enquiry about the Salt, and to collect the Hospital Money.

The Man returned on the 25th but brought no Satisfactory Accounts from the People who had taken on board the said Salt, only gave him some Nocks, which plainly indicate their having had it, and in a much greater quantity than was mentioned in your Excellency's Order to Mr. Coghlan, as they denied making Salt to having received any more Salt than therein mentioned.

I have received all the Hospital Money from this Island & Twilingate except from Mr. Slade, who I wrote to, desiring he would settle, but received rather an evasive Answer. I shall therefore leave Fogo the first Wind, which I had proposed dong on the 25th, but the Wind continuing to the S. E. ward prevented me.

I am, Your Excellency's most obedient humble servant,

I. SCHOMBERG.

To His Excellency,
Governor Montagu.

[19 Sept.,
1777.]

No. 395.

LIEUT. SCHOMBERG'S ORDER.

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 7, page 73.

By Isaac Schomberg, Esq., Surrogate to His Excellency John Montagu, Esq., Governor and Commander in Chief in and over the Island of Newfoundland Coast of Labrador, &c., &c.

WHEREAS it has been represented to me by Charles Hellinss and his Crew who were employ'd by Mr. Jeremiah Coghlan on the N.E. Side of the Coast of Labrador as Furrers and Salmon

Catchers on Shares, that the said Charles Hellinss and Crew having met with bad success at a part of the said Coast, called Partridge Bay where they were employ'd, Furring and Salmon
p. 1275

Catching the last Season, did on the 4th Day of August last, proceed to the Northward of the Mealy Mountains, in search of some other Place on the said Coast of Labrador, more likely to encourage their Industry to the Advantage of their Employers, and having after much Fatigue and trouble, discovered a Bay about Twenty Leagues to the Northward of the aforesaid Mealey Mountains fitting for the taking of Furrs the Winter, and Cod Fish and Salmon the Summer, which Bay or River that runs therein, no English Subject did ever discover or occupy, and that he the said Charles Hellinss and Crew or some other Crew of Hands belonging to the said Jeremiah Coghlan at whose Expencc the said Discovery has been made, are to be employed at the aforesaid River the approaching Season for the purpose of taking Furrs, Salmon and Fish.

By the Power and Authority to me given by His Excellency Governor Montagu bearing Date at St. John's the 4th day of September, 1777.

I do hereby Order and Direct that no Person or Persons employed by John Payton, John Wrixon, or in their Names, or in the Name of any other Person or Persons whatever, do at any time after the Date of these presents disturb, molest, or pretend to hinder any Person or Persons whatsoever to or employ'd by the said Jeremiah Coghlan, the first Discoverer of the said Bay or River, from making of the said Premises, for his use only, and I forbid all Servants and others known by the Name of Planters, who may pretend to reside on the Coast of Labrador without the protection of a British Ship annually cleared out of some Port in Great Britain to be known as his or their Property, as the Law directs, not to occupy or make use of any Bay, Harbour, Creek or River for his or their use to the prejudice of the first Establisher; And should such Servants or Planters persist in residing on the said Coast, they are ordered herewith to evacuate the same otherwise they will be compelled.

And Whereas it appears to me that the said Jeremiah Coghlan, not only conforms to the Laws and Regulations in every particular, heretofore made regarding the said Coast of Labrador for the benefit and increase of His Majesty's Marine, but also has been at great expence in erecting Stages, Buildings and other Fisheries, for the purpose of carrying on the Sealing, Furring and Cod Fishery, and Salmon Fishery providing yearly two Ships from Great Britain to the said Coast, for the use of His Fisheries.

I do hereby also further Order and Direct that no Person or Persons whatsoever of His Majesty's British Subjects, shall on any pretence, as Settlers on the said Coast of Labrador take possession of, or settle at any Salmon River, Sealing Posts, Furring Paths, or Fishing Harbour, that has been first Discovered, occupied and established by the said Jeremiah

Coghlan, or the people employ'd by him, on the said Coast of Labrador, he at all times taking care to conform to the Laws regarding his said residence.

Given under my hand on board His Majesty's Schooner Labrador, in Fogo Harbour, this 19th day of September, 1777.

I. SCHOMBERG,
Surrogate to His Excellency the Governor.

SIR E. GOWER TO ADMIRALTY.

Vice-Admiral Gower to the Secretary of the Admiralty.

ADMIRALTY 55/475.

Isis, St. John's Harbour,
Newfoundland. 14th September 1804.

SIR,—

I beg you will acquaint the Lords Commissioners of the Admiralty, that having received information from the coast of Labrador, that the American fishermen have resorted thither in vast numbers this season, I despatched Lieut. Morrison on the Queen Charlotte hired cutter to that coast, for the purpose of making enquiry into the conduct of the Americans, and receiving any complaints the British fishermen might have to make against them. Lieutenant Morrison accordingly, on his return from this service delivered me the representations he had received from the British merchants carrying on the fishery there, copies of which, as well as of the Lieutenant's letter to me on this subject, I have the honour to transmit you herewith to be laid before their Lordships, the whole of which seem to suggest the necessity of stationing a frigate or sloop of war on that coast, during the fishing season, to enforce the due observance of the third article of the Treaty of Versailles on the part of the Americans.

[20 Nov.,
1804.]

I have the honour also to enclose herewith for their Lordships' information a copy of Lieutenant Morrison's report of the British Fisheries in those harbours on the coast of Labrador which he visited as well as his answers to certain queries respecting the American Fishery on that coast.

I am, Sir,

Your most obedient humble servant,

E. GOWER.

Note in different hand.

Approve of the steps he has taken; direct him to station a sloop there for the protection of the fishery and conclude that in his capacity of Governor, he has transmitted copies of these

papers to H.M. Secretary of State.

By Sir Charles Hamilton Bart., Vice Admiral of the White
and Commander in Chief of His Majesty's Ships
and Vessels employed and to be employed at and
about the Island of Newfoundland
&c.

Whereas the fisheries carried on by His Majesty's Subjects on the Coast of Labradore require the protection of a Man of War, and the authority of a Surrogate and Justice of the Peace, you are therefore hereby required and directed to proceed in His Majesty's Ship Favourite under your command to visit the said fisheries going first to Sandwich Bay, where a considerable Salmon Fishery has been for many years established and is now prosecuted by Messrs. P. Beard & Co. who have lately complained that their boundaries have been encroached upon by Vessels fitted out in Nova Scotia as well as by Subjects of the United States. You will make this fishery a particular object of your attention, and report to me relative to any points contained in the accompanying Memorial from Beard & Co.,* upon which your immediate observation may enable you to form a correct judgment, and you will cause the enclosed Regulations to be made public, and as far as in you lies enforce the observance of them. You will afterwards visit the different Establishments South and Westward as far as L'Ance a Loup within the Straits of Belleisle, calling occasionally at Cape Charles for the purpose of communication with the Magistrate there, to whose care I shall address any subsequent orders I may have occasion to send you; and you will if a favourable opportunity offer, without interfering too much with your other duties, call at Croque Harbour with the view of observing the fisheries of the French and obtaining the best accounts you can of their extent, of which as well as those of the Americans on the Labrador Coast you will make Returns agreeable to the prescribed form.

If you should find it necessary you are authorized to take a Pilot for the Coast to which you are bound, and bear him on the Books of the Ship you command for Victuals only for which service he will be paid at the rate of 5/- per day and you are to discharge him with triplicate Certificates the moment you are able to dispense with his assistance.

You will continue on this service until the 15th Sept. by which time you will quit the Station assigned to you, and return to St. John's unless from any unforeseen circumstances you should consider it necessary to remain longer on it.

Given under my hand on board the Sir Francis
Drake in St. John's Harbour the 15th June, 1820.

C. HAMILTON.

To Hercules Robinson Esqr.,

Captain of His Majesty's Ship Favourite,
By Command of the Commander in Chief.

P. C. Le Geyt.

N.B.—You will receive herewith a Warrant and
Instructions
to collect the Greenwich Hospital duty to which you will pay
due attention.

**CAPTAIN MARTIN, OF H.M.S. CLINKER, TO
GOVERNOR HAMILTON.**

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND, Volume 32, page 99.

H.M. Brig, Clinker, Cuff Harbour, Entrance of Invertoke
Inlet,
1st Sept. 1821.

SIR,

In my last dated 24th July, I informed you of its being my intention to proceed to the Northward about the 1st of August. The 26th July we proceeded out of the Inlet from Information obtained by a Shallop which arrived here from the Northward the day previous to my sailing of the great quantity of lee still remaining in the offing, I judged it advisable (to ensure a passage) to proceed between the Islands and the Main land if possible. From the 26th July to the 11th Aug. I was employed beating and running through the Islands when weather permitted anchoring at evening & weighing at dawn of day.

When we arrived at Port Manvers, going between Newark of Island and the Main, coming to the anchorage through Pierre point Canal, the innumerable quantity of Icebergs and other Ice, rendered our passage outside nearly impossible, and from the observations I made from the tops of hills, which I was obliged to mount every evening to observe our way (our Pilot not knowing the Coast further than Cape Harrison, 60 miles to the Northward of Invertoke) and the Charts so extremely erroneous I could not depend on them. The Islands and Rocks extend 50 miles from the Main land, we experienced 8 days foggy blowing weather during our passage,

At Port Manvers not one Inhabitant resides, and judging it your wish I should communicate with the Moravian Missionaries on this Coast, I proceeded from thence the next morning further to the Northward intending to find their settlements out. After running round an innumerable number of Islands in a Northerly direction till the 15th (following the

and weighing as before) when I anchored on the N. E. side of Okkack Island where we found the Northernmost Moravian Settlement, the gratitude they expressed at Your Excellency's attention to them in sending a Man of War to visit their Settlements was unbounded and the whole of the Congregation of Indians desired I should express such to you. On the 21st I proceeded to Nain, the second Settlement, on our way back, the 26th, sailed for Hopedale their Southernmost settlement, arrived at it 27th. We were accompanied by the Harmony Merchant Brig their annual Vessel, from those two places likewise the utmost gratitude was expressed at our visiting them, the 30th weighed, and anchored at this place for the night.

I trust my visiting the three Settlements will meet Your Excellency's approbation, as I shall be enabled to arrive at the appointed Rendezvous by the 3rd. I weigh for Sandwich Bay to-morrow morning.

I have the honour to be, Sir,

Your most obedient humble servant,

(Signed) WM. MARTIN.

Commander in Chief, &c. &c.

No. 403.

C

EXTRACT FROM A REPORT

MADE BY CAPTAIN ALEXANDER MILNE, OF HER MAJESTY'S SHIP
" CROCODILE," RELATIVE TO THE FISHERIES OF NEWFOUNDLAND—
1840.*

“I am not aware that there is any settlement, properly so called, on this part of Labrador. The word I conceive to mean a number of houses, with inhabitants, residing permanently in one locality; but there are, I believe, numerous establishments, the same as at Dumplin, Round, Black, and Indian Islands, along the Coast from Belle Isle northward. These establishments consisting of one principal house, it is, in general, a store for the sale of the various necessaries of life, and implements of fishing, &c., and for the purpose of purchasing fish, from any casual fishermen who come here. The Superintendents of these establishments generally come to these houses every Spring, bringing with them a number of fishermen, all of whom reside in temporary houses during the season, and when it is concluded return to England, St. John's, or their native place.”

* Journals of Leg. Council, Nfld, 1841, App. No. 30.

[September,
1841.]C.C.N.,
Vol. 89.**CAPTAIN WYVILLE TO SIR J. HARVEY.**H.M.S. Cleopatra, St. John's,
September, 1841.

On the Coast of Labrador from Blanc Sablon to Sandwich Bay the fisheries are carried on in Schooners by the Inhabitants of St. Johns and other adjoining Ports with a few establishments from Europe. There are four or five hundred people employed on the Coast. The fisheries are very productive in Cod, Salmon, Seals, and Herrings. In six weeks the general average is about 100 Quintals of Cod a man, and in the spring several thousand Seals. At Eagle River, Sandwich Bay, Messrs. Hunt take about 30 tons of Salmon and from the adjoining Rivers nearly as much. At one haul with the Seine at Lance à Loup Messrs. Stabbs establishment caught 200 Barrels of Herrings, and nearly the same quantity at Blanc Sablon was caught by Messrs. de Quitville. On this part of the Coast the Herrings are uncertain, but not so in St. Georges Bay.

The Herrings come into the Barrasway early in May very regularly. Last year there was shipped from this port 30,000 Barrels in 47 Schooners for Quebec, Halifax and other parts in America. The trade in Herrings might be on a large scale here.

The French encroach on the Labrador Coast early in August. The fish leave their side about that time, the distance across is about fifteen miles where the Fish are in great abundance for a month later. They frequent the unsettled Bays, or get permission from the Settlers by giving the livers of the cod they take.

At Blanc Sablon the people employed by Messrs. de Quitville complained of the tyrannical treatment they suffered from the Agent, for not working on Sundays he had put them in irons (and kept them on Bread and Water until they consented to work). As there is not a magistrate on the coast I advised the Agent to compromise with the men which he did by giving them £2 each, and promised that such treatment should not be repeated. There is a great want of both a magistrate and a medical person on the Coast of Labrador during the fishing Season. There cannot be less than 5,000 people employed on the Coast. There are many disputes arising from the peculiar description of property on the Coast which a Magistrate would easily settle, and in many places I found that the inhabitants wanted medical advice. By the English Fishermen the Season is said to have been a good one.

The French on the Banks have made a fair Season, but to the Northward not good. They have had about 300 Vessels on the Banks and 100 to the Northward employing about 12,000 Men, two-thirds of which are shore going people. They get a Bounty of 11 Francs per Quintal for the fish taken to the West Indies, and 8 for that to the Mediterranean. Very little of the Newfld. fish is used in France.

The American have had a bad Season and had not more than 200 Vessels this year on the Coast, the number being 2/3rds less than last year.

I have the &c.

(Signed)

C. WYVILLE, Captain,
H.M. Ship Cleopatra.

Vessels to be hired to protect the fisheries to collect Revenue at Labrador and or the conveyance of the Judges on Circuit. J. L. Pendergast to be Supdt. of fisheries and Act S. Collector.

**EXTRACT FROM MINUTES OF NEWFOUNDLAND
EXECUTIVE COUNCIL.**

12th June 1855 to 10th Oct. 1861. RECORD BOOK, 3, p. 116.

June 7th, 1856.

His Excellency the Govr.,
Atty. Gl. Col. Sec. Honble. L. O'Brien.,
Solgl. RI. General.

It was resolved that a vessel be despatched to Labrador and to the West Coast of this Island to guard fisheries at Bell Isle and to enable the Govt. to enforce the collection of the Revenue, also a suitable boat to guard the fisheries at Cape John, and that tenders be advertised for suitable craft for that purpose and also for suitable vessels to convey Judges on circuit. James L. Pendergast Esq., M.H.A., was appointed Acting Superintendant of fisheries and Acting Sub Collector for Coast of Labrador and Western Coast of this Island. Remuneration £100 and 10 per cent. on any duties he may collect.

[23 June
1857.]**MEMORANDUM BY J. KENT, COLONIAL
SECRETARY.**

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 51, page 37.

[Copy.]

Secy.'s Office,
23rd June, 1857.

The Colonial Government have made the following arrangements for the protection of the Fisheries at the Labrador and in the Straits of Belle Isle during the present Summer.

A Schooner called the Alice (65 tons) under the command of William Coady with a Superintendant on board sailed about the 20th May to Cape Ray in order in the first place that the Superintendent might take means for ascertaining the Census of the population and other statistics on the Western Coast as far as Cape Norman and thence along the Northern Coast to Quirpon. He would thence proceed to the Straits and remain there until about the beginning of September employed in protecting British Fishery Interests in that neighbourhood. Mr. M. J. Kelly a member of the Colonial Assembly is the Superintendent on board of the Alice.

A second vessel called the Nelson (39 tons) a clipper schooner Wm. Giles master under the direction of the Superintendent of Fisheries for the Labrador James L. Pendergast Esqr., M.H.A. sailed a day or two after the Alice for Cape John (at which important point the boundary between the English and French Fishing grounds the Colonial Government have placed a boat and four hands under the command of Henry Knight who has been employed for several successive years in the same service) from whence he would proceed to Quirpon taking the Census of the population and other statistics on his route He would thence proceed to Labrador and be employed in taking the Census (as far as the entrance of Hudson's Straits) and protecting the Fisheries during the remaining period of his service along that line of Coast. The Act for taking a Census having been passed during the last Session of the Legislature and which provides that it shall be taken in the course of the present year it has been found expedient to combine the two duties in order to ascertain the British population resident or what is commonly called the French Shore and upon the Coast of Labrador within the Government of this Island. A Boat and four hands under the Command of Caleb Young has been stationed at Belle Isle and Mr. Young has been instructed to keep a constant look out round the Island and its neighbourhood to prevent French Encroachment.

A sum of money has been appropriated by the Legislation
for the erection of a Breakwater at Belle Isle.

**ACTING COLONIAL SECRETARY R. CARTER TO
STEPHEN MARSH, Esq.**

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 52, page
766.

Secretary's Office,
June, 1863.

SIR,

I have to direct your attention to the above copy of the Governor's instructions defining his Jurisdiction in the Island of Newfoundland and the Coast of Labrador. On the latter Coast the Western limit is 59 25' Longitude 57° 9' West.

The position of Cape Chudleigh at the entrance of Hudson's Strait, to which the Jurisdiction extends is laid down in Latitude 60° 37' North, Longitude 65° West; and in performing your duties which will be explained to you in the protection of the Fisheries, you are strictly to adhere to the limits laid down.

I have &c.
(Signed) R. CARTER,
Acting Col. Sec.

To Stephen Marsh, Esq.
Superintendent of Fisheries.

No. 408.[Oct. 17,
1863.]**MINUTE RESPECTING EMPLOYMENT OF H.M.
"VESUVIUS."**

Pages 216 & 217, 4 RECORD BOOK, Oct. 26th, 1861, to Aug. 3rd, 1869.

Oct. 17th, 1863.

The following Minute was adopted with respect to the Employment of H.M.S. "Vesuvius" during the past season.

The Governor reported to the Council that Her Majesty's Ship "Vesuvius" had returned from the Westward on Tuesday last where Captain Hamilton had been despatched on special duty at the requisition and in aid of the Civil power and on Thursday he had unexpectedly proceeded to Halifax to convey the mails from England landed here from Royal Mail Steam Company's Ship "Africa" which had unfortunately sustained considerable damage by touching on the Coast near Cape Race, and bore up for St. John's.

The fishing season being now terminated the Council are desirous to take an early opportunity of expressing on behalf of the Government and the community, their acknowledgements to His Excellency Vice Admiral Sir Alexander Milne for the efficient services which have been rendered by H.M.S. "Vesuvius" for the protection of Commerce and the Fisheries.

The Admiral will doubtless have seen by the able Reports of Captain Hamilton that his co-operation with the authorities on the Coasts of this Island as well as those of the Labrador have enabled the Government to adopt measures for raising a Revenue on the latter for the administration of Justice, and protection of their Fishery, which but for the presence of H.M. Ship might have been difficult to accomplish.

Captain Hamilton has also rendered essential service on the Southern Coast by the support given to the civil power in checking the plundering of wrecks which crime had become too prevalent on these coasts and which the Government will use every effort in their power to put down.

The Council take the liberty of requesting that Admiral Milne will communicate to Captain Hamilton their regret that they had not the opportunity before his departure of personally offering to himself and Officers their thanks; and to convey to His Ship's Company the sense they entertain of their good conduct during the times when the "Vesuvius" was necessarily in harbour.

A. BANNERMAN, Governor.

No. 409.**ADDRESS OF HOUSE OF ASSEMBLY TO GOVERNOR
AS TO PROTECTING SALMON FISHING.**

COLONIAL OFFICE RECORD 197 / 39. JOURNAL OF ASSEMBLY,
NEWFOUNDLAND.

[29 March,
1865.]

Wednesday, 29th March, 1865.

Resolved that the following address be presented to His
Excellency the Governor.

To His Excellency Anthony Musgrave, Esq.,
Governor and Commander-in-Chief,
In and over the Island of Newfoundland
and its dependencies, etc.

MAY IT PLEASE YOUR EXCELLENCY,

The House of Assembly having had under their consideration the general decrease of late years in the produce of the salmon fisheries of this colony, and the causes to which that decrease may be attributed, are of opinion that it would be desirable, with the object of protecting this valuable fishery, that the laws for its regulation should be rigidly enforced by means of a small marine police force, the expense of which should be defrayed by a small rent to be imposed upon the salmon rivers in Newfoundland and the Labrador with a view to their obtaining such information as may enable them to legislate to advantage upon this subject, they respectfully request that Your Excellency will be pleased to direct a return to be laid before them of the number and situation of salmon rivers on the coasts of Newfoundland and Labrador, and the names of the parties by whom they are respectively fished, of the titles by which the occupants hold, and of the average annual produce of each river for the space of five years past.

Ordered, that the address be engrossed and presented to His Excellency the Governor by such members of this House as are of the Honble. Executive Council.

[10 Sept.
1865.]**No. 410.****REPORT OF JUDGE SWEETLAND ON THE SALMON
FISHERIES.**

COLONIAL OFFICE RECORD 197 / 41. JOURNAL OF THE ASSEMBLY,
NEWFOUNDLAND. Appendix.

Report of B. Sweetland, Esq., J.P., on the Salmon Fisheries on
the Coast of Labrador.

Schooner "Volant,"
St. John's,
10th September, 1865.

SIR,

I beg leave to acknowledge receipt of your letter of the 18th May last, directing our attention to the salmon fishery on the Coast of Labrador, and to report thereon. I have the honour to state, for His Excellency the Governor's information, that not having any account of the catch of former years, I am not able to say if there is decrease or increase in the quantity taken in the brooks, other than may be influenced by the number taken at the headlands as they approach the bays to seek their usual breeding places; nor have I been able to discover, except in one instance, any unfair means to prevent their access to the rivers, in the spawning season, neither is there any exclusive claim set up to any station that I can discover, all being situate in tide water; except that of Eagle River in Sandwich Bay, where there are nets in the eddies, leaving three-quarters of the river open for ingress or egress, and at Kenewichie in Lake Metvill [*sic*] in Exquimaux Bay; although no exclusive right is set up.

The fishery in Sandwich Bay is monopolised by Messrs. Hunt & Henley, and that in Exquimaux Bay is nearly so by the Hudson Bay Company. To these monopolies may be attributed in a great measure, the quantities taken in these two bays, as the gentlemen managing these fisheries are fully alive to the importance of preserving the small fish. The take on the whole coast as far as I can calculate, will be this year 1,657 tierces. On the south part of the coast the fishery has been a failure.

Although not within the limits of the directions contained in your letter, I cannot but remark the 4½ inch mesh used on this coast is a serious injury to the fish.

The first brook within our jurisdiction is that at Blanc Sablon, the tide flowing a mile or two before it meets a rapid. Not fished within its waters, one net set off its mouth by De Quetville & Co. does not supply their table.

Forteau is a large and rapid river, no fishing is carried on there; and not much in its neighbourhood.

Pinware Brook, so called, is the entrance to a Bar Harbor, the river being 3 miles up the arm. The fishing is in tide water, consequently a free fishery. It yields, on an average, 43 tierces. It is used by Messrs. Stab, Row & Co., by Odalls and by Dorsey. Messrs. Stab, Row & Co. attempted but failed to establish an exclusive right, the Odalls having fished it in common with them for 30 years. No use is made of the river.

Wiseman's Brook, about 3 miles from Red Bay, is occasionally fished by one and another; the take is very insignificant. Chateau Bay always yielded a fair catch until this year, has two considerable streams running into it; no use is made of either of them.

Lewis Inlet, "the Main River," is fished for salmon, and yields on an average 7 tierces. It is not always used by the same persons; it was formerly claimed by Messrs. Slade, who have ceased to exercise their right to it.

Hawk's Harbor or Bat, near the main river, is a station yielding three tierces. Messrs. Slade also claimed this station but have abandoned it. Sand Hill, situated between Indian Tickle and Cape North has a river, near which is taken 40 tierces, mostly small.

Sandwich Bay yields the largest catch on the coast. There are three considerable rivers flowing into it, viz.:—

Eagle River,
White Bear River, and
Paradise River.

Eagle River is the only one used, the average about 40 tierces; the whole would average 700 tierces—24,000 tins of preserved salmon were put up this year.

Esquimaux Bay and Lake Melville above the narrows, into which there are several rivers flowing, two only of them are fished, viz.: the N.W. River and Kenewichie by the Hudson Bay Company. The former giving only a supply for the table; the latter averaging 8 tierces. Both these stations were purchased of the estate of Bird & Co.

The whole collection in this way is 450 tierces. Mr. Norman participates in this fishery. Messrs. Hunt & Hill had a station here, but were purchased out by the Hudson Bay Company.

The N.W. River as well as Hamilton River, are said to be navigable for boats 40 miles, terminating in falls, over which salmon are known to ascend. The lakes and rivers above these falls abound in fish, affording means of support to the tribes of Indians occupying that part of the country.

I have, etc.,

[31 Oct.
1867.]**REPORT OF GENERAL SUPERINTENDENT ON
PROTECTION OF FISHERIES ON COAST OF
LABRADOR (FARMS).**COLONIAL OFFICE RECORD 197/45. JOURNAL OF
THE ASSEMBLY, NEWFOUNDLAND. Appendix.Copy of Report of the General Superintendent of Fisheries on
the Protection of the Fisheries on the Coast of Labrador,
and in the Straits of Belle Isle, during the summer of
1867.St. John,
31st October, 1867.

SIR,

I have the honour to report for the information of His
Excellency the Governor, that on receipt of the mails for
Labrador per R.M.S. "Delta" for which the "Brilliant" had
been delayed, I lost no time in getting her under way and sailed
on the 9th July.

* * * *

On enquiring what these fishermen did when the fishery
partially failed, I was glad to hear that the greater part of them
had small farms which yielded them no small profits. It is to be
regretted that all of our people are not similarly situated. I
cannot conceive how so many of them are in continual
poverty, dependent on the Government [year] by year, while
their neighbours, who have no better chances to rise, are
tolerably well off, unless it be that their habitual indolence and
improvidence are the causes; for if the thousands of acres of
fine land on this coast were cultivated and attended to by our
poorer classes, Newfoundland would be in a flourishing
condition.

* * * *

16th. Left L'Anse Amour at 5 a.m. and arrived Forteau 1
p.m. Visited the lighthouse which cost £20,000 and found
everything in excellent order. The keeper, Mr. Blamfield, is a
worthy man and has been in charge 12 years. The captains of
H.M. ships, who have called at this place, speak of him in the
highest terms. By his industry he has shown what can be done
in respect of husbandry and he now enjoys the fruits of his
labours. Our people have the benefit of this light as well as that
of Belle Isle, and I hope they know how to appreciate it.

p. 528.

17th. Left Forteau and steered East.

* * * *

While I was on Belle Isle, His Excellency the Governor visited the Labrador. If I had seen him it would have afforded me much pleasure to have taken him up some of the bays and rivers, where it would be unsafe for a man-of-war to venture.

STEPHEN MARSH.

The Honble. John Bemister,
Colonial Secretary.

No. 412.

[1872.]

REPORT ON FISHERIES.

Report on the Newfoundland and Labrador Fisheries, 1872.

COLONIAL OFFICE RECORD 197 / 57. Appendix No. 56.

NEWFOUNDLAND, JOURNAL OF ASSEMBLY.

Crossed over from St. Barbes on the 17th, detached boats to visit Bradore and the neighbouring islands, and anchored in Blanc Sablon Bay. The Jersey firm of Le Boutellier Bros. have established a new room at Green Island since my visit last year, which is working very well. I was informed that the cod fishery in this place had improved considerably during the last three years; previously to that, it had been failing, and the herring fishery during the same interval had not been good. The want of a church and school is much felt, especially during the summer; it is a pity that a church had not been erected here, instead of at Forteau, where a schoolhouse would have answered the purpose, especially if situated on the Jersey side. A number of fishing schooners and larger vessels belonging to the Jersey and other establishments, were at anchor in the Bay of Bradore, and the neighbouring islands, whose aggregate catch was about 40,000 quintals; some of the schooners had two cod seines each, and the smaller ones one. The trout fishing in this river is excellent, and is only second to that of Forteau; the great advantage being its proximity to the ship. The principal salmon river to the westward is in Salmon Bay, it is called St. Paul's River, and is fished by a Canadian named Louis Chevalier; very few salmon have been caught at Bradore River lately, although it was considered by Lieut. Hughes of the "Niobe" as an excellent fishing river, both for salmon and trout. I was asked while in this place what was the proper boundary line between Canada and Labrador, and whether any fishery laws existed, so that the rights of the fishermen could be ascertained.

The opinion here is that this year's "voyage" is likely to be much better than that of last year, very few salmon had been taken from the river; the country abounds in game, but very little trapping had been done lately. Sub-Lieut. Warren visited L'Anse Loup and I visited L'Anse Amour during our stay. Mr. Frederick Davis, the resident at the latter place, had heard that some persons from Newfoundland intended to come and settle on his

ground, but I told him that on my return to St. John's I would see what the law was on the subject, as his father had owned and resided on the property for 70 years previously.

* * * *

Lieut. Wickham, ascended the Pinware river for some distance, but found no obstruction in the shape of weirs or set nets. Thomas Elworthy, the fisherman, quoted his catch at 40 barrels, but I have reason to believe that he and all the salmon fishers in the rivers on the coast greatly underrate their "net" proceeds. There is much complaining in this place about the French hauling bait; they come over from the other side in Chaloupes of 20 tons and batteaux of 8 tons and return with hundreds of tons of bait to the French shore, with which they strew the ground in the vicinity of their trawls or bultows; this is said to attract the fish off this coast to their own shore.

* * * *

The inhabitants of this harbour are rather a large community; they have a church and chapel, and are very orderly and respectable. They remove to winter houses at the head of the bay in the fall of the year; this is also the custom in some other places. There are said to be about 1,500 settlers on the shore between Red Bay and Cape Harrison and about 500 more between this and Blanc Sablon. It is estimated that during the fishing season, there is on the Labrador, a fluctuating population of no less than 30,000 persons, a large proportion of whom are said to be women and children, who are employed on board the fishing craft to split and prepare for salting, and otherwise assist in "making" the fish. I met Mr. Canning, the Sub-Collector of Customs; he said that Judge Pinsent and Mr. Knight, the Collector, were then at Rogoulette, or some other place in that neighbourhood, in the "William Stairs," revenue vessel; Mr. Canning visits the coast from Red Bay to Blanc Sablon in an open whale boat; he experiences no difficulty in collecting the revenue. There is a rumour on this coast that the French are again trying to get leave to fish on the Labrador. I mention this as one of the various "canards" that are winging their way along the coast.

* * * *

Chateau Bay, August 1st.

* * * *

I met a sad case of distress on Castle Island. Two fine boys, aged 16 and 12 respectively, sons of a man named Charles Stone, who winters on Cape Norman, and does a great deal of trapping during the season, were lost in the snow for several hours, and on recovery have suffered from frost bites to such an extent that both have lost their feet, and are now helpless cripples. I arranged to take the poor boys down to St. John's in the "Lapwing" for hospital treatment, but on landing with the surgeon to convey them on board, the lads were unwilling to leave their home, and their parents would not decide to entrust them to our care, so I had most reluctantly to leave them to their fate. The state of one of the boys is such that he probably

will not live long without medical assistance and generous diet.

ABOUT PINWEIR (PINWARE) ONLY.**

COLONIAL OFFICE RECORD 197 / 59. JOURNAL OF THE LEGISLATIVE
COUNCIL. NEWFOUNDLAND. Appendix.

H.M.S. "Sirius,"
Sydney, Cape Breton,
18th July, 1873

SIR,

PINWEIR.

No fish yet (cod); good haul of salmon in the river, which for about 11 or 12 miles from the mouth is of some size and depth; many nets set, all according to law. Mr. Ellworthy, who fishes the mouth, says he never knew them to take a fly; the river above what I have stated, is strong and shallow for the most part. A Government school is kept by Mr. Odell; no doctor; occasional visits by a clergyman. Mr. Ellworthy grew some good potatoes.

I have the honour to be, Sir,

Your most obedient servant,

D. MILLER,

Captain and Senior Officer.

In the Privy Council.

IN THE MATTER of the BOUNDARY
between the DOMINION of CANADA
and the COLONY of
NEWFOUNDLAND in the LABRADOR
PENINSULA.

I, FREDERICK COLMAN BRIEN, special Officer of the
Department of Finance and Customs of Newfoundland, make
oath and say as follows:

1. Acting under instructions of the Hon. Minister of Finance
and Customs to compile a statement from the various
Departments of the Government of the amounts paid on
account of public services for Labrador for the fiscal years
ending June 30th, 1924 and 1925, I have prepared the
statements attached hereto:

A summary statement marked "A,"
A detailed statement marked "B 1 to 11."

2 These statements are correct to the best of my knowledge
and belief, and give, as far as was possible for me to ascertain
from the various Departments, the amounts spent by the
Colony of Newfoundland in public services for Labrador
during these years.

Ent. H. 369.

To the King's most Excellent Majesty.

May it please your Majesty.

In obedience to Your Majesty's commands signified to us by the Earl of Halifax, one of your Majesty's principal Secretaries of State, in his lordship's letter of the 8th instant, we have taken into consideration the subject matter of a letter to his Lordship from his Excellency the French ambassador and of several papers therein referred to, containing complaints and propositions on the part of the court of France respecting the French fishery on the coast of Newfoundland and in the Gulph of St. Lawrence; and having received from Commodore Palliser, to whom your Majesty was graciously pleased to entrust the superintendency of the Newfoundland fishery and the government of that island, the last year, such information as he is able to give us respecting the facts stated in these papers, we humbly submit to your Majesty the observations which have occurred to us upon each complaint and proposition, in the order they have placed in the Comte de Guerchy's letter;

* * * *

The sixth and last head of complaint contained in the French Ambassador's letter is, that a captain of a certain French vessel was forbid by your Majesty's Governor from having commerce with the Eskimaux Indians.

It is difficult to conceive upon what grounds or opinion or with what view this circumstance, admitting it to be as it is stated by the French Ambassador, could have been introduced as subject matter of complaint, for we are unwilling to suppose it is meant to insinuate or introduce a claim on the part of France to carry on commerce and establish connections with the inhabitants of that territory, the sole property and possession of which is in your Majesty; but whatever may have been the view or opinion of the court of France on this occasion it does appear to us that under this circum-

stance of clear territorial right in your Majesty, your Majesty's Governor was not only justified, but is to be commended for having forbid the subjects of France to trade or treat with these Indians, which might have introduced a connection prejudicial to your Majesty's rights and disadvantageous to the commerce of these kingdoms; and we are humbly of opinion that it ought on no account to be admitted or allowed, as is declared by the French Ambassador that your Majesty's Governor has not a right by his own authority to interpose his jurisdiction in the case of any foreigners whatever who may resort to the coasts of a country the sole property and possession of which is in your Majesty or who shall attempt to establish a communication or commerce with the inhabitants of it who are under the protection of and dependent upon your Majesty.

As to the particular fact alluded to in the French Ambassador's paper your Majesty's Governor has informed us that a Frenchman named Galliot offered a considerable sum of money to one Capt. Thompson one of your Majesty's officers to permit him to go to the coast of Labrador and though his offer was treated with the contempt it deserved and he was denied and strictly forbid to go yet he did send his boats over and trafficked with the savages and even invited them over to Newfoundland to the great terror of all the English and French fishermen; which does so far alter the case from the state of it given by the Court of France as to make it a real and important foundation of complaint on the part of your Majesty and gives your Majesty just cause to demand that satisfaction which the Comte de Guerchy says in his letter the Court of France is well disposed to give in the case of any complaints that may be made against the French.

* * * *

(5) That they [the French] have left a ship at New Ferrole where she is hauled up and secured for the winter, and her stores, materials and effects are deposited in storehouses erected there for that purpose, and that there is no doubt, but that the crew belonging to her is employed on the coast of Labrador to collect furs from the Indians.

* * * *

10. That from the North part of Newfoundland the French fishermen resort to, and fish at the island Belle Isle on the coast of Labrador.

* * * *

All which is most humbly submitted.

C.O. RECORDS, 194/27. BOOK II.

Whereas the Subjects of France fishing at Quirpont the last year, invited the Savages named Carolits or Esquemeauxs over to Newfoundland, and had a considerable Trade with them, and used many Infamous Wicked Savage Arts to prejudice those ignorant barbarous People against the English Nation.

And as the Subjects of France are entitled to no Priviledges in Newfoundland but that of Fishing as stipulated by the 13th Article of the Treaty of Utrecht, their carrying on any Commerce there of any kind with any People whatever, is an illicit Trade and contrary to Treaties, their Tampering with those People to spirit them up to disturb His Majesty's Government to the danger of His Subjects Lives, I am satisfied is most contrary to His Most Christian Majesty's Sentiments of Humanity and Christianity, as well as inconsistent with the Treaties of Peace and Friendship subsisting between the two Crowns, under the sanction of which the Subjects of France are admitted into that Part of His Majesty's Dominions, and the French Ambassador having declared at the Court of London that His Most Christian Majesty would give the most positive Orders to all *Armateurs Françoise* not to have any Communication or Trade with the said Carolit or Esquemeaux Savages.

I hereby give notice to all Masters of French Ships resorting to Fish at Newfoundland agreeable to Treaties, that if any of them are discovered to have any Commerce with the Carolits or Esquemeauxs, I shall proceed against them as illicit Traders, and if any of the Subjects of France are discovered to be guilty of any of the other Practices abovementioned they will be treated with the utmost severity of the Law against Publick disturbers of the Peace.

I also hereby give notice that in case any of the said Carolits or Esquemeaux Savages should go over to Newfoundland, they are not to be molested or ill treated, they (as well as the Subjects of France, whilst in His Majesty's Dominions,) being under His Protection, and I am in pursuance of His Majesty's commands taking proper Measures for Civilizing those People, and for protecting both English and French from being Plundered Molested or Hurt by them.

FOR PROTECTION OF NATIVE SAVAGES.

By His Excellency the Honbl. JNO. BYRON,
Governor and Commander-in-Chief in
and over the Island of Newfoundland,
the Coast of Labrador, &c., &c.

A PROCLAMATION.

Whereas it has been represented unto the King that his subjects residing in the said Island of Newfoundland, &c., instead of cultivating such a friendly intercourse with the savages inhabiting that Island and Coast of Labrador as might be for their mutual benefit and advantage, do treat the said savages with the greatest inhumanity and frequently destroy them without the least provocation or remorse. In order therefore to put a stop to such inhuman barbarity and that the perpetrators of such atrocious crimes may be brought to due punishment it is His Majesty's Royal Will and Pleasure that I should express his abhorrence of such inhuman barbarity, and I do hereby strictly enjoin and require all His Majesty's subjects to live in amity and brotherly kindness with the native savages of the said Island of Newfoundland and Coast of Labrador. I also command all officers and magistrates to use their utmost diligence to discover and apprehend all persons who may be guilty of murdering any of the said native Indians, in order that such offenders may be sent over to England to be tried for such capital crime as by the Statute of the 10th and 11th of William the 3rd for encouraging the Trade of Newfoundland is directed. Given under my hand at St. John's this 5th day of July 1769.

BY HIS EXCELLENCY JOHN CAMPBELL, ESQRE.

Governor and Commander in Chief in and over the Island of
Newfoundland, &c. &c.

WHEREAS His Majesty in Council on the third day of May 1769 was graciously pleased to grant unto the Unitas Fratrum and its Society for the furtherance of the Gospel among the Heathen, One Hundred Thousand Acres of Land on the Coast of Labrador for the Establishment of a Mission among the Esquimeaux Savages. AND WHEREAS it has pleased His Majesty in Council on the Ninth Day of March 1774, to permit and allow the Missionaries of the said Unitas Fratrum to extend their said Settlements to the Southward and Northward of their first Location called Nain, as may be found necessary for the purposes of the Undertaking; AND they have taken up agreeable to the said Order of Council One Hundred Thousand Acres of Land North of Nain, near the 56th Degree N. Lat. and have established a Mission Settlement thereupon called Okkak, and have taken up One Hundred Thousand Acres of Land, South of Nain, between the 55th and 56th Degree and have established a Mission Settlement thereupon called Hopedale. AND WHEREAS His Majesty did at the same time order that the Governor or Commander in Chief of Newfoundland for the time being, do give them all reasonable Assistance and Support in forming the said Mission Settlements, and in His Majesty's Name to warn all Persons from molesting or disturbing the said Mission Settlements; THEREFORE be it known to all Men that their said Settlements are under His Majesty's immediate Direction and Protection ; And I do hereby enjoin all His Majesty's Subjects to live in Amity and Brotherly Love with the said Missionaries and with the Native Indians inhabiting that Country, in no wise molesting or disturbing the said Missionaries, or those who shall settle with them. And I do require that all His Majesty's Subjects, who shall come upon the Coast of Labrador do act towards the Esquimaux Indians, justly, humanely, and agreeable to these Laws, by which His Majesty's Subjects of all Classes are bound throughout His Majesty's Dominions and to the Proclamation issued at St. John's in the Island of Newfoundland on the 24th June 1772, respecting the Savages inhabiting the aforesaid Island and Coast.

Given under my hand in

London the 15th May 1784.

(Sgd.) A. GRAHAM.

No. 427.[17 Aug.,
1909.]**AFFIDAVIT OF C. A. MARTIN.**
_____IN THE MATTER OF the Enquiry into Newfound-
land Territorial Rights on the Labrador.

District of Labrador, Nain, to wit:

I, C. A. MARTIN, at present of Nain aforesaid, Bishop, in charge of the Unitas Fratrum Mission, make oath and say as follows:—

1. I have been Superintendent of the Unitas Fratrum Mission at Nain, a settlement about twenty miles from the sea coast, for the past twenty one years.

2. I am well acquainted with the habits and customs of the Esquimaux and natives of the Labrador, and as far as I know they have always obeyed the laws of Newfoundland and have been subject to the jurisdiction of the Governor and Government of Newfoundland. As far as I know they have never acknowledged the sovereignty of the Province of Quebec or any other portion of the Dominion of Canada and have never paid nor been requested to pay any duties whatever to Canadian authorities and no attempt has ever been made by Canada to claim jurisdiction on this part of the Coast.

3. The natives of the coast hunt, trap and fish as far as three hundred miles into the interior in the winter time.

4. On reference to the records of our Mission I find that the original grant to our Society of one hundred thousand acres of land on Labrador, dated May 3rd, 1769, was from Government of Newfoundland, since which date, in 1774, this grant has been increased by the Government of Newfoundland by two hundred thousand acres, and I also find several Proclamations from different Governors of Newfoundland issued for the purpose of protecting and furthering the objects of the Mission. Copies of these documents are attached hereto.

(Sgd) C. A. MARTIN, Ep. Un. Fa.

SWORN before me at Nain aforesaid this
17th day of August A.D. 1909.

(Sgd) F.J. MORRIS,

Judge of the Court of Labrador.

AFFIDAVIT OF W. R. BARLOW, M.D.[21 March,
1926.]**In the Privy Council.**

IN THE MATTER of the BOUNDARY
between

the DOMINION of CANADA and the
COLONY of NEWFOUNDLAND in the
LABRADOR PENINSULA.

I, WILLIAM RAWSON BARLOW, M.D. of Port-aux-Basques,
Newfoundland Medical Practitioner make oath and say as
follows:—

1. I was for over two years physician in charge of the
Hospital at Okkak, Northern Labrador, maintained by the
Moravian Mission at that place. I went out from England by
the Mission ship Harmony in the early summer of 1914, and
came back in the autumn of 1916.

2. In April 1915, and in the same month of 1916, I
accompanied the Esquimaux on their annual deer hunt inland
from Okkak. Usually about twenty or thirty men, those with
the best guns, dog-teams and equipment, take part in this
annual hunt. They travel inland for seven days or roughly 200
miles. My estimate is based on an hourly progress of three
miles with the dog-teams and a daily journey of ten hours.
Greater progress is not possible, because the teams are heavily
laden with supplies and necessaries both for the journey inland
and the return.

3. These expeditions were undertaken partly to secure deer
meat for food and partly to secure the sinews from the backs of
the animals, which sinews are indispensable to the Esquimaux
in sewing seal skins for boots and garments, as nothing so
satisfactory for this purpose exists as the back sinews of the
deer.

4. A similar party of Esquimaux went inland each year
from Nain, 120 miles south of Okkak, but larger because Nain
is a bigger station, having

a greater population. The two parties met each year at a junction point in the interior best suited for the deer hunt, and this was successful each season, the parties securing all the deer they required.

5. I understand that for generations it has been the custom for the Esquimaux to make a similar deer hunt each year. In former times they carried only provisions for the inland journey and travelled until they met the deer, or if they failed to do so perished in many cases from lack of food on the return journey; but latterly the practice is to take a fortnight's provisions, make the week's trip inland and then, if deer are not to be found to return without any, using the reserve stock of food for the trip back.

6. My understanding is that the Esquimaux regarded the whole region as far inland as they proceeded, as their own country, that is to say, part of the territory of the Government of Newfoundland, to whose rule they consider themselves as subject.

No. 429.

**EXTRACT FROM THE PETITION OF THE SOCIETY
OF THE UNITAS FRATRUM TO THE LORDS OF
TRADE.**TO THE RIGHT HONOURABLE THE LORDS COMMISSIONERS OF
TRADE AND PLANTATIONS.

* * * * *

SHEWETH,

That the said Unitas Fratrum, desiring to the utmost of their power to propagate the Gospel of Our Lord And that to the same end Jens Haven, one of the above mentioned Petitioners, was sent last summer to Terra Labrador, in order if possible to find out whether the Language of the so called Eskimaux be the same with that of our Indian Brethren in Davis's Straits, in which undertaking of his by the favour of the Lords of the Admiralty, & the kindness of Governor Palliser, he was enabled to make some progress, & found to our great Satisfaction, that the Language was the same, & met with an unusually kind treatment from those Savages he came to the Speech of.—The endeavours of the said Jens Haven having met with so much success, the Unitas Fratrum also perceiving that this undertaking has been agreeable to the Lords Commissioners of Trade & Plantations (who were pleased to express a desire that the Brethren would settle in those parts) have after mature deliberation resolved in the name of God, & Our Lord Jesus Christ, to do everything in their power towards the conversion & Civilizing the Savage Natives of that inhospitable Country But seeing the Esquimaux are not only a Savage Nation but even provoked by the former behaviour of the Europeans in general to such a degree, that even killing as well Robbing & stealing is become their ordinary Custom Therefore it is humbly hoped, that the English Nation if they on their side ever wish to see the Fishery on that Coast Secure from the Depredations of those barbarous People by their becoming Civilized will not only do all in their power to prevent our Mission among them from being disturbed or molested in any wise, but will also in all respects be inclined to wish well to the same, and readily grant us all needful & proper protection & assistance Your Petitioners beg leave to make the following Proposals. (1) That a proper Vessel be appointed & Fitted out by the Government either from hence or from Newfoundland in order

that the Coasts of Labrador be more thoroughly & Solidly visited than hitherto, in order to be better acquainted with the Situation of the Country, with the Rivers & Harbours, and also with the divers Inhabitants in different parts of the said Coasts

p. 1312

The aforesaid Jens Haven, & Christian Brackhart who having been a Missionary many years understands & speaks their Language, & besides them two other Brethren, one of whom is an Englishman & the other a German, who hath some knowledge in the mathematics offer themselves to go in the said Ship

To which purpose it is humbly proposed that a proper Commission thereto be given to those four Brethren by the Government & consequently the Captain of the said Vessell be instructed to regulate his motions according to the desire of the said Commission and also as to his stay in each place, and how far the Boats may go up the Rivers they may meet with We therefore Petition,

That Four Different Tracts of Land on the Coast of Labrador for the use of the Mission be now beforehand Allotted & Secured to us, by the Government And as Terra Labrador is a Country where hardly any other Europeans will make a fixed Settlement We desire that these four Tracts of Land in four different parts making altogether 400,000 Acres may be granted to us in the above manner.

And as we ought to take care that the Missions be Settled in such places and parts of the Country where the Natives are most likely to find whereon to Subsist, & of Consequence to resort in greatest numbers, therefore we should have leave to fix upon such Districts & Situations as may seem to us most convenient, & Serviceable to our Aim.

We should have leave also in the Grant & be properly empower'd to fix upon at pleasure Bays & Navigable Rivers with the Shores on both Sides thereof. to give these Districts their Distinct names, to make Draughts & Maps thereof, in order to lay them before the Government, the whole not to exceed 400,000 acres in all We desire also to have liberty (on that part of the Coast where we are to be put in possession in four different places of the said Tracts of Land according to the aforesaid Dimensions as our duely granted property) and be invested with the right of forming Harbours, & to be owners thereof under the gracious protection of the Crown of Great Brittain, not by any means with the right of excluding others or to hinder the Ships of any British Subject to enter the said Harbours, but yet that such Ships and their Crews be bound while there to Conform to the Orders and Regulations made in our Settlements agreable to the Laws, and in case of offence to be oblidged to answer for it either to the Governor of Newfoundland or at Home.

We should also have full Liberty to send Ships of English Bottom & under English Colours to Labrador and into the Bays as well as the inland Seas of that Country, and back again

to any other Part of the English Dominions.

And that good Order may be maintained in our future Settlements there from the beginning we think it will be a proper method for our Brethren which shall be establish'd in those parts, from time to time to propose to the Governor of Newfoundland such Persons in our Settlements as may be fit for it, out of whom he may choose one or more in every place of our Missions, as

p. 1313

Circumstances may require, to be legally & in the name of his Majesty appointed to the office of a Justice of the Peace.

As to any objections which might be started concerning any of the aforesaid Points, or in general whether it can be expected that his Majesty or the Right Honourable the Lords Commissioners of Trade & Plantations should grant us such Privileges as seem to belong only to British born Subjects; the natural answer seems to be, that we are the first Adventurers and consequently the first Inhabitants & Subjects to the Crown of England in Terra Labrador; neither do we think. it unreasonable, that seeing we venture our lives in order to obtain this Salutary end, so useful to the English Nation in the end, and even directly, that the said English Nation should consider our Brethren as faithful, good & useful Subjects & fellow Citizens, and gladly so far encourage our undertaking; so much the rather as there are no other Inhabitants in Terra Labrador, who could object thereto, or whose priviledges might suffer by such Concessions, especially also as this Country was never Subject to any known Laws; etc

**ACCOUNT OF THE VOYAGE OF THE FOUR
MISSIONARIES.**

C.O. 194/16. T. 74.

Account of the voyage of the four Missionaries sent by the Unitas Fratrum to the Esquimaux on the Coast of Labrador, and under the protection of his Britannic Majesty. From the month of May to November, 1765.

* * * *

23^d July. Sr Thomas sent for us, and read to us that part of Commodore Palliser's Orders relative to the Schooner; by these orders she is to proceed to 56 deg. N. to explore the Coast make proper Draughts, and every needful discovery for the future Benefit of Trade and Fishery

* * * *

As we came into Pitt's Harbour we were met by the Governor, who returned with us into the Harbour surrounded by the Indian Kaiahs, . . . Bro^r Prachart spoke with them he formed them in a Circle round the Governor and then read to them the following Articles which the Governor had drawn up for the purpose: . . .

16. If you will let me know what things you want our people shall bring you everything the next year to truck for your things. . . .

Memorandum for our Brethren of the Unitas Fratrum Missionaries on the Coast of Labrador.

After giving the Savages such impressions and Informations as you judge best for making yourselves acceptable and for facilitating the pious and Laudable Object of your Mission you'll please to make the following enquiry's for his Majesty's Information and for the Benefit of the Publick

1. What do they call themselves as a Nation or as a particular People?

2. Where they Inhabit. How they name the place or places of their abode the distance from hence, or the time they are coming here or any other particulars for ascertaining the situation of the places from whence they come?

3. Whether they reside altogether or in different places?

4. If they reside at different Places their number at each and the supposed number of the whole on the Coast northward from hence, and that usually assemble together when they come this way?

5. Whether they have any notion or tradition concerning their Origin?

6. If they have knowledge of any other Nations or People, what is their names, numbers and places of abode?

p. 1318

7. Whether they have any intercourse with other nations or are in peace or war with them?

8. Whether they have knowledge of any other Savages directly inward from this place or to the Westwards?

9. What is the nature of the Coasts Harbours and Rivers and the inland Country and whether there are any People inward?

10. What is the produce of the Countries and Seas; if Foxes, Beaver, Deer, Elk or other animals, and if each are abundant or scarce, also as to Whales, Seals, Cod, Salmon or other Fishes?

11. How they subsist; what is their Food and Cloathing?

12. What is their employment and occupation in the different seasons?

13. What is the places and seasons for taking Whale and their manner of doing it whether they do or can preserve the Oil, or if they can't keep the Fish in certain appointed places for our people to come to cut them up?

14. By remarking all things they have in use, you'll be directed in your enquiries, how they got them, particularly if they have any metal?

15. What things they seem to covet most and for what uses they want you?

16. Whether they have knowledge of any Savages Inhabiting Newfoundland?

17. Whether they have any notion of any Europeans in former times inhabiting this place or any part of the Coast to the Northward?

18. With respect to the quantity of Tyles &c. found here how do they account for them, is there any such at any other place on the Coast and what account do they give of the Stones shaped like Ridge Tyles, whether they have been brought here by them and from whence, or by Europeans?

You'll endeavour to explain to them my Manifesto and the intended use thereof also to give them a proper Idea of His Majesty's greatness and his regard and affection for them; with anything else which you think best for fulfilling His Majesty's and your Societies' humane Intentions for the Benefit of mankind in general and of these poor ignorant People in particular, and from time to time suggest to me what measure will best answer these Ends.

(Signed) HUGH PALLISER.

Augst 11th 1765 In Pitts Harbour
within York or Chateau Bay
on the Coast of Labradore.

N.B.—The answer to these and other questions which from time to time We made are added at the end of this Journal.

* * * *

Sep. 30th. We sailed from Pitt's Harbour and came the 4th Oct. to St John's where we had the Honour to wait on the Governor, to whom We delivered the two annexed Charts One of Esquemaux Bay with the several Indian names of the Islands &c., and their meaning in English. The other a Draught we took of Davis's Inlett. Also as specific an Account as we from

p. 1319

time to time could get from the Esquemaux in answer to divers enquiries proposed by the Governor and what we ourselves could learn about the affairs of the Esquemaux.

* * * *

London Decem^r 5th 1765.

Questions proposed from time to time by the Missionaries to the Esquemaux Indians with their Answers.

* * * *

3. From whence do they come?

Those who come here live at Esquemaux Bay which they call Nucingame and at Mille Isles, etc. . . .

4. What is the nature of the Inland Country?

Inward in the Country are plenty of Trees but near the shore it's Barren, the Isles are also Barren. There are many fresh water Lakes.

5. Of the Coast Harbours and Rivers near their Habitations. Please to look at the annexed Chart.

6. On how many places do they live?

Those who come here have only the two above mentioned places.

* * * *

8. How long were they in their passage hither?

Twenty days, but they make short stages, one of them say'd if wind and weather favour'd him he could come here in 3 days.

9. Have they seen any Europeans in their passage?

They met one Ship with which they traded but whether English or French they don't know.

* * * *

17. Do they know of Indians inhabiting the interior part of the Country?

They speak of Caralit who live northward of them besides these they know of no Indians inland or on the Coast.

18. Do they trade with the Hudson's Bay Company?

These who come here do not; but the Caralit north of Davis's Inlet very likely do.

19. Have any French ships been on the Coast?

They tell us a ship (we suppose French) frequently comes to Esquemaux Bay and trades with them.

20. Are there any Europeans among them?

None live among or near them. Our Brethren's attempt in

the year 1752 was the first and only we hear of.

* * * *

25. What are the most proper things our Merchants should take to barter for their Whalebone Furr &c.?

* * * *

p. 1320

To the Right Honourable the Lords for Trade & Plantations.

Your Lordships will be pleased to remember that on the report of our Brother Jens Haven having been able in the year 1764 to converse with the Eskimaux in their own language, the Rt. Honble. the Lords for Trade and Plantations desired to speak with him, and having heard from his own mouth divers particulars which seemed to them to make it a matter worthy of their very great attention, desired that our Brethren of the Unitas Fratrum would go and settle there, which being reported to our Brethren abroad, they in consequence thereof desired and engaged the four underwritten Brethren and members of the church of the Unitas Fratrum to offer their service accordingly in order to reconnoitre the coast of Labradore and chase such tracts of land as might be agreeable to the Esquimaux and suitable for them to make a settlement on, and live together; in order, if possible in time thro' the preaching of the Gospel to make them real Christians and consequently good and quiet neighbours Which was looked upon to be of very good benefit to the trade of those nations.

* * * *

An account of the voyage of the four missionaries sent by the Unitas Fratrum to the Esquimaux on the coast of Labrador and under the protection of His Britannic Majesty from the month of May to November 1765.

[Certificates follow from the Rt. Honble, the Lords Commissioners for trade and plantations and Governor Palliser dated 29 & 30 April, 1765, respectively.]

[3 May,
1769.]**ORDER-IN-COUNCIL GRANTING LAND TO
MORAVIANS AT ESQUIMAUX BAY.**

C.O. RECORDS 194/18, p. 285.

See also GREENWICH HOSPITAL MISCELLANEA VARIOUS. Vol. 121,
p. 72.

At the Court of St. James,

The 3rd day of May, 1769.

WHEREAS there was this day read at the Board a Report from the Right Honorable the Lords of the Committee of Council for Plantation Affairs; Dated the 24th of last month, in the words following, viz:—

“Your Majesty having been pleased by Your Order in Council of the 20th February last to refer unto this Committee a Representation from the Lords Commissioners for Trade and Plantations setting forth that they have had under their consideration a memorial presented by the Earl of Hillsborough, one of Your Majesty's Principal Secretaries of State, On behalf of the Society of Unitas Fratrum, stating, That the said Society are desirous of prosecuting their intention of establishing a Mission on the Northern Coast of Labrador for the purpose of civilizing and instructing the Savages called Esquimaux, inhabiting that Coast, in which undertaking the Memorialists represent that they have already taken some steps in consequence of encouragement received from the Board in 1765; but that there is a necessity of having permission to occupy such a quantity of land on that Continent as may induce the Esquimaux to settle around the Missionaries; that for this purpose they have pitched upon Esquimaux Bay and praying for a grant on that spot of one hundred thousand acres of land, or about twelve miles square; with liberty in common of other British subjects of fishing and trading on that Coast, submitting at the same time the expediency of the Government erecting a blockhouse near the said intended settlement to protect the Esquimaux and their Missionaries from violences and encroachments of any disorderly people who might happen to come into that Bay.

WHEREUPON the said Lords Commissioners represent that in the yea 1765 the Society above mentioned having with the approbation of the Government deputed four of their

brethren to visit and explore the Coast of Labrador with a view to propagate the Gospel among the savage inhabi-

p. 1322

tants; those persons though unavoidably prevented from completing their design in its full extent did however by the assistance and under the direction of Mr. Palliser Your Majesty's Governor of Newfoundland make some progress in the laudable purpose of their mission by establishing an intercourse and concluding a treaty with those savages. Whereupon in the year following upon the favourable report made by Your Majesty's said Governor touching the conduct and behaviour of these said Missionaries and in consequence of a petition from the said Society, the Board of Trade did in an humble representation to Your Majesty dated March 27th 1766, submit whether it might not be adviseable to allow this Society to occupy such a district of land not exceeding one hundred thousand acres upon the Coast of Labrador as they should think best situated for the purposes of their Mission from this opinion of their predecessors in office they see no reason to dissent and as they do in like manner with them think it advisable to encourage and promote a settlement of this sort as well from the pious and laudable object of its institution as from the public and commercial advantage to be derived from it they beg leave humbly to recommend to Your Majesty that the Society or the persons deputed by the Society for that purpose may be allowed by an order of Your Majesty in Council to occupy and possess during Your Majesty's pleasure one hundred thousand acres of land in such part of Esquimaux Bay on the Coast of Labrador as they shall find most suitable to their purpose and that Your Majesty's Governor of Newfoundland may be directed by the said Order to give them all reasonable assistance and support in forming such establishment and by a Proclamation to be published in Your Majesty's name signifying that this establishment is formed under Your Majesty's express authority and direction to Warn all persons from molesting and disturbing the said settlers; and in case it shall appear to him to be necessary for their welfare and security that one or more of the principal Missionaries shall be vested with the authority of Justice of the Peace that he should in that case issue the proper commission for that purpose conformable to the powers delegated to him by Your Majesty's Commission under the Great Seal, with respect to the expediency of erecting a blockhouse near the said intended settlement for the defence of the Esquimaux and the Missionaries and for the general protection of the British Trade and Fishery they do not think themselves justified in advising Your Majesty to comply a request that would probably be attended with considerable public expense and for which there does not appear to them to be any immediate necessity; but as they think it highly proper that reasonable and necessary measures should be taken for the security of those persons who shall establish themselves on this savage and uncivilized Coast

they would humbly recommend to Your Majesty to direct that the persons who shall engage in this settlement shall be furnished out of Your Majesty's Stores with fifty muskets and a proportionable quantity of ammunition which they conceive may be sufficient for their personal security and defence. The Lords of the Committee in obedience to Your Majesty's said Order of reference this day took the said representation into their consideration and

p. 1323

do humbly report to Your Majesty that they agree in opinion With what is above proposed by the Lords Commissioners for Trade and Plantations, and that Your Majesty's Governor of Newfoundland should give them all reasonable assistance and support informing the said Establishment and by a Proclamation to be published in Your Majesty's name.

That it may be adviseable for your Majesty by Your Order in Council, to permit and allow James Hutton of Lindsey House Chelsea Gentleman Benjamin La Trobe of Lindsey House Chelsea Clerk, Charles Metcalfe of Chelsea Gentleman, John Edmonds of St. Andrews Holborn Brewer, Philip Hurlock of St. Pauls Church Yard Surgeon, John Wollin of Lindsey House aforesaid Gentleman, and Jens Haven of Lindsey House aforesaid Catechist, In Trust for the Unitas Fratrum, and its Society for the furtherance of the Gospel, to Occupy and possess during Your Majestys Pleasure, one hundred thousand Acres of Land in such part of Eskimaux Bay on the Coast of Labrador, as they shall find most Suitable to their purpose; and that Your Majestys Governor of Newfoundland should give them all Reasonable Assistance and Support in forming the said Establishment and by a proclamation to be published in Your Majestys Name Signifying that this Establishment is formed under Your Majestys Express Authority and Direction to warn all persons from Molesting and disturbing the said Settlers, and in case it shall appear to him to be necessary for their Welfare and Security that one or more of the principal Missionaries should be vested with the Authority of Justice of the peace, that he should in that case, issue the proper Commission for that purpose, conformable to the powers delegated to him by Your Majestys Commission under the great Seal; and the Lords of the Committee are further of opinion, that it may be adviseable for Your Majesty to direct that the persons who shall Engage in this Settlement, shall be furnished out of Your Majestys Stores with fifty Musquets and a proportionable quantity of Ammunition for their personal Security and Defence.

His Majesty taking the said Report into Consideration was pleased with the advice of his privy Council to approve thereof and accordingly doth hereby permit and allow James Hutton of Lindsey House Chelsea Gentleman, Benjamin La Trobe of Lindsey House Chelsea Clerk, Charles Metcalf of Chelsea

Gentleman, John Edmonds of St. Andrews Holborn Brewer, Philip Hurlock of St. Pauls Church Yard Surgeon, John Wollin of Lindsey House aforesaid Gentleman and Jens Haven of Lindsey House, aforesaid Catechist; In Trust for the Unitas Fratrum and its Society for the furtherance of the Gospel to Occupy and possess during His Majestys pleasure one hundred thousand Acres of Land in such part of Eskimaux Bay on the Coast of Labrador as they shall find most Suitable to their purpose. And his Majesty doth hereby further order that the Governor or Commander in Chief of Newfoundland for the Time being do give them all Reasonable Assistance and Support in forming the said Establishment and by a Proclamation to be

p. 1324

published in his Majestys Name Signifying that this Establishment is formed under His Majestys Express Authority and Direction, to warn all persons from molesting and disturbing the said Settlers, And in Case it shall appear to him to be necessary for their Welfare and Security that one or more of the principal Missionaries should be vested with the Authority of Justice of the Peace that the said Governor do in that case issue the proper Commission for that purpose Conformable to the powers delegated to Him by his Majestys Commission under the Great Seal. And the Governor or Commander in Chief of His Majestys Island of Newfoundland and the Territories depending thereon for the Time being and all others whom it may concern are to take Notice and Govern themselves accordingly.

Endorsed.

FOR PROTECTION OF MORAVIANS.

BY HIS EXCELLENCY THE HONBLE. JOHN BYRON,
Governor and Commander in Chief in and over the Island of
Newfoundland, the Coast of Labrador &c.

WHEREAS His Majesty was pleased by an Order of Council May 3rd 1769, to encourage the Unitas Fratrum and their Society for the Furtherance of the Gospel among the Heathen to make a Settlement on the Northern Coast of Labrador for the purposes of Civilising and Instructing the Savages inhabiting that Coast, and to permit and allow certain Persons in Trust for the Unitas Fratrum and its Society for the Furtherance of the Gospel, to occupy and possess during His Majesty's Pleasure, a certain quantity of land in such part of Esquimaux Bay on the Coast of Labrador, as they should find most suitable to their purpose. AND WHEREAS His Majesty did at the same time Order that the Governor or Commander in Chief of Newfoundland for the time being, do give them all reasonable Assistance and Support, in forming the said Establishment, and in His Majesty's name to warn all Persons from molesting and disturbing the said Settlers. AND WHEREAS certain Persons, who are Members of the said Society for the Furtherance of the Gospel have purchased the Jersey Packet, whereof Francis Mugforth is Commander, Burthen about eighty tons Square sterned Boston built, in order to go this year to the Coasts of Labrador to converse with the Esquimaux, and to try to bring them to a peaceable temper, and to look out for such parts on, or near Esquimaux Bay, as may suit best for the purpose of Establishing a Mission of the Unitas Fratrum, and to that end have engaged some Missionaries to go on board the said Jersey Packet for the laudable purposes aforesaid.

These are therefore to certify to all Persons whom it may concern, that this Establishment is undertaken and formed under His Majesty's Express Direction and Authority, whose protection they are under. And all Officers, Civil and Military, and all other His Majesty's Subjects within my Government, are hereby strictly charged and required not to give any interruption or hindrance to the said Mission, but that they do afford the said Brethren all friendly Assistance for the Success of their Pious Undertaking, calculated for the benefit of Mankind in general, and for the Kingdom of Great Britain in particular. GIVEN under my Hand this 21st of April 1770.

(Sgd.) J. BYRON.

By His Excellency's Command.
(Sgd) HEN. STACY.

No. 436.[10 April,
1772.]**PROCLAMATION BY GOVERNOR SHULDHAM.**

BY HIS EXCELLENCY MOLYNEUX SHULDHAM, ESQR.,
Governor and Commander in Chief in and over the Island of
Newfoundland, the Coast of Labrador, &c. &c.

WHEREAS I am informed that the Esquimaux Savages inhabiting that part of the Coast of Labrador where the Unitas Fratrum and its Society have formed a Settlement for the furtherance of the Gospel among the Heathen have lately strolled from the said Settlement to the Southward with a View of Trading with the Shipping which touch upon that Coast. AND WHEREAS many Barbarous Murders have been committed on both sides by the English upon the Savages and the Savages upon the English, occasioned by Disputes and Misunderstandings in Bartering their Track. For the putting a stop thereto for the future I do hereby desire and require the said Unitas Fratrum to use every fair and gentle means in their power, to prevent the said Esquimaux Savages from going to the Southward without first obtaining their Permission in writing for so doing, and till such time as other Settlements shall be formed and extended down along the Coast. Given under my hand this 10th of April 1772.

**REPORT OF THE STATE OF THE BRETHERN'S
MISSION ON THE COAST OF LABRADOR IN
SEPTEMBER, 1773.**

* * * *

At the end of July a King's Schooner, sent by Governor Schuldam commanded by Lieutenant Curtis, who had an Esquimaux Pilot from Chateaux Bay on board, arrived in our harbour & spent some few days there, & will have delivered in his report. We are much obliged to the Governor for his kind attention & concern shewn on this occasion, who sent the Schooner in order to know if the Missionaries were still alive & in what condition they were.

The Sloop after landing Mr. Layritz & his wife, went from Unity Harbour to the northward Aug. 2d taking in her Mr. Jens Haven Mr. Hill & an Esquimaux & went north as far as 59.30 & saw & made acquaintance with several different Tribes & Families of Esquimaux

* * * *

When the King's schooner came to our harbour the Esquimaux were called together & the Officer declared the Governor's orders to them by Interpreter, that for the future if any of them killed an European or another Esquimaux he should be put to death & the same if he stole, that they should not go to the southward on pretence of fetching wood for their arrows & then steal Boats, Sails, Ropes & Graplins, for they should be well watched & punished . . .

* * * *

The Officer then told them that they should make the Governor's Orders known to the other Esquimaux in the South & North. They answered that they had already done so, & would continue to make it known as far as wherever they could: The Officer said, those Esquimaux who frequented the Brethren were not meant to be forbidden going occasionally to the South, but they must not come without a written Certificate that they were persons who could be trusted, for if any came without they would not be let pass. The Esquimaux said we do not think to go the south, but if we should want to go, we will bring a Letter from our Brethⁿ here. The Governor's Proclamation is wrote on a large Board in the Esquimaux Language & hung up on the Pallisades.

* * * *

Our Society for the furtherance of the Gospel as well as our Mission in Labrador are extremely obliged to Government for their kind countenance

and protection & for their wise care & concern to prevent future mischief from & to the Esquimaux, & are happy in having had three such successive Governors as S^r Hugh Palliser, Mr. Byron & Mr. Schuldham who have in the most obliging & prudent manner protected our Mission & the Esquimaux; etc.

**ABOUT FURTHER GRANTS OF TERRITORY TO THE
MORAVIANS.**

[9 March,
1774.]

At the Council Chamber, Whitehall, the 9th March 1774.
Present

PRIVY COUNCIL 2 / 117, pp. 458-459.

Your Majesty having been pleased by your order in council of the 21st of last month to refer unto this Committee a Representation from the Lords Commissioners for Trade and Plantations in the words following, viz.:—

“We have had under our consideration a memorial of Mr. James Hutton and sundry others on behalf of the Unitas Fratrum and its Society, for the furtherance of the Gospel amongst the heathen referring to an inclosed report of last year's proceedings of the Mission at Nain on the coast of Labrador, and praying for the reasons in the said memorial set forth, that the Missionaries may have leave to take up some thousand acres of land for the use of such Esquimeaux as shall incline to conversion, somewhere about the 54 or 55 degree to the southward of Nain, wherever it shall be found most agreeable to the Arbatock tribe, as likewise some thousand acres of land to the northward of Nain, somewhere in the parts that lie from 57th to the sixtieth degree on the Eastern coast of Labrador.

Whereupon we beg leave humbly to represent to your Majesty—That the propagating the lights of the gospel salvation among the barbarous and uninstructed tribes which frequent the coasts of Labrador, is an object in every respect so meritorious, and the endeavours of these missionaries appear to have been so sincere and are attended withal by so fair a promise of success from the reception they have met with, that we do not scruple humbly to recommend to your Majesty to comply with the prayer of their memorial, by granting to them such tracts to the southward and northward of their present location, as shall be found suitable to the wishes of the savages, and to the purposes of the undertaking; At the same time we humbly beg leave to advise that your Majesty's Governor be instructed to take due care, that the spots chosen by these Missionaries for their settlements be such, as may in no respect interrupt or annoy the fisheries carried on upon this coast.”

The Lords of the Committee in obedience to your Majesty's said order of reference, this day took the said Representation into consideration and do agree humbly to report as their opinion that it may be advisable to your Majesty to comply with the prayer of the said Memorial and to permit and allow the Missionaries of the said Unitas Fratrum to extend their settlements accordingly to the southward and northward of their present location, and to occupy and possess during your Majesty's pleasure, such tracts of land as may be found necessary for the purposes of the undertaking provided such tracts shall not exceed 100,000 acres to the southward of Nain, and 100,000 acres to the northward of Nain. And that your Majesty's Governor of Newfoundland do take due care that the spots chosen by the said Missionaries for their settlements be such as may in no respects interrupt or annoy the fisheries carried on upon the said coast of Labrador.

[9 March,
1774.]**ORDER IN COUNCIL AS TO FURTHER GRANTS OF
TERRITORY TO THE MORAVIANS.**

PRIVY COUNCIL 2 / 117, p. 461.

At the Court of St. James's, the 9th day of March 1774.
Present

Whereas there Was this day read at the Board a report from the Right Honourable the Lords of the Committee of Council for Plantation affairs, dated this day in the words following, viz.:—

Memdm.—Here the Committee report for permitting the missionaries of the Unitas Fratrum to extend their settlements under certain restrictions to the southward and northward of their present location on the Labrador coast, to be inserted at length as vide entered page 458.

His Majesty taking the said report into consideration, is pleased with the advice of his Privy Council to approve thereof, and accordingly doth hereby permit and allow the Missionaries of the Unitas Fratrum to extend their settlements accordingly, to the southward and northward of the present location and to occupy and possess during his Majesty's pleasure such tracts of land as may be found necessary for the purposes of the undertaking provided such tracts shall not exceed one hundred thousand acres to the southward of Nain and one hundred thousand acres to the northward of Nain and that the spots so to be chosen by the said Missionaries for their settlements be such as may in no respect interrupt or annoy the fisheries carried on upon the said coast of Labrador. And the Governor or Commander in Chief of his Majesty's island of Newfoundland and the territories depending thereon for the time being and all others whom it may concern, are to take notice and govern themselves accordingly.

REPORT OF MORAVIANS, 1775.

C.O. RECORDS 194/19. VOL. 5, p. 1.

The underwritten begs leave, in the name of the Brethren's Society for the furtherance of the Gospel among the Heathen in those Countries principally which are under the British Dominion, to lay before the Right Honourable the Earl of Dartmouth, and the Lords Commissioners for Trade and Plantations, the following annexed Papers, relating to the transactions of their Missionaries in Terra Labrador, from the latter end of the year 1773 to the month of October 1774.

* * * *

At the end of the year 1773 they take notice of the great increase of the number of Esquimaux with whom they got acquaintance during the course of that year, not only by the means of the Revd Mr. Layritz's voyage that year from St. John's to Nain, on which he saw some hundreds of the southern Esquimaux, and by means of Mr. Haven's voyage also last year to the north, where he saw many Esquimaux who till then had never seen an European: but also by their having been visited by at least an hundred of the Southern Esquimx as well as by hundreds of others; and indeed during the greatest, part of the year 1774 Nain has seldom been without Esquimaux Visitors as well from the south as from their neighbourhood. . . . It is supposed that some or other of the Missionaries have by this time seen and conversed with and preached to, more or less the far greatest part of the Nation, so far as Labrador has been vet discovered. . . .

**LA TROBE AND HUTTON'S REPORT TO LORD
SYDNEY.**

C.O. RECORDS 194/35.

MY LORD,

We beg leave to lay before your Lordship the following relative to the Mission Settlements upon the Coast of Labradore, established by the Church known by the name of Unitas Fratrum and its Society for the furtherance of the Gospel among the Heathen; in consequence of two orders of the King and Privy Council one in the Year 1769 and the other in 1774.

The Society for the furtherance of the Gospel among the Heathen gave, for several years, an annual report to the board of Trade and Plantations of the state and progress of the Mission, to which we refer your Lordship.

The first settlement was formed in 1770, and Was called Nain; the second a degree North of Nain in 1776, and was called Okkak; and the third a degree south of Nain in 1782 and called Hoffenthal or Hopedale.

The Journies of the Esquimaux in former Years to Chateau Bay and the European settlements in the South, were attended With unhappy consequences such as theft, drunkenness, murder, &c. On these accounts Government found proper to prevent their visits to the South, and Mr., now Sir, Roger Curtis being sent thither by Governor Shuldham, desired them in the Governor's name to stay at home. That very Year a Company of 200 that went to the south, perished either at Sea in a Storm, or those who reached the shore died of Sickness or hunger. This order of Government had the desired effect, and they have been contented at home until the year 1782.

The Missionaries have withheld from them the use of Strong Liquors.

* * * * *

The Missionaries also withheld from them Guns, and Gunpowder, and offensive weapons of all sorts; not only for the safety of their own persons, but of the Esquimaux themselves. All this had the wish'd for effect, but in the summer 1782, a few of the leading Esquimaux got a strong desire to go to the South, they went, and staid there some time, were kindly treated by the officers and others and returned with Guns, powder and Ball, and having received plenty of food and liquor, they brought such an account back, that the rest imagining they would be fed in like manner, the whole Nation were ready to go to the South, etc. . . . The Missionaries agreeable to the regulation made by Sir Roger Curtis, sent Letters with them to the Officers.

These and other considerations, which we need not mention, make us humbly request, that instructions may be given to the very worthy Governor of Newfoundland to direct the officers and others on the Coast, not to encourage, but to prevent as far as in them lies, the Esquimaux from coming to the South.

We beg your Lordship's attention to this request, etc.

(Signed) BENJ^N LA TROBE.

C.O. RECORDS 194/35.

Whitehall, 28th May 1784.

SIR,

I transmit to you herewith by the King's command a copy of a Letter to me from Mess^{rs} La Trobe and Hutton, the Heads of the Society of the Unitas Fratrum, containing some observations relative to the Indians upon the Coast of Labrador, amongst whom Missioners from that Society have been planted with a view to convert them to Christianity.

The reasoning of these Gentlemen respecting the Treatment of the Savages and discouraging their Excursions to the Southward which have heretofore proved so fatal to them seems so consistent with their own Comfort as well as with the safety of the Missionaries and so essentially necessary for forwarding their laudable designs that His Majesty has been pleased to command me to recommend the representation of Mess^{rs} La Trobe and Hutton to your particular attention and consideration, and that you do so far as it may be in your power enforce a compliance with their desire.

I am &c.,

(Signed) SYDNEY.

[9 July,
1784.]**THE UNITAS FRATRUM TO SECRETARY OF THE
HOME DEPARTMENT.**

*[sic]

HOME OFFICE RECORDS 42/5. DOMESTIC. GEORGE III.

9 July, 1784.

MY LORD,

Governor Campbell having intimated before he sailed that there was no intention that Terra Labradore should be again annexed to the Government of Newfoundland, we make bold to address your Lordship on this subject.

There are no Europeans settled upon the coast of Labradore but perhaps a few Fisheries, and the three mission settlements made by the Brethrens' Society for the Furtherance of the Gospel among the Heathen in Consequence of an Order of the Privy Council.

At the time that Labradore was annexed to the Government of Canada, we were apprehensive, that is* would be out of reach in every point of view, and that the missionaries could have no immediate Communication with, or be under the Inspection of, or enjoy the protection which might at any time be requisite from, that Government; and experience has evinced what we apprehend to be true. We have made during this period, application to the Governors of Newfoundland, and been happy to find them always ready to attend to our requests on account of the missions, and to do whatever was in their power, as far as their commission reached; to protect the worthy people who have settled upon that inhospitable Coast, merely for the benefit of the poor Esquimaux.

Being always glad to be under an established Government, and to be within the reach of protection; We will only add that we are humbly of opinion, that it will be of real utility to Terra Labradore, if it be brought under the jurisdiction of Newfoundland, and should it be found proper to re-unite those two countries, it will be a matter of thankfulness to the missionaries settled there.

If the Governors of Canada were instructed to send a word, as it is there called, to the Indians connected with them, not to molest the Esquimaux nations, they might meet with on their hunting parties, it would possibly answer the good purpose, and be sufficient as to everything the Governor

p. 1339

of Canada could do in regard to Labrador, except it might be added, to forbid the Indians under the Canada Government, on or near the River St. Lawrence to go upon the Labrador coast.

We are, My Lord,
Your Lordships' Most obedient humble servants,
BENJAMIN LE TROBE.
JAMES HUTTON.

Fetter Lane,

July 9th, 1784.

[Written on a slip of paper attached to the foregoing letter.]

As my Lord is here, I wish you would find out from him what has been done, as I am desirous of seeing Banks before he leave Town, which will be at one. If I am later, I shall be greatly disappointed for I want something from him.

[Endorsed].

ARCHIVES), 1752-1778.**

VOL. XLIV, 14A, PART I.
March, 1773.

27th Millik who is a very serious Man and much respected in his Nation began to speak with the other Esquimeaux and said—This is what we have often heard that Jesus has bought all men with his Blood. After the Esquimeaux had spoken with one another on this matter Millik asked, are the Adlat, that is the Land Indians also bought with his Blood? He was told, yes certainly, and we have among them very many who are our Brn and Srs., we have also a great number among the black people whose hearts have been cleans'd by the Blood of Jesus from their Sins. Millik was asked if he had seen any of those people. Yes, said He, I saw one on board a Ship in the South, then he lifted up three Singers, there are so many Nations bought with his Blood, first the Adlat or Land Indians, secondly the Blacks, thirdly the Kaxalit.

Nain, Labrador.
pp. 404-405.

VOL. XLIV, 14A, PART II.
August 2nd, 1777.

Two boats came from Arvertok. This evening br. Lister went into the first tent and asked if they had heard that some bn. had been to Arvertok to buy some land. The answer was yes, but the man Panniak added it was his land and he would live no where else. Being asked if he was not willing we should come there too, he said, O yes, he was not displeased with us, but they, he and his wife, were to be paid for the land extraordinary and if this was done he was willing we should go and live there. The 3^d the purchase of the land was fully made by the 3 bⁿ. Schneider, Lister, and Jensen, and one family after the other was called into our meeting room, the usual payment made them and the men signed the deed of conveyance written in the Esquimeaux language, with the first letter of their names, their hands being guided for the purpose.

Account of bⁿ. John
Schneider Lister and
Step. Jensen's voyage
from Nain

to Arvertok and back
again from the 2^d to
the 22^d of July.

July 1777.

The 7th . . . we reached Arvertok in good time safe and well . . . We however called all the men present to our tent, and told them the reason of our coming hither, viz. to buy a piece of land to settle upon with

them, that thus they might become acquainted with their creator and Redeemer. Being asked if they were willing to this? they all answer'd, O yes. We then told them that to morrow we would speak to them farther about it . . . The 8th in the morning we again called all the people together and b^r. Schneider delivered a testimony of our Saviour and his love. Then he repeated the reason of our coming to their land, which was chiefly out of love from them and he assured them, if they would be converted to our Saviour he would enlighten their hearts and make them very happy. He further told them what a district of land we desired, viz. from the North corner of Arvertok as far as Tikkerarsuk to the South, on which district none should live but we bⁿ. and how great would be our joy, if many of them would believe in our Saviour, come and live with us . . . Then we called the men alone into our tent whose names were written down to witness that they sold us the land and received the payment for it. Then the wives and children received the like with which they were all satisfied.

Diary of Nain.
p. 473.

Afterwards we went off in our boat and placed a boundary stone at the hook of Arvertock Land in the name of our Lord and Saviour, agreeable to the liberty given us in consequence of our grant.

August, 1778.

The 25th Pattiguks boat and family come hither, they said, that they heard the firing of canon several times, and therefore we concluded that the ship must be near us. But as the ship did not arrive, they reported that it must, be country Indians, and were much affrighted. These country Indians are almost the only people of whom the Esq^x are afraid, and yet the most of the reports about them have hitherto been without foundation.

The Diary of the
Voyage of the B^m
and S^{rs}. Leibish and
Becks from Nain to
Okak.
pp. 540-41.

August, 1778.

29th. Today many Esquimaux came running to us from Nariasiourck all in a fright, and said that they had seen a great smoke upon the main land behind Siouak, and that in all probability land or Canada Indians were there, and would murder their people. One said. My son is there upon the rein deer hunt, another his B^r. and so on, and they were very much troubled. They begged us to help them, and wanted us to sail there with our boat directly. We told them we could not believe that Canada Indians were so near, but it was most likely that their own people had made a fire and left it, and that had caught some large wood on fire, which was the smoke they saw. Our B^m and all the Okak people went with them

The Diary of Okak.
p. 597.

upon an eminence to see this smoke. We adhered to our opinion that it was a wood caught on fire.

July 13th, 1778.

Diary of the House
Congⁿat Nain.
p. 630.

The 3 B^m Neiser, Turner & Branigen went with a couple of Esquimaux to Ikkerasak to survey that Country and then behind Siarak upon the Continent to see if we could get any fresh Meat, and our dear Heavenly Father vouchsafed us a Reindeer.

p. 1342

January 20th, 1779.

Diary of the House
Congⁿ, in Okak.
pp. 661-662.

Tuglu-vina related that some esq^x hunting up in the country saw some land-Indians; they came so near as to call to one another, but could not understand each other, the indians had guns, and as much as the esq^x could understand they thought they wanted to trade with them—they behaved friendly, & had good cloathing of deer-skins.

October 1778.

On the 2^d a Boat full of People came to Kivallek; they had had this year much success in Hunting. They related a particular circumstance which the oldest People here had never heard the like of. Some of the Kivallek People were hunting Rein Deer far within Land. All at once they perceived a Land Indian busied in skinning a Rein Deer he had killed. The Kivallek peopled were frighted at the sight of this Man, but he very courageously waved his cap over his Head & cried out. Our People supposed he called to them. They went nearer, yet not without fear on both sides, but he did not let them come close to him, but made a sign to them to stand still. Then he cut off a piece of the Leg of the Rein Deer, broke the Bones, & laid it on a Stone before them &, made them a sign to eat it, which they did. They talked much to each other, but could not make themselves understood. Our Esquimaux nam'd to him the several Europeans who live among them especially Johannes Ingoak (Br. Haren) & Ludwig (Beck). The Indian pointed to his left side, struck it with his right hand, speaking much & earnestly at the same time. The Esquimaux judged from that sign, that he was talking of the wound in our Sav^{rs}. side, & that he was one of our B^m. The general opinion of the Esquimaux concerning the Land Indians is, that they are very bad People, whose design is to root out the Esquimaux.

*[sic]

The Indian kept his Gun constantly in his Hand & his eye fixed on every movement of the Esquimaux. He was a lusty Man; his brown hair hung in two twisted curls over his shoulders & breast, his face was white & ruddyish; his coat was of white cloth, made in the European way, he had blue Breeches, European Stockings & shoes, & wore on his head a grey & white strip'd knit cap. In order to spew his civility still

more; he gave our Esquimaux the two fore legs of the Rein Deer, & with a little Hatchet he had broken the Bones for them, that they might easily get at the marrow; at last they separated peaceably. The Indians took his Rein Deer & went towards his comrades, whom our Indians did not see, but the firing of whose Guns they could hear. This is certainly the very first time that the Esquimaux & Land Indians met one another peaceably. Our Esquimaux suppose that if War was every where else, here at least there would be Peace.

**LETTER FROM MR. LA TROBE, SECRETARY OF THE
UNITAS FRATRUM, TO MR. GOULBURN.**

C.O. RECORDS 194/61. MISCELLANEOUS L.

SIR,

Permit me to state to you the situation of the Mission of the United Brethren (commonly called Moravian) among the Esquimaux on the Coast of Labrador.

This Mission was begun by the Encouragement of the British Government, in the year 1764, and obtained consistency in the years 1769 and 1774, when orders of Council were granted for its establishment and security. Under the protection of these orders, and a proclamation, directed to be issued by H.M. Governor of Newfoundland, the Mission has proceeded to the present time, supported chiefly by the voluntary contributions of friends to the Spread of Christianity.

The communication between the settlements of the United Brethren on that Coast & England is maintained by a small brig annually sent with provisions and stores, the expence of which is defrayed by some trade with the Natives.

The benevolent aim of Government in encouraging this institution has so far been obtained, that, at present, there is perfect safety for all Europeans visiting that Coast, whereas formerly, the Esquimaux murdered every whiteman they could get into their power. Those, who have obeyed the Gospel and reside with the missionaries at the settlements have acquired a considerable degree of civilization. A farther extension of such benefits to a barbarous race must be the wish of every benevolent mind.

The first establishment of the Mission was at Nain, in Lat. 56° 18 N. the second at Hopedale, in Lat. 55° 33 N. and the third at Okkak, in Lat. 57° 35 N. Of late years, the number of Esquimaux, who have come to reside with the Missionaries has considerably increased, and. some of the inhabitants of a bay, hitherto unknown, have long ago importuned the Brethren to come and settle among them. In 1811, a reconnoitring voyage was undertaken to that coast, of which I had the honour to present a report to Earl Bathurst, at his particular desire.

The result of that discovery was a conference with the Directors of the Hudson's Bay Company, within whose territory the said bay, called Ungava, seems to be situated. The Directors expressed a wish, that the Esquimaux under their protection might receive the same instructions as those on the Eastern Coast, but the necessary facilities could not be afforded, consistent with their obligations as guardians of the

Company's rights.

Meanwhile, the number of Esquimaux, collected, particularly at Okkak,

p. 1344

became too great to afford them the means of procuring subsistence, which they obtain solely by catching seals and fishing, and must consequently spread their habitations along the coast. By these circumstances great disadvantages have arisen to the Mission, which have caused the Brethren's Society for the Furtherance of the Gospel to resolve to yield to the necessity of the case, and to form a fourth Settlement on the Eastern Coast.

For this purpose the only suitable place seems to be a bay called Kangerttuksoak situated about 100 miles North of Okkat, and we now entreat your kind attention to this subject, that we may be favoured with the countenance of Government in executing this Design.

Of late years our Settlements have been not a little disturbed by the intrusion of stragglers from some Southern quarter, who bring brandy, and other European articles, useless and hurtful to the Esquimaux; etc.

Signed: CHRIST^N IGNAT^S LATROBE,
Secretary of the Unitas Fratrum.

1821.]

**REPORT BY UNITAS FRATRUM ON VISIT BY
CAPTAIN MARTIN TO THE MORAVIAN
SETTLEMENTS.**

C.O. RECORDS 194/64.

TO HIS EXCELLENCY SIR CHARLES HAMILTON BART &C.
COMMANDER IN CHIEF OF HIS BRITANNIC MAJESTY'S SHIPS AND
VESSELS EMPLOYED AT NEWFOUNDLAND AND LABRADOR &C.
&C.

SIR,

With humble thankfulness, We the Brethren of the Unitas Fratrum Society, residing at Nain, Okkak and Hopedale Labrador offer up our Prayers to the Almighty Father, that he was pleased Your Excellency should take us into your kind notice, by Sending one of His Britannic Majesty's Ships (the Clinker) to visit our Settlements on this most dangerous Coast, and we cannot praise the Lord too much in preserving her through so many dangers (surrounded with rocks and shoals) which she has gone through in finding our Settlements out.

This attention to us is manifold in many circumstances, but particularly in convincing the Esquimaux Tribes, they are under the peculiar care of the British Government, and in establishing and confirming their Faith, in our Lord Jesus, which has been attempted to be shaken, by People in the South part of Labrador, acquainting the Esquimaux's (who have come from there to our Settlements for hearing of the Gospel) that the British would send Ships of War, to destroy all those, who had turned Christians as well as their teachers.

It is with the most heartfelt pleasure we have (since the arrival of His Britannic Majesty's Ship Clinker) received from the mouths of all the Christians their Prayers and thankfulness, that they as poor creatures are so much thought of; and they desire us (as their teachers) to return their boundless gratitude to Your Excellency, the friendly and fatherlike manner in which they have been treated by Will^m Martin Esq. (the Commander of His Britannic Majesty's Ship Clinker) has made them with one voice, cry unto us they will ever serve the Lord, in this instance the cause of our Society has been served in a most wonderful manner.

Our thanks to W^m Martin Esq^r is better felt than described, our hearts overflow with gratitude, his conduct to us, and the great care he took, that his people should not shew a bad

example to our Esquimaux Christians, has attached him to us as our Father, not one in our whole congregation saw him depart without tears in his eyes.

May the Father of mercies bless and preserve Your Excellency for this

p. 1346

attention to his fallen creatures will be the constant prayers of our whole congregation. This being the 50th year of our forming the first settlement on the coast, which we have celebrated by a Jubilee, and it adds to our great pleasure in being honored in a visit by one of His Britannic Majesty's Ships.

N.B. [Here follows the Signatures of the Missionaries, seventeen in number.]

August 29th 1821.

P.S. We beg to enclose a Report of the Number of our congregation at the different Establishments.

Number of Esquimaux Indians who have Embraced the Christian Religion.

**PROCLAMATION BY GOVERNOR HAMILTON AS TO
GRANT TO MORAVIANS.**

—
RECORD BOOK. ST. JOHN'S. NEWFOUNDLAND. Volume 32, page
269.

By His Excellency Sir Charles Hamilton Bart., Vice Admiral
of the White, Governor & Commander in Chief in and
over the Island of Newfoundland, &c. &c. &c.

Whereas His Royal Highness the Prince Regent in Council
on the 13th of May, 1818, acting in the name and on the behalf
of His Majesty was graciously pleased to authorise that every
facility should be given to the Moravian Missionaries in
Labrador for extending the beneficial influence which they
have had upon the character of the Native Indians, and for
spreading still further the benefits of the Gospel and to that end
to permit and allow the Society of the “Unitas Fratrum” to
form a fourth settlement on the Eastern coast of Labrador and
to occupy during His Majesty's pleasure “that part of the said
Coast to the North of Okkak, which comprehending the Bays
of Kangerhuksoak and Saeglek reaches to the 59 Degrees of N.
Latitude, provided that the spots chosen by the said Society for
its settlements may be such as in no respect to interrupt or
annoy the fisheries carried on upon the said Eastern Coast of
Labrador.”

I, the Governor aforesaid, do therefore hereby make known
unto all whom it may concern that the said Settlements of the
“Unitas Fratrum” are under His Majesty's immediate
protection and do hereby strictly enjoin all His Majesty's
Subjects to live in amity and brotherly love with the said
settlers and the Native Indians inhabiting the Country
aforesaid, in no wise molesting, or disturbing the said
Missionaries or those who shall settle with them; And I do
further require that all His Majesty's Subjects who shall come
upon the Coast of Labrador do act towards the said
Missionaries and the Esquimaux Indians justly, humanely &
agreeably to those laws by which His Majesty's Subjects of all
classes are bound throughout His Majesty's Dominions.

And the said Society of “Unitas Fratrum” are hereby
enjoined to take especial care that spots it shall chuse for its
Settlements be such as in no respect to interrupt or annoy the
fisheries carried on upon the said Coast of Labrador.

Given under my hand and Seal at Fort Townshend, St.
John's, Newfoundland, the 3rd day of December,
1821, in the second year of His Majesty King
George the Fourth.

C. HAMILTON.

By His Excellency's Command,

No. 458.

[3 Dec.
1821.]**GOVERNOR HAMILTON TO REV. B.
KOHLNNUISTER.**St. John's,
December 3rd, 1821.

Reverend Sirs,

It was exceedingly gratifying to me to receive your letter of the 29th of August last and to find that my orders to Captain Martin to communicate with you had been productive of any benefit to your Society and I approved of his having proceeded to Okkak, your Northmost settlement, notwithstanding the intricacy of the navigation, and the dangers attending it, which are the great impediments to your not having been visited before, but the kind reception Captain Martin and his officers received will naturally induce me to embrace the earliest and every opportunity of repeating the experiment, trusting that a more frequent intercourse will lessen the risk attending it, and prove beneficial to your settlements.

Captain Martin's report to me of the result of your labors are no less pleasing than surprising, and as long as it may please His Majesty to continue me in this Government I shall feel a sincere pleasure in not only communicating but forwarding the views of your Society in every way within my power, agreeable to His Majesty's towards all his subjects and who has commanded the Earl of Bathurst, his principal Secretary of State for the Colonies, to direct me to make a special grant of a considerable accession of territory to the Society of Unitas Fratrum, which has only been delayed for want of an eligible mode of conveyance, but which will now accompany this letter and confidently trusting that your efforts may continue to be attended with equal success and that your congregations may very long experience the same beneficial results from your arduous and unremitting labors, in a wilderness with an inclement climate and arid soil to contend against, is the sincere wish of

Reverend Sirs,

Your very obedient humble servant,

(Sgd) C. HAMILTON.

To the Revd. BENJAMIN KOHLNNUISTER
and Brethren of the Unitas Fratrum Society.

[16 Aug.,
1822.]**MR. KOHLMEISTER AND OTHERS TO
GOVERNOR HAMILTON.**

RECORD BOOK. ST. JOHN'S. NEWFOUNDLAND. Volume 33, page 23.

Nain, Labrador, 16th Aug., 1822.

SIR,

With humble gratitude to that good Providence since the Mission of our Society commenced on the Coast of Labrador amongst that part of His Majesty's numerous Subjects, the Esquimaux Nation, we beg leave to offer to your Excellency our most grateful thanks for your Excellency's paternal attention to this Society situated in this part of His Majesty's Dominions so evidently shewn by Your Excellency's late Grant thereby authorising us to extend our Mission to the 59th degree of North Latitude.

On the 10th inst. His Majesty's Brig Clinker which your Excellency has been kindly pleased to send to our Settlements arrived which afforded us another instance of your Excellency's unremitted attention towards our Welfare. We expected to see again our dear friend Captain Martin, but instead of him Capt. Booth who proves that beneficence and magnanimity do not rest With only one, and the British Navy is commanded by Gentlemen that are worthy to support the honour of His Majesty's Sceptre, and to be possessed of those qualifications that draw forth our love and esteem.

We cannot speak too highly of the conduct of the Officers of the Clinker, their exemplary conduct sheds a lustre on their profession. Captain Booth's and the Officers' attention to our Esquimaux Congregation have given them great encouragement.

With pleasure we beg leave to say that the conduct of the Ship's Company reflects credit on the excellent Discipline manifested in their whole Department. When we informed our Esquimaux people of your Excellency's regard to their welfare, and the active part you had & were still devising for their good, and the spread of the Gospel amongst their heathenish countrymen the tears of heartfelt gratitude flowed down the furrowed cheeks of the parents, and no less moved were the youths, by their countenances you might read their affectionate hearts.

We anticipate great good to arise from being visited by one of His Majesty's Ships as circumstances and the service will permit. Our Esquimaux will feel themselves secure and under the protection of their good friends, heathens

who before were afraid of joining the Society, on hearing the Gospel for fear of temporal sufferings through the report of several persons to the Southward as we have before mentioned to your Excellency, will now be encouraged to come forward fearing none of those things they looked for, and our own people will be stirred up to a Spirit of Emulation and will not for the future fear a King's Ship but contrariwise they will meet her. with greetings and Joy from the bottom of their hearts.

We beg leave to submit for Your Excellency's information an account of the several changes respecting the Esquimaux which have taken place since His Majesty's Brig Clinker left here on the 31st Aug. last till her arrival this year,

EXTRACTS FROM REPORT.

ON OFFICIAL VISIT TO THE COAST OF LABRADOR BY THE GOVERNOR OF
NEWFOUNDLAND (SIR WILLIAM MACGREGOR) DURING THE
MONTH OF AUGUST, 1905.

JOURNAL OF THE ASSEMBLY, NEWFOUNDLAND, 1907, pp. 335, 342-
343.

Referring to the Moravian Mission stations on the coast, the
Governor said:

“Judicial powers have not been granted to the Mission,
as seems to have been contemplated in connection with the
original grants, and consequently the Missionaries can only
expel evil-doers from the stations from which they hold
grants; or, in the case of church members, exclude them
from Communion or church ceremonies. Expulsion from a
station, though rare has not been quite unknown.”

* * * *

“It is true that on the Innuït coast there is no prison, no
police, no magistrate. But it would not appear that these
adjuncts of civilization, necessary elsewhere, are required
there, so far as the maintenance of order is concerned. The
moral control of the Mission, which has been so effective
in the past, would appear to be sufficient at the present
time.”

[19 Aug.
1909.]**AFFIDAVIT TO GEORGE VOISEY.**

IN THE MATTER OF the Enquiry into Newfoundland Territorial Rights on the Labrador.

District of Labrador, Voisey's Bay, to wit:—

I, GEORGE VOISEY, of Voisey's Bay, Kekitonjak Island, make oath and say as follows:

1. I reside in Voisey's Bay, a settlement about thirty-one miles from Nain and about sixty miles from the waters of the Coast.

2. My father was born in Plymouth, England. He came here about sixty-five years ago, and lived here up to the time of his death about twenty-two years ago. I am fifty-seven years of age. I have resided here all my life. My father was a trouter, salmon catcher and furrier, and used to go into the interior on hunting trips for fourteen and fifteen days at a time, going in as far as one hundred miles. He exercised the rights of citizenship here during his lifetime and was subject to the laws of the Government of Newfoundland, the same as we are now. I have been subject to the Governor and Government of Newfoundland all my life, paying duties to the Collector of Customs since he has been coming on the Coast. I have fished, trapped and hunted, and have been in the interior a hundred miles on hunting trips. I never had any intimation from the Canadian Government that I was on their territory, or anything of that sort. I have been all my life under the Moravian Mission, obeying the laws of Newfoundland.

(Sgd) GEORGE VOISEY.

SWORN before me at Voisey's Bay aforesaid,
this 19th day of August, A.D. 1909.

RELATING TO THE MISSIONS OF THE CHURCH OF
THE UNITED BROTHERS ESTABLISHED AMONG
THE HEATHEN."**

[VOL. I. LONDON: 1790.]

Dear Brethren,

* * * *

We heard but lately of some shocking murders committed in the North, especially in Seglek and Killanek, where the Esquimaux fell upon each other in their tents by night, and many were stabbed and wounded with knives, in so barbarous a manner, that we could not hear it without horror. Our people here made several remarks upon this subject, expressing their gratitude that the brethren had come into this country; and adding, "We certainly should have had as many murders committed here, unless you had come and brought us the good news of our Creator and Redeemer, of his love to us, and our duty to love him and our neighbour." *

From Hopedale, dated
Oct. 7, 1791.
pp. 91-94.

* * * *

We remain,

Dear Brethren,

Your affectionate and faithful

Brethren and Sisters in Okkak.

(Signed) JOHN CHRISTOPHER WOLF.
THEOBALD FRECH.

Dear Brethren,

* * * *

Five or six families of Land-Indians have also spent the winter in Kippokak. They came from Arvertok, and told the Esquimaux, that they intended to pay us a visit. We should be glad to see them, but suppose that they have returned before now.

* * * *

(Signed) JOHN LEWIS BECK,
SUEN ANDERSON.

From Hopedale, dated
August 23, 1792.
pp. 155-156.

* The Diary received from Okkak makes mention of new traces having been discovered, of Indians that inhabit the inland country, and of whom the Esquimaux are much afraid. They seem a nation entirely different from the Esquimaux on the coast; and a dog that strayed, probably from their tents, to our people, when hunting rein-deer, appeared of a breed different from the common dog of Labrador. He left them again in some days.

Dear Brethren,

From Hopedale, dated
August 12, 1793.
pp. 211-212.

* * * *

We devote ourselves anew to our Savior and to his service, and confidently pray unto him, to give us grace and strength to make known his gospel to the poor Esquimaux or Land-Indians, should any of the latter come to us. Hitherto we have heard of none who have an inclination to come.

* * * *

(Signed) JAMES BRANAGIN,
JOHN LEWIS BECK.

Dear Brethren,

* * * *

During the summer no Esquimaux lived at Kippokak, and we heard nothing of the Land-Indians.

* * * *

(Signed) JOHN LEWIS BECK,
JAMES BRANAGIN.

[VOL. IV. LONDON: 1806.]

Extracts of Diaries received from the Settlements of the United Brethren on the Coast of Labrador chiefly relating to internal state of the Mission in 1805 and 1806.

This settlement was built in the year 1782, with a view to preach the gospel to the Esquimaux to the south of Nain, who, at that time seemed eager to have missionaries resident among them. The Brethren also fondly hoped; that perhaps some communication might be established between them and the so-called Red Indians, who now and then, in small parties, approached that coast from the interior, though greatly in dread of the Esquimaux; and an opportunity afforded of bringing the word of Salvation to those miserable beings. But in this respect, the aim was not obtained; and as the Esquimaux themselves seemed to reject the gospel, and about the year 1790 it appeared as if they had even withdrawn from the neighbourhood of Hopedale, both the Missionaries in Labrador, and the Society for the Furtherance of the Gospel, in London, were of opinion, that it would be well to give up that establishment.

to a Medical Friend.

* * * *

It is not improbable that these nations have a common oriental origin; at all events, they come from the same stock, and may once have been sufficiently numerous, to have rendered colonization a matter of expediency. The Esquimaux tribe has since been much thinned by frequent wars with the Indians of the interior, who are a very different race.

* * * *

“Not long ago, our Esquimaux brother Zacharias, fell in with two Indians from the interior, whom at first sight he mistook for Europeans. The language they spoke was quite unintelligible to him, nor were they able to understand his. By signs they intimated that their home was far inland, though they could not point out the exact direction. Each of them had a gun, and was clothed in a kind of smock, the legs and feet remaining bare. The invitation given them by Zacharias to accompany him home, they declined to accept, and the younger wept at the very idea of such a visit.

[VOL. XVII. London: 1844.]

Letters received by the Brethren's Society for the Furtherance of the Gospel from the Missionaries on the Coast of Labrador.

“Dear Brethren,

* * * *

“Last winter, we had a visit from two Indians (father and son), who came hither on the 28th of February, in company of a European, from an inlet lying twenty or thirty miles to the west of this place. Their object was professedly to obtain some provisions. These poor people manifest great fear of the Esquimaux, who in turn are disposed to be afraid of them. On visiting us in the Mission-house, we observed that the father had an Indian prayer-book, out of which he read us some passages with much feeling. Our Esquimaux gave them a friendly reception, and supplied them with the necessaries of life out of their own stores. In former times they would have met with very different treatment, the two nations cherishing a

p. 1357

C

deadly hatred as Well as fear of each other. The time was, when they sought to do each other every possible injury; but now the Esquimaux is taught by the Gospel of peace, to show kindness

to the Indian who comes in his way. This friendly disposition our people again manifested, when, on the 24th of March, another company of Indians, consisting of three married couples and their children, (in all 14 persons), arrived at Hopedale. They had left their effects about an hour's distance from our place, thinking it best to ascertain, how they would be received. Being greatly in want of food, they proposed to avail themselves of the cod-fishery, intending to return to the West, as soon as it was over. They remained, however, only four days, during which time, they attended the meetings very diligently, and appeared very devout and attentive. Being quartered in three Esquimaux houses, they were hospitably entertained by their inmates, and when they took their departure, were supplied With the needful food. They seemed a very poverty-stricken race, far more so than the Esquimaux; the men were clothed in reindeer skins, the women in left-off European garments; the little children were bound upon little sledges or trays, and were dragged after them. They were very expert runners. In their general appearance they resembled the gipsy tribe.

Letters received by the Brethren's Society for the Furtherance
of the Gospel from the Missionaries on the Coast of Labrador.

* * * *

“Dear Brethren,

“In the spring of the year, we were again visited by Indians from the South; on the 6th of March, by an old man, who had been here several times before, and who came again with his wife and child; and on the 10th of July, by the same man in company with three other families. From one of the last-mentioned company, who understood a little English, we ascertained, that most of our visitors had been baptized, probably by Roman Catholic Missionaries. In the evening, we gave them an opportunity of attending a liturgical service, hoping, that, even though they did not understand what was said, they might be impressed with the thought that we were in a place of worship. That the singing of hymns struck them pleasantly, was shewn the next day, by one of the women bringing a reindeer skin as a present to the Church. Oh! could we but be of some spiritual service to these, doubtless, ignorant people! The above-mentioned old man had with him a nearly worn-out Prayer-book in his own language, and appeared to ask if we had any books in the same tongue. It has, therefore, occurred to us to inquire whether we could obtain, perhaps through the kindness of the British and Foreign Bible Society, a few copies of such translations of the New Testament, or portions of it, as have been already made in the language of the Northern Indian tribes. We may thus discover the tribe to which our occasional visitors belong, and be the instruments of some good to their souls.

LABRADOR.

Extracts of Private Correspondence.

“In how far there is any truth in the idea of the Esquimaux,
that the Indians have hostile intentions towards them, it is
difficult for me to say. The former attribute to the latter an
intention of cutting their fishing-nets, stealing their food, &c.,
and are certainly in great fear of them. This fear was a good
deal increased by the report of a heathen Esquimaux, named
Anneraitsiak, who stated that the Indians had nearly killed him,
and that his life was spared merely by his saying who he was;
for the Indians declare, that it is their intention only to kill such
Esquimaux as have been baptized, but no longer reside with
the believers. This lying story had certainly an effect upon the
Esquimaux Noah, who forsook us last winter, and went to the
settlers in David's Inlet, since he returned to Hopedale in
spring. Some of our people seem actually to believe, that the
Indians have a commission from us, to make away with such
Esquimaux as wander out of our fold.

E.—ADMINISTRATION OF JUSTICE AND ADMINISTRATIVE WORK OF JUDGES.

No. 467.

SURROGATE COMMISSION TO CAPTAIN SAXON.

By James Webb Esq,
Governor.

By virtue of the Power and Authority to me given, by His Majesty's Letters made Patent bearing date at Westminster, the Nineteenth day of May in the thirty third year of the reign of our Sovereign Lord George the Second by the Grace of God, of Great Britain, France and Ireland, King, Defender of the Faith, I do hereby constitute and appoint you.....to be my Deputy or Surrogate with full power and authority for you to assemble Courts within the Districts of.....and of Ports adjacent, to enquire into all such complaints as may be brought before you, and to hear and determine the same, to all intents and purposes as I myself might or could do, by virtue of the power and authority invested in me, you have likewise power and authority to seize and detain in order to proceed to condemnation, all uncustom'd, prohibited or run goods that may be found in the Districts aforesaid or the ports adjacent.

And I do give and grant unto you the said.....full power and authority to administer the several Oaths to any person or persons you shall think fitt, agreeable to ye several Acts of Parliament made in that behalf; and I do strictly enjoin ye Justices of the Peace, all Officers, Civil and Military and all other His Majesty's Leige Subjects, to be aiding and assisting unto ye said.....and to obey and put in execution all such lawful orders you shall givnto them, as I myself might could do, by virtue of the power and authority invested in me.

Given under my Hand and Seal at St. John's, this 20th June 1763.

J. W. WEBB. (Seal)

Commission in above form issued to Captain Saxon, Pearl, dated June 20 1763 to cover section from entrance of Hudsons Straits to River

AND INSTRUCTIONS.**

N

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume, 4, page 59.

By His Excellency Hugh Pallisser, &c., &c.

BY VIRTUE of the Power and Authority to me given by His Maj's Letters made Patent, bearing Date at Westminster the 9th day of April, in the fourth year of the Reign of our Sovereign Lord George the Third, by the Grace of God of Great Britain, France and Ireland, King Defender of the Faith; I do hereby constitute and appoint you to be my Deputy or Surrogate, with full Power and authority to assemble Courts within the District between to enquire into all such Complaints as may be brought before you (except such as are excepted in the Instructions annex'd) and to hear and determine the same to all intents and purposes as I myself might or would do By Virtue of the Power and Authority Vested in me, you have likewise power and authority to seize and detain in order to proceed to condemnation, all uncustomed, Prohibited or Run Goods that may be found within the aforesaid Limits or Ports adjacent; And I do give and grant unto you full power and authority to administer the several Oaths, to any Person or Persons you shall think fit agreeable to the several Acts of Parliament made in that behalf. And I do strictly enjoin all Adm'ls of Harbours, all Justices of the Peace, all Officers Civil and Military, and all other His Maj's Leige Subjects, to be Aiding and Assisting unto you the said and to obey and put into Execution all such Lawfull Orders as you shall give unto them, as I myself might or would do. By Virtue of the Power and Authority vested in me.

Given under my Hand and Seal this

26th day of August, 1766.

By Order of His Excellency,
Jno. Horsnaill.

INSTRUCTIONS.

You are hereby strictly enjoined not to do anything by
Virtue of the within Commission, Contrary or Repugnant to
the Act for Encouraging ye

p. 1362

Fishery and Trade of Newfoundland, Passed in the 10th & 11th
years of William 3rd nor obstruct the Powers thereby given
and granted to the Admirals of Harbours, but you are to the
utmost of your power, to support, assist and encourage the
Fishing Admirals in their respective Harbours, for carrying
into execution the several good Rules and Orders ordained by
the said Act, and in all cases of appeal from the
Determinations of such Admirals to you, as the Commander of
one of the King's Ships, you are to determine such cases
according to the Rules and Orders ordained by the said Act,
observing all Ships are to be deemed British Fishing Ships &
intituled to the privileges of being Admirals of Harbours, that
arrive directly from Britain with Fishing Certificates and Men
actually employ'd in the Fishery, and that occupieth a Publick
Ships Room, and not one that is held and possess'd as private
property.

In such cases as are not provided for in the said Act, you are
to take to your assistance the Justices of the Peace, where there
are any, and determine them according to Law, Justice and
Custom in like cases, and to any particular Regulations made
by me for the Benefit of the Fisheries except in cases relating
to any exclusive right to, or property in any Fishing Rooms of
Lands, or concerning Rents, Leases, Mortgages, or Sales of
such Places, all which are to be referr'd to me, and all disputes
concerning Merchants Accounts and transactions in Trade, are
to be left to be tryed by the proper Courts here or in England.

Servants Wages are always to be Paid according to their
Shipping Papers, and in preference to all other Claims, and in
case of any doubt of the Masters being able to pay them, the
Produce of the Voyage must make good the Servants Wages in
preference to all Debts or Demands whatever. In case any
Person within your District should be charged with Murder or
any other Capital Offence, you are on proper application being
made to you, to apprehend such offenders, and send them to
St. John's, or bring them with you when you join me, in order
to their being try'd at the General Assizes.

You are to transmit to me, a copy of all the Causes that may
be brought before you, with your Decrees thereon.

You are by every means in your power, to Encourage and
oblige the Fishermen to return home. With the assistance of the
Admirals, the Justices and the Naval Officers, you are to fill up
the Fishing Schemes herewith delivered you, as exact as

possible.

In case the Justices and Principal People at any Port within your district, present to you any Persons that are useless People to the Fishery, who entertain Rogues and Thieves, and live mostly by spoil and Plunder, and by entertaining the Fishermen and Seamen in Debaucheries, Idleness and Wickedness to the great detriment of the Fishery, you are to seize on so much of the effects of such people to pay for them and their Families passage home, and ship them off accordingly, with a Vagrants Warrant signed by you, certifying that their passage are paid.

p. 1363

Servants who have stop'd the Fish for their Wages, if it is made appear by due proof, that they did not after the time of such stoppage continue to prosecute the Voyage to the utmost of their power, they are to be paid Wages only to the time that such stoppage was made, but this must be done with caution and such proof of neglect must be very full and satisfactory, for poor labouring men serving on voyages, must not be subject to discouragement, nor lyable to abatements for a bad voyage, since they are not intitled to any advanced Wages for an abundant one.

HUGH PALLISSER.

**GOVERNOR PALLISER'S DECISION IN *re* Mr. BRUSH
v. AGAINST Mr. GOODFELLOW**N.B.—
Delivered to
both parties.CONCERNING THE SEALING POST AT MECATINA.

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume, 4, page 56.

By His Excellency Hugh Pallisser, &c., &c.

Mr. Brush having applied to me, for leave to occupy the Sealing Post of St. Augustine this year, in behalf of his Fishing Ship, I having upon a disputed Claim between him and Mr. Goodfellow to the Post of Macatina, determined in favour of Mr. Goodfellow.

I now approve of Mr. Brush occupying the Post of St. Augustine this year, and as an Encouragement to both these Gentlemen to become British Ship Fishers, I allow Mr. Goodfellow also to occupy for this year, any other Post in the Macatina District (St. Augustine excepted) no other Fishing Ship making a claim thereto, and Mr. Brush for this year, may also occupy any other Post to the Eastward of St. Augustine, no other Fishing Ship putting in a claim thereto.

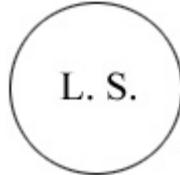

Given &c. in Pitts Harbour, Labrador, 23rd August, 1767.

HUGH PALLISSER.

By Order of His Excellency,
Jno. Horsnail.

[26 July,
1810.]**No. 473.****SUPREME SURROGATE'S WARRANT, BY
GOVERNOR DUCKWORTH.**

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. VOLUME, 21, p. 73.

By His Excellency, Sir Thomas Duckworth,
K.B., Vice Admiral of the Red, Governor and
Commander in Chief in and over the Island of
Newfoundland, and its dependencies, &c. &c.

Whereas by an Act of Parliament passed in the forty-ninth year (1809) of His Majesty's Reign intituled "An Act for Establishing Courts of Judicature in the Island of Newfoundland and the Islands adjacent; and for re-annexing part of the Coast of Labrador, and the Islands lying on the said Coast to the Government of Newfoundland," it is enacted that it shall be lawful for the Governor of the Island of Newfoundland from time to time to institute Courts of Civil Jurisdiction, to be called Surrogate Courts in different parts of the Island of Newfoundland and the Islands adjacent, as occasion shall require, with full power and authority to hear and determine, in a summary way, all suits and complaints of a civil nature arising within the Island of Newfoundland, and on the Islands of St. Pierre and Miquelon, and on the Islands and Seas to which Ships or Vessels repair from the Island of Newfoundland for carrying on the fishery, and on the Banks of Newfoundland, and in Great Britain or Ireland, which Courts shall respectively be Courts of Record, and shall determine according to the law of England, as far as the same can be applied to suits and complaints arising in the Islands and Places aforesaid, and the said Courts respectively shall be holden by a Surrogate to be appointed from time to time by the Governor of the said Island, and shall have full power and authority to hear and determine all suits and complaints cognizable in the said Courts." Be it known that by the authority vested in me as Governor of the Island of Newfoundland and its dependencies, I do by these presents institute such Surrogate Court to be holden, as need shall require, in any part of the Island of Newfoundland or Islands adjacent, or Coast of Labrador, and appoint you Thomas Coote, Esquire, Supreme Surrogate, to hold the said Surrogate Court in the manner directed by the Act of Parliament above recited, and according thereto to hear and determine all suits and complaints cognizable in the said Court.

Given under my Hand and Seal at Fort Townshend,
St. John's, Newfoundland, this 26th day of
July, One thousand eight hundred and ten.
J. T. DUCKWORTH.

To Thomas Coote, Esq.,
Hereby appointed Supreme Surrogate
of the Island of Newfoundland &c.
By Command of His Excellency,
R. C. SCONCE, Secretary.

No. 474.

[10 Sept.,
1810.]**EXTRACT FROM SURROGATE RECORDS, 1810.**FORTEAU,
September 10th, 1810.

The Court being opened,

Mr. Joseph Kelson made application to receive a remuneration for the undermentioned property supplied by him to Messrs. Noble, Pinson and Sons in 1803:—

16 New Batteaux,
1 Ships new anchor,
160 Quintals of fish, wet and dry,
1 New Batteaux rode or grapnell,
1 1-2 hhds. of cod oil,
30 French hogsheads in good condition.

It appeared by letters produced by Mr. Nelson that the said property was given to *him* by Captain B. W. Taylor, the officers and crew of His Majesty's ship *Camilla* at the commencement of the present French War, as a reward for his exertions in making the captors of the said property acquainted with hostilities having commenced between Great Britain and France, and assisting in getting its possession.

The applicant was sworn to the correctness of the before mentioned list of fish, boats, stores, &c., and also to their having been supplied for the use of Messrs. Noble, Pinson and Sons.

Mr. Andrew Pinson, on behalf of Messrs. Noble, Pinson and Sons, states that at the time the above property was supplied (1803) he had not arrived in this country, therefore of his own knowledge, can say nothing of the circumstance, but he has been informed that the Articles sued for were conveyed from Port-au-Choix to Lance-au-Loup, at the expence of Noble, Pinson and Sons, Mr. Kelson having employed their vessels, servants, etc., in the middle of the fishing season (August) for that purpose; he therefore submits that the accustomed charges be allowed by the applicant for the services thereof.

It is therefore decreed with the consent and approbation of the contending parties that Mr. Joseph Kelson shall nominate one respectable person at Forteau, on his part, and Mr. Andrew Pinson another, on the behalf of Noble Pinson and Sons, to ascertain in the first place the value of the property supplied by the said Joseph Kelson to Noble Pinson and Sons, then to specify a fair allowance for the services of their servants, vessels, etc., the balance of accounts to be then made and the difference to be paid.

Should any difficulty or disagreement arise between the Arbitrators in the business an Umpire is then to be nominated by us for the final adjustment of the same.

THOS. WHITE, J.P.,
R. HENRY MUDDLE.

JOHN NICHOLL *versus* JAMES BELBIN.

September 10th, 1810.

The Plaintiff complained that on or about the 21st of October last the Defendant sold to his (Ptf's) servants spirituous liquor, whereby most of them became extremely intoxicated, to the great prejudice of the Plaintiff and caused the detention of a Brig called the Princess Royal for twelve hours at that late season of the year; he therefore prays the Court will, for the sake of example, punish the said James Belbin for the same.

Francis Le Marquand, Sworn, Deposed that he was supplied with a gallon, or a gallon and a half, of liquor by the Defendant at that time for which he paid him seven shillings per gallon.

John Keates Sworn. Deposeth that he is winter agent, and master of a voyage in the summer for the Plaintiff, that he was on the Ptf's room at the time above mentioned, and that he observed several of the crew very drunk.

Witness further deposed that lie having charge of the stores of the Plaintiff, must have known had the crew received liquor from thence, but none was delivered to them from the said stores.

Nicholas Roberts, Fisherman, Sworn. Deposeth that he was in the Plaintiffs employ at the time mentioned in the complaint and that he, this deponent, observed on the evening previous to the sailing of the Princess Royal, several of the crew drunk, but does not know where they got the liquor. Witness bought a gallon or half a gallon (cannot exactly say which), from the Defendant for which he paid him at the rate of seven shillings per gallon. That the day before the Princess Royal sailed he heard the Plaintiff, who was her Captain say that the people were so drunk as to prevent the vessel sailing that day, and that at the same time the wind was fair.

Defendant admits that he did sell some liquor to the Plaintiffs men, but he thinks the liquor which occasioned the general drunkenness complained of was supplied by some schooners a few days before that time in Forteau Bay and knows that liquor was frequently got from them.

The charge having been fully proved the Court decrees that the Defendant be tined in the sum of ten pounds to our Sovereign Lord the King with costs of Court, but in consideration of the general good character of the Defendant the Court recommends him to His Excellency the Governor for a reduction of the fine, it not being in the power of the

Magistrates to pass sentence for a less sum agreeably to
Governor Gambiers Proclamation.

THOS. WHITE, J.P.,
R. HENRY MUDDLE, J.P.

[25 Nov.,
1810.]**GOVERNOR DUCKWORTH TO EARL OF
LIVERPOOL.**

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 21, page
259.

His Majesty's Ship Antelope,
at Spithead, November 25, 1810.

MY LORD,

A difference of opinion having arisen whether according to the Act of the 49th of His Majesty's Chapter 27th for establishing Courts of Judicature in Newfoundland, and for re-annexing part of the Coast of Labrador to that Government, it can be considered lawful for the Governor of Newfoundland to institute Surrogate Courts in such part of the Coast of Labrador so re-annexed to his Government. I feel it my duty to request that your Lordship will do me the honor to instruct me on this subject, and to acquaint me whether I am authorised to extend the influence of a Surrogate Court to that remote part of my Government where from the difficulty of a recourse to the Supreme Court it must be most wanted, or whether, in strict application of the terms of the 15th Section I am restrained from doing so.

I have the honor, &c.,
J. T. DUCKWORTH.

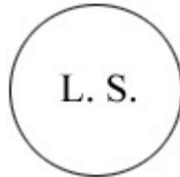

To the Earl of Liverpool, &c., &c.

1810?

**LIMITED COMMISSION OF THE PEACE, BY
GOVERNOR DUCKWORTH.**

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. VOLUME, 21, p. 87.

By His Excellency Sir John Thomas
Duckworth, K.B., Vice Admiral of the Red,
Governor and Commander in Chief in and over
the Island of Newfoundland, &c.
&c.&c.

By Virtue of the Power and authority to me given by His Majesty's letters made patent, bearing date at Westminster the fourth day of June, in the fiftieth year of the reign of our Sovereign Lord George the Third by the Grace of God of the United Kingdom of Great Britain and Ireland, King, Defender of the Faith, to constitute and appoint Justices of the Peace with other necessary Officers and Ministers for the better administration of Justice, and keeping the peace and quiet of the Island of Newfoundland and Islands adjacent, and also on that part of the Coast of Labrador in lower Canada which has been re-annexed to the Government of Newfoundland by the 49th of Geo. 3rd, Cap. 27, I do constitute and appoint you residing in the district of _____ in Newfoundland, His Majesty's Justice to keep the Peace in the said Island, and Islands adjacent, and said part of the Coast of Labrador, and to keep and cause to be kept all Ordinances and Statutes for the good of the Peace, and for the preservation of the same, and for the quiet rule and government of His Majesty's People made, in all and singular their Articles in the said Islands (as well within the liberties as without) according to the Force, Form and Effect of the same, and to Chastise and Punish all Persons that offend against the form of those Ordinances or Statutes, or any one of them in the aforesaid Islands or Coast of Labrador, as it ought to be done according to the form of those Ordinances and Statutes, and to cause to come before you all those who to any one or more of His Majesty's Subjects or the Native Savages of the Island of Newfoundland aforesaid concerning their Bodies or the firing of their Houses, have used threats to find security for the peace, or their good behaviour towards His Majesty, His People and the Native Savages aforesaid, and if they shall refuse to find such security, then to cause them to be kept safe in Prison until they shall find such security. I do also appoint you the aforesaid His Majesty's Justice to enquire the truth more fully by the Oath of

good and lawful Men of the Islands, and Coast of Labrador aforesaid by whom the truth of the matter shall be better known, of all and all manner of Felonies, Trespasses, Forestallings, Regratings, Engrossings and Extortions whatsoever, and of all and singular other Crimes and offences of which the Justices of

p. 1372

His Majesty's Peace may or ought lawfully to enquire, by whomsoever and howsoever, in the said Islands and Coast of Labrador done or perpetrated, or which shall happen to be there done or attempted, and also of all those who in the aforesaid Islands and Coast of Labrador in Companies against His Majesty's Peace, in Disturbance of His People, with Armed Force have gone or rode, or hereafter shall presume to go or ride, and also of all those who have there lain in wait, or shall hereafter presume to lie in wait to maim, or cut, or kill His Majesty's Subjects or the Native Savages of the said Island of Newfoundland or Coast of Labrador, And also of all Victuallers, and all and singular other Persons who in the abuse of weights and measures, or in selling Victuals against the Form of the Ordinances and Statutes or any one of them therefore made, for the common benefit of England, or of the said Island of Newfoundland, and Island's adjacent and Coast of Labrador, and of His Majesty's People thereof have offended, or attempted, or hereafter shall presume in the said Islands to offend or attempt and also of all Sheriffs, Bailiffs, Stewards, Constables, Keepers of Gaols and other Officers, who in the execution of their Offices about the Premises or any of them have unduly behaved themselves, or hereafter shall presume to behave themselves unduly, or have been, or hereafter shall happen to be careless, remiss or negligent in the aforesaid Islands and Coast of Labrador; and of all and singular Articles and circumstances, and all other things whatsoever that concern the Premises, or any of them, by whomsoever and after what manner soever, and to inspect all indictments whatsoever before you taken, or to be taken, or before others late His Majesty's Justices of the Peace in the aforesaid Islands and Coast of Labrador made or taken and not yet determined, and to make and continue processes thereupon against all and singular the Persons so indicted, or who before you hereafter shall happen to be indicted, until they can be taken, surrender themselves, or be outlawed; and to hear and determine all and singular the Felonies, Poisonings, Trespasses, Forestallings, Regratings, Engrossings, Extortions, unlawful assemblies, Indictments aforesaid, and all and singular other the premises according to the laws and Statutes of England as in the like cases hath been accustomed or ought to be done, and the same offenders and every of them, for their offences by Fines, Ransoms, Americaments, Forfeitures, and other means, as according to the Law and custom of England, or form of the Ordinances and Statutes aforesaid it has been accustomed, or ought to be done to chastise and punish.

Provided always that if a case of difficulty upon the determination of any of the Premises shall happen to arise before you, or if any Treasons, Robberies, Hurders and other Felonies brought before you, then do not you in any wise give judgment thereon, but take especial care that all persons guilty of such offences be committed to the prison at St. John's, in order to take their trial at the Assizes yearly to be field there, and therefore, I command you that to keeping the Peace, Ordinances and Statutes, and all and singular other the Premises, you diligently apply yourself hereby authorising you, on certain days, at such places as shall be for that purpose appointed, to hold and keep General Quarter Sessions of

p. 1373

the Peace in the said Island of Newfoundland and Coast of Labrador, according to the custom of England, and to adjourn such Court of Sessions from time to time and from place to place as shall be most convenient and necessary for the Peace and welfare of His Majesty's Subjects, inhabiting there, to make enquiries into the Premises, and all and singular the premises hear and determine, perform and fulfil them in the aforesaid form, doing therein what to justice appertains according to the law and custom of England, so far as the same shall be applicable in the aforesaid Island of Newfoundland. And I do command by the tenor of these presents the High Sheriff of Newfoundland, or his Deputy, at certain days and places which you shall make known to him, to cause to come before you so many and such good and lawful Men of the Islands aforesaid and Coast of Labrador as well within the liberties as without, by whom the truth of the matter in the premises shall be better known and enquired into. And furthermore you are hereby authorised and required at such General Quarter Sessions to appoint from such of the Inhabitants and Planters as shall reside and abide during the Winter in the Islands aforesaid and Coast of Labrador, a proper number of Constables and other Ministers of Justice as may be necessary for preserving the Peace and quiet of His Majesty's Subjects. Provided that neither you nor any such Officer or Minister of Justice by you appointed, do presume or be suffered to Act in your respective Offices or places until you and they have taken the Oaths mentioned in the Act passed in the first year of King George the First, intituled "An Act for the further security of His Majesty's Person and Government and the succession of the Crown in the Heirs of the late Princess Sophia being Protestants and for extinguishing the hopes of the pretended Prince of Wales and his open and secret abettors," as the same is altered and explained by an Act passed in the sixth year of the present reign intituled "An Act for altering the Oath of Abjuration and the assurance, and for amending so much of an Act of the Seventh year of Her late Majesty Queen Anne intituled An Act for the improvement of the union of the two Kingdoms, as after the time therein limited requires the delivery of certain Lists and Copies therein

mentioned to Persona indicted of High Treason or misprision of Treason” as also made and subscribed the Declaration mentioned in an Act made in the twenty fifth year of the reign of King Charles the Second, intituled “An Act for preventing dangers which may happen from Popish Recusants,” and also taken such proper Oath or Oaths as are usually taken in England by persons executing such Offices and Trusts, which Oaths and Declaration you are jointly and severally hereby authorised and empowered to administer and give to all and every person or persons that ought to take the same according to the law and Custom of England; And I do strictly require and enjoin you and all such inferior Officers and Ministers of Justice who shall be appointed by you as is aforesaid, amongst the Inhabitants of the said Islands and Coast of Labrador in all cases and times whenever it may be necessary to be aiding and assisting to the utmost of your power to the Commanders of His Majesty's Ships of War in the discharge of their several duties. And

p. 1374

I do hereby strictly require all Officers Civil and Military and all other the Inhabitants of the Islands aforesaid and Coast of Labrador to afford all lawful aid and assistance to you and to the Officers and Ministers of Justice appointed by you as is aforesaid, in preserving the peace and executing the power hereby given as they will answer the Contrary.

But you are especially to take notice, and be it therefore hereby most clearly and positively understood, that you are not on any account or pretence whatever to presume to hold Plea of any disputes which shall arise concerning the Fishermen's or Seamen's Wages, nor of any Actions for debt of any description or in any case, nor concerning Seamen or Fishermen absenting themselves from their duty or employ, nor concerning the Penalties or Forfeitures incurred by any Act of Parliament relative to the Island of Newfoundland which you are not authorised but on the Contrary, are hereby strictly forbidden to inflict.

Given under my Hand and Seal on board
His Majesty's Ship the Antelope (at the
out Harbours) and Fort Townshend at
St. John's.

J. T. DUCKWORTH.

By Command of His Excellency,
R. C. SCONCE.

No. 477.

[1811.]

51 GEO. III. CAP. 45, 1811.

**An Act for . . . instituting Surrogate Courts on the Coast of
Labrador, and in certain Islands adjacent thereto.**

“II. And whereas it is expedient to provide for the better administration of justice in such parts of the coast of Labrador from the River St. John to Hudson's Streights, and in the island of Anticosti, and in all other smaller islands as are re-annexed to the Government of Newfoundland by an act passed in the forty-ninth year of His Majesty's reign, intituled, An Act for establishing Courts of Judicature in the Island of Newfoundland and the islands adjacent; and for re-annexing part of the coast of Labrador and the islands lying on the said coast to the Government of Newfoundland”; Be it therefore further enacted, That it shall and may be lawful for the Governor of Newfoundland from time to time to institute Surrogate Courts in the said parts and places, with power and authority to proceed in and to hear and determine civil suits arising within the said ports and places, and all other suits and complaints, in like manner as Surrogate Courts instituted by virtue of the said act in the Island of Newfoundland.

GOVERNOR PICKMORE.**

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. VOLUME 27, p. 221

By His Excellency, Francis Pickmore, Esquire,
Vice Admiral of the White, Governor and
Commander in Chief in and over the Island
of Newfoundland &c. &c. &c.

In all cases which may be brought before you and that are not provided for in the Acts of Parliament with which you are furnished, you are to take to your Assistance, the Justices of the Peace (where there are any) and determine them according to the Established Customs and regulations of the Fishery and as shall appear to you equitable and just. But all cases of dispute relating to any exclusive right to or property in Fishing Rooms, or Lands are to be referred to me, and in order to enable me to decide in such Cases with Justice, you will be very particular in your reports describing in cases of property the situation, size use and nature of buildings, the limits, extent, boundaries, admeasurement and situation of Lands.

You will take care to authorise at such places in each District as you may deem necessary a proper Person in the absence of the Surrogate to issue Process, pursuant to the latter part of the 3rd Section of the 49 Geo. 3rd, Cap. 27.

Given under my Hand at Fort Townshend,
St. John's, Newfoundland, the 23rd day
of September, 1816.

To the Surrogates, for the
Island of Newfoundland,
and its Dependencies.

By Command of His Excellency,
P. C. LEGEYT.

PHILIP BEARD**

AS JUSTICE OF THE PEACE FOR COAST OF LABRADOR.

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 31, page
249.

Appointed by Commission bearing date this day Philip
Beard Esqr. residing on the Coast of Labrador a Justice of the
Peace for that district.

C. HAMILTON.

Fort Townshend, St. John's,
20 October 1820.

[11 Nov.,
1820.]**GOVERNOR HAMILTON TO EARL BATHURST.**

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 31, page
264.

No. 59.

Fort Townshend, St. John's,
Newfoundland, 11th Nov. 1820.

MY LORD,

In reference to your Lordship's dispatch of the 4th Decem.
1819 transmitting the copy of a letter from Viscount Chetwynd
enclosing an application * from Philip Beard & Co. of
Dartmouth praying for a specific Grant of a Fishing
Establishment of which they have long been in possession on
the Coast of Labrador, and desiring I will report to your
Lordship my opinion upon the circumstances of the case.

I have the honor to report that Messrs. Beard & Co. appear
to have become possessed of the fishing establishment in
question which is one of considerable extent in the manner
they have set forth. That finding in the year 1816 their fishing
ground was interfered with by vessels from the United States
and Nova Scotia, they applied for redress to Capt. Cookesley
of His Majesty's Ship Hazard who had been appointed to hold
a Surrogate Court on that Coast, and who issued an order of
which the enclosure No. 1 is a copy, this however was
disregarded, and I accordingly directed Captain the Honble. J.
Gordon in the year 1819 to make particular enquiry into the
circumstances of the case, and to inform himself how far the
order of Captain Cookesley, while it afforded protection to one
party might not be prejudicial to the interests of the fishery in
general, always keeping in view that regulations for the
conduct of a salmon fishery must necessarily differ materially
from those applicable to a general cod fishery.

The result of these enquiries will be found in enclosure No.
2, and I was further informed that Messrs. Beard & Co. had
again experienced annoyance from a Master of a Nova Scotia
Vessel of the name of Jennings who however had quitted the
Bay before Capt. Gordon's arrival there.

* * * *

Your Lordship is aware that the Laws enacted for
regulating the Fisheries and trade of the Island of
Newfoundland do not extend to the Coast of Labrador
although the Government of the latter is included with the
former

No. 1.
Vide Capt.
Cookesley's Records,
1816.

No. 3.
Vide Records of Capt.
Robinson.

in His Majesty's Commission. The fisheries on the Labrador have therefore as appears by the records in this office been regulated by Proclamations and orders issued from time to time by the Governor either as the necessity of the case required or from direct instructions under the King's Sign Manual or communicated through one of His Majesty's Secretaries of State and which have generally tended to encourage Ship fishery and adventurers from England in preference to any other class of His Majesty's Subjects with the obvious view of promoting the increase of Seamen. These orders and Proclamations were always (until very lately) considered to carry with them the force and effect of law, and Messrs. Beard & Co. have in their Petition given a true copy of one issued by Governor Shuldham in the year 1775 peculiarly applicable to their case.

Under these considerations and with the precedents before me, I this year issued an order containing certain regulations for the Salmon fishery with more particular reference to that of Sandwich Bay a copy of which will be found marked H in the collection of papers No. 4 and directed Captain Robinson of His Majesty's Ship Favorite to proceed early to that station for the purpose of publishing the same, and of settling by his authority of Surrogate any differences that might arise. On his arrival at Sandwich Bay Mr. Beard. again complained of the interruption given to him by Jennings against whom he instituted an action for damages. The trial of which and the judgment given by the Surrogate will be found in enclosure No. 3.

The defendant Jennings being dissatisfied came to St. John's and instituted an action against P. Beard & Co. for supposed damages which was tried in the Supreme Court, a copy of the proceedings in this case is also marked No. 4.

It would appear that the Chief Justice in the judgment he pronounced has considered the proclamations of the Governor as not binding, although that issued by Governor Shuldham was expressly to the point in question viz,—“the encouragement and security of persons possessed of Establishments for carrying on a Salmon fishery, who should comply with the conditions therein specified of sending a Ship or Ships annually from England to be employed in the Cod fishery” and issued in pursuance of the King's pleasure signified by the Earl of Dartmouth, and as the parties in this case have appealed from the judgment to His Majesty in Council I have considered it my duty to transmit all these proceedings to your Lordship, and to solicit such instructions for my future guidance, as His Majesty's Government may be of opinion the case required.

I have the honor to be with great respect, My Lord,
Your Lordship's Most obedient humble servant,
C. HAMILTON.

The Right Honble. The Earl Bathurst K.G., &c., &c., &c.

17 June, 1824.

1824. IMPERIAL ACT 5 GEO. IV., CAP. 67.

His Majesty may
institute a superior
Court of Judicature in
Newfoundland, to be
a Court of oyer and
Terminer and
General Goal
Delivery.

An Act for the better Administration of Justice in
Newfoundland,
and for other purposes.

[17th June 1824.]

Jurisdiction.

Appointment of a
Chief Judge and two
Assistant Judges.

May be removed.

Governor may appoint
judges in certain
cases,

'Whereas it is expedient to make further Provision for the Administration of Justice in the Colony of *Newfoundland*;' Be it therefore enacted by the King's most Excellent Majesty, by and with the Advice and Consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the Authority of the same, That it shall and may be lawful for His Majesty, by His Charter or Letters Patent under the Great Seal, to institute a Superior Court of Judicature in *Newfoundland*, which shall be called "The Supreme Court of *Newfoundland*;" and the said Court shall be a Court of Record, and shall have all Civil and Criminal Jurisdiction whatever in *Newfoundland*, and in all Lands, Islands and Territories dependant upon the Government thereof, as fully and amply, to all Intents and Purposes, as His Majesty's Courts of King's Bench, Common Pleas, Exchequer and High Court of Chancery, in that Part of *Great Britain* called *England*, have, or any of them hath; and the said Supreme Court shall also be a Court of Oyer and Terminer and General Gaol Delivery in and for *Newfoundland*, and all Places within the Government thereof; and shall also have Jurisdiction in all Cases of Crimes and Misdemeanors committed on the Banks of *Newfoundland*, or any of the Seas or Island to which Ships or Vessels repair from *Newfoundland* for carrying on the Fishery.

II. And be it further enacted, That the said Supreme Court shall be holden by a Chief Judge and Two Assistant Judges, being respectively Barristers in *England* or *Ireland* of at least Three Years standing, or in some of His Majesty's Colonies or Plantations, who shall be appointed to such their Offices by His Majesty, His Heirs and Successors: Provided always, that it shall be lawful for His Majesty, His Heirs and Successors, from time to time as Occasion may require, to remove and displace any such Chief Judge or Assistant Judge as aforesaid, and in his Stead to appoint any other fit and proper Person; being a Barrister as aforesaid, to be the Chief Judge or Assistant Judge of the said Court, as the Case may be: And provided also, that in case any such Chief Judge or Assistant Judge shall be absent from *Newfoundland*, or die, or resign

until resumption of Office or Successor appointed.

such his Office, or by reason of Sickness or otherwise shall become incapable of performing the Duties thereof, then and in every such

p. 1383

Issues of Fact to be tried at Saint John's by a Jury.

Case it shall be lawful for the Governor or Acting Governor of *Newfoundland* for the Time being, to nominate and appoint some fit and proper Person to act as Chief Judge or Assistant Judge, as the Case may be, in the Place or Stead of the Judge so being absent, dying, resigning his office or becoming incapable of performing the Duties thereof, until such Judge shall resume the Duties of his office, or until a Successor shall be appointed by His Majesty, His Heirs and Successors; and the said Chief Judge and Assistant Judges shall respectively have and exercise such and the like Powers and Authorities in *Newfoundland*, and in all Places dependant upon the Government thereof, as any Judge of any of His Majesty's said Courts of King's Bench, Common Pleas and Exchequer, or as the Lord High Chancellor of *Great Britain*, hath or exercises in *England*.

Appointment of Sessions.

How Actions in breach of Laws relating to Trade of Colonies in America, to be tried.

III. And be it further enacted, That all Issues of Fact which may be joined between the Parties in any Action at Law originally brought before the said Supreme Court of Record, or which may be joined upon any Criminal Information or Prosecution depending in that Court, shall be tried at the Town of *Saint John's* in the Island of *Newfoundland*, by a Jury of Twelve Men; and for the Purpose of hearing and trying all Suits, Actions and all Informations, Prosecutions and other Proceedings, of what Nature or Kind soever, which may be brought or commenced in the said Supreme Court, One or more Term or Terms, or Session or Sessions of the said Court, shall be held at the Town of *Saint John's* aforesaid, in each Year, by the said Chief Judge and Assistant Judges, at such Times as the Governor or Acting Governor of the said Colony shall from time to time, by any Proclamation to be by him for that Purpose issued, direct and appoint.

Appeal.

Supreme court may grant Administration of the Effects of Intestates and Probates of Wills, &c.

IV. And be it further enacted, That as often as any Information, Action or Suit shall be brought or prosecuted before the said Supreme Court, for the Breach or Violation of any Law relating to the Trade or Revenue of the *British Colonies* or Plantations in *America*, such Information, Action or Suit shall be heard and determined by the said Court, according to the Course of Proceeding in similar Cases in the Courts of Vice Admiralty in the said Colonies or Plantations; and that it shall and may be lawful for the Party or Parties feeling aggrieved by the Judgment or Decree of the said Supreme Court, in any such Case, to appeal from such Judgment or Decree to the High Court of Admiralty, or to His Majesty in Council, under such and the like Rules and Regulations as are observed in Appeals from the said Courts of Vice Admiralty.

and appoint
Receivers.

V. And be it further enacted, That the said Supreme Court shall have Power to grant Administration of the Effects of Intestates, and the Probate of Wills; and that the Effects of deceased Persons shall not be administered within the Island of *Newfoundland*, or any Island, Place or Territory dependant upon the Government thereof, unless Administration or Probate shall have been duly granted by the said Supreme Court; and in all Cases where the Executor or Executors of any Will in *Newfoundland*, or the Dependencies thereof, upon being duly cited, shall refuse or neglect to take out Probate

p. 1384

Supreme Court may
appoint Guardians for
Infants and Lunatics.

as aforesaid; or where the next of Kin shall be absent from *Newfoundland* and the Effects of the Deceased shall appear to the said Supreme Court to be exposed and liable to Waste, it shall be lawful for the said Supreme Court to authorize and empower the Registrar or Clerk of the said Court, or some other fit and proper Person, to collect the said Effects, and hold, or deposit or invest the same in such Manner and Place, or upon such Security, and subject to such Orders and Directions as shall be made by the said Supreme Court in respect of the Custody, Control or Disposal of such Effects.

Governor by
Proclamation may
divide Colony into
Three Districts.

VI. And be it further enacted, That the said Supreme Court shall have Power and Authority to appoint Guardians and Keepers for Infants and their Estates, according to the Order and Course observed in such Cases in *England*; and also to appoint Guardians and Keepers of the Persons and Estates of natural Fools, and of such as are or shall be deprived of their Reason or Understanding, so as to be unable to govern themselves and their Affairs, which the said Supreme Court shall have Power and Authority to enquire of and determine, by Inspection of the Person, or by such other Ways and Means as to such Supreme Court shall seem best for ascertaining the Truth.

His Majesty may
institute Circuit
Courts.

VII. And be it further enacted, That it shall and may be lawful for the Governor or Acting Governor for the Time being of *Newfoundland*, by any Proclamation or Proclamations to be by him for that Purpose issued, to apportion and divide the said Colony into Three several Districts, and to fix and ascertain the Boundaries and Limits of every such District, and such Boundaries or Limits from time to time to alter as Occasion may require Provided always, that such Apportionment of the said Colony into such Districts as aforesaid be made in such Manner as to such Governor or Acting Governor may appear to be best adapted for enabling

the Inhabitants of the said Colony to resort with Ease and Convenience to the Circuit Courts to be therein established as after mentioned.

Circuit Courts to be Courts of Record, Jurisdiction as the Supreme Court.

Exceptions.

VIII. And be it further enacted, That it shall and may be lawful for His Majesty, by any such Charter or Letters Patent as aforesaid, to institute Circuit Courts in each of the Three Districts in which the said Colony may be so divided as aforesaid; and each of the said Circuit Courts shall be holden once at least in each Year by the said Chief Judge, or by One of the said Assistant Judges of the said Supreme Court of *Newfoundland*, at such Times and at such One or more Place or Places within each of the said Districts, as the Governor or Acting Governor for the Time being of *Newfoundland* shall from time to time direct and appoint.

IX. And be it further enacted, That the said Circuit Courts shall be respectively Courts of Record, and shall, within the District in which it may be holden, have and exercise all such and the same Jurisdiction, Powers and Authority, as is hereby vested in the said Supreme Court of *Newfoundland* throughout the whole of the said Colony: saving and excepting the trying and determining of Treasons, or Misprisions of Treason, and Felonies not within the Benefit of Clergy, and the hearing or determining of any Informa-

How Crimes cognizable in Circuit Courts and Civil Actions to be tried.

p. 1385

tion, Suit or Action, for the Breach or Violation of any Act of Parliament relating to the Trade and Revenue of the *British Colonies in America*; all which said Crimes and Offences, Informations, Suits and Actions, shall be tried, enquired of, heard and determined in the said Supreme Court of *Newfoundland*, and not elsewhere within the said Colony.

Where a Jury not formed, Trials for Crimes had by the Circuit Judge and Three Assessors, being Justices of Peace, and nominated by Governor.

X. And be it further enacted, That all Crimes and Misdemeanors, cognizable in the said Circuit Courts, and all Issues of Fact which may be joined between the Parties in any Civil Action, depending in the said Circuit Courts, shall be enquired of, heard and determined by the said Circuit Judge, and a Jury of Twelve Men, according to the Rules and Course of the Law of *England*, as far as the Situation and Circumstances of the said Colony will permit.

Such Assessors liable to be challenged

XI. Provided nevertheless, and be it further enacted, That if upon the Trial of an Crimes or Misdemeanors before any of the said Circuit Courts Twelve good and lawful Men shall not appear to form a Jury, then and in all such Cases such Trial shall be had by the Circuit Judge and Three Assessors, being Justices of the Peace in and for the said Colony, or for some District thereof; and the said Justices shall be nominated from

Verdict to be given in open Court.

Civil Actions tried by Judge of Court alone where Jury cannot be formed.

Evidence where Matter at issue is above the Value of 50*l.* to be in Writing.

On Appeal Documents to be produced.

On Application of either of the Parties before Trial, though

time to time to serve as such Assessors as aforesaid by the Governor or Acting Governor for the Time being of the said Colony, and shall severally be liable to be challenged or objected to upon the special Ground of direct Interest or Affection, to be specified in open Court at the Time of Challenge; and in case of such Challenge or Objection being allowed by the Judge of the said Circuit Court, the Justice of the Peace so challenged or objected to shall be succeeded by another such Justice of the Peace, who shall in like Manner be nominated by the Governor or Acting Governor for the Time being as aforesaid, and be liable in the same Manner to Challenge or Objection, until Three such Justices of the Peace shall appear duly qualified for the Trial of any Offender in the said Circuit Courts respectively; and the said Justices of the Peace shall thereupon severally take and repeat in open Court the same Oath as is taken by Petit Jurors impannelled for the Trial of any Crime or Misdemeanor in a Court of Record in *England*; and the Judges of the said Circuit Courts respectively shall, together with the said Three Assessors, give their Verdict upon every such Trial in open Court; but no Person shall be found guilty by any such Verdict unless the Judge of the said Court, and Two at the least of his said Assessors, shall concur in such Verdict; and the Proceedings in the said Circuit Courts respectively shall be under the Controul and Direction of the respective Judges thereof, and all Matters of Law arising in the Course of any Trial shall be determined by such Judges respectively.

XII. Provided also, and be it further enacted, That if upon the Trial of any Issue or Issues of Fact joined between the Parties in any Civil Suit or Action depending in any: of the said Circuit Courts, Twelve good and lawful Men shall not appear to from a Jury, all such Issues of Fact shall be triad and decided by the Judge of such Court, alone, and without a Jury; and that in

p. 1386

all Cases where the Sum or Matter at Issue in any such Suit or Action shall exceed or be of the Value of more than Fifty Pounds Sterling *British* Money, the Judges of the said Courts respectively shall cause the Evidence on any such Hearing or Trial as aforesaid to be taken down in Writing by the Clerk or other proper Officer, in open Court, in the Presence of the Witnesses respectively giving the same, and the Evidence so taken shall be entered upon the Proceedings of the said Courts respectively, and be of record; and in every Case in which any Appeal shall be made and allowed under the Provisions of this Act, from any Judgment of the said Circuit Courts, not founded on the Verdict of a Jury, Copies of all Documents and Papers which shall have been produced and given in Evidence shall be certified by the said Clerk or other proper Officer, as

the sum does not amount to 50l. the judge may permit the evidence to be recorded.

authentic; and also Copies of any Documents and Papers which shall have been produced and tendered in Evidence and rejected shall, if required by the Party producing the same, be in like Manner authenticated, but marked by such Officer as aforesaid as rejected, in order that all such Copies may be annexed to the Record, as Part thereof, in case of Appeal.

Appeal.

XIII. And be it further enacted, That it shall be lawful for the Judges of the said Circuit Courts respectively, on the Application of either of the parties, Plaintiff or Defendant, at or before the Trial of any Issue of Fact joined in any Civil Suit or Action commenced in the said Circuit Courts respectively, in case such Issue is not tried by a Jury, to permit the Evidence on such Trial to be recorded and certified as aforesaid, although the Sum or Matter at Issue may be less in Value than Fifty Pounds Sterling, provided it shall be made to appear to such Judge that the Judgment, Decree, Order or Sentence, which may be given, made or pronounced in such Suit or Action, may be of such Importance as to render it proper that an Appeal should be permitted; and if, after giving or pronouncing such Judgment, Decree or Order, the said Judge shall be of Opinion that such Judgment, Decree or Order is of such Importance as to make it proper that an Appeal should be permitted, it shall be lawful for the said Judge to allow either of the said Parties, Plaintiff or Defendant, to appeal to the Supreme Court, in like Manner, and under and subject to the like Rules and Regulations, as in and by this Act directed in other Cases of Appeal.

Appeal to the supreme Court may be made on giving Notice.

Costs.

XIV. And be it further enacted, That it shall be lawful for the Plaintiff or Plaintiffs, Defendant or Defendants, against whom any Judgment, Decree or Order of the said Circuit Courts respectively shall be given, for or in respect of any Sum or Matter at Issue above or exceeding the Value of Fifty Pounds Sterling, to appeal therefrom to the said Supreme Court, and the Party or Parties appealing from such Judgment, Decree or Order, shall, within Fourteen Days from the passing thereof, give Notice to the adverse Party or Parties of such Appeal, and within Fourteen Days from and after such Judgment, Decree or Order, enter into sufficient Security, to be approved by the Judges of the said Circuit Courts respectively, to satisfy or perform the said Judgment, Decree or Order, in case the same shall be affirmed or the Appeal dismissed, together with such further Costs as shall be awarded thereon; and in all

Cases of Appeal, where Notice shall be given and Security perfected as aforesaid, Execution shall be stayed, and not otherwise; and the said Supreme Court shall and may enquire into, hear and decide all Questions, whether of Law or of Fact, arising upon any such Appeal, but shall not admit or receive any Evidence which was not tendered to the Circuit Court from which such Appeal may be brought on the Hearing or Trial of any such Suit or Action therein: Provided always, that the said Supreme Court shall not reverse, alter or enquire into any Judgment of the said Circuit Courts, founded on the Verdict of a Jury, except only for Error of Law apparent upon the Record.

XV. And be it further enacted, That as often as any Action or Suit shall be brought in the Supreme Court, or in either of the said Circuit Courts respectively, and it shall be made to appear to the Court before which such Action or Suit may be pending, that such Action or Suit may be more conveniently heard and determined either in the said Supreme Court or in some other of the said Circuit Courts, it shall be lawful for such Court to permit and allow such Action or Suit to be removed to such other Court, and such Allowance shall be certified by the Judge, together with the Writ or Process on certificate of and Proceedings in such Action or Suit, to the Court into which such Action or Judge. Suit shall be intended to be removed; and thereupon it shall be lawful for such last mentioned Court, and such Court is hereby required to proceed in such Action or Suit in like Manner as if the same had been originally commenced and prosecuted in such last mentioned Court.

XVI. And be it further enacted, That in all Actions at Law or Suits in Equity, which shall be brought in the said Courts respectively, where the Debt or Sum demanded shall not be sworn to as hereinafter mentioned, the Defendant or Defendants in such Action or Suit shall be made to appear to such Action or Suit by Summons, to be issued by the Chief Judge of the said Supreme Court, or by the Judges of the said Circuit Courts respectively, and served by the Proper Officer on the said Defendant or Defendants personally, or left at his, her or their usual Place of Abode; and in all Cases where such Summons shall be disobeyed, or where the Debt, Damages or Thing demanded shall exceed Ten Pounds Sterling Money, and shall be sworn to in an Affidavit made by the Plaintiff or Plaintiffs, or his, her or their lawful Attorney, then the said Defendant or Defendants shall be made to appear by Attachment of his, her or their Goods, Debts, or Effects, or by Arrest of the Person of the said Defendant or Defendants; and in case of his, her or their Goods, Debts or Effects being attached as aforesaid, such Goods, Debts or Effects, or so much thereof as shall be judged by the said Court sufficient to

satisfy the Debt or Damages, shall be held as Security for such Debt or Damages, and shall abide the Order, Judgment or Decree of the Court issuing such Attachment, unless the Defendant or Defendants, or some Person on his, her or their Behalf, shall appear and give good and sufficient Bail, to be approved by such Court, to satisfy such Judgment, Decree or Order; and where the Defendant or Defendants has or have been arrested, he, she or they shall not be discharged out of Custody until he, she or they shall in

p. 1388

Damages and Cost.

like Manner have given good and sufficient Bail, to be approved by such Court, to satisfy the Judgment, Decree or Order of the Court in the Cause in which such Arrest was made; and it shall also be lawful for the said Courts respectively, when any such Action or Suit as aforesaid shall be depending therein, to cause to appear from Day to Day all Parties interested therein, and to examine upon Oath any of such Parties, in case such Examination shall appear to the said Court necessary for the Discovery of the Truth, but not otherwise; and thereupon, and after due Consideration of all Circumstances of the Case, to make such Order, Judgment or Decree therein, and award such Damages and Costs as shall be just and equitable; and such Order, Judgment or Decree shall be enforced by Attachment and Sale of the Goods, Debts and Effects, or by Arrest of the Person or Persons against whom such Order, Judgment or Decree shall be made, and Imprisonment of such Person or Persons until such Order, Judgment or Decree shall be performed and satisfied.

Powers given for making Rules and Orders for the Proceedings in the Supreme Court and Circuit Courts, &c.

XVII. And be it further enacted, That it shall be lawful for His Majesty, His Heirs and Successors by such Charter or Letters Patent as aforesaid or by any Order or Orders to be hereafter issued by and with the Advice of His or Their Privy Council to make and prescribe or to authorize and empower the said Supreme Court of *Newfoundland*, under such Limitations as His Majesty shall deem proper, to make and prescribe such Rules and Orders touching and concerning the Forms and Manner of Proceeding in the said Supreme Court and Circuit Courts respectively, and the Practice and Pleadings upon all Indictments, Informations, Actions, Suits and other Matters to be therein brought; or touching or concerning the appointing of Commissioners to take Bail, and examine Witnesses; the taking Examinations of Witnesses *de bene esse*, and allowing the same as Evidence; the, granting of Probates of Wills and Letters of Administration; the Proceedings of the Sheriff and his Deputies, and other Ministerial Officers; the summoning of Assessors for the Trial of Crimes and Misdemeanors in the said Circuit Courts; the Process of the said Court, and the Mode of executing the same; the

§ 2. repealed.

impannelling of Juries; the Admission of Barristers, Attornies and Solicitors; the Fees, Poundage or Perquisites to be lawfully demanded by any Officer, Attorney or Solicitor in the said Courts respectively; and all other Matters and Things whatsoever touching the Practice of the said Courts, as to His Majesty, His Heirs and Successors, shall seem meet for the proper Conduct of Business in the said Courts; and such Rules and Orders from time to time to alter, amend or revoke, as to His Majesty, His Heirs and Successors, shall seem requisite.

Power to the Governor to institute a Court of Civil Jurisdiction on the Coast of Labrador, &c.

“XVIII. And Whereas it is expedient to make further Provision for the Administration of Justice on the Coast of *Labrador;*” Be it further enacted, That so much of an Act passed in the Fifty first Year of the Reign of His said Majesty *George* the Third, intituled *An Act for taking away the Public Use of certain Ships Rooms, in the Town of Saint John's in the Island of Newfoundland, and for establishing Surrogate Courts on the Coast of Labrador,*

Court to be held by One Judge, and to hear and determine Complaints of a Civil Nature.

p. 1389

and in certain Islands adjacent thereto, as relates to the Institution of Surrogate Courts, shall be, and the same is hereby repealed; and that it shall and may be lawful for the Governor or Acting Governor of *Newfoundland* for the Time being to institute a Court of Civil Jurisdiction at any such Parts or Places on the Coast of *Labrador,* or the Islands adjacent thereto, which, in and by the said Act passed in the Fifty first Year of the Reign of His Majesty *George* the Third are reannexed to the Government of *Newfoundland,* as Occasion shall require; and such Court shall be held by One Judge, and shall be a Court of Record, and shall have Jurisdiction, Power and Authority to hear and determine all Suits and Complaints of a Civil Nature arising within any of the said Parts and Places on the Coast of *Labrador,* or the Islands adjacent thereto; and the said Court shall be holden by a Judge, who shall be appointed from time to time by the Governor or Acting Governor of *Newfoundland,* and shall have a Clerk and such other Ministerial Officers as the Governor or Acting Governor shall appoint; and the Proceedings of the said Court shall be summary, and such Forms of Process, and such Rules of Practice and Proceeding as shall be settled by the Chief Judge of the said Supreme Court, shall be followed by the said Court, and no other.

Appeal to Supreme Court in certain Cases.

Notice.

Security.

XIX. And be it further enacted, That it shall and may be lawful for the Plaintiff or Plaintiffs, Defendant or Defendants against whom any Judgment, Decree or Order of the said Court shall be given, for or in respect of any Sum or Matter at Issue above Fifty Pounds Sterling, or where the Matter in Dispute shall relate to the Title to any Lands, Tenements, Right of Fishery, annual Rent or other Matter, where, in the Judgment of the said Court, Rights in future may be bound, to appeal therefrom to the said Supreme Court; and the Party or Parties

Stay of Execution.

Appeal from Supreme Court to His Majesty in Council.

Governor, on Arrival of His Majesty's Charter,

to notify by Proclamation when the Courts shall be opened, and thereupon so much of 49 G. 3. c. 27. as relates to the Courts thereby instituted, shall be repealed, and Proceedings and Records of those Courts delivered over to the Courts instituted under this act.

General and Quarter

appealing from such Judgment, Decree or Order, shall, within Seven Days from the passing thereof, give Notice to the Adverse Party or Parties of such Appeal, and within Fourteen Days from and after such Judgment, Decree or Order, enter into sufficient Security, to be approved by the Judge of the said Court or some Person to be appointed by him for that Purpose in his Absence, to satisfy or perform the said Judgment, Decree or Order, in case the same shall be affirmed or the Appeal dismissed, together with such further Costs as shall be awarded thereon; and in all Cases of Appeal, where Notice shall be given and Security perfected as aforesaid, Execution shall be stayed and not otherwise.

XX. And be it further enacted, That it shall and may be lawful for His Majesty, by His said Charter or Letters Patent to allow any Person or Persons feeling aggrieved by any Judgment, Decree, Order or Sentence of the said Supreme Court, to appeal therefrom to His Majesty in Council, in such Manner, within such Time, and under and subject to such Rules, Regulations and Limitations as His Majesty by such Charter or Letters Patent respectively, shall appoint and direct.

XXI. And be it further enacted, That the Governor or Acting Governor of *Newfoundland*, upon the Arrival in the said Colony of His Majesty's Charter

p. 1390

or Letters Patent for the Establishment of the said Courts by virtue of this Act, shall by Proclamation notify to the Inhabitants of the said Colony, the Time when the said Courts respectively shall be intended to be opened; and as soon as the Judges of the said Supreme Court shall have assumed and entered upon the Exercise of their Jurisdiction therein, then and from thenceforth so much of the Act passed in the Forty ninth Year of the Reign of His late Majesty *George* the Third, intituled *An Act for establishing of Courts of Judicature in the Island of Newfoundland, and in the Island adjacent; and for reannexing Part of the Coast of Labrador, and the Islands lying on the said Coast, to the Government of Newfoundland*, as relates to the Courts thereby instituted, and respectively called the Supreme Court of Judicature of the Island of *Newfoundland*, and Surrogate Courts, shall cease to be in force and determine; and every Suit, Action, Complaint, Matter or Thing, which shall be depending in such last mentioned Courts respectively, shall and may be proceeded upon in the Supreme Court instituted under and by virtue of this Act or either of the said Circuit Courts which shall have Jurisdiction within the District or Place in *Newfoundland* where such Action or Suit respectively was depending; and all Proceedings which shall thereafter be had in such Action or Suit respectively, shall be conducted in like Manner as if such Action or Suit had been originally commenced in one or other of the said Courts instituted under this Act; and all the Records, Muniments and

Sessions held as
Governor shall
appoint.

Jurisdiction.

Proceedings whatsoever, of and belonging to the said Courts instituted under the said recited Act respectively, shall, from and immediately after the opening of the said Courts respectively instituted under this Act, be delivered over and deposited for safe Custody in such of the said Courts respectively instituted under this Act as shall be found most convenient, and all Parties concerned shall and may have recourse to the said Records and Proceedings, as to any other Records or Proceedings of the said Courts respectively.

Proceedings in Cases
of Insolve.

XXII. And be it further enacted, That Courts of General and Quarter Sessions shall be holden at *Newfoundland* and its Dependencies at such Times and Places as the Governor or Acting Governor of *Newfoundland* and its Dependencies at such Times and Places as the Governor or Acting Governor of *Newfoundland* shall by his Proclamation appoint; and the said Courts of Sessions respectively shall have Power and Authority, in a summary Way, to take Cognizance of all Suits for the Payment of Debts not exceeding Forty Shillings, except the Matter in Dispute shall relate to the Title to any Lands or Tenements or to the taking or demanding of any Fee of Office or Annual Rent, and to award Costs therein; and also to hear and determine all Disputes, to any Amount, which may arise in *Newfoundland* concerning the Wages of Seamen or Fishermen, the supply of Bait, the Hiring of Boats for the Fishery, and all Disputes arising in *Newfoundland* aforesaid concerning the curing or drying of Fish, where the Sum or Matter in Question does not exceed or is not of the Value of more than Five Pounds Sterling; and the Judgment, Determination or Award of the said Courts of Sessions or Justices respectively, in all such Cases, shall be final.

p. 1391

Trustees appointed.

Declaration of
Insolvency.

“XXIII. And Whereas it is expedient to make Provision for declaring Insolvencies in *Newfoundland*,” Be it further enacted, That as often as any Writ of Attachment or other Process for the Recovery of any Debt or Sum due, shall be issued by the said Supreme or Circuit Courts respectively, against any Person or Persons residing or having a House of Trade, or carrying on Business in *Newfoundland*, or any Place within the Government thereof, and it shall be made to appear to the said Court out of which such Writ or Process shall have issued, at the Return thereof, that the Person or Persons against whom such Writ or Process hath issued is or are unable to pay Twenty Shillings in the Pound to all his, her or their Creditors, it shall be lawful for such Court to cause the Person or Persons against whom such Process shall have issued, together with all his, her or their Creditors, to be summoned by public Notice to attend the said Court on a certain Day, and in the mean Time, if it shall appear necessary to the said Court, to appoint One or more of the said Creditors as Provisional Trustee or Trustees to discover, collect and receive the Estates and Effects of such Person or Persons so appearing to be insolvent, subject to the

Distribution of Estate.

Insolvents, on making Disclosure of their Effects and conforming to Directions of judges, may receive Certificates with Consent of One half in Number and Value of the Creditors

Orders and Directions of the said Court; and if after due Examination of the Person or Persons against whom Process shall have issued as aforesaid, or his, her or their lawful Agent or Agents, or if such Person or Persons shall abscond or fail to attend the said Court pursuant to Summons as aforesaid, it shall be made to appear to the Satisfaction of the said Court, that such Person or Persons is or are insolvent, it shall be lawful for the said Court to declare such Person or Persons insolvent accordingly, and immediately to take order for discovering, collecting and selling the Estates, Debts and Effects of such Insolvent, and distributing the Produce thereof amongst all his, her or their Creditors, and for that Purpose to authorize any Two or more Creditors of the said Insolvent or Insolvents, who shall be chosen by the major Part in Value of such Creditors, or their Agents duly authorized in such Behalf whose Debts amount respectively to the Sum of Twenty Pounds and upwards, to act as Trustees os such insolvent Estate; and such Court shall from time to time make such Orders as it shall deem proper, for better discovering, collecting, realizing and distributing the Estates, Debts and Effects of the Person or Persons so declared insolvent, and as often as Occasion shall require, for vesting the same or any Part thereof, in the Public Funds or Securities in *England*, in the Name or Names of such Person or Persons as shall for that purpose be appointed by the said Court until Distribution can be made, as hereafter mentioned.

XXIV. And be it further enacted, That if such insolvent Person or Persons shall make a full and true Disclosure, Discovery and Surrender of all his her or their Estates, Goods, Debts and Effects, and shall conform to the Orders and Directions of the said Judges of the said Courts respectively, the same shall and may, with the Consent in Writing under the Hands of One Half in Number and Value of the Creditors of such Insolvent or Insolvents, be certified by the respective Judges, under the Seal of the Said Courts respectively; and such Certificate may be pleaded, and shall be a Bar to

collect, sell and dispose of all the Estates and Effects of such deceased Person, and to distribute the Produce thereof amongst his or her Creditors, according to the Manner of Distribution by this Act directed in respect of the Estates of Persons declared insolvent, and always subject to the Orders and Directions of such Court: Provided always, that nothing herein contained shall be construed to affect the Right of any Creditor having a Judgment or Special Security for his or her Debts.

Deeds to be registered
at the Office of
Registration within
the District in which
the Lands are situate,
within a certain
Time.

“XXVII. And Whereas it is expedient that Provisions should be made for the Registration, within the said Colony of *Newfoundland*, of all Deeds, Wills and other Assurances whereby any Lands or Tenements therein situate may be granted, conveyed, devised, mortgaged, charged or otherwise affected;” Be it further enacted, That the Chief Clerk of the Supreme Court of *Newfoundland* shall be also the Registrar of Deeds within the District or Circuit in which the Town of *St. John's* may be situate, and that the Chief Clerks of each of the Circuit Courts to be holden in and for the Two other Districts of the said Colony, shall respectively be the Registrars of Deeds within such other Districts or Circuits; and in each of the said Three Districts an Office shall be kept by such Chief Clerk respectively, for the due Registration of all such Deeds, Wills and other Instruments as aforesaid.

How Deeds verified
before the Registrar.

XXVIII. And be it further enacted, That all Deeds, Wills, Conveyances and other Assurances in Writing, of what Nature or Kind soever, whereby any Lands or Tenements situate in the said Colony, or the Dependencies thereof, may be hereafter granted conveyed, devised mortgaged, charged or otherwise affected or intended so to be, shall be registered at the Office of Registration within the District or Circuit in which such Lands may be situate; and that all such Deeds, Conveyances and other Assurances as aforesaid, shall be left for Registration at such Office within Six Months next after the Execution thereof, by the Party or Parties from whom any Interest may pass, in case such Party or Parties may, at the Time of such Execution thereof by him, her or them, be resident within the said Colony or its Dependencies, or within Twelve Months in case such Party or Parties may at that Time be resident elsewhere; and all such Wills as aforesaid shall be left for Registration at such Office Twelve Months next after the Death of the Testator or Testatrix.

Registrar to indorse
on the Deed a
Certificate of
Registry.

XXIX. And be it further enacted, That some or one of the Parties executing any such Deed, Conveyance or other Assurance as aforesaid, shall appear before the Registrar of Deeds, and acknowledge the Execution thereof by them, him or her, or in case none of the Parties to any such Deed, Conveyance or Assurance shall be resident in the said Colony, then the same shall be acknowledged before the said Registrar of Deeds, by some Person duly appointed for that Purpose as the Attorney of such Parties; and in that Case the Execution of every such Deed, Conveyance or other Assurance shall be further verified by an Affidavit to be sworn before the Mayor or other principal Magistrate of any City, Town or Place in or near to which such Parties respectively may be resident; and such Affidavit shall also be preserved and registered at the Office of the said Registrar of Deeds.

p. 1394

Registrar to enter in
the Book of Registry
a Memorial of the
Deed acknowledged
before him.

XXX. And be it further enacted, That the Registrar of Deeds shall and he is hereby required to indorse and subscribe, on every such Deed, Conveyance or other Assurance, a Certificate, in which shall be expressed the Day or Time when the same was so acknowledged before him, and the Names of the Person or Persons by whom such Acknowledgement was made, and the Time when the same was actually registered, and the Volume and Page in which the Registry thereof is entered; and every such Certificate so indorsed or subscribed shall be taken and allowed as Evidence of the due Registration of any such Deed, Conveyance or Assurance.

Deeds hereafter to be
made, conveying
Lands, &c. not duly
registered, declared
void.

XXXI. And be it further enacted, That the Registrar of Deeds shall and he is hereby required to enter in a Book of Registry, to be by him regularly kept for that Purpose, a Memorial of every Deed, Conveyance or Assurance which shall be so acknowledged before him; and every such Memorial shall contain a Statement of the Year and Day of the Month on which such Deed, Conveyance or Assurance shall bear Date, the Names and Additions of all and every the Parties, as well as the Names and Additions, if any, of the several subscribing Witnesses thereto, the Descriptions at Length of the Lands or Tenements conveyed or intended to be conveyed, charged or affected by such Deed, Conveyance or Assurance, as the same are therein described, and the Consideration of every such Deed, Conveyance or Assurance, as the same may be therein stated; all which Memorials shall be entered and recorded in the said Book of Registry with all convenient Dispatch, in the Order of Time in which the same may have been acknowledged before the said Registrar.

XXXII. And be it further enacted, That every Deed, Conveyance or Assurance hereafter to be made, whereby any Lands or Tenements situate in *Newfoundland*, or the Dependencies thereof, shall be granted, conveyed, released, charged or incumbered, or intended so to be, which shall not

Supreme Court
authorized to make
Rules and Orders for
the Registry of
Deeds, &c.

be registered within the Time and in the Manner hereinbefore mentioned, shall be absolutely null and void to all Intents and Purposes: Provided always, that every such Deed, Conveyance or Assurance shall be deemed and taken to be a registered Deed, Conveyance or Assurance within the Meaning of this Act, from the Time when the Execution thereof shall be acknowledged in Manner aforesaid, before such Registrar of Deeds as aforesaid.

XXXIII. And be it further enacted, That the Judges of the Supreme Court of Newfoundland shall be and they are hereby authorized to make any general Rules and Orders of Court for maintaining Order and Regularity in the Mode of taking such Acknowledgments, and registering such Deeds, Wills, Conveyances and other Assurances as aforesaid, and for executing the Duties of said Office of Registrar of Deeds; provided that such Rules and Orders be not in any wise repugnant to the Provisions of this present Act in that Behalf.

“XXXIV. And Whereas the Justices of the Peace in *Newfoundland* have been used to grant Licences for the Retail of Ale and Spirituous Liquors, and it is proper to regulate the Sums to be demanded upon such

p. 1395

Governor may make
Ordinances for
granting Licences for
Retail of Ale and
Spirits, and
Appropriation of
Sums arising thereby.

Licences, and to make Provision for the Appropriation thereof, and for preventing Abuses in the granting of such Licences, and in the Sale of Spirits by unlicensed Persons in the said Colony;” Be it therefore enacted, That it shall and may be lawful for the Governor or acting Governor of Newfoundland to make, establish and ordain such Rules and Ordinances as to him may seem meet, respecting the granting of such Licences, and the recalling the same, and the Amount of the Sums to be demanded and taken for every such Licence, and the Appropriation of such Sums to His Majesty's Service in the said Colony, and for preventing the Retail of Ale and Spirituous Liquors by Persons not duly licensed, and to impose such pecuniary Fines or other Penalties as may be necessary for enforcing Obedience to any such Rules or Ordinances as aforesaid.

His Majesty may
grant Charters for
establishing
Corporations for the
Government of
Towns.

XXXV. And be it further enacted, That it shall and may be lawful for His Majesty, by Charter or Letters Patent under the Great Seal, to constitute and erect such Persons as to His Majesty shall seem meet a Body or Bodies Corporate and Politic, for the Government of any Town or Towns situate within the said Colony of Newfoundland or its Dependencies, and to grant to such Body or Bodies Politic and Corporate Power to make Bye Laws for regulating the Police of any such Town or Towns, and for the Prevention or Abatement of Nuisances therein, and for the Prevention of Accidents by Fire; and also to grant to any such Body or Bodies Politic and Corporate as aforesaid, the Power to impose and levy such

reasonable and moderate Rates and Assessments upon the Inhabitants and Householders in such Town or Towns, as may be necessary for carrying into Effect the several Purposes aforesaid, or any of them; and it shall also be lawful for His Majesty, His Heirs and Successors, by any Order or Orders to be made by or with the Advice of His or Their Privy Council, to dissolve any such Corporation or Corporations as aforesaid, upon and subject to such Conditions and Regulations as may be made in and by any such Order or Orders in that Behalf.

XXVI. And be it further enacted, That this Act shall continue and be in force for Five Years from the passing thereof, and no longer.

with Jurisdiction, power and authority to hear, determine all suits and complaints of a civil nature after the manner and form provided by the said Act, and arising within any of the parts or places on the said Coast of Labrador, or the Islands adjacent thereto, which are re-annexed to the Government of Newfoundland,

p. 1397

viz: from the entrance of Hudson's Straits to a line to be drawn due North and South from Anse Sablon on the said Coast, to the fifty-second degree of North Latitude.

And I do authorise, empower and direct the Judge of the said Court of Civil Jurisdiction, hereby instituted, from day to day and from place to place, or for any number of days within the term, session, or continuance of the said Court, to adjourn the said Court, to meet, re-assemble and sit again in the execution and discharge of the duties of the said Court, when, and so often as by the said Judge may be deemed necessary or expedient for the due and proper fulfilment and discharge of such duties.

And of these presents gall Magistrates, the Sheriff and his deputies, all Bailiffs, Constables, Keepers of Gaols, and other Officers of the Coast of Labrador, in the execution of their Offices about the Premises, are desired, and hereby required. and commanded to take due notice and govern themselves accordingly.

Given under my hand at Government House, St. John's, the second day of January, in the Sixth year of His Majesty's Reign.

By Command of His Excellency the Governor,
E. B. BRENTON.

L.S. George the Fourth by the Grace of God, of
the
(Signed) United Kingdom of Great Britain and
Ireland,
Thos. Cochrane. Defender of the Faith.

To all to whom these presents shall come, Greeting.

KNOW YE that We having taken into our Royal consideration the loyalty, integrity, and ability of our trusty and well beloved William Paterson, Esquire, Captain in our Royal Navy and Companion of the most Honourable Military Order of the Bath, have constituted and appointed him the said William Paterson, Judge of our Court of Civil jurisdiction in and for our Coast of Labrador from the entrance of Hudson's Straits, to a line to be drawn due North and South from Anse Sablon on the said Coast to the 52nd degree of North Latitude, and all the Islands adjacent to the said Coast of Labrador, and which are annexed and appendant to the Government of Newfoundland with jurisdiction, Power and Authority to hear and determine all Suits and Complaints of a Civil Nature arising within any parts or places of the Coast of Labrador within the limits before mentioned, or the aforesaid Islands adjacent thereto, in pursuance of the provisions contained in a certain Act of Parliament passed in the fifth year of our Reign and intituled "An Act for the better administration of Justice in Newfoundland and for other purposes" To have, hold, execute and enjoy the said Office unto him the said William Paterson for and during our pleasure, together with all and singular the rights, Profits, privileges, and Emoluments unto the said place belonging in the most full and ample manner, with full power and authority to hold the said Court of Civil Jurisdiction at such places and times as the same may and ought to be held within our said Coast of Labrador and the Islands adjacent.

IN TESTIMONY whereof We have caused these our letters to be made patent.

WITNESS His Excellency Sir Thomas John Cochrane Knight,
our Governor & Commander in Chief in and over our
Island of Newfoundland and its Dependencies, the 2nd

day of January, 1826, in the Sixth year of our Reign.

By Command of His Excellency the Governor,

E. B. BRENTON.

L.S. By His Excellency Sir Thos. John Cochrane
(Signed) Knight, Governor, &c.
Thos. Cochrane

WHEREAS by an Act of Parliament made in the fifth year of the Reign of His Majesty King George the fourth intituled "An Act for the better administration of Justice in Newfoundland and for other purposes" it is declared and enacted that it shall and may be lawful for the Governor or, Acting Governor for the time being to institute a Court of Civil Jurisdiction at certain parts or places on the Coast of Labrador, or the Islands adjacent thereto, and that the said Court shall be holden by a Judge who shall be appointed from time to time by the Governor or Acting Governor of Newfoundland and shall have a Clerk and such other Ministerial Officers as the Governor or Acting Governor shall appoint. AND WHEREAS I the said Governor have by virtue of the power and authority so given unto me by the said recited Act of Parliament, instituted such Court of Civil Jurisdiction, as aforesaid, and have also appointed a Judge of the said Court; AND WHEREAS it is necessary and expedient to appoint a Sheriff for the said parts and places on the said Coast of Labrador, and the Islands adjacent thereto, and within the Jurisdiction of the said Court. NOW THEREFORE by Virtue of the said Power and authority and also by Virtue of the said power and authority unto me given by His Majesty's Commission unto me directed, bearing date at Westminster the 20th day of August in the 6th year of His Majesty's Reign, authorising and empowering me to appoint the necessary Officers and Ministers for the better administration of Justice and keeping the peace and quiet of the Island of Newfoundland and its dependencies, I the said Governor, do by these presents nominate and appoint you William Dickson, Esquire, to act and be Sheriff for all posts and places of the Coast of Labrador, and the Islands adjacent thereto under and within the Jurisdiction of the said Court. To hold, exercise, and fulfil all & singular the powers, duties, and

functions belonging to and incident to the said Office of Sheriff within all parts and places of the said Coast of Labrador and the Islands adjacent thereto as aforesaid, And to enjoy, receive and take all &

1401

singular the rights, profits, privileges, Emoluments, Fees & perquisites unto the said office belonging or in any wise appertaining from the day of the date of these presents and thenceforth during pleasure.

And I do by these presents commit unto you the said William Dickson, Esquire, the custody of the aforesaid parts and places of the said Coast of Labrador and the Islands adjacent thereto with the appurtenances so that you render to His Majesty's use His Majesty's due forms, and answer touching all other His Majesty's dues, and fulfil all other matters concerning the said Office of Sheriff as you ought and may be thereunto lawfully required and enjoined.

Given under my hand & Seal at the Government House, St. John's, Newfoundland, this 18th July, 1826. in the seventh year of His Majesty's Reign.

By His Excellency's Command,

E. B. BRENTON.

Government House,
11th August, 1826.

SIR,

With your Commission to proceed on your Circuit to Labrador and the Proclamation which accompanies, I transmit you a list of such places as from the best information that can be obtained are likely to call for your presence. At the same time you will understand that it by no means professes to be correct; but after your arrival at Invucktoke, you must obtain from time to time the best information you can get on that point and regulate your proceedings accordingly, taking the most Northern place at which first to hold your Court, so that you may be always making progress to the, Southward as the Summer declines.

Herewith you will receive a Copy of the Treaty with America, by which that Country is entitled to take and cure fish upon the Coast of Labrador, and with it I also forward to you copy of an explanatory letter from Lord Bathurst on the subject of it. At the same time that I recommend the most conciliatory and friendly conduct on the part of yourself and all attached to your Court or under your authority towards the subjects of the United States whilst engaged in the fishery secured to them by the Treaty, you will bear in mind that whilst they are employed within your Jurisdiction they are equally amenable to the Laws with any of His Majesty's subjects, and that the same measure of Justice is to be dealt to them as to any others infringing the rights of Individuals or disturbing the public Peace.

For your further guidance in the discharge of your official duties I must refer you to the Acts 5, Geo. 4, Cap. 51 & 67 with which you will be furnished, and should there be any point on which you may previously to your sailing require legal advice the same shall be submitted to the Attorney General, or to the Judges of the Supreme Court as the Case may require.

During the period that you are upon the Coast of Labrador,
It is very desirable you should stake every opportunity of
informing yourself of the

p. 1405

state of our Fishery, as well as that of the Americans, and that
you should collect all the information you can with reference
to the Fur trade, and Native Inhabitants, the Moravian
Settlements, the number, if any, of Europeans or Americans
who remain the Winter, as well as the Stations they occupy;
and generally, that you should collect all the information you
can of that imperfectly known country that may in any way
tend to the Advancement of science or Commerce.

I am, Sir,
Your most obedient servant,
(Signed) THOS. COCHRANE,
Governor.

To Captain Paterson, C.B., R.N.,
&c. &c. &c.

[30 Aug.,
1826.]**EXTRACT FROM RECORDS OF COURT OF CIVIL
JURISDICTION FOR LABRADOR.**

J. C. Brunet & Co.
vs.
Joseph Bird &
Timothy Craze.Rigolet, Esquimaux Bay, Labrador,
Wednesday, the 30th day of August, 1826.Court of Civil Jurisdiction for the Coast of Labrador and
islands adjacent.The Honourable William Paterson, Esq., Captain of the Royal
Navy, and Companion of the most Honorable Military
Order of the Bath, Judge of the said Court.

J. O. Brunet & Co. of Quebec by their partners, Joseph Tourzeon, residing at Rigolet, also by petition set forth his complaint, stating that. Mr. Joseph Bird of Sturminster, England, by his agent Timothy Craze of Tub Harbor, in this Bay and by the persons employed under him; have for these three years last past interrupted the complainants in their salmon fishery at a place called Kinnamon Brook in this Bay, by placing their nets in front of and very near to those of complainants, so as to intercept the salmon coming to them, whereby the complainants allege that they have sustained damages to the amount of five hundred pounds and praying that process might be issued against the said Joseph Bird and Timothy Craze for the recovery of that sum.

The Court complied with the prayer of the Plaintiffs petition by granting a writ of summons at their suit against Joseph Bird and Timothy Craze in in the sum of £500. But as it appeared that the Defendants could not this year be prepared with their evidences to defend the action, the Court directed that the writ should be made returnable at Rigolet on Monday the 13th day of August, 1827, or at such other time as the Court of Labrador might first sit at Rigolet.

PROCLAMATION.

L.S. By His Excellency Sir Thomas John
Cochrane
Thos. Cochrane. Knight, &c.

Whereas by an Act of Parliament passed in the fifth year of the Reign of our Sovereign Lord George the fourth by the grace of God of the United Kingdom of Great Britain & Ireland King Defender of the Faith intituled "An Act for the better Administration of Justice in Newfoundland and for other purposes" it is enacted and declared that it shall and may be lawful for the Governor or Acting Governor of Newfoundland for the time being to institute a Court of Civil Jurisdiction at any such parts or places on the Coast of Labrador, or the Islands adjacent thereto, which are reannexed to the Government of Newfoundland as occasion shall require. Now therefore in pursuance of the power and authority to me given by the said Act of Parliament, and in fulfilment of the requisitions & provisions of the same, I the Governor do by this my Proclamation institute a Court of Civil Jurisdiction to be holden at the several Ports or Bays on the Coast of Labrador as hereinafter mentioned, and in the order herein set forth, commencing with the first named place as soon after the 15th day of July next as the Weather will permit, viz., Indian Harbour, Indian Island, Rigolet, or Ivucktoke otherwise Gross Water, Mullins Cove, Tub Harbour, Dumplin Island Harbour, Indian Tickle, Cape Charles, Henley Harbour in Chateau Bay, and Henley Harbour in Temple Bay on the said Coast of Labrador, or at any or either of the said places, or at any other place or places on the said Coast, and at such periods as circumstances will permit or may render necessary with jurisdiction, power and authority to hear and determine all suits and complaints of a civil nature after the manner and form provided by the said Act, and arising within any of the ports or places on the said Coast of Labrador or the Islands

adjacent thereto which are re-annexed to the Government of Newfoundland viz. from the entrance of Hudson's Straits to a line

p. 1408

to be drawn due North and South from Anse Sablon on the said Coast to the fifty second degree of North Latitude.

And I do authorize empower and direct the Judge of the said Court of Civil Jurisdiction hereby instituted, from day to day and from place to place or for any number of days within the term session or continuance of the said Court to adjourn the said Court, to meet, re-assemble, and sit again in the execution and discharge of the duties of the said Court when and so often as by the said Judge may be deemed necessary or expedient for the due and proper fulfilment and discharge of such duties.

And of these presents, all Magistrates the Sheriff and his Deputies, all Bailiffs, Constables, Keepers of Gaols and other Officers of the Coast of Labrador in the execution of their Offices about the premises, are desired and hereby required & commanded to take due notice and govern themselves accordingly.

Given under my hand and seal at the Government House,
St. John's the 18th day of June 1827 in the Eighth year of
His Majesty's Reign.

By His Excellency's Command,
W. A. Clarke.

CIVIL JURISDICTION FOR LABRADOR.**

Hired Schooner Belinda at Sea.
July 6th, 1828.

Thursday, July 18th, left Indian Island, point D'Nore, notice having been given that a Court of Civil Jurisdiction would be held at Tub Harbor on the first day of August, the Honorable the Judge deeming that to be the most central place in Esquimaux Bay. On Tuesday evening the 19th July, arrived at Rigolet, on the 20th July left Rigolet for Kinnamish Tuesday 22nd reached Kinnamish where the Court viewed the Salmon Brook in dispute between J. O. Brunet & Co. vs. J. Bird. Thursday the 24th July arrived at North West Brook, Sunday the 27th left N.W. Brook for Rigolet, Tuesday the 28th arrived at Rigolet when notice was given that a Court would be held at Tub Harbor on the first of August, on Wednesday the 30th July left Rigolet for Tub Harbor giving notice at Mullens Cove, Cullenghams Tickle and Cuff Harbor, where and when the Court would be held, and on Thursday, the 31st July arrived at Tub Harbor.

[11 Dec.,
1828.]**REPORT OF THE JUDGE OF THE LABRADOR
DISTRICT WITH THE PLACES VISITED 1826-8**

St. Johns Newfoundland,
11th December, 1828.

SIR,

I have the honor to enclose for your Excellency's information, and that of His Majesty's Government, Returns of the number of Civil Actions tried in the Court of Civil Jurisdiction established for the Labrador District within the Government at Newfoundland for the years 1826-1827 and 1828.

In forwarding these Returns to your Excellency I beg to state that they by no means afford an adequate view either of the number of cases of complaint that have been decided, or set at rest,—or of the extent of litigation that arises between the parties resorting to the Labrador Coast.

Your Excellency is aware that the Season for taking fish and securing the produce of the Fisherman's labour is both short and uncertain; there are consequently numerous cases of complaint, or dispute, that arise of much importance to the parties, but which they rather forego, than by leaving their Fishery incur the risk of losing the whole produce of their voyage.—Under these circumstances I have, whenever it has been in my power to do so, visited the different establishments, had the litigant parties before me, heard their complaints, and, by my advice, very commonly reconciled their differences without interfering with their labours.

I have &c.

Signed: WILL PATERSON.

Endorsed . . . Letter from Judge
Paterson; &c.

[ENCLOSURE.]

Return of the number of civil actions tried in the Court of Civil Jurisdiction established for the Labrador District within the Government of Newfoundland, 1826.

Place where the Court was holden: Rigolett, Mullins Cove,
Tub Harbour, Dumplen Island, Cape Charles.

Return of the number of civil actions; etc. 1827.

Place where the Court was holden: Grady Harbour, Dumplen Island, Tub Harbour, Indian Island, Indian Tickle, Cape Charles.

. . . . The Court visited the following places where there was no business for its consideration viz.: Frances Harbour, Indian Harbour, Indian Island, point North, Mullins Cove, Rigolett and Cuff Harbour.

Return of the number of civil actions; etc.

Place where the Court was holden: Tub Harbour, Dumplen Island, Grady Harbour, Seal Islands, Frances Harbour, Cape Charles, Henley Harbour.

. . . . The Court visited the following places where there was no business for its consideration viz.: L'Ance a Loup, Forteau, Indian Tickle, South East Cove, Long Island, Indian Island, point North, Rigolett, Kinnamarsh, Cuff Harbour, Indian Harbour and Mullins Cove.

Signed: WILL PATERSON,
Judge of the Labrador District Court.

1828.]**GOVERNOR COCHRANE TO SECRETARY OF STATE,
TRANSMITTING RETURNS OF ACTIONS IN
NEWFOUNDLAND AND LABRADOR.**LETTERS DESPATCH, ST. JOHN'S, NEWFOUNDLAND. Volume 3.
Judicial Affairs.

No. 11.

St. John's, Newfoundland,
13 December, 1828.

SIR,

As it was not in my power when in England to comply with the wishes of Mr. Hay, and in obedience to the order of the Honourable House of Commons to furnish a return on the spot, of the number of Civil and criminal actions tried in the several Courts of Newfld. since the passing of the Act 5th Geo. 4 Cap. 67, I have availed myself of the earliest opportunity since my arrival, and on the return of the Judges from their respective Circuits to cause the documents to be prepared which I now have the honor to transmit to you, and trust they will be found to have been framed with such care and accuracy as will fully meet the object of the Honorable House of Commons.

I have nothing further to remark upon the Returns now submitted to you, with the exception of that for Labrador, to which I think it right to draw your attention; as I understand it is the object of the Merchants in England connected with Newfoundland to do away with that Court altogether on the ground, first,—That the cases which have come before it are so few in number, and secondly,—That all the persons who resort there for the purpose of fishing, return either to St. John's, or Conception Bay where their differences can ultimately be decided with.

With reference to the first reason,—It will I am persuaded be unnecessary for me to comment upon an argument which would go to say that because there were no offences for a given time, there should be no law, and with equal propriety would a Criminal Circuit Court be dispensed with in any County in England because there happened occasionally to be an empty Callender.

As respects the second reason,—although it is true that a large portion of those concerned in the Labrador Fishery do return to this Port, and Conception Bay, yet a considerable number do not, and to them it would infallibly be a denial of Justice altogether to prevent their receiving it on the spot, as, however much aggrieved or injured they could obtain no

redress without

p. 1416

following the aggressor through the Court at this place, which even if practicable, might involve an expense and loss of time more grievous than the original injury.

There are, as you no doubt are aware Sir, a considerable number of persons who resort to the Labrador Coast during the Summer months, and which being at a distance of nearly five hundred miles from this place, there is no check upon the lawless ill-disposed, but the certainty of the arrival of a Court to call them to account; for the little restraint imposed upon them by the fear of retribution on their happening to meet the injured party within the Courts of the Island of Newfoundland cannot operate as such. It has as far as I can learn been an invariable custom for a vessel of War to proceed to that Coast to Surrogate, until the institution of the present Court, and at an expence far beyond that now incurred, and unquestionably the advance of time does not render it less necessary that there should still be a power to administer Justice there. At the same time that I entertain this opinion I by no means intend it to be inferred that upon the introduction of a new Judicatory Act, arrangements may not be made for the attainment of the object in question at a less expence than is at present incurred.

I have the honor to be, Sir,
(Signed) THOS. COCHRANE.

Right Honble. Sir Geo. Murray, G.E.B.

PROCLAMATION BY GOVERNOR COCHRANE[10 Aug.,
1829.]

FOR A LABRADOR COURT.

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 37, page 247.

PROCLAMATION.

By His Excellency Sir Thomas John Cochrane, Governor,
&c. &c. &c.

L.S.

Thos. Cochrane.

Whereas the Act intituled "An Act for the better administration of Justice in Newfoundland and for other purposes," under the authority of which a Court of Civil Jurisdiction for the Coast of Labrador and the Islands adjacent thereto was instituted by me, has been continued by a certain other Act made and passed in the present year of His Majesty's Reign, until the 31st day of December 1832 and no longer. I, the Governor, do therefore by this my Proclamation direct and appoint that the said Court shall be holden in the present year at the several Ports or Bays on the Coast of Labrador as hereinafter mentioned, and in the order herein set forth, commencing with the first mentioned place as soon after the 19th day of this instant *August* as the weather and other circumstances will permit, viz.

Indian Harbour, Indian Island, Rigolet or Ivucktoke, otherwise Gross Water, Mullins Cove, Tub Harbour, Dumplin Island Harbour, Indian Tickle, Cape Charles, Henley Harbour, in Chateau Bay, and Henley Harbour in Temple Bay on the said Coast of Labrador, or at any or either of the said places, or at other place or places on the said Coast as the weather or other circumstances may permit or render necessary.

And I authorize, empower and direct the Judge of the Court, from day to day and from place to place, or for any number of days within the term, Session or continuance of the said Court, to adjourn the said Court, and to meet, re-assemble, and sit again in the execution & discharge of the duties of the said Court when where and so often as by the said Judge may be deemed necessary or expedient.

And of these presents the Sheriff & his Deputies and other Officers and persons whom it may concern are hereby required and commanded to take due notice, and govern themselves accordingly.

Given &c. &c. &c.
10th August, 1829.

By His Excellency's Command,
J. TEMPLEMAN,
P. Secy.

**NEWFOUNDLAND ACT 4 WM. IV. c 20—REPEALING
FORMER ACTS AS TO JURISDICTION OF COURT ON
COAST OF LABRADOR, 1834.**Preamble.
5 Geo, 4,
cap. 67,
s. 18.

C.O. 196/1. NEWFOUNDLAND ACTS.

4 William IV., Cap . XX.

An Act to repeal so much of an Act of the Imperial parliament passed in the Fifth Year of the Reign of His late Majesty King George the Fourth, entitled “An Act for the better administration of Justice in Newfoundland and for other Purposes” as relates to the Jurisdiction of a Court of Civil Jurisdiction on the Coast of Labrador and the Islands adjacent.

1 Geo. 3,
cap. [sic.].

[12 June 1834.]

2&3 Wm. 4,
cap. 78.

Whereas by an Act passed in the Parliament of the United Kingdom of Great Britain and Ireland, in the fifth year of the reign of his late Majesty King George the IV. entitled “an act for the better administration of justice in Newfoundland, and for other purposes,” it is, among other things, enacted that it shall and may be lawful for the governor, or acting governor of Newfoundland, for the time being, to institute a court of Civil Jurisdiction at any such parts or places on the Coast of Labrador, or the Islands adjacent thereto, as, in and by an Act passed in the Fifty-first year of the Reign of his late Majesty King George the Third, entitled “an act for taking away the Public Use of certain Ship's Rooms in the Town of Saint John's, in the Island of Newfoundland, and for establishing surrogate Courts on the Coast Of Labrador, and in certain Islands adjacent thereto,” were re-annexed to the Government of Newfoundland: and whereas by another Act of the said Parliament, passed in the second and third years of the Reign of His present Majesty, and entitled “an act to continue certain acts relating to the Island of Newfoundland, and to provide for the appropriation of all Duties which may hereafter be raised in the said Island,” it is among other thing enacted, that it shall and may be lawful for His Majesty, or for any governor, lieutenant governor, or officer administering the government of Newfoundland, in pursuance of his commission or instructions to him for that purpose addressed by His Majesty, with the advice and consent of any House or Houses of general assembly, which His Majesty may thereafter be pleased to convoke from among the inhabitants of the said colony, by any act or

Repeal of Acts herein recited as far as they relate to the institution of a court of Civil Jurisdiction on the Labrador.

acts to be, from time to time, for that purpose passed, to repeal in whole or in part, or to amend, alter, or vary the said first recited act or any part thereof: and whereas the court instituted on the coast of Labrador, by virtue of the said first mentioned act, has been found by experience not to answer the purposes thereby intended: Be it therefore enacted, by the Governor, Council, and Assembly, in Colonial Parliament assembled, that so much of the said Act of the Imperial Parliament, passed in the fifth year of the reign of his late Majesty King George the Fourth, entitled “an act for the better administration of Justice in Newfoundland, and for other purposes,” as relates to the institutions of a Court of Civil Jurisdiction on the Coast of Labrador, or the Islands adjacent thereto, shall be, and the same is hereby repealed.

Cap. 20.
Act abolishing the
Labrador Court.

No. 511.

C

**“EXPLANATORY OBSERVATIONS ON ACTS OF
THIRD SESSION, 1834.”**

LOCAL LEGISLATURE, ST. JOHN'S, NFLD., VOL. 1, p. 171.

The object of this Act is the abolition of the Court of Civil Jurisdiction for the Coast of Labrador, the expense of which was deemed to exceed the bounds of its utility. The measure which this Act is meant to accomplish is sanctioned by general opinion, but it is material to be held in view that the whole Coast of Labrador is now left destitute of a local Civil Jurisdiction; while an opinion seems to be prevalent in the Colony that the expenses incident to a Court of Justice of limited jurisdiction and simple character suitable to the exigencies of the Merchants fishermen and others frequenting that Coast during the season of the fishery, ought to be sustained by the Parent Government, because that fishery is in part, and to a considerable extent carried on by Merchants and others whose domicile is in Great Britain.

H. PRESCOTT TO EARL OF DURHAM.[16 July,
1838.]Government House St. Johns
Newfoundland 16th July 1838.

My Lord,

I have the honor to acquaint you in reply to Your Excellency's letter of the 1st of June that the internal state of this Island is tranquil. The Legislative Session commenced on the 20th ulto. and satisfactory addresses were presented in answer to my opening speech.

* * * *

The coast of Labrador attached to this Government has but a very scanty fixed population. There is not any Court established for the Administration of Justice, or Magistrate, or Custom House Officer; but as I receive no representation on the subject I presume that little practical inconvenience results from these deficiencies.

* * * *

Having given Your Excellency this general idea of our state, I shall be happy to afford fuller information on any points which may appear to Your Excellency to require it.

I have the honor to be

My Lord

Your Excellency's most obedient
humble Servant

H. PRESCOTT.

His Excellency
The Right Honble
The Earl of Durham, G.C.B. &c. &c. &c.

[1864.]

**EXTRACTS FROM REPORT OF MR. E. RENDELL TO
GOVERNOR PRESCOTT,**

RELATIVE TO HIS PROCEEDINGS ON THE COAST OF LABRADOR—1840.

WHITE PAPER, IMPERIAL HOUSE OF COMMONS:

Ordered to be printed 18th March, 1864, p. 4.

“As may be expected, on such a length of coast, disputes will arise amongst the people, to adjust which they have no one authorised to resort to, which oftentimes gives rise to the worst of feelings, and leads to disastrous consequences; but beyond this, the commission of crime is not unfrequent, and that, too, of the blackest die. A man is going at large there at this moment who murdered his wife last winter, and during last summer two attempts at murder were made. These circumstances, alone, are sufficient to show the necessity for establishing a Court to punish and repress offenders.”

* * * *

“The extensive sale of spirits without license or payment of duties by Nova Scotians and Americans who resort to that coast, is much complained of; they carry a cheap, bad article, with which they supply the servants in the fishery, to the great damage and injury of their employers, who have not the slightest remedy against the evil; thus the revenue is defrauded, and the fishery injured at the same time.”

No. 514.[3 April,
1845.]**PETITION OF NEWFOUNDLAND MERCHANTS FOR
A LABRADOR COURT (1845).**

[EXTRACT FROM JOURNAL OF HOUSE OF ASSEMBLY, NEWFOUNDLAND,
1845, p. 100.]

Thursday, April 3, 1845.

The Hon. Mr. Noad by direction of the Governor presented to the House a petition from William Gordon & others, Shipowners, Shipmasters & Planters, trading from Newfoundland to the Coast of Labrador setting forth:

That no fewer than 200 sail of vessels annually proceed from Conception Bay, St. John's and other parts of Newfoundland to the Coast of Labrador to prosecute the Cod & Salmon fisheries: that these vessels employ at least 5000 hands, supported by a heavy capital furnished by merchants & outfitters.

The petitioners have found their houses, fishing rooms, flakes, stages and oilcasks, which have been provided at heavy outlay, destroyed by the winter residents. They have no redress whatever, there being no magistrate, not even a constable on the whole coast of Labrador.

The petitioners, always lamenting the abolition of the late Labrador Court, pray His Excellency to constitute a Court of Civil and Criminal Jurisdiction for the Coast of Labrador, with power to try and decide in a summary way, all suits and complaints of a civil nature arising on the Coast of Labrador & Islands adjacent thereto; with an appeal to the Northern Circuit Court, in all Conception Bay cases (from whence three fourths of the trade is conducted), and to the Central Circuit Court in all St. John's cases. It would be advisable that the said Court should have a criminal jurisdiction in a summary way concurrent with the jurisdiction as at present exercised in practice by the Magistrates in Newfoundland.

No. 516.

CAPTAIN LOCH TO GOVERNOR LE MARCHANT.[30 Aug.,
1848.]

C.O. RECORDS, 194/130.

H.M. Ship Alarm,
St. John's, Newfoundland,
30th Aug. 1848.

SIR,

I have the honor to enclose the evidence concluded of various examinations marked as per margin, which I held as Justice of the Peace of Newfoundland and its Dependencies, during the cruise round the Island.

I beg particularly to call your Excellency's attention to the copy of a Warrant issued against Mr. Ellis of Forteau Bay, for having possessed himself by Force of a small Island called West St. Modest, and the house and property upon it belonging to Mr. Antonio Talbot of Quebec, under the plea that he was acting in the capacity of Sheriff, to establish the Right of another Party, by whom he was employed, over the aforesaid Island and Property. In effecting this object it appears that he violently assaulted the occupant, broke open the house, destroyed some of the property, sold another portion by public Auction, and carried off the remainder in Vessels to his residence in Forteau Bay.

It will be seen upon reference to the Documents that this case was investigated two years since by Captain O'Callaghan (commanding H.M. Steam Sloop Vesuvius, and possessing, as I do, a Warrant as Justice of the Peace) who obliged Mr. Ellis to sign a Declaration that he would restore the property taken away within a given time; this I find has not been done.

Unfortunately I was not put in possession of these very unjustifiable and cruel proceedings on his part towards Mr. Talbot (which have reduced him from comparative affluence to absolute penury) until my arrival at Blanc Sablon, otherwise I should have considered it my duty to have summoned Mr. Ellis before me to answer to the charges made against him, but I trust that some means may be adopted to restore to the poor man at least some portion of his former Property.

So many flagrant cases of violent usurpation by the powerful over the poorer Settlers, came under my notice during my visits of inspection to the various Ports upon the Coast of Labrador that I sincerely hope your Exc^y. will think proper to make such future arrangements for the security of Property, and the maintenance of Justice as, in your judgement, may be considered requisite, independent of any influence the annual visit of a Ship of war may be supposed to exercise.

*

*

*

I have &c.
Signed: G. G. LOCH,
Captain.

No. 517.

[1852.]

**PETITION OF NEWFOUNDLAND MERCHANTS FOR
A LABRADOR COURT (1852).**

[EXTRACT FROM JOURNAL OF HOUSE OF ASSEMBLY, NEWFOUNDLAND,
1852, p. 142-3.]

Mr. Prendergast presented a Petition from William Gordon and others, resident in Conception Bay, which was received and read, setting forth,—That they had invested capital, and employed a great many men, in carrying on the fisheries at Camp Islands, on the Labrador; that from the absence of a Magistrate on the Labrador, they are without the means of redress for damage done to their property by evil-disposed persons; that from the encroachments of the French at Belle Isle, they suffer to a great extent, without having any means within their reach of protecting themselves; and praying either that a Stipendiary magistrate may be appointed for the Labrador, or some other means adopted, as may appear meet to the House.

Ordered,—That the said Petition do lie upon the Table.

(JOURNAL OF THE ASSEMBLY, NEWFOUNDLAND, 1907, p. 366.)

“Although merchants declared to Mr. Rendell that they would not pay dues unless a Labrador Court was established, no permanent arrangement seems to have been made for administering justice, for on the 15th March, 1854, the Governor in a message to the House said: ‘In the latter part of the year 1852 reliable information reached the Admiral Commander-in-Chief on this station, as well as the Governor of the Colony, that parties possessing fishing privileges on the coast of Newfoundland and Labrador contemplated to disregard the laws in existence, or hereafter to be passed by the Colonial Legislature for regulating the mode of conducting the fisheries, provided such laws interfered with the mode usually in practice.’”

THE STATE OF THE LABRADOR COAST IN 1855.

EXTRACT FROM "REPORT OF AN OFFICIAL VISIT TO THE COAST OF
LABRADOR BY THE GOVERNOR OF NEWFOUNDLAND DURING
THE MONTH OF AUGUST, 1905."*

The special attention of Government was called to Labrador by a petition, dated Hopedale, 1st July, 1855, which was signed by all the members of the Labrador Moravian Missionaries, and sent through the London Secretary to the Colonial Office, to be forwarded to the Governor of Newfoundland: "To beg your Excellency most humbly to protect the poor Exquimaux on the coast of Labrador against selling or handing in to them rum or other spirits." The Governor replied to the Secretary of State that he could give no precise information on the subject, and added, "That the introduction and sale of spirits takes place upon that coast to a considerable extent there can be no question; but even if its sale were contrary to law, the law would, unfortunately, be a dead letter, since, although the coast is included in the jurisdiction of the Government of Newfoundland, it is not, and has not for some years past, been under the operation of any organization for purposes either of revenue, police, or administration of justice. This state of things has not failed to receive the consideration of the local Government, and I trust that before the conclusion of the year some steps will be adopted with a view to its improvement."

No. 522.**EXTRACT FROM MINUTES**[17 May,
1862.]

OF THE EXECUTIVE COUNCIL OF THE COLONY OF NEWFOUNDLAND.

(No. 4 RECORD BOOK, OCT. 26, 1861, TO AUGUST 3, 1869, p. 64.)

May 17th, 1862.

Present,—His Excellency Sir A. Bannerman, Kt. Gov.
Hon. L. O'Brien, President
H. W. Hoyles, Atty. Genl.
R. Carter (Actg.) Col. Secretary
Nicholas Stabb and John Bemister.

His Excellency having brought under the notice of the Council the neglected condition during the fishing season of the large populations who reside on, or frequent the Labrador in the want of adequate provision for the protection of life and property and the prompt and inexpensive redress of civil injuries; and having referred also to the unfair immunity enjoyed by a large part of that population from contribution of the expense of protecting the fisheries in which all are interested, the following minute was adopted:

“In the next session of the Legislature, let a bill be introduced for the establishment of a Court of limited criminal and civil jurisdiction on the Labrador; and in order to provide for the expense of such establishment and for a fair proportion of the cost of protecting the fisheries in that locality, let the provisions of the Revenue Act be put into operation within the limits of this Government, such notice being first given of the intention of the Government in this respect as His Excellency may consider expedient.”

NEWFOUNDLAND ACT 26 VICT. c 2, TO PROVIDE FOR COLLECTION OF REVENUE AND BETTER ADMINISTRATION OF JUSTICE AT THE LABRADOR.

Preamble.

C.O. 196/4. NEWFOUNDLAND ACTS. 26 Victoria, Cap II.

Institution of Court at Labrador.

An Act to provide for the Collection of the Revenue and for the better Administration of Justice at the Labrador.

Passed 25th March 1863.

Powers of such Court.

Whereas it is expedient to provide for the collection of the Revenue and for the better Administration of Justice at the Labrador: Be it therefore enacted by the Governor, Legislative Council and Assembly, in Legislative Session convened, as follows:

Proceedings to be summary.

I. It shall be lawful for the Governor, by Letters Patent under the Great of Seal of the Island of Newfoundland, to institute a Court of Civil and Criminal Court at Jurisdiction at the Labrador; and such Court shall be a Court of Record, and shall be presided over by one Judge, to be appointed by the Governor in Council; and shall, over all such parts of the Labrador as be within the Powers of Government of Newfoundland, have jurisdiction, power and authority, to hear and finally determine all Criminal Prosecutions for Assaults and Batteries, and for Larcenies without force to the person, committed within the limits aforesaid; and all Actions and Suits of a Civil nature, wherein the debt, damage or thing demanded, shall not exceed in amount or value One Hundred Pounds.

Salaries of Judge and other officers.

II. The Proceedings of the said Court shall be summary; a Record of such proceedings shall be kept and signed by the Judge thereof; and the forms of Process and other proceedings in Civil cases shall be as set out in Schedule to this Act annexed, and in Criminal matters shall be those used in summary proceedings of a like character by Justices of the Peace in this Island.

Appeal allowed in certain cases.

III. The Salary of the Judge of such Court shall not exceed Two Hundred and Fifty Pounds; and there shall be such

officers of the said Court as the Governor in Council shall appoint; and the salaries of such Officers shall be fixed by the Legislature.

p. 1437

Proceedings in case of Appeal.

IV. It shall be lawful for any Party against whom any Judgement or Order of the said Court may be given in any matter over Fifty Pounds, or where the matter in dispute shall relate to the Title to any Lands or Fishery, or where the right in future may be bound, within two days after such Judgment or Order to appeal therefrom to the Supreme Court, giving one day's notice to the opposite party of such intended Appeal; and upon such Appellant, within seven days, giving security, to the satisfaction of the Judge, for the speedy prosecution of such Appeal, for the performance of the Judgment or Order of the Superior Court, or for the performance of the Judgment of the Court of Labrador, should the same be affirmed or the Appeal dismissed, and in such last mentioned cases also for the payment of the costs of such Appeal, Execution shall be stayed upon the Judgment of the Court below Provided that it shall be competent to such Judge, upon reasonable grounds, to extend the time for such Appeal, and that it shall be lawful for him, when he shall think it necessary, to reserve any question of Law arising in any case before him for the consideration of the Supreme Court, suspending his Judgment in the meanwhile until such question shall have been determined.

The Judge to be *ex-officio* of the Peace and Coroner.

Offenders and arrested debtors may be confined, as directed by the Judge.

V. When an Appeal shall be allowed in manner aforesaid, a copy of all proceedings in the Court below, authenticated under the Hand and Seal of the Judge thereof and of any other officer, if any such, who may be appointed for that purpose, shall be transmitted by such Judge to the Registrar of the Supreme Court, and after adjudication it shall be competent to the Supreme Court to carry such Adjudication into effect by its own process, or to direct that the same be carried into effect by the Court below, as may be considered most expedient.

Act 6 Vic. cap. 10, and 12 Vic. cap. ii. in force in certain cases.

VI. The Judge of the said Court shall be, *ex-officio*, a Justice of the Peace and Coroner for all places within the limits aforesaid, with the like Power and Authority in all respects as are or may be exercised by any Justice of the Peace or Coroner lawfully appointed in Newfoundland.

VII. Criminal Offenders sentenced by the said Court to imprisonment, offenders and Debtors arrested under final process, may be confined in any place of and arrested security within the limits aforesaid the said Judge may direct, or may be Debtors conveyed to any Gaol in Newfoundland, there to remain until removed or find, as discharged in due course of law.

VIII. The Provisions of an Act passed in the Sixth Year of the Reign of Her present Majesty, entitled "An Act to repeal an

Appointment of
Superintendent of
Fisheries and
Collector of Revenue.

Act passed in the Fifth Year of the Reign of His late Majesty, entitled, 'An Act to amend the Law of Attachment, and to facilitate the Recovery of Debts from absent or absconding Debtors, and to make other provision for the Amendment of the Law of Attachment,'" and of an Act passed in the Twelfth Year of the Reign of Her present Majesty, entitled "An Act to amend the Law of Attachment in this colony, and to regulate the Fees in certain cases payable therein," so far as the same relate to the sale of perishable property attached,

p. 1438

Appointment of Sub-
collectors.

the recovery of Debts and Effects attached in the hands of third parties, the Examinations of such third parties, the Attaching for Costs and the Levying of Monies under a Writ of Execution, shall be applicable to the proceedings of the Court hereby established, Provided that an Attachment may issue for any amount exceeding Forty shillings.

Powers of Collectors.

IX. That it shall be lawful for the Governor in Council to appoint the said Judge or some other competent person to be Superintendent of the Fisheries on the Coast of Newfoundland and the Labrador, and to appoint the same or other competent Person to be a Collector of Revenue on the Labrador.

Appropriation of
Revenue.

X. It shall be lawful for such Collector, subject to the control of the Governor in Council, to appoint Sub-Collectors under him at the principal Ports and Places on the Labrador, and such Collector and his Deputies shall have the like Power and Authority in and for the Collection of the Revenue on the Coast of Labrador, and shall give the like Security for the right discharge of the Duties of their respective offices, as are by Law provided with respect to Customs and Revenue Officers in this Island.

XI. The Revenue collected under this Act shall be applied in the first place towards defraying the Cost of Protection of the Fisheries, and of carrying the Provisions herein contained into effect, and the surplus, if any, shall be paid to the Receiver General for the Uses of the Colony.

[25 March,
1863.]**NEWFOUNDLAND ACT 26 VICT. c. 3, EXTENDING
JURISDICTION OF CIRCUIT COURTS OF
NEWFOUNDLAND TO LABRADOR.**

Preamble.

C.O. 196/4. NEWFOUNDLAND ACT, 26 Victoria. Cap III.

Jurisdiction of the
Circuit Courts
extended to all such
parts of the Coast of
Labrador as are
within the
Government of
Newfoundland.

An Act to extend the Jurisdiction of the Circuit Courts of Newfoundland to the Trial of Offences committed, and of causes of action arising, on the Coast of Labrador.

[Passed 25th March, 1863.]

Whereas it is expedient to extend the Jurisdiction of the circuit courts of Newfoundland to the Trial of Offences committed, and of causes of action arising, on the Coast of Labrador: Be it therefore enacted by the Governor, Legislative Council and Assembly, in Legislative Session convened:

That the circuit courts of Newfoundland shall have power to hear and determine all crimes and offences, informations, suits, and actions committed, occurring, or arising, on all such parts of the Coast of Labrador as are within the Government of Newfoundland, and shall have power to proceed to Final Judgement and Execution therein, and shall have the same jurisdiction, Powers and Authority, as are by law vested in the Supreme Court of Newfoundland, saving and excepting the Trial and Determining of Treasons or Misprisons of Treason, and Capital Felonies, and the hearing and determining of any Information, Suit, or action, for the breach or violation of any Act of Parliament relating to the Trade and Revenue of the British Colonies in America: Provided always that the Parties charged with such crimes or offences, and the Parties to such suits or actions, shall reside within the judicial districts in which such court shall be respectively holden. And provided that all actions or suits now depending in either of the said Circuit Courts for or in respect of any matter or thing done or committed on the Coast of Labrador, by any Person or Persons, may be proceeded with, Tried and Determined, under the Provisions of this Act.

[18 April,
1863.]**LETTERS PATENT FOR THE INSTITUTION OF A
COURT AT LABRADOR.**

Pages 162 to 164. 4 RECORD BOOK. Oct. 26th, 1861 to Aug.
3rd, 1869.

April 18th, 1863.

Present:—

His Excellency Sir A. Bannerman, Kt. Governor,
Hon. L. O'Brien, President, J. Bemister, Receiver
Genl.,
H. W. Hoyles, Atty. Genl., N. Stabb,
R. Carter, Act. Colonial Secy.

The following Letters Patent for the Institution of a Court at
Labrador were adopted and ordered to be issued and
promulgated.

By His Excellency Sir Alexander Bannerman, Knight,
Governor and Commander-in-Chief in and over the Island of
Newfoundland and its dependencies, &c.

To all whom these presents shall come,

Greeting.

Whereas by an Act of the Legislature of this Colony passed
in the 26th year of the Reign of Her present Majesty entitled
“An Act to provide for the collection of the Revenue and for
the better administration of Justice at the Labrador” it is
amongst other things enacted that it shall be lawful for the
Governor by Letters Patent under the Great Seal of the Island
of Newfoundland to institute a Court of Civil and Criminal
Jurisdiction at the Labrador which said Court shall be presided
over by one Judge to be appointed by the Governor in Council,
and shall have certain powers jurisdiction and authority upon
such parts of the Coast of Labrador as lie within the
Government of Newfoundland in and by the said Act
particularly declared and defined. Now Know Ye, that I, the
said Governor, upon consideration of the premises and in
pursuance and by virtue of the said Act have thought fit to
institute, grant, direct and appoint, and by these presents do
institute, grant direct and appoint a Court of Civil and Criminal

Jurisdiction at the Labrador and such Court shall be called "The Court of Labrador" and shall be presided over by one Judge to be appointed from time to time in manner aforesaid and such Court shall be a Court of record,

p. 1441

and shall be held for such terms and at such times and in such places at the Labrador as the Judge thereof for the time being may from time to time determine as best calculated for the administration of Justice within its jurisdiction and the said Court shall have and exercise all such Jurisdiction power and authority whatsoever as are in and by the said Act or otherwise by law provided or declared. And I do hereby strictly charge and command all Magistrates and Officers and all others Her Majesty's Subjects Within and belonging to the said Island and its Dependencies that in the Execution of the several powers hereby conferred they be aiding and assisting and obedient in all things as they will answer the contrary at their peril.

In witness whereof I have caused these presents to be made Patent and the Great Seal of the said Island of Newfoundland to be Hereunto affixed at St. John's in the said Island this 18th day of April, A.D. 1863 and in the twenty-sixth year of Her Majesty's Reign.

Benjamin Sweetland Esquire, J.P., of Trinity was appointed Judge of the Court of Labrador at a salary of £200.

**JUDGE SWEETLAND'S PROCEEDINGS OF THE
CIRCUIT COURT, 1863.**

COLONIAL OFFICE RECORDS 1971/38. APPENDIX NO. 8.
JOURNAL OF COUNCIL, NEWFOUNDLAND.

Copy of the Proceedings of the Circuit Court, held in the summer of 1863, for the administration of justice on the Coast of Labrador, within the jurisdiction of this Government, under Act 26th Victoria, cap. 2, etc., etc.

[COPY]

PROCEEDINGS OF THE CIRCUIT COURT.

Held in the Summer of 1863, for the administration of justice (vide 26 Vic. cap. 2) on the Coast of Labrador; with the Judge's Report of the times when, and the places where, the court was held, the number and nature of the cases brought before, settled and decided by the Judge, and of those reserved for the opinion of the Supreme Court.

To the Hon. Hugh W. Hoyles,
H.M. Attorney General,
etc., etc.

SIR,

Having had the honour to be appointed by His Excellency and Council to the office of Judge of the Court of Labrador, I accompanied the gentleman appointed to collect the revenue in the hired craft the "Volant," from St. John's on the 15th June.

There are no pretensions to gardens or cultivation; yet I think, back from the sea, out of the reach of the sand drift, the soil is good and climate genial enough to ripen ordinary crops. The river is level, the tide flowing up about 11 miles; then a slight rise, and again level for a considerable distance. Many patches of excellent grass are to be found opposite the river. No cattle of any sort except a horse, made useful on De Queteville's room. No wood within view; no salmon fishery.

At Pinware, in Black Bay, is a salmon fishery of small extent in comparison with those on the coast east and north. The cod fishery was progressing favourably in the bay.

The salmon is altogether on the coast, there being no river or estuary to invite their visits.

On our circuit we visited:—

Blanc Sablon,
Forteau.
Lance-a-Loup,
Pinware,
Chateaux,
Henly Harbor,
Cape Charles (twice),
Battle Harbor (three times),
Salt Pond (twice),
Seal Island,
William's Harbour,
Spear Harbour (twice),
Francis „ „
„ „ Bight (twice),
Venison Tickle (twice),
Indian Tickle,
Long Island,
Cartwright,
Grady,
Bateau,
Square Island,
Hawk's Harbor (twice),

We had before the Court:—

6 persons concerned in breaches of the
peace,
2 persons for breach of the 8th and 10th
sec.
26th Vic. cap. 1,
2 trespass cases, involving right of
fishery,
1 inquest.
1 nuisance,
10 cases of account,
1 reference.

The Court was open every day and at all hours when the vessel was in port, even at night, to accommodate witnesses who would lose a day's fishing if compelled to attend by day. Like most circuit courts, the moral effect is greater than the amount of business done.

There was no complaint of barring herring, and only in one instance did I hear of its being done. Far less drunkenness and fewer assaults than usually occur in places reported to be very quiet. It is probable that this was owing to an absence of idleness.

I would not estimate the resident population to be over 700 or 800 on the whole coast.

Our little vessel was large enough, sailed well, and was very managable. The captain and crew were fishing and appear to take a lively interest in the result of the voyage. The only addition requisite being a good whale boat, to be had on the coast for about £12, to enable the collector to push into small places in the vicinity, if he wished it, whilst the vessel would be detained on other matters connected with the object of the expedition.

You will perceive that I have dwelt longer on the subject of the western part of the coast than any other; I have done so because our fishermen know very little about it, or the advantages it presents to them and also on account of the extent of its foreign trade.

I have, etc.,
(Signed) BENJ. SWEETLAND.

[1864.]

**JUDGE SWEETLAND'S REPORT OF PROCEEDINGS
OF THE LABRADOR COURT, 1864.**

COLONIAL OFFICE RECORDS 197/39. JOURNAL OF THE ASSEMBLY,
NEWFOUNDLAND.

Appendix No. 707.

Report of Judge Sweetland of Proceedings of the Labrador Court during the summer of 1864, etc., together with census returns of resident population Blanc Sablon to Indian Harbor.

Schooner "Volant,"
St. John's,
11th October, 1864.

SIR,—

I have to acknowledge receipt of your letter of the 6th June, directing me to proceed in the Schooner "Volant," employed to take the Collector of the Customs and myself to Labrador, and to inform you that we left St. John's on the 10th of the same month.

We arrived at our destination on the 23rd. Having visited Blanc Sablon, Forteau, L'Anse Loup, Pinware, West and East St. Modeste, we reached Red Bay on the 7th July.

Henly Harbor,
Camp Island,
Cape Charles,
Sizes Harbor,
Salt Pond (twice),
Seal Bight,
Francis Harbor,
Francis Harbor Bight,
Williams and Merchants Harbors,
Venison Tickle,
Round Island,
Cartwright,
Independent Harbor.
Tub Herring and
Rigoulette,

p. 1447

and various numerous creeks and coves were visited, until we reached Indian Harbor, at which place we arrived on the 31st August last.

Here we found the captain and crew of the schooner "Charlotte" recently wrecked on White Bear Island. The captain having complained that some wrecked materials were in the possession of "Greenfish" catcher on the coast, the bailiff was dispatched with a crew to the scene of the wreck. In the meanwhile the complainant and his crew went off to join a vessel for England, leaving no person to identify the parties complained of, or the property saved; but for the address of the bailiff, very little, if anything, would have been recovered. The articles saved were left in possession of Nathan Norman, Esq., J.P., for the benefit of whom concerned.

There being no settled fishery north of Indian Harbor, we returned south, visiting most of the places named above, and also Grady and Bolsters. In going and returning over 50 harbours were visited.

There were before the Court:—

13 cases of account,
5 „ „ trespass,
1 case of malicious injury,
1 „ „ theft,
1 „ „ bastardy,
1 recovery of wrecked goods,
3 parties to prove wills.
1 case of defamation,
2 cases for the recovery of wages.

I enclose herewith census which I believe to be correct. Having visited personally every place within my reach, and being greatly assisted by the Revd. Hutchinson and the Revd. B. Botwood, in directing my attention to coves and places within their missions.

Roads to be of any general use, cannot be made except from Blanc Sablon to Forteau about 12 miles, and thence should join the road from L'Anse Loup to Port Lamour Lighthouse. It is possible to continue the road to Chateau, but I doubt if it will be required in this age. The total distance is 60 miles. Other settlements are so isolated that it would be difficult to make a good road from one house to another.

Schools. I found only one regular day school in existence, that is in the house of the Revd. George Hutchinson in Battle Harbor. At Red Bay, and also at Henly Harbor, there are Sunday schools, attended with considerable success, particularly at the former place, where it is possible to establish a day school, the whole population being within easy distance of each other. A winter school might be had at Pinware, where the inhabitants of west and east Modeste take up their residence for the sake of fire-wood. Most other places are formed of islands requiring conveyance by boat from one place to another.

p. 1448

In Sandwich and Exquimaux Bays, the inhabitants disperse

themselves for the sake of furring in the winter and catching salmon in the summer. Very little can be done in the way of an established school. In the latter bay the "half casts" evince a greater desire for learning to read than any other classes. They complain very much of want of first and second class school books. In general the resident population, being useful furriers, are very well taken care of during the winter. Of destitute poor the number is very small, viz.:—

One widow and two children in Red Bay.
Three widows and five children in and about Battle Harbor,
One Esquimaux widow at Francis Harbor,
One man beridden, wife and three children at Battle Harbor.

For these I made arrangements, which I hope will assist in keeping them from any great privation. I did not hear of any general distress occurring, except in the summer of 1863, when supplies did not reach them until the 9th July.

Churches.—There is one at Forteau, one in Red Bay, one in Battle Harbor, one in Francis Harbor, and one at Seal Island; one Roman Catholic Church in Pinware, one Wesleyan chapel in Red Bay, and a building for general purposes in Indian Tickle.

There are only two resident clergymen on the coast, both Protestant and episcopalian. Beyond the reach of these gentlemen, the marriage ceremony, if performed at all, is very irregular, in some cases the name of the party officiating is unknown.

The season was wet and cold, so much so that the usual crop of "greens" could not be obtained; potatoes on the coast did not come to perfection. At the N.W. River at the head of Esquimaux Bay, they produce green peas, new potatoes and radishes of immense growth; fresh butter and home made cheese. In no other places were there any cattle kept, or attempts to raise such luxuries, but I think they may be had at the heads of every deep pass with as little trouble.

I have, etc.,
(Signed) B. SWEETLAND.
Judge of the Court
of Labrador.

[1865.]

**JUDGE SWEETLAND'S LABRADOR CIRCUIT
REPORT, 1865.**

COLONIAL OFFICE RECORDS 197/41. JOURNAL OF THE
ASSEMBLY, NEWFOUNDLAND. Appendix.

Report of Judge Sweetland, of his visit upon the Labrador
circuit during the summer of 1865.

Schooner "Volant,"
St. John's,
15th September, 1865.

SIR,—

Having proceeded in this vessel on the Labrador circuit in
company with the Collector, Sub-Collector and broker of H.M.
Customs, we arrived on the coast the 3rd June, but were unable
to land at Blanc Sablon until the 8th, the harbour being
blocked up with ice. During the passage from thence north, a
great many harbours were visited and revisited without
anything being brought before the Court that requires any
comment; the people were orderly and quiet.

On the subject of schools, one has been set going at
Pinware under Mrs. Catherine Odell, a Roman Catholic, of
which I have good hopes from her usual energy and ability.

One, for the summer, at Cape Charles, under Mrs. Young,
and also one at Venison Tickle, under Mrs. Courtis. These two
ladies are from Conception Bay and return to it in the winter.

In Red Bay no person suitable could be found. The
residents professing their willingness to assist, I left the matter
in their hands, under the guidance of the Revd. Mr. Dobie. The
account of births must necessarily be very imperfect, every
information being furnished from memory or hearsay. Deaths
being very few are comprised thus:—

Three persons killed by accidental discharge of guns,
Two persons committed suicide,
One died from old age.

Except in Battle Harbor Mission, no record is kept.

I left the forms to be filled up and returned at the end of the
year.

The list of marriages will be still shorter, there being few
licensed persons to perform the ceremony, and parties not
being over particular whether any ceremony is performed or by
whom is it performed. Some sort of agreement takes place,
which is generally respected, and does not lead to any greater
immorality. I hope a better state of things will be arrived at ere

long.

**EXTRACT FROM AN ACT TO INDEMNIFY HIS
EXCELLENCY THE GOVERNOR OF
NEWFOUNDLAND, FOR CERTAIN SUMS OF
MONEY ADVANCED BY HIM FROM THE
COLONIAL TREASURY, FOR THE SERVICE OF
THE COLONY.**

(Passed 20th April, 1867.)

LAWS OF NEWFOUNDLAND, 1866-69. 30TH VICTORIA, CAP. XX.

Labrador Court.

Whereas it is expedient to Indemnify His Excellency the Governor of Newfoundland for certain Sums of Money advanced by him from the Colonial Treasury, for the service of the Colony. Be it therefore enacted, by the Governor, Legislative Council, and Assembly, in Legislative Session convened,—

From and out of such moneys as may from time to time remain in the hands of the Receiver General, and unappropriated, there be granted to Her Majesty, Her Heirs and Successors, the sum of Forty-three Thousand Four Hundred and Ten Dollars and Fifty-five Cents, to be appropriated as follows, that is to say:—

* * * *

The Sum of one Thousand Two Hundred and Ninety-six Dollars and Seventy-seven Cents, on account of Labrador Court.

[1867.]

**JUDGE PINSENT'S REPORT OF COURT OF
LABRADOR, 1867.**

COLONIAL OFFICE RECORDS 197/46. JOURNAL OF THE COUNCIL.
Appendix.

Report of Robert J. Pinsent, Esq., Judge of the Court of
Labrador.

St. John's
December 20th, 1867.

To His Excellency
the Governor of Newfoundland
etc. etc.

SIR,

I have the honour to report to Your excellency on my
proceedings and observations at Labrador during the past
season.

I sailed from St. John's——on the 4th June.

We arrived at Battle Harbor Labrador on the 16th of that
month [June] from which period until the 4th of October, we
continued cruising on the coast visiting most of the principal
harbors from Red Bay in the Straits of Belle Isle to Rigoulette
in Hamilton Inlet. We should have called at some other places
had the vessel not been detained for several days, in the month
of September, in Battle Harbor, owing to a disagreement
between the Collector and the captain.

The cases actually brought before me during the circuit
were:—

Nine cases of debt.
Five respecting nets,
One respecting a wrecked vessel,
Two of bastardy,
One of defamation of character,
Two requiring sureties of the peace,
One respecting a lunatic man whom I sent home to
Newfoundland.

A case of enquiry into a report of the murder of a man in the
woods near Murry's Harbor, which on investigation, I
concluded to be false.

At Red Bay on the 28th September, I fell in with Capt.
Green of the Schooner "Emblem," of Nova Scotia, against
whom a warrant had been

issued last year, by Judge Sweetland, for a violent assault on Collector Winter. I caused him to be arrested, took the necessary examinations, and bail being offered, I bound him over to take his trial in St. John's at the next sitting of the Supreme Court. This is a case which it was very desirable should be brought to issue as it had excited much public attention.

I think the amount of legal business done may appear small, but I am of opinion that the presence of the Court on the coast of Labrador, has an important moral effect in preventing offences against the law, and in causing private settlements of accounts between parties engaged in the fisheries and trade of this district.

On the subject of legal proceedings in the Court of Labrador, I beg to make a few remarks for the consideration of the Government.

With respect to actions for the recovery of debts, I would suggest the desirability of some enactment to prevent the injustice that sometimes arises from cases in which persons obtaining judgment for old debts, require the levy of execution for the amount recovered out of the produce of the current voyage, without reference to the claims of the absent supplying merchants, the fishery servants, and other creditors.

It might also be advisable to give the court power to grant probate of wills, and letters of administration, and to register deeds, so far as property situate at Labrador is concerned, subject to the condition that they should be recorded in St. John's.

I would further suggest, that provision be made for bringing up, under warrant, any person summoned as a witness, who may fail or refuse to attend at Court in civil cases; as in the event of default of attendance by such person the ordinary process for contempt would be a dilatory and difficult proceeding.

If the Government would decide on any legislation with reference to the matters above named, I would then respectfully recommend some minor amendments. I would suggest that there should be a room fitted up on board the circuit vessel for a lock-up.

I would recommend that the bailiff of the Court should be provided with a suitable dress to be worn when he is engaged in official business.

It appears that the cod fishery has for some time declined on the southern part of this coast, so that many of our fishing vessels and crews have gone further and further north until they have reached Hopedale, the southern Moravian settlement.

The salmon fishery was, this year, pretty good in Sandwich Bay and Hamilton Inlet, which are principal places for what may be called the embayed fishery.

p. 1454

On the open coast the salmon fishery was not so successful.

The Hudson Bay Company have establishments in Hamilton Inlet, N. W. River and Rigoulette. Here we met Mr. Smith the Deputy Governor of the Company, and Chief Manager of their business in this quarter; he arrived from Canada in the steamer "Labrador," a fine new vessel belonging to the concern. This Company receives most of the salmon in the neighbourhood of their establishments, and cut them up and preserve them in small tin canisters for exportation to England and other countries.

The mercantile firm of Hunt and Henley do the same, in Sandwich Bay. Mr. Nathan Norman of Indian Harbor, carries on a similar business in the neighbourhood of his establishment.

The resident population of Labrador (as distinguished from the people who go there on the fishery in the summer only) from Blanc Sablon in the Straits of Belle Isle to Indian Harbor Esquimaux Bay, which in the year 1864 was estimated by Judge Sweetland at 2026, may be considered as rather increased since that time. It is difficult for a transient visitor to ascertain, reliably, even the probable number of resident inhabitants, scattered as they are in so many places along this extensive coast; to take personally a census is impracticable.

The residents are principally of English origin, including some from Newfoundland, but in Esquimaux Bay, Hamilton Inlet and that neighbourhood, there are several families of Esquimaux and half-breeds, the latter are descendants of European fathers and Esquimaux mothers.

These people are occupied chiefly in the salmon fishery in summer and in furring during the winter; and are supplied, principally by the Hudson Bay Company, at Rigoulette, and by Mr. Norman at Indian Harbor. They are very docile and well behaved, and in their simple way, fond of learning; most of them can read, and some can write-taught by their fathers and by each other.

They have a taste for music and singing; several whom I met could play a musical instrument. I distributed some elementary school-books among them, which I am sure were much appreciated, and will be used to good purpose. I consider that the permanent residents of Labrador are better off than the poorest class of people in Newfoundland. They are well employed in the summer in the fisheries on the coast, and in the winter they go up into the bays of the mainland where there is plenty of wood for fuel; some animals yielding valuable furs, to be caught for trading, and rabbits, partridges, and sometimes deer for food. The rabbits, so called here, which are very like the hares of Nova Scotia, have been numerous the last three winters, affording an excellent and important article

of diet to the inhabitants.

Although the amount of pauperism is comparatively small at Labrador, yet a few cases will occur, in which the resident mercantile agents, or other principal inhabitants, may have to give assistance to destitute persons having no special claims on them, and in such cases they look to the Government for reimbursement.

p. 1455

ROADS. The fishing stations at Labrador are nearly all on the numerous rugged islands of the coast, and consequently the communication being by water, there is little or no necessity for making roads.

RELIGION. There is at present only one resident clergyman of any denomination on the coast of Labrador—from Blanc Sablon in the Straits of Belle Isle to Hopedale, the Moravian Southern Mission Station. That clergyman is the Revd. Robt. Dobie of the Church of England, who resides at Forteau in the Straits of Belle Isle.

During the past summer three other clergymen have been on the coast, employed in their religious duties—viz.: Revd. William Wilson of the Church of England, who was stationed at Battle Harbor, and who visited other settlements; the Revd. Henry Carfagnini of the Roman Catholic Church, who came down in the steamer “Ariel” and visited several places; and the Revd. Thomas Allen of the Wesleyan Methodist Church, who was engaged all the summer in travelling from one harbor to another.

For several years prior to this year, the Revd. George Hutchinson, a clergyman of the Church of England, who resided permanently at Battle Harbor and from thence was in the habit of visiting, in summer and winter, many places north and south, of that station. His Christian zeal, kindness and liberal charities are well remembered and acknowledged by the people, who spoke of him with the greatest love and respect.

PLACES OF WORSHIP. From Blanc Sablon to Hopedale, there are five of the Church of England, viz.: one each at Forteau, Red Bay, Battle Harbor, St. Francis Harbor, and Seal Islands; two Roman Catholic, viz.: one at Pinware, and another at Matthews Cove, Battle Island; one Wesleyan Methodist at Red Bay. At Indian Tickle there is a convenient building appropriated as a place of worship for clergymen of all denominations who may happen to come there.

SCHOOLS. Four schools were in operation during the past summer, viz. at Battle Harbor, Venison Tickle, Cape Charles, and Pinware; the three former kept during the summer only, that at Pinware is continuing through the year. It is proposed to open a school at Red Bay during the coming winter.

These schools are but moderately attended; the number of scholars in each, ranging from about 15 to 25.

I distributed amongst the teachers of these schools the sums

placed at my disposal by the Government, and supplied them with some school books. Owing to the peculiar occupations and scattered habitations of the people, it is impracticable to establish a general system of school education; but I think it would be well to distribute a liberal supply of elementary books among the inhabitants, who would make good use of them in their families for domestic instruction.

I found the medicines and drugs with which I was supplied by the Government very acceptable, and useful for the people, both residents and summer fishermen. Many cases of disease and death, this season, came to my knowledge.

p. 1456

There was no regular medical man (except the surgeon on H.M.S. "Fawn," which vessel came twice to the Labrador for short periods) on the whole coast from the Straits of Belle Isle to Hopedale last summer. I would suggest the advisability of sending a surgeon in the revenue and circuit vessel, who would then be enabled to attend to such cases of disease and accident as he might meet with, while cruising about during the season.

It would be gratifying to all those engaged in business on Labrador to have postal communication with St. John's, and through it with other places at home and abroad, two or three times during the summer. They consider they are entitled to this advantage as contributors to the General Revenue; indeed they complain that Labrador does not get its fair share of the public money in any way.

Labrador is no country for agriculture; the summer is so short, and the sea coast and islands so rocky and barren that nothing can be grown there but turnip greens and lettuces.

In the deep bays, such as Sandwich Bay and Hamilton Inlet, where there are woods, some soil and the climate warmer, a little more cultivation of the ground might be accomplished. I saw potatoes which were grown at Red Bay, in the Straits of Belle Isle, but none further north.

I may remark, that on the whole coast, from Battle Harbor to Rigoulette, I did not see a horse, cow, or sheep (except one cow at Indian Tickle, brought down for the summer from Newfoundland). Dogs abound in all settlements at Newfoundland. They are chiefly of the Indian or wolf breed, and are used during the winter season harnessed to sledges for hauling timber out of the woods and for travelling, in which occupation they are very sagacious and enduring.

With the exception of the dreadful effects of the storm of the 9th October, the present year may be considered a good one for the fisheries of Labrador, which in extent and importance are, I suppose, unsurpassed in the world.

I have, etc.,

(Signed) ROBERT J. PINSENT,
Judge of the Court of Labrador.

No. 534.**JUDGE PINSENT'S REPORT, 1868.**[31 Dec.,
1868.]

COLONIAL OFFICE RECORDS 197/47. JOURNAL OF THE ASSEMBLY,
NEWFOUNDLAND. Appendix No. 658.

Report of Robert J. Pinsent, Esq., Judge of the Court of
Labrador to His Excellency the Governor, December 31st,
1868.

St. John's
31st December, 1868.

To His Excellency
the Governor of Newfoundland, etc.

SIR,

I have the honour to report to your Excellency my proceedings and observations during my circuit at Labrador during the past summer. I sailed from St. John on the 2nd June, in the schooner "Vivid," a vessel employed by the Government as a revenue cruiser and circuit ship on the Coast of Labrador; Mr. Knight, Collector of Customs, and Mr. Canning, Sub-Collector, being on board, the former having the general direction of the destination of the vessel.

We arrived at Labrador on the 20th June; from which period until the 2th of October, we continued cruising on the coast from Blanc Sablon, in the Straits of Belle Isle to Indian Harbour and Rigoulette, in Hamilton Inlet. We anchored in 34 different harbours; in some of them two or three times, and called off and communicated with other places. On the 5th of October we returned to St. John's.

I may very justly say

On our arrival at Labrador, we learned that in some localities the residents had been straightened for provision during the past winter, but that no loss of life had actually resulted therefrom.

The wild rabbits of the country, as an article of food, had been of essential service to the poor inhabitants generally; and in some instances aid had been afforded by persons having provisions, to those who were in great want. I was informed that in several places on this coast, hungry people had, during winter, taken salted herrings from the premises of persons who were then in Newfoundland.

The legal cases brought before me during the circuit were:

3 of debt,
1 respecting nets,
p. 1458

1 of bastardy,
1 of malicious injury,
5 of assault,
2 of larceny,
Application of a wife for a separate
maintenance.
Case of investigation into the death of two
Esquimaux Indians, about which there
are
suspicious reports.

I consider the general conduct of the people of Labrador creditable to them, although I must take exception to the behaviour of some of them during the herring season of last year.

The salmon fishery on the coast of Labrador was this summer more successful than it had been for some years before; but this bunch of the fisheries is, to a limited extent, unimportant as compared with those of the cod and herring.

These causes have necessarily produced much want among the poorest class of the residents of that district. In some cases, the condition of certain cases was so destitute, with reference to the coming winter, that Capt. Parish of H.M. ship "Sphinx" and myself, while together at Red Bay, considered it to be our duty to make some provision for their sustentation. Accordingly he, knowing from personal observation the exact circumstances of the people residing above Red Bay, and within the territory of the Governor of Newfoundland, made arrangements for the very destitute there, and I did the same for the few families in a similar condition on the Red Bay. He also communicated with the Government of Canada on the destitute state of many of the inhabitants of the States living within Canadian territory, with whose condition he was minutely acquainted, having personally visited them during his cruises last summer and fall.

It is to be remembered that in this desolate region, there are no means of obtaining a supply of provisions during the long winter, from stores or traders; and, consequently, that it was requisite to give the needful assistance before we left the coast.

SCHOOLS. There were this year five at Labrador, viz.:—

Place.	Teacher.	When in Operation.	No. of.	Salary.
Pinware.	Mrs. O'Dell.	Summer and winter.	14 last summer. 30 last winter.	£ currency. 9
Cape Charles.	Miss Young.	Summer only.	18 last summer.	6
Battle Harbor.	Rev. W.E. Wilson.	do.	20 do.	6

Venison Tickle	Mrs. Pike.	do.	13 do.	6
Red Bay.	Mr. Bailey.	Next winter.	20 expected.	6
				£33

p. 1459

I paid the above mentioned salaries from the money placed by the Government in my hands for that purpose; and I supplied the schools with books.

These schools are quite of an elementary character and irregular operation. It does not appear to me practical to establish a permanent system of general school education to the migratory habits of the people. I distributed books among the resident inhabitants of the coast throughout the whole district visited by me. They were gladly and thankfully received, and will, I am sure, be very useful in promoting education in a domestic way among the people.

I also dispensed the medicines placed in my charge by the Government. They were very much valued generally, and in several cases, urgently required. The health of the people at Labrador is usually good, but of course infectious diseases and accidents occur. I was informed that during last winter scarlet fever prevailed in Hamilton Inlet and caused the death of several persons. There is no doctor resident at Labrador.

I beg to state that some of the gentlemen who were in the Commission of the Peace for Labrador have retired from the country; and I would respectfully suggest that their places should be filled up by the appointment of suitable persons.

I would also remark that Mr. Goodrich, the gentleman who was licensed as layman to celebrate marriages at Labrador, has gone away, so that there is no person residing in the locality where he lived now legally authorised to perform that ceremony. This is a want that I think should be supplied by the appointment of one or two fit persons resident on that part of the coast. I refer to the district comprising Sandwich Bay, Hamilton Inlet, and from thence northward, where there is no resident clergyman, and where the inhabitants are seldom, if ever, visited by one: consequently the resident people are obliged to substitute the services of a layman who, without being duly licensed, cannot legalize the marriage. I was applied to on this subject by persons interested in it as permanent inhabitants, and requested to bring the matter under the consideration of the Government.

I regret that I cannot report more favourably of the fisheries at Labrador during the past season. The cod appear in a great degree to have abandoned the southern part of the coast where formerly they were so abundant, and to have gone northward whither our fishermen have to follow them in vessels of all sizes from 30 tons and upwards.

The hardships and dangers to which they are exposed in this arduous pursuit are manifold, and it would be gratifying indeed to see their exertions crowned with more commensurate success and prosperity.

I have the honour to be,

Your Excellency's most obedient servant,
ROBERT JOHN PINSENT,
Judge of the High Court of Labrador.

JUDGE PINSENT'S REPORT, 1869.

[1869.]

COLONIAL OFFICE RECORDS 197/49. JOURNAL OF THE
ASSEMBLY, NEWFOUNDLAND. Appendix.

Report of Robert J. Pinsent, Esq., Judge of the Court of
Labrador to His Excellency Steven John Hill, Esq., C.B.,
Governor of Newfoundland, etc.

St. John's.
27th November, 1869.

SIR,

I have the honour to make my report to your Excellency my proceedings and observations during my circuit at Labrador last summer. I sailed from St. John's on the 28th May.

We did not arrive at Labrador until the 18th June, from which time up to the 7th October, we were constantly cruising on the coast from Blanc Sablon, in the Straits of Belle Isle to the vicinity of Cape Harrison in the north, visiting all the principal harbors and stations within that circuit.

The revenue collected at Labrador this year exceeded that of any other year since the service was established.

The following particulars I learned from the father of the family, Edward Mercer, of Bay Roberts, Newfoundland. He informed me that he had been in the habit of fishing in the summer at Pack's Harbor, Labrador, for several years, and returning to Newfoundland in the fall; that last winter for the first time, he remained at Labrador, with his family, consisting in all of himself, his wife, five sons and one daughter; he had only three barrels of flour for his stock of provisions, but he hoped to catch game and seal for food during the winter. He removed from Pack's Harbor at the end of October and went into winter quarters up the North River in Sandwich Bay; his stock of food was exhausted by the middle of January, and he and his family then subsisted on what little game they could catch, and the scanty but kind aid they received from some neighbours, who were themselves straightened for food. There was no supply to be had at the merchants' stores in Sandwich Bay. They struggled on in their way until the latter part of February, when they

removed—being all in a week state of health—to Handy Harbor Island; about 6 miles to the northward of Pack's Harbor, hoping there to catch some seals and sea birds, and to get a supply of mussels.

When I saw the poor man at Pack's Harbor in August, he was debilitated and unable to work, his wife and surviving children had comparatively recovered their healths, their circumstances were very poor; I therefore, on the part of the Government, gave them some assistance.

This case is an extreme one, but I was told by several reliable persons that the conditions of many families last winter was nearly as necessitous as that of Edward Mercer, and that such sufferings for want of food, was perhaps, never before experienced on the coast of Labrador. I may mention that game of all kinds was unusually scarce.

I cannot but express my opinion that it is very illiberal or at least, very inconsiderate on the part of the merchants having establishments at Labrador, that they do not make some winter provision for the resident inhabitants who deal with them more or less during the summer. A stock of from 50 to 100 barrels of Indian meal, costing about as many pound would, at each establishment, be sufficient to guard against this danger of starvation. I deem it to be the absolute duty of these merchants to provide, to a reasonable extent, for the sustentation of the surrounding people, should there be any necessity for it during a long inclement Labrador winter.

The legal cases brought before me during the circuit, were:

3 of larceny,
2 of assault and battery,
1 of damages for destroying a net,
4 of sureties of the peace,
1 of unlawful throwing ballast overboard,
1 of debt.

In two aggravated cases, viz.:—

1 of larcency,
the other of assault and battery,

I sentenced the offenders to six months' imprisonment with hard labour in H.M. Gaol at St. John's. They justly deserved that amount of punishment, and it was necessary to make a flagrant example of the consequences of violation of the law and show that even at Labrador it could not be done with impunity.

I brought these men from Labrador to St. John's in the circuit vessel; one of them was on board nearly two months, and the other about half that time; their custody was attended with considerable care and trouble, as

no proper lock-up room had been provided in the vessel. I would repeat what I have on former occasions represented, that it is necessary a suitable temporary prison should be provided in the circuit vessel.

The conduct of the people at Labrador, both residents and those coming in the summer only, is, on the whole, creditable to them. When it is considered how many thousands of fishermen are there engaged, it is remarkable that so few serious crimes are committed. During the past season I have heard very little complaint of violent behaviour even in the prosecution of the herring fishery in which, from its brief continuance and exciting character, such conduct is most likely to occur.

The salmon fishery was, on the whole, good. In addition to our own vessels there were, as usual, several Nova Scotia and Canadian vessels engaged in the fishery. I saw only one vessel from the United States, which I met with in St. Michael's Bay; she was a steamer called the "Monticello" from New York, engaged in the herring fishery, in which she had been unsuccessful at Labrador.

I am gratified to be able to state, and I have good reason to believe, that the condition of the resident inhabitants of Labrador, will next winter, be much better with respect to food than it was last winter. These residents, not having vessels and other means of leaving their own localities, were last summer, fortunately obliged to remain home, where they did much better in the fishery than if they had come to Cape Harrison and its neighbourhood; they have consequently been able, generally, to lay in a sufficient stock of provisions for the winter.

The census of the resident population of Labrador, from Blanc Sablon to Cape Harrison inclusive, has this summer been taken by order of the Government. The total number is 2,479, comprising

1803				belonging to the Church of England,
483	„	„	„	Rome
165	„	„		Wesleyan Church,
28	„	„		Church of Scotland
<u>2479</u>				

In this number about 300 Indians and half-breeds of the Esquimaux and Mountaineer races are included. They reside chiefly in the magnificent bay called Hamilton Inlet and that neighbourhood. Most of them are connected with the Hudson Bay Company. The half-breeds, who have sprung of Europeans and Indians, are docile, decent and intelligent, they speak good English and are fond of learning to read and write. They are employed in the salmon fishery in summer, and in furring in winter, catching only a little cod in the fall of the

year, for their own consumption. On the whole they make out a tolerably comfortable living.

p. 1463

In the summer the coast of Labrador swarms with thousands of people from Newfoundland, who engage in the cod, herring and salmon fisheries during the season—and return in the Fall to their own country. They are of course, not included in the Labrador census.

SCHOOLS. — There were only 4 schools in operation this year at Labrador, viz.:—

Place.	Teachers.	In operation.	Scholars.	Salary.
Battle Harbor.	Rev. W.E. Wilson.	Summer and winter.	233 summer. 13 winter.	\$24
Pinware.	Mrs. O'Dell.	do. do.	20 summer. 47 winter.	36
Cape Charles.	Mrs. Young.	Summer only.	25 summer.	24
Matthew's Cove.	Mrs. Tobin.	15 ..	8
				\$92

I paid the above salaries out of the money placed in my hands by the Government and supplied the schools with books.

Labrador is not a favourable country for the establishment of schools, the people there are so scattered that, with a few exceptions, it is impracticable to get a sufficient number of them together for that purpose. The general and most effective mode of instruction is by supplying books to the isolated inhabitants and thus enabling them to learn at home by their own firesides, where they teach one another. I distributed the books furnished by the Government to a great many families, who have thankfully received them, and will, I am sure, make good use of them. The medicines which I took down with me and distributed among the inhabitants were very useful and much valued, for on this coast they are not, in most cases, to be procured in any other way.

The weather at Labrador last summer, was particularly wet, cold and backward; consequently the curing of fish was retarded, and the shipments for market were delayed much beyond the usual period.

I have the honour to be,

Your Excellency's most obedient servant,

ROBERT JOHN PINSENT,

Judge of the Court of Labrador.

JUDGE PINSENT'S REPORT, 1870.[31 Dec.,
1870.]C.O. 197/52. APPENDIX. JOURNAL OF THE COUNCIL,
NEWFOUNDLAND. NO. 34.Report of Robert J. Pinsent, Esq., Judge of the Court of
Labrador, to His Excellency the Governor, 1870.To his Excellency Colonel Stephen I. Hill, C.B., Governor
of Newfoundland, etc., etc.St. John's.
December 31st 1870.

SIR,

I have the honor to report to your Excellency my proceedings and observations at Labrador, during my Circuit the past summer.

On the 10th of June I sailed from St. John's, in the schooner William Stairs, a vessel employed by the Government as a Revenue cruiser and Circuit ship on the coast of Labrador.

Mr. Knight and Mr. Canning, Collectors of Customs were on board; the former gentleman having the general direction of the destination of the vessel. In consequence of the prevalence of Northerly and Easterly Winds, and of information that there was much field ice obstructing the passage by the Northern route, we proceeded South about, through Gulf of St. Lawrence and the Straits of Belle Isle: being favored with fair winds, we accomplished, by this unusual and generally objectionable route, our passage to Labrador in five days, arriving at Blanc Sablon on the 15th of June.

From that period up to the time of our departure from Labrador, we were continually cruising on the coast, going as far North as Hamilton Inlet, and visiting all the principal Harbors and settlements.

We sailed from Labrador, on our return home, on the 17th of October, and after a very stormy and dangerous passage arrived in St. John's on the 25th of the same month.

I was happy to learn at Labrador, that the resident inhabitants had, last winter, been exempt from the sufferings experienced the previous winter, from want of a sufficient supply of food.

The legal cases brought before me during the Circuit were:

—
2 cases of Larceny,
1 of assault,
1 of trespass on land,
1 of damage to nets,
1 of killing goats,
1 of bastardy,
2 of debt,
2 cases of inquiry respecting the death of two
men.

In one case, in which the Bailiff of the Court was obstructed and assaulted in the execution of his duty, I brought the matter under the consideration of Her Majesty's Attorney General, who indicted the offender in the Supreme Court at St. John's. Although few cases are actually brought before the Court, there is no question but that its annual circuit at Labrador, has the important effect of preventing the commission of offences and wrongs which might otherwise be done with impunity. I consider the general conduct of the people at Labrador very creditable to them; few serious crimes, or other offences, are committed there, considering the great number of men congregated on that coast during the fishery season, in addition to resident inhabitants.

I beg leave to bring under the consideration of the Government, two subjects, which I think require to be provided for by Legislative enactment, viz.: The Recovery of Debts; and the Regulation of the Salmon Fishery at Labrador.

With respect to actions for the recovery of Debts at Labrador, I would suggest an enactment to prevent the injustice that arises, in cases in which creditors on the spot obtaining judgment for old debts require the levy of execution for the amount, out of the produce of the current voyage, without reference to the claims of the absent supplying merchants, the fishery servants and other creditors. Under the present state of the law, applicable to the Court of Labrador, the Judge cannot refuse, in such cases, to issue a writ of execution and levy for the whole amount of the judgment; for he has not authority to declare a debtor insolvent (sic), and make distributions of his effects, according to the Law of Insolvency.

I am of the opinion that power should be given to the Judge, when it appears to him that a defendant is insolvent, to limit the amount for which attachment or execution should issue against goods for debt; or to suspend the issue thereof. And in cases where execution against the person, for debt, appears to the Judge to be oppressive, to refuse to issue such execution.

With reference to the Salmon Fishery at Labrador, I think it very desirable that the legislature should define the rights of persons to occupy the stations (posts as they are called), where they set their nets.

In the Bays of Labrador, such as Hamilton Inlet, Sandwich

Bay, and similar places, the permanent residents, and others who regularly resort to the

p. 1466

coast, have occupied certain fishing stations, where in the summer they carry on the Salmon Fishery; these Salmon posts, as they are called, have been exclusively occupied by such persons for many years, and their subsistence depends on the possession of them.

But very lately a question has arisen of the right of these people to the exclusive occupation of their salmon posts, and strangers threaten to interfere with them. This is a matter of vital importance to the old inhabitants, and requires legal decision, I think by an Act of Legislature.

Under all the circumstances of the case, it appears to me reasonable that they should have secured to them the exclusive right to the Salmon posts which they have hitherto held and occupied, so long as they regularly and annually continue to fish them, and in other respects conform to the law.

It has been represented to me, by several persons well acquainted with the Salmon Fishery, that the distance now required by law, in the setting of salmon nets, is not sufficient; that at least double the distance between such nets ought to be required. As far as I am competent to give an opinion on the subjects, I consider this representation well founded, and worthy of attention.

SCHOOLS.

Only four schools were in operation this year at Labrador, viz:—

Place.	Teacher.	When in Operation.	Scholars.*	Salary.
Matthew's Cove, Battle Harbor.	Mary Marshall.	Summer only.	59	\$24.00
Cape Charles.	Catherine Young.	Summer only.	25	24.00
Red Bay.	John Bailey.	Winter only.	18	24.00
Pinware.	Mrs. O'Dell.	Summer and winter.	40	36.00
				Total \$108.00

* On the Books, but the number in attendance varying, according to the season of the year.

I paid the salaries out of the money placed in my hands by the Government for that purpose, and I supplied the Schools with books.

I distributed books to a great many resident families on the coast, by whom they were thankfully received, and to whom they will be very useful in promoting education, in the only way in which it can be generally accomplished, by instruction among themselves in their own houses.

The medicines supplied annually by the Government, for the use of the people at Labrador, are esteemed by them as a great boon: in many cases which came under my notice they

proved of essential service.

This season the quantity of field ice on the coast of Labrador was unprecedented; it remained in many places until late in July, the effect of which was most injurious to the fisheries, by preventing the fish from striking in to

p. 1467

the shore at the usual time, and obstructing the harbors, so that boat and vessels could not get to their fishing stations in due season; the result being that the voyages of cod and herring were the most unsuccessful perhaps ever known on the coast of Labrador.

The Salmon catch, in the great bays, was about half an average voyage.

The weather was boisterous and wet, with a prevalence of Northerly and Easterly Winds during the whole season.

I have the honor to be Your,
Excellency's most obedient servant,
ROBERT JOHN PINSENT,
Judge of the Court of Labrador.

JUDGE PINSENT'S REPORT, 1871.[30 Dec.,
1871.]

COLONIAL OFFICE RECORDS 197/53. JOURNAL OF THE ASSEMBLY,
NEWFOUNDLAND. Appendix.

Report of R. J. Pinsent, Esq., Judge of the Court of Labrador,
1871, to His Excellency Col. C. J. Hill, C.B., Governor of
Newfoundland, etc., etc.

St. John's,
December 30th, 1871.

SIR,

I have the honour to make my report to Your Excellency on
my proceedings and observations at Labrador during my
circuit this year.

We were detained there [L'Anse a Loup] by ice, until the
21st [June], when we succeeded in getting to Blanc Sablon,
which is the southern boundary of our Labrador territory.

From thence we proceeded north as far as Hamilton Inlet,
touching at the principal settlements on our way.

On the 26th August, we returned south and on the 6th
October, sailed from Red Bay for St. John's, where we arrived
on the 15th of the same month.

During the period we were at Labrador we were continually
cruising about, visiting the various harbours and settlements on
the coast and attending to such business of law and revenue as
came within the scope of our several departments and duties.

The legal cases brought before me during the circuit were:

Four of debt,
Three of malicious injury,
One of Sureties of the peace,
One of killing goats and dogs,
One of title to land,
One of intestate estate,
Two of trespass of goods,
One of larceny,
One of bastardy,
One of affidavit of debt.
Twelve of examinations taken of witnesses
in
cases pending in the Supreme and
Northern

I am, while at Labrador, frequently applied to for information and advice in matters of a legal character, but which it is not necessary to treat formally.

The conduct of the people resident and transient at Labrador, is generally peaceable and honest. Very few serious crimes are committed. However, I believe that the presence of the Court annually has a salutary effect in preventing offences.

The fisheries at Labrador last summer were on the whole good.

The catch of salmon on the sea-board, was about an average; but in the great bays such as Sandwich and Hamilton Inlet, where that fishery is almost the only one carried on, the catch was not more than half the usual quantity.

Education. Four public schools were in operation this year at Labrador, viz:—

Place.	Teacher.	When in Operation.	Number.	Salary.
Matthew's Cove, Battle Harbor.	Mary Marshall.	Summer only.	59	\$24
Cape Charles.	Catherine Young.	Summer only.	30	24
Red Bay.	John Bailey.	Winter only.	22	24
Pinware.	Catherine O'Dell.	Summer and winter.	46	48

The above are the numbers of scholars on the list, but their attendance is variable. I supplied these schools with books and paid the salaries of the teachers. I distributed educational books to the resident inhabitants of the coast, by whom they are highly valued and used well for the purpose of instruction in their families.

The medicines placed by the Government at my disposal I dispensed to all who required them. I am sure they were of great service to the people, and by them greatly appreciated.

The Mail Service for Labrador, introduced by the Government last summer, was doubtless of great utility and convenience generally to the merchants and fishermen engaged in the trade and fisheries of that coast; but I know that the mercantile house at Blanc Sablon, the southern extremity of our territory and the Hudson Bay Company at Rigoulette, Hamilton Inlet in the North are dissatisfied that the postal steamer does not call on those places, as they are thus practically excluded from the advantages enjoyed by the rest of the, mercantile community.

I would respectfully call the attention of the Government to this subject, as I think that these establishments are entitled to great consideration, for one half of the whole revenue collected at Labrador is paid by them. I believe from my local knowledge of Labrador, that it is quite practicable to arrange the Mail Steamers Service so as to call at those places in the course of her rounds.

I was requested to bring this matter under the notice of the Government. The general condition of the trade and fisheries at Labrador last season was an improvement on that of some previous years, and the collection of revenue greater in amount than had ever before been realised.

I have the honour etc.,
(Signed) ROBERT JOHN PINSENT,
Judge of the Court of Labrador.

No. 539.**JUDGE PINSENT'S REPORT, 1872.**

COLONIAL OFFICE RECORDS 197/57. JOURNAL OF THE LEGISLATIVE
COUNCIL, NEWFOUNDLAND. Appendix No. 14.

[31 Dec.,
1872.]

Report of J. R. Pinsent, Esq., Judge of the Court of Labrador,
1872.

To His Excellency
Col. Stephen J. Hill, C.B.,
Governor of Newfoundland, etc., etc.

St. John's,
December 31st, 1872.

SIR,

I have the honour to make my annual circuit Report to Your
Excellency.

As usual we traversed the coast from Blanc Sablon to
Hamilton Inlet and were constantly engaged during the period
of our stay at Labrador in visiting the various settlements and
attending to our official duties of Law and Revenue.

The legal cases brought before me during the circuit were:

4 of debt and damages,
2 of Trespass,
2 of Assault and Battery,
1 Sureties of the Peace,
1 Public Nuisance,
1 Larceny,

I am frequently applied to for information and advice,
which I give to the people, and thus prevent serious disputes
and litigation.

A report was propagated at Labrador this summer that a
woman had been murdered at White Bear Island, near Indian
Harbour; it reached Newfoundland, and the Government sent a
small party of police to Labrador to see into the matter; they
fell in with H.M.S. "Eclipse" at Indian Tickle, and reported
this to Capt. Hoskins, who offered to convey them in the ship
to their destination. on his way thither he called at Grady
Harbour for me. I accompanied

him to Indian Harbour, where we investigated the report, and found it to be false.

I consider the general conduct of the people at Labrador very creditable to them. When it is remembered how many thousands of men are engaged during the summer in an arduous and exciting occupation, the absence of serious crime is highly satisfactory and remarkable.

The salmon fishery in the Great Bays was very short of an average voyage, but on the seaboard the catch was better.

Education. Five public schools were in operation this year at Labrador, viz:—

Place.	Teacher.	Time.	Salary.
Pinware.	Mrs. O'Dell.	Summer and winter.	\$20
Red Bay.	John Bailey.	„ „	20
Cape Charles.	Eliz. Young.	Summer only.	10
Matthew's Cove.	Mary Marshall.	„ „	10
Battle.	Rev. G. Bishop.	Summer and winter.	25
		Currency	\$85

I received the reports of the teachers (with the exception of that from Battle Harbor) and have sent them to the Colonial Secretary. I supplied the schools with books and paid the teachers their salaries. I distributed additional books and stationery to the resident inhabitants of Labrador, who value them highly, and will make good practical use of them.

The medicines supplied by the Government for the use of the people of Labrador, I dispensed to those who required them. This is a very useful annual gift to the inhabitants, who are not able to procure them otherwise; and I believe I may truly say that aided by the practical skill and experience of our Captain, I have been in this way instrumental in affording relief to many sick persons, and in some cases in saving life.

The Mail Packet Service at Labrador this season has, with reference to place of call and the time of waiting for letters, been much more satisfactory than it was last year; but the service is still considered susceptible to practical improvement.

I have, etc.,

(Signed) ROBERT JOHN PINSENT,

[31 Dec.,
1873.]**JUDGE PINSENT'S REPORT, 1873.**

COLONIAL OFFICE RECORDS 197/59. JOURNAL OF THE LEGISLATIVE
COUNCIL, NEWFOUNDLAND. No. 49.

Report of Judge Pinsent, Labrador Court, 1873, to His
Excellency, Col. Stephen J. Hill, C.B., Governor of
Newfoundland, etc., etc.

St. John's,
December 31st, 1873.

SIR,

I have the honour to make my annual circuit report to Your
Excellency.

I sailed from St. John's on the 17th of June last, in the
schooner "William Stairs," Hackett, master—vessel employed
by the Government as a revenue ship on the coast of Labrador.

Messrs. Knight—Collector of Customs—Canning and
Stephenson, Sub-Collectors, together with Mr. Frederick
Crowdy, a medical student of the University of Edinburgh,
who was employed by the Government to vaccinate the
resident inhabitants of Labrador, were my fellow passengers.

We proceeded north-about, and after harbouring several
times on our way, owing to contrary winds and obstruction
from ice, we arrived at Red Bay, Labrador, on the 8th July.

After landing Messrs. Canning and Stephenson at Blanc
Sablon, our vessel proceeded northward, and during the whole
season continued cruising along the coast of Labrador, visiting
the various settlements from Blanc Sablon to Hamilton Inlet,
inclusive. On the 11th of October, we returned to St. John's.

The legal cases brought before me during the circuit were:

5 for debt,
2 sureties of the peace,
2 injuring nets,
1 title to land,
1 larceny.

In many matters I am applied to by the people for
information and advice, and thus disputes are adjusted and
litigation avoided. Although the cases tried are few, the fact of
the annual presence of the court is beneficial and important in

the prevention of offences.

The general conduct both of the residents and of the fishermen at Labrador during the fishing season, is very creditable to them; few serious offences are committed; and there is on the whole but little disorderly behaviour.

This season we went in our vessel where I had not been before, to the N.W. River at the head of the magnificent bay called Hamilton Inlet, for the purpose of enabling Mr. Crowdy to vaccinate the Indians belonging to the Hudson's Bay Company, who have their principal Labrador establishment there, and where Mr. Connolly, their chief officer, resides. It was owing to his representation and request last year, that the Government determined to send a medical man to Labrador, for the purpose of vaccinating the inhabitants. Mr. Crowdy performed the operation on all the Indians here assembled, nearly two hundred men, women and children. These Indians are from Canada and the Mountaineer race—they speak the Indian language and follow the Indian mode of living. It was curious and interesting to see them encamped in their birch-rind covered wigwams, at N.W. River, employed in building and repairing canoes and other work, preparatory to their journey into the interior of the country for hundreds of miles, on their annual furring expedition, for which purpose they are supplied by the Hudson's Bay Company. In these journeys all go—men, women and children; they travel by land and water, ascending rivers, crossing lakes and passing through woods and over barrens. They start from N.W. River in the summer and return the following spring with their catch of furs. They are Roman Catholics and are attended by a clergyman who comes down for that purpose every summer.

These Indians are quite a different race from the Esquimaux who inhabit the north coast of Labrador, and who generally occupy themselves in catching fish and seals.

Our visit was very satisfactory to all concerned. We ourselves were interested and amused by the scenery and by the Indians. Mr. Connolly was gratified by the attention paid by the Government to his application, and the job was well carried out by Mr. Crowdy.

While on this subject I beg leave to recommend to the Government what would be very useful and acceptable to the residents to those resorting to the Labrador during the fishing season, that a medical man should be sent in the circuit vessel for the purpose of attending to cases among the thousands of people congregated there in the summer. There is no doctor residing on the coast of Labrador. The medicines supplied by the Government to me, I disposed of as usual among the people, to whom they were of great use and highly valued.

p. 1476

EDUCATION.

Five schools were in operation this year at Labrador, viz.:—

Place.	Teacher.	Time.	Scholars.	Salary.
Pinware.	Mrs. O'Dell.	Summer and winter.	30	\$80
Red Bay.	John Bailey.	do.	20	80
Cape Charles.	Laura Young.	do.	26	40
Battle Harbor.	Thomas Ward.	do.	36	100
Matthew's Cove.	Mary Marshall.	Summer only.	70	40
				\$340

The people of the United States seem to have given up, as a fishing station, that part of Labrador comprised within the limits of the Newfoundland Government.

The Mail Packet Service at Labrador was this season satisfactorily carried out. The steamer "Walrus" employed, was built to do the work properly, and her master, Capt. Delaney, was in all respects well qualified for his duty.

ACTING JUDGE McNEIL'S REPORT, 1874.[31 Dec.,
1874.]COLONIAL OFFICE RECORDS 197/60. JOURNAL OF THE ASSEMBLY,
NEWFOUNDLAND. Appendix.

31 December, 1874.

Report of I. L. McNeil, Esq., Acting Judge of the Court of
Labrador.To His Excellency Sir Stephen Hill, C.B., K.C.M.C.,
Governor and Commander-in-Chief in and over the Island
of Newfoundland and its dependencies.

SIR,—

I have the honour to make my circuit report for the information of Your Excellency and Council; Having been appointed Judge of the Court of Labrador I sailed from St. John's on the 9th June in the revenue cruiser "Voyager," Giles, master, in company with Mr. Knight and Mr. Stevenson, Collectors of Customs of the Coast of Labrador.

We succeeded in getting over to the Labrador coast on the 27th June, and anchored at Blanc Sablon, where we landed Mr. Stevenson, and then proceeded northward to Hamilton Inlet, arriving there on the 30th July, calling on our way north at the principal harbors and fishing stations, and attending to our official duties, during which I had frequent occasion to offer advice in the settlement of disputes between the residents of the coast.

On our return from the north, we arrived at Battle Harbor, 22nd September, where I found several parties awaiting my presence to hear and settle their complaints. After getting through our business here I landed from the revenue cutter, Mr. Knight having to go in that vessel to the French shore for the purpose of completing census returns on that part of the coast. I took passage on the mail steamer "Leopard" for St. John's, where I arrived on the 2nd October.

The salmon fishery on the sea coast was unusually good, while in the rivers and northern bays, it was quite a failure, more especially in Sandwich Bay and Hamilton Inlet.

Owing to a succession of unfavourable fisheries of late years, the resident population of Labrador had, (with few exceptions) become impoverished in their circumstances, and many of them found it difficult to procure necessary supplies for the support of their families.

The supply of books and medicines furnished by the Government for the poor, was distributed by me principally to the settlers of Sandwich Bay and Hamilton Inlet, who made anxious enquiries for them, and appeared very grateful for the attention bestowed upon them in this respect. Medicines especially are a valuable boon to the poor people on that coast, many of Whom have no other means of getting a supply.

Eight public schools were in operation in Labrador during the year, viz:—

Forteau,
Pinware,
Red Bay,
Cape Charles,
Matthews Cove,
Battle Harbor,
Little Harbor,
Venison Tickle,

I visited some of the schools and found a fair attendance of children who appear in most cases to be making some improvement.

I received returns from all the schools except that of Venison Tickle. I I [sic] transmitted the returns to the Colonial Secretary. The legal cases brought before me during the circuit were four.

For debt and damages — one,
For trespass — two,
Assault and battery — one,
One bastardy,
One larceny.

I have the honour to be, Sir,
Your most obedient servant,
ISRAEL L. McNEIL,
Acting Judge of the Court of Labrador.

Carboner, [sic]
December 31st, 1874.

[19 July,
1875.]

MINUTE RESPECTING APPOINTMENT OF JUDGE.

Page 75, No. 6 RECORD BOOK, 1874 to 1883.

July 19th, 1875.

The Executive were of opinion that under present circumstances the appointment of Judge of the Labrador Court may be dispensed with this year, its further continuance to be a matter for the future action of the Legislature.

STEPHEN J. HILL.

Read and approved the 22nd July, 1875.

AFFIDAVIT OF CLUNY MACPHERSON, G.M.G.. M.D.[18 March,
1926.]In the Privy Council.IN THE MATTER of the BOUNDARY
betweenthe DOMINION of CANADA and the
COLONY of NEWFOUNDLAND in the
LABRADOR PENINSULA.

I, CLUNY MACPHERSON, C.M.G., M.D., of 65 Rennie's Mill Road, St. John's Newfoundland, medical practitioner, make oath and saw as follows:—

1. I served as a medical officer on the Labrador for a period of nearly 3 years between 1901 and 1904. I went there originally as a medical missionary with Dr. Grenfell and was then employed by the Newfoundland Government to prevent the spread into Newfoundland Labrador of an outbreak of small-pox in Canadian Labrador. In the course of this work I vaccinated many persons in Newfoundland Labrador and made journeys into Canadian Labrador to treat small-pox cases as there was no medical officer there. After this work I rejoined the Grenfell Mission until my return to general practice in St. John's Newfoundland in 1904.

2. While on the Labrador Battle Harbour was my headquarters. I went as far West as Bradore some miles West of the boundary, between Newfoundland and Canada, and as far north as Rigolet. I did not go further north since there was a doctor at North West River and another with the Moravians at Hopedale. I used to spend both winter and summer on the Labrador. I exercised authority there under a commission appointing me a Justice of the Peace. I was also appointed a Commissioner of the Newfoundland Supreme Court. I tried cases alone and in conjunction with Dr. Grenfell. There was never any difficulty in enforcing our decisions, which were accepted without question.

3. I was also empowered by the Newfoundland Government as Relieving Officer to relieve cases of distress at the Government's expense When I thought such a course desirable. I frequently availed myself of this authority, the traders on the Labrador furnishing the necessary supplies at my order and claiming the price from the Government. I relieved Indians and Eskimos when necessary as well as white settlers.

4. I further held the magisterial enquiries, which are equivalent in Newfoundland law to coroner's inquisitions, in the case of deaths in Newfoundland Labrador when it seemed necessary.

5. In my time the river at Blanc Sablon was generally assumed to be the boundary between Newfoundland and Canadian territories. Accordingly when I was in 1902 trying to prevent the spread of small-pox I had the bridge over the river destroyed and stationed a policeman on the Newfoundland side and also put up a notice prohibiting intercourse from the Canadian side.

6. From my experience I should say that the Newfoundland Government did more for Newfoundland Labrador than the Canadian Government for Canadian Labrador, Newfoundland maintained a weekly steamboat service for all the settlements on Labrador along Belle Isle Strait and a fortnightly service from Battle Harbour to Nain during the summer months. Canadian Labrador had no regular service but only two visits a year from the Canadian Revenue Cruiser. Telegraphic communications on Canadian Labrador is by means of a land line down the coast from Quebec to Red Bay. Newfoundland maintains a similar service by wireless stations in her territory, the Canadian authorities have done no more than the Newfoundland Authorities to develop the interior country.

7. It is true that Canadian Labrador is included in an electoral district whereas Newfoundland Labrador is not, but I never heard of any person East of the R. Natashquan exercising his vote or being canvassed or taking any active part in politics.

8. I Further say from my experience of the Labrador that the permanent settlers, who live at the heads of the bays, live in the winter almost entirely on hunting and trapping for furs and that this occupation takes them like the Indians far into the interior. So far as I can see this must always have been so ever since settlers have been on the Labrador, for no other means of livelihood than furring is available for them in the Winter.

Sworn at St. John's in the Colony
MACPHERSON.
of Newfoundland this 18th day
of March 1926,

CLUNY

Before me,
SIMON BUTLER,
A Commissioner for Oaths.

[18 March,
1926.]**AFFIDAVIT OF JOHN GRIEVE, M.D.**

In the Privy Council.IN THE MATTER of the BOUNDARY
betweenthe DOMINION of CANADA and the
COLONY of NEWFOUNDLAND in the
LABRADOR PENINSULA.

I, JOHN GRIEVE, M.D., of 282 Duckworth Street, St. John's Newfoundland, medical practitioner, make oath and saw as follows:

1. I joined the Grenfell Mission in 1906 and was for more than 10 years 1906-1916 on the Labrador, being for two seasons on Canadian Labrador. I was away on vacation for two winters during those 10 years but was otherwise continuously on the Labrador.

2. On the Canadian Labrador I was for 15 months at Harrington Hospital. At the same time I was Indian agent for the Canadian Government with jurisdiction over the Indians between Natashquan and Blanc Sablon.

3. During my time on the Labrador I traversed the whole of the peninsula from Eskimo Point opposite Anticosti to Okkak. The Belle Isle Strait section and the section from thence northward to Hamilton Inlet I travelled several times. I used to travel with dog teams from the beginning of January till the middle of April and must have met every family in the region.

4. As Justice of the Peace under the Newfoundland Government from 1909-1916 I tried various cases. During the destitution in the winter of 1909-10 I authorised business houses to furnish relief to the people and the Newfoundland Government endorsed my action in the following spring.

[20 March,
1926.]

Government does more for Newfoundland Labrador than the Canadian Government for Canadian Labrador I have read the affidavit sworn herein by Dr. Cluny Macpherson on the 18th day of March 1926 and I agree with what he says in paragraphs 6, 7 and 8 thereof.

[8 June,
1926.]**AFFIDAVIT OF FRANCIS CYRUS BERTEAU**In the Privy Council.

IN THE MATTER of the BOUNDARY
between

the DOMINION of CANADA and the
COLONY of NEWFOUNDLAND in the
LABRADOR PENINSULA.

I, FRANCIS CYRUS BERTEAU of St. John's, Newfoundland,
Comptroller and Auditor General of Newfoundland, make
Oath and say as follows:—

1. In 1881 I was appointed by the Newfoundland
Government Collector of Customs at Rigolet and Magistrate
for Labrador, and held the appointment for nine years.

2. During those years the Hudson's Bay Company were the
principal direct importers to Labrador but Nova Scotia traders
also visited the coast. We made them all pay duties to the
Newfoundland Government. As far as the Hudson's Bay
Company was concerned we collected duties in respect of
goods intended for use at Rigolet, North West River,
Cartwright, Davis Inlet, Nachvak or for trading with the
Indians in the interior, but not on those intended for use at
Ungava, which was looked upon as No Man's Land. When the
goods for the Company were of American origin they were
brought from Canada in bond and when they had been landed
and duty paid I cancelled the bonds. Tobacco and other
material from Canada on which excise duty would be payable
if it was put into consumption was similarly dealt with. Where
the goods were of Canadian production I levied duties on them
just as if they were coming into a port in the island of
Newfoundland.

3. On several occasions I went up North West River and up
the lakes and streams and saw the Indians who came out each
summer.

4. I performed magisterial duties where necessary. I remember determining a dispute between Fortescue, chief factor of the Hudson's Bay Company, and McLean, in relation to the alleged barring by the latter of the River Kinnamish against Salmon. I decided after enquiry that Fortescue's claim failed.

5. The Newfoundland Government always looked after the interests of the people and provided relief for them when required. In the Hamilton Inlet and at Sandwich Bay this relief was administered through the Hudson's Bay Company.

F. C. BERTEAU.

No. 81.Downing Street,
29th June, 1836.

SIR,

I have to acknowledge the receipt of your despatch of the 24th May No. 31, enclosing two Petitions addressed to you by persons settled on the Coast of Labrador, deprecating the passing of a Bill which had been introduced into the House of Assembly of Newfoundland for regulating the Salmon Fishery of the Colony. As that Bill was not eventually presented to you for your assent, it is unnecessary for me to allude further to it, but I proceed to notice the other topic in these Petitions, to which you have invited my particular attention.

The Petitioners protest against the right of the Legislature of Newfoundland, in which they are not represented, to make Laws binding on them, and record their belief that they are still under the authority of the King in Council expressing at the same time their wish to remain so. In this view of their situation the Petitioners are evidently in error. By the Statutes 49, Geo. III., C. 27 & 6 Geo. IV., C. 59, as well as by the Royal Commissions to Sir Thomas Cochrane and to yourself, the Coast of Labrador to the Eastward of a line drawn due North & South from the Harbor of Ance Sablon to the 52° North Latitude is annexed to the Colony of Newfoundland. The authority therefore of the Legislature of Newfoundland to pass Laws for the Government of the Settlers at Labrador cannot be disputed; but at the same time the claim of those settlers to be represented in the Colonial Legislature demands, & ought to receive a deliberate consideration.

You will accordingly inform the Petitioners, while pointing out to them the error into which they have fallen, that you will be ready to recommend to the favourable notice of the Council and Assembly of Newfoundland any Petition which they may address to those Bodies, putting forward their Claim to be represented in the Colonial Legislature.

I have the honour to be, Sir,

Your most obedient, humble servant,

GLENELG.

Captain Prescott

No. 553.[*Enclosure in No. 552.*]

COLLECTION OF CUSTOMS DUTIES AT LABRADOR.

[4 March,
1841.]

FOREIGN LETTERS, RECEIVED ST. JOHN'S, NEWFOUNDLAND.
Volume 17, page 432.

[Copy.]

To the Right Honourable Her Majesty's Principal Secretary of
State for the Colonies.

The Memorial of the undersigned Merchants engaged in the
Fisheries on the Coast of Labrador,
Sheweth

That a Memorial was some months since presented to the
Honourable the Board of Trade a copy of which is sent
herewith, and to which they

p. 1492

request Your Lordship's reference, but in consequence of the

Act complained of not having been passed, and sent home for approval, they are informed that the Board is unable to render them any assistance.

That altho the Act was not passed, a Collector has been appointed by the Governor of Newfoundland to receive duties on the Coast of Labrador, and he has accordingly exacted payment of them from several of your Memorialists. His Excellency having considered himself authorised to make such appointment from a despatch of Your Lordship's predecessor Lord Glenelg dated 29th June, 1836.

That your Memorialists would beg to observe with reference to this despatch, that altho there can be no doubt that the Coast of Labrador is by Acts of Parliament therein named, placed within the Jurisdiction of the Governor of Newfoundland, yet it by no means follows that it forms therefore a dependency of the Colonial Legislature, which was not in existence at the time these Acts were passed, and that his Lordship appears to have entirely overlooked the important fact that while the fisheries of Newfoundland are protected from all Interference on the part of other Countries, the British Fishermen on the Coast of Labrador have little more than a concurrent right of Fishery with those of the United States.

That the Governor of Newfoundland has not except during the few years that the Labrador Court annually visited the Coast, exercised any more than an Admiralty Jurisdiction there, one of H.M. Ships being sent round for a few weeks in the fishing seasons.

That there are on the Coast merely moveable fisheries without a Single Town or Village, and without one resident Officer of Justice, Police or Revenue of any kind, so that laws and regulations adapted to the wants of Newfoundland a long settled Colony with regular establishments of Justice, Police &c. would be quite inapplicable to Labrador.

That the attempt to impose duties on Articles employed in the fisheries is also directly opposed to the policy of the Government at home, whose object has always been to encourage them by allowing the import of all Articles used, by the fishermen free of all duties, which privilege is enjoyed by the fishermen of Nova Scotia & those of the United States with whom Memorialists have to compete, the latter being further assisted by bounties.

That the proceedings of the Collector during the past Season afford a striking proof of the injustice which must always result from an attempt to levy duties on the Labrador Coast. He has passed along the Coast in a small vessel calling only at the principal British establishments, or such of them as he thought fit or convenient, passing over all or nearly all, the numerous American traders having indeed no means of knowing whether or not they are engaged in trading or merely fishing Vessels. It is unnecessary to point out the various particulars of injustice which such a mode of proceeding must obviously produce, but it is clear that the mode adopted of levying duties is as unjust & oppressive in practice as the right assumed by the Authorities of Newfoundland is opposed to the

principles of Government & the established policy of the
Mother Country & that while adding to the burdens of the

p. 1493

British Fishermen it confers a Benefit to the same extent on
those of the United States.

Your Memorialists therefore beg that your Lordship will
transmit such instructions to the Governor of Newfoundland as
may serve to prevent any further attempt at levying Colonial
Duties on the Coast of Labrador.

COLLECTION OF CUSTOMS DUTIES AT LABRADOR.

[4 March,
1841.]

FOREIGN RECORDS, ST. JOHN'S, NEWFOUNDLAND. Volume 17.

[Copy.]

To the Right Honourable the Committee of Privy Council
for Trade & Plantations.

The Memorial of the Undersigned Merchants trading with
and having Establishments on the Coast of Labrador.

Sheweth,

That your Memorialists who are extensively engaged in the
fisheries on the Coast of Labrador have recently learnt with
surprize that an Act has been passed in the Legislative
Assembly of Newfoundland, for levying Customs Duties on
that Coast on the various articles used for the purposes of these
fisheries, and Assembly claiming the power of imposing those
Duties on the ground that Labrador is a dependency of
Newfoundland.

That in the Royal Commission authorizing the formation of
the Colonial Govt. of Newfoundland, no mention is made of
Labrador nor is it included in either of the electoral districts
into which Newfoundland with the adjacent Islands was under
the Commission divided.

That since the Establishment of the Colonial Govt., no

Judge, Magistrate, or Officer of any kind has been sent to
Labrador from Newfoundland,

p. 1494

no part of its Revenues are laid out there; nor, as your Memorialists believe, has any measure been attempted or proposed by which its fisheries could be encouraged or its interests in any way promoted.

That your Memorialists therefore are not represented in the Colonial Legislature, & have never derived any advantage from their assumed connection with it, and that if the present attempt to impose Duties be successful they will be compelled to contribute towards the expenses of a Govt. from which they receive no protection and derive no advantage whatever & with which in fact they are if at all, only nominally connected.

That in addition to what is above stated the Memorialists beg further to represent that their trade has for several years been much interfered with by trading Vessels from the United States, as well as British Colonies which every season visit the Coast in great and annually increasing numbers. And as from the nature of the Coast and other Circumstances, it is impracticable, without a large establishment of officers (which is not contemplated) to visit more than a very small proportion of the Harbours these traders would evade without difficulty the payment of the Duties which would be levied on the occupiers of the regular fishing establishments. Thus the Act lately passed, if allowed to be carried into effect, would most oppressively & unjustly add to the difficulties under which the Memorialists labour in their competition with the privileged fishermen of the United States, & would in effect encourage the rival trade of that Country at the expense of the British Fishermen.

Your Memorialists therefore respectfully beg that your Honourable Board will be pleased to take the necessary steps for procuring the disallowance by Her Majesty's Government of the Act of Colonial Legislature above referred to, and in order to prevent its being acted on during the fishing season now commencing, will cause directions to be immediately transmitted to the Governor of Newfoundland to suspend any appointment of proceedings under the said Act.

And your Memorialists will ever pray.

[7 May, 1841.]

GOVERNOR PRESCOTT TO LORD JOHN RUSSELL.

C.O. RECORDS, 194/111, Nfld. 951.

Government House St John's,
Newfoundland 7th May 1841.

MY LORD,

I have the honor to acknowledge the receipt of your Lordship's Despatch of 4th of March No. 97 and in reply I must in the first place beg leave to bring under your Lordship's notice my letter of May 24th 1836 No. 31 and Lord Glenelg's answer thereto of the 29th of June 1836 No. 81. The Memorial of certain Merchants addressed to your Lordship on which my Report is now required refers to Lord Glenelg's said letter and impugns His Lordship's reasoning, but until I am better informed I must believe that every part of this Government, in which a large portion of the Labrador Coast is included, is subject to the Laws whether fiscal or otherwise of the Colonial Legislature by an early act of which the Labrador Court which had existed for several years was abolished in June 1834.

The accompanying copy of a letter from the Collector of the Customs dated the 20th of May 1840 will explain to Your Lordship the circumstances under which Mr. Rendell was appointed Sub-Collector on the Labrador Coast during the last Summer. The machinery of collection was doubtless imperfect and the receipts were not large. Many who ought to have paid duties may have evaded that obligation—but nothing, I conceive, was exacted that was not strictly due.

Having referred your Lordship's Despatch with its accompanying Documents to the Collector of the Customs I append his Report thereupon.

I have &c.
(Signed) H. PRESCOTT.

GOVERNOR PRESCOTT.

SIR,

4 March/41.

I transmit to you, herewith, the copy of a Memorial which has been addressed to me by the Merchants engaged in the Fisheries at Labrador, complaining of an attempt made by the Authorities of Newfoundland to exact payment of duties on that coast; and I have to request that you will favor me with a Report on this subject.

I have &c.

1841.]

**LETTER FROM SECRETARY OF STATE *re*
APPLICATION OF NEWFOUNDLAND LAWS TO
LABRADOR.**

Downing Street,
5th July, 1841.

SIR,—

With reference to my letter of the 2nd of last March acquainting you that the Memorial enclosed in your letter of the 25th of February preceding, which complained of an attempt of the authorities of Newfoundland to levy duties on the Labrador Coast, would be referred to the Governor of the Colony for his Report, I am desired by Lord John Russell to inform you that the Report which has been lately received from the Governor gives His Lordship no reason to doubt that the Labrador Coast, as a dependency of Newfoundland is subject to the same laws, whether fiscal or otherwise, to which every part of the Island is amenable; and that, although from the imperfect machinery of the Collection, some parties on the Coast of Labrador may have evaded the duties, no payment has been exacted that was not strictly due.

I have, etc.,

(Sd) R. VERNON SMITH.

C. HUNT, ESQ.

No. 556.[10 March,
1842.][*Enclosure 1 in No. 555.*]**CHAS. HUNT TO LORD STANLEY.**

Princes Hall,
Old Broad St., 10th march, 1842.

MY LORD,

On behalf of the Merchants engaged in Fisheries on the Coast of Labrador, I beg to call Your Lordship's attention to the accompanying Copies of their Memorials to Your Lordship's Predecessor complaining of an attempt by the Authorities of Newfoundland to levy Colonial duties on the Labrador Coast. The facts stated in the Memorial are briefly as follows.

That the Coast of Labrador is not at all referred to in the Royal Commission authorising the formation of a Colonial Legislature in Newfoundland and is not included in either of the Electoral Districts into which that Colony is divided. That no part of the Revenue of Newfoundland has ever been laid out in Labrador. That no public Officer whatever of Justice, Police or otherwise (except the Collector of Customs) resides on that Coast or is even sent thither. That the British Fishermen have little more than a concurrent right in Labrador with those of the United States, the latter having by Treaty permission to fish on any part of the Coast, of which they avail themselves largely, and at the same time engage in trading with goods on which no duties are or can be levied. The effect therefore of exacting duties from the British Merchant, is simply that of encouraging the American fisheries and injuring our own. Your Lordship will observe that the reply of Lord J. Russell states merely his belief that Labrador as a dependency of Newfoundland is legally subject to the duties levied in that Colony. Admitting that this view is correct which the Memorialists are advised is not the case) they would beg Your Lordship's interference under the circumstances above mentioned, to take such steps as may be necessary for their relief. In the meantime I am to request your Lordship will cause instructions to be sent to the Governor of Newfoundland to desist from the attempt to enforce payment of the duties complained of, which His Excellency last season intimated through the Collector of Customs his intention of doing in the coming Season, and as the Vessels engaged in Labrador Fisheries will leave this Country during April and May, I would respectfully beg your Lordship's early attention to the subject.

I remain, &c.,
(Signed) CHAS. HUNT.

[*Enclosure 3 in No. 555.*]

THE HONOURABLE THE COLONIAL SECRETARY.

Custom House

Saint John's 4 May 1841.

SIR,

His Excellency the Governor having referred to me a Despatch of the Right Honorable the Secretary of State for the Colonies, together with Copies of two Memorials from certain Settlers and Traders at the Labrador with a request that I will make such observations on those documents as will in my opinion assist Her Majesty's Government in coming to a decision on the subject to which they refer.

I would most respectfully observe that the parties to those Memorials appear to labor under a misconception as to the object and intention of the Bill to which they refer in their Memorial to the Board of Trade—the object of that Bill was not the imposition of duties on the Trade of Labrador, each and every Revenue Bill passed by the Legislature from its institution on the first of January 1833 to the present time having provided that the same duties should be raised levied and collected at the Labrador as in the other districts and dependencies of the Colony, but to enable His Excellency to appoint a permanent officer to collect them.

I would also observe that the question raised by these parties, is not raised now for the first time. In the year 1837,

during my absence in England the Acting Collector acting on the opinion of Her Majesty's Attorney General levied the duties, both Imperial and Colonial, on the Cargo of a Vessel belong-

p. 1499

ing to one of the parties to these Memorials which Duties were in ordinary course paid over to the Treasurer of the Colony.

Against this proceeding on the part of the Acting Collector those parties appealed, by Memorial to the Board of Trade, and I have reason to believe they were then informed that the duties in question were due, and that the Acting Collector had only done his duty in levying them.

The correspondence connected with this transaction may perhaps be made available on the present occasion in as much as it will enable the Governor to bring under the consideration of the Government its former decision. I have therefore the honor to enclose Copies of it for His Excellency's information.

I have &c.

J. McMILLAN (?).

THE HONORABLE THE COMMISSIONERS
H.M. Customs, London.

Custom House
St John's Newfoundland
25 July 1837.

HONOURABLE SIRS,

We have the honor to report to your Honorable Board that on the 19 Ultimo the Brig "Visitor" Luscomb Master from Liverpool arrived at this Port having on board supplies for the Fisheries also,

15 puncheons B.P. Rum &c.

* * * * *

all of which articles were accompanied by cockets cleared for Newfoundland and the Labrador at which latter place there is no officer stationed, and not being exempt from duty for the Fisheries, We considered it imperative on us to levy the same, and in doing which we experienced much opposition both from the Master and the Super Cargo, who pretended to be ignorant as to what Port the Vessel was bound, and said they had come in here for orders, but this Statement we regarded as a mere subterfuge as the Super Cargo is son of one of the owners, and who is also owner of the Establishment on the Labrador Coast.

Under these circumstances we deemed it expedient to apply for the Attorney General's opinion thereon, Copy of which we herewith enclose and beg to state that in accordance therewith, We levied the duties, which were paid by the Super Cargo under protest.

We have &c.

THE HONOURABLE MR. SECRETARY CROWDY.

Attorney General's Office

22 June 1837.

SIR,

In obedience to the directions of His Excellency the Governor conveyed to me in your letter of yesterday's date I have the honor to acquaint you for the information of His Excellency, that having carefully considered the facts and circumstances set forth in the Statement of the Case of the Brig Visiter (Luscomb) made by the officers of Customs, under date of the 21 Inst. I am humbly of opinion that in such a Case under the 16 Sec. of the Act 3 & 4 W. 4. C. 59 this port of St Johns may properly be considered the port of that Vessel's arrival within this Colony, the Vessel being bound and goods cocketed and cleared at Liverpool (England) for Newfoundland and Labrador, the latter being a dependency of this Government, and therefore that the Officers of H.M. Customs are justified in requiring the Goods on board the Visiter destined for importation into this Colony, to be entered and duties paid at the Customs of this Port.

I have &c.

DUPLICATE DESPACHES, ST. JOHN'S, NEWFOUNDLAND, 1842-3.

Attorney General's Office,
St. John's, 14th May, 1842.

SIR,

I have the honour to submit to his Excellency the Governor my Report on the subject of the Customs duties payable on Imports upon the Coast of Labrador.

The absence of the Solicitor General from St. John's prevented me conferring with him on the subject, and after waiting some time for the return, I considered that, as there did not appear to me to be any difficult or obscure points involved in the matter, it would be desirable to supply my own report rather than delay for a longer period the object of His Excellency's wishes.

I have &c.
(Signed) JAMES SIMMS.

To the Hon. Mr. Secy. Crowdy.

[May
1842.]**REPORT OF H.M. ATTORNEY-GENERAL OF
NEWFOUNDLAND RELATIVE TO CUSTOMS
PAYABLE AT THE LABRADOR.**

A. D. 1809.

A. D. 1811.

DUPLICATE DESPATCHES, ST. JOHNS'S, NEWFOUNDLAND, 1842-3.

A. D. 1824.

In order to fulfil the Commands of His Excellency the Governor by explaining to him the authorities under which I conceive the Customs duties on the Coast of Labrador have been levied, I shall endeavour to present a concise history of their origin, and of the operations that have been pursued through a series of years, in order to collect the duties in question. By the 14th Section of the Imperial Statute 49 Geo. 3 Cap. 27, the Coast of Labrador from the River St. John to Hudson's Streight, and the Island of Anticosti, together with certain other smaller Islands were re-annexed to the Government of Newfoundland.

A. D. 1834.

A. D. 1825.

The Imperial Statute of 51st *Geo. Cap* 45 authorized the Governor to institute Surrogate Courts of Civil Inducature on the Coast of Labrador which Courts established and continued through a series of years, when the Imperial Act of 5 Geo. 4 Cap 67 was passed, "for the better administration of Justice in Newfoundland, and for other purposes and by the 18th Section of this Act, the institution of Surrogate Courts on the Labrador was abolished and another species of Court of Civil Judicature was instituted, which Court subsisted until the Colonial Act of 4th Wm. 4 (2nd Sep.) Cap 20 repealed its great expense compared with the small advantages which it was conceived the public derived from its administration. No Court has been since substituted in its place.

The Commission conferred on Governor Sir Thomas Cochrane who entered on his Government in October 1825 narrowed the boundaries of that part of the Coast of Labrador thence before annexed to the Government of Newfld. and defined the boundaries to be and extend from the entrance of Hudson Straits, to a line to be drawn due North and South from Anse Lablon on the said Coast, to the 52nd degree of North latitude, and comprising also all the Islands adjacent to that part of the said Coast of Labrador, which boundaries have been continued and set forth in all the Commissions subsequently issued to the Governors of this Colony.

I have had recourse to the documents in the Custom House here, but have been unable to ascertain the year when duties were first collected on

the Coast of Labrador, the extracts however which I have obtained from such documents as I can procure access to, show the amount of duties collected from the year 1826 to 1840, and copies of certain correspondence between the Officers of Customs and the Board of the Commissioners of Customs, will explain, in some degree, the causes which have operated at intervals to suspend the collection of the duties, which consisted chiefly in the difficulty of getting a person competently qualified by character &c. to undertake the collection, and at same time afford him an adequate compensation for his trouble, to which must be added the want of means for his conveyance from place to place, sea-ward along a Coast of considerable extent. During the latter three years that the Court of Civil Judicature exercised its functions, the vessel which served to convey the Judge and Officers of the Labrador Court, was availed of to convey an Officer also to collect the duties of Customs. The extracts from the Customs here referred to I beg leave to submit herewith, under the imperfect system which has been pursued, if system it may be called, it may be reasonably assumed that the duties have not at any period been efficiently collected. The duties in question are those which are levyable under the provisions of certain Acts of the Imperial Parliament enumerated in the accompanying extracts from Customs Documents, and those also which are prescribed in the annual Revenue Acts of the Colonial Legislature which are made operative throughout the Island of Newfoundland and the Dependencies of its Government.

I humbly conceive that it can scarcely be doubted that certain goods when imported on the Coast of Labrador within the Government of Newfld. are legally subject under the several Acts of the Imperial Parliament, and also under the Legislative enactments of the Colony, to the payment of certain duties specified under those authorities, and I also believe that for the protection of the public Revenues and also for the protection of the fair Trader, it is essential that such duties should be efficiently collected. Besides those Establishments on the Labrador belonging to persons exclusively resident in England and Jersey, there are numerous trading and fishing Establishments on the Coast belonging to persons resident in Newfld., and carrying on business at St. John's and other places intermediate between that place and Twillingate, and it is too notorious to be questioned that illicit trade prevails to a considerable extent on that Coast on the import of goods without payment of duty, which was vended and brought into Newfld. by the *numerous* vessels employed at the Labrador which are outfitted chiefly at St. John's and in Conception Bay, Trinity, Greenspond, Fogo and Twillingate and which are cleared out at the Customs "for the Fisheries" under the provisions of the 19th Section of the Imperial Statute 3 & 4 Wm. 4 Cap. 9, but whose people constantly deviate from the *conditions* of such fishery-clearance, and enter into traffic.

It is equally true that vessels of the United States and French Vessels also pursuing the fisheries on the Coast of Labrador, and also vessels our any neighbouring Colonies practice such illicit trade and cause serious injury to the Newfld. Merchants, in the Barter of goods, which have paid no duties, for fish caught by British fishermen, thus inflicting

p. 1506

a double wrong in cheating the Merchant of fish which he ought to receive and defrauding the Revenue of the Customs duties.

While Newfld. continued to be a Naval Station for H.M. Ships, the numerous cruisers operated powerfully to check such illegal practices; but subsequently no provision has been made or efficient means adopted to prevent those injurious practices, and the consequence has been as in all such cases may be reasonably expected, that illicit trade on the Labrador has prevailed to a very injurious extent.

Among the names of parties to the representations made in England to H.M. Secy of State for the Colonies, I observe the firm of D. & J. Slade. The Messrs. Slades are among the oldest Houses established in Newfld. and carry on business at Fogo, Twillingate, and Greenspond, with which locations their establishments at Grady Harbor and Francis Harbor &c. on the Labrador are in immediate connexion, Mr. John Stabb is also of the firm of Stabb Row & Holmwood of St. John's, and Messrs. C. & E. Hunt until very recently were connected with a Mercantile House in St. John's.

The duties which have been made the subject of complaint by certain Labrador Merchants, are thus seen to be such that are imposed under certain Imperial Statutes on the Newfld. trade and Fisheries generally in common with the fisheries and trade of other British North American Colonies; and also certain other duties imposed by the Colonial Legislature of Newfld. on the trade and fisheries of this Colony in particular; and I am of opinion that it would be very difficult to show that any portion of the dependencies of this Government are entitled to claim an exemption from those duties. I am however of opinion that it is very desirable that the duties on the Labrador should be more punctually collected, and that there should be a sufficient number of small cruising vessels employed on that Coast during four months of the Summer for the protection of the Revenue in the prevention of illicit trade and the fraudulent traffic between British fishermen and those of France and America.

The amount of Labrador Revenue collected may appear small, compared with the expense incident to its collection; but I consider that it is essential that the duties nevertheless ought to be collected more punctually on that Coast, and the unlawful traffic prevented, in order to frustrate the practices of the fraudulent trader, which spread a demoralizing influence through all classes, whether Merchants, Planters or Fishermen, while they obviously diminish the Revenues of the Colony.

I am not aware that I can state any other matters material to the subject in question, and I presume that it is unnecessary for me to make any observations on the allegations of the Memorialists who have moved in this matter, "that the Labrador is not included in the Electoral Districts of this Colony, and that therefore the Legislature of the Colony are not competent to impose duties on the goods imported at the Labrador."

[*Enclosure 3 in No. 565.*]

No. 14.

Custom House, St. John's,
Newfoundland, 10th Novr., 1826.

We acknowledge your letter No. 15 of the 9th August last directing us immediately to state at what place on the Coast of Labrador we had stationed an Officer, and whether one Officer

would be sufficient for the due collection of

p. 1508

the duties there, and if not at what places we would recommend other Officers to be stationed. We should have acted in obedience to your Orders by making our report immediately but that we wished to gain further information respecting the extent of the Fisheries on that Coast than we were in possession of, and therefore deemed it advisable to wait the return of Mr. Wm. Langley whom we had appointed to act the last Summer in order to certain whether it would be expedient to make a permanent appointment as it was from Mr. Langley the Collector received the information of dutiable goods being annually sent there as stated in our letter No. 1 of the 11th April last.

The principal Fishing Establishments on that Coast he stated to be as follows, viz, Esquimaux Bay, Dumplin Hr, Packs Harbor, and Grady Harbor, in Sandwich Bay, Domino Harbor in the Isle of Ponds distant twelve leagues from Grady Harbor—Francis Harbor at Cape St. Francis, Battle Harbor—Cape Charles, Fortune, Lance a loop and Blance a Blanc in Green Bay in the Streights of Belle Isle. There is also a Canadian Establishment in Red Bay, there is no communication by land between any of those Establishments. The distance from Blance a Blance the Southern-most Fishery to Esquimaux Bay the Northernmost is 230 miles. Mr. W. Langley carries on a Fishery in Esquimaux Bay—he ran down the Coast in a Boat so far as Grady Harbor distant about eighteen leagues touching in his way at Dumpling Harbour, Packs Harbor and Home Harbor—he collected duties to the amount of £174 14s. 3d. he says he would have gone to Blanc a Blanc the Southmost Fishery but his Boat was too small for such an undertaking. He also informs us that some fifty to sixty vessels from the United Kingdom, Jersey and Canada bringing supplies for the Fishery arrive there yearly, those vessels never make two voyages but remain until the fish is caught and cured and the oil manufactured. They never or very rarely arrive there before the middle of June in consequence of the Ice—there are also some vessels from Nova Scotia, these have no establishments on the Coast, but go there merely to fish and carry away their fish in a green or uncured state, about 200 sail of American Vessels also fish on this Coast.

The fishery on that Coast commences from the 7th to the 5th July, and continues from six weeks to two months in that short time all the fish are caught. Touching the appointment of more Officers we beg leave to lay before you an offer made by Mr. W. Langley which perhaps may supercede the necessity of such appointments, at least with your approbation it might be tried for one year, as by that means we may be able to ascertain the amount of duties likely to be collected annually, and whether it may be necessary to make further appointments. His offer is to provide a good and sufficient vessel and crew to visit the different fishing establishments three times during the

season and to collect the duties for £400 per annum, and should you have any objection to his being engaged in the Fishery he is willing to give it up for an additional £100 per annum. When he received his appointment to act, it was not in our power to promise him any stated allowance; we therefore humbly request you will be pleased to acquaint us with what allowance you may be pleased to make him for his services during the last Summer.

p. 1509

We omitted to say that the duties collected by Mr. W. Langley would have been greater but from the circumstance of a vessel from Liverpool bound to Esquimaux Bay having put into this Port with seven Puncheons of Rum &c. on board, the duties on which were paid here amounting to upwards of £50.

[*Enclosure 4 in No. 565.*]

No. 13.

Custom House, London,
6th June, 1829.

A memorial having been presented to the Board by Mr. William Langley requesting to be remunerated for his services in collecting duties on the Coast of Labrador—

I have it in command to acquaint you that have directed him to be paid at this Port the sum of £50 on account of the services alluded to and to be informed that he is at liberty to lay before them through you a statement of any further claims which he may consider to have on the Revenue for collecting the duties in question and you are to report to the Board whether you are satisfied that the sums paid to you by Mr. Langley were the whole amounts of duties received by him, and whether the parties who paid the same passed regular entries with him previously to the duties being paid.

I am further to direct you to report the nature of the Trade carried on upon the Coast of Labrador at what part thereof the goods are generally landed the description and amount of goods annually imported—the probable annual amount of duties payable on goods and from what places the vessels resorting to Labrador are most usually cleared. You are also to report whether in the event of the Board deeming it expedient to sanction the employment of an Officer on the Coast of Labrador such Officer could collect the duties efficiently if stationed at any particular place, or whether it would be necessary that he should continue afloat and proceed from place to place and if so he would require assistance and of what nature and what would be the probable annual expence. Likewise whether any and what check could be had on the proceedings of such Officer in order to ensure his duly accounting for all monies received by him—and any other

observations which may occur to you upon the subject.

I have at the same time to inform you that Mr. Langley has been apprized that the Board cannot sanction his resuming the collection of duties on the Labrador Coast until they shall have received your return to certain enquiries which they had considered it necessary to make.

(Signed) W. MACLEAN,
P. Secy.

No. 570.[*Enclosure 5 in No. 565.*][10 Sept.,
1829.]

No. 16.

Custom House, St. John's,
Newfld. 10th Sept. 1829.

We acknowledge your letter No. 13 of the 6 June last acquainting us that Mr. William Langley had presented a Memorial praying to be remunerated for his services in collecting the duties on the Coast of Labrador, and that he has been paid £50 on account of his services and was at liberty to lay before the Honble Board through us a statement of any other claims which lie may consider he has on the Revenue for collecting the duties in question; and directing us to report whether we are satisfied that the sums paid to us were the whole amount of duties and whether the parties passed regular entries with him previously to the duties being paid &c.

In reply we respectfully acquaint your Honors that Mr. Langley's character was well known to us long before he was employed in the service of the Revenue, and had we not been satisfied of his integrity we should not have placed such confidence in him—he on his return from the Labrador always laid before us the Cockets and other Documents granted for the Cargoes imported there, for our inspection; therefore we feel assured that he has fully accounted for all the duties collected by him. We are not prepared to say whether the parties passed regular entries with him previously to the duties being paid. Respecting the nature of the Trade carried on upon that Coast we humbly beg leave to refer your Honor to our letter No. 14 of the 10 November 1826 wherein we gave all the information in our power on that subject and which we derived from Mr. Langley who having for several years been engaged in the Fishery on that Coast possesses as to the nature and extent of the Trade. We think the amount of imports annually may be estimated at from Twenty to Twenty thousand pounds, and as we cannot pretend to say what the probable amount of the Revenue may be, we acquaint your Honors that in the three years Mr. Langley has been employed, his collections amount to £585 18. 11 and out of that sum his last years collection amounted to £359 4. 8. Should your Honors deem it expedient to sanction the employment of an Officer on the extensive Coast, we think the duties could not be efficiently collected by a stationery Officer as from the great distances of many of the Establishments from each other it would be impossible for him to ascertain whether due entries were made of all the Cargoes imported therefore if an Officer be employed he would require a vessel of about 50 Tons burthen with four men at the least, and if a vessel of that description were hired for the express purpose of the Revenue we think the expense may be

estimated at £50 per month, which for the time it would be necessary to employ her would amount to about £250 the season.

Touching the check of such Officer we can suggest no other than those that he should be required to render accounts to us according to the Forms No. 62 & 63 of the Imports and exports, and to deliver to us all the Cockets

p. 1511

and other Documents granted for the Cargoes imported, for our inspection. Enclosed you will receive an account of the claims made by Mr. Langley on the Revenue and we deem it necessary to observe that the charges made by him for the Boat and crew are estimated so low in consequence of the Boat being his own and the crew consisted of men employed by him in the Fishery which charge appears to be estimated according to the time he was deprived of their services, and he appears to have charged the salary at the rate of that of the Sub-Collectors at the time of his appointment.

GOVERNOR HARVEY TO LORD STANLEY.[4 June,
1842.]

LETTERS SENT, ST. JOHN'S, NEWFOUNDLAND. Volume 6, page 216.

Exc.

No. 19

4th June, 1842.

MY LORD,

I had the honor to receive your Lordship's despatch No. 46 of the 20th March last, and having referred the same and its enclosures to the Attorney General I now beg to transmit that Officers report thereon, together with the copy of one previously made by the Collr. of the Customs on the same subject and which was forwarded to Lord Jno. Russell in my predecessors despatch No. 40 of the 7th May 1841.

Prior to the Establishment of a Legislature in this Colony, a Court consisting of a Judge, Clerk and Sheriff existed for the Labrador Coast, and which Court held an annual Circuit during the Summer months.

In 1834 this Court was abolished by an Act of the Legislature and no substitute for it has yet been provided.

In 1840 a Bill intituled "An Act to provide for the collection of the Revenue and for the execution of the process of the Supreme Court of Nwfld. on the Coast of Labrador and the Islands thereunto adjoining, was sent up to the Council by the House of Assembly, but did not pass, and was not renewed in the succeeding session.

Whilst I cannot doubt that such portion of the Labrador Coast as is by Act of Parliament and the Commissions to the several Governors included within the limits of this Government, is subject to the duties imposed by our annual Revenue Act, which extends them to the "dependencies" of the Colony, I at the same time feel that the absence of any legal tribunal in that part of my Government is a hardship on its Inhabitants, and to which I trust the Legislature when again in Session will be able to apply a remedy.

I avail myself of the occasion to inform your Lordship that it is my intention to visit Labrador during the present season in the event of the naval Commander in Chief's furnishing me with a Ship of War for that purpose.

I have &c.

(Signed) J. HARVEY.

The Right Honble. Lord Stanley,

No. 573.**COMMISSION TO PREVENTIVE OFFICER OF
COLONIAL REVENUE FOR COAST OF LABRADOR.**[10 May,
1850.]

C.O. 197/12. JOURNAL OF ASSEMBLY, NEWFOUNDLAND, p. 168.

Copy of Commission to James Tobin, Esq., as Preventive Officer, St. George's Bay.

Copy. By His Excellency Sir John Gaspard Le Marchant, Knight,
and Knight Commander of the Orders of St. Ferdinand and of Charles the Third of Spain, Governor and Commander-in-Chief in and over the Island of Newfoundland and its Dependencies.

Whereas it is advisable and expedient that an officer in the Preventive Service of the Colonial Revenue should be appointed at and for St. George's Bay, and all other ports and places on the Western coast of this island, and on the coast of Labrador within the Government of this island, as well for the convenience of persons in trade, as for securing the due payment and collection of the duties payable on the importation of Goods, Wares and Merchandize into this Island and its Dependencies:—

I, the Governor of Newfoundland do therefore appoint you, James Tobin Esquire to be Preventive Officer in the service of the Colonial Revenue for the ports and places aforesaid, with full power and authority as such Officer to admit, according to the Rules and Forms by Law provided, all ships and vessels to entry and clearance at any of the ports aforesaid, and to admit to entry and importation or to exportation, in customary form and manner, all such goods and merchandize as may be lawfully imported into or exported from the Island of Newfoundland or its dependencies; on due payment to you of the duties payable by law, on such goods and merchandize; and for which duties, and all your proceedings herein, you shall duly account at such times and according to such rules and forms as shall from time to time be prescribed unto you by the Collector of Her Majesty's Revenue at St. John's, and for the execution of the duties of your office in the premises this shall be your Warrant.

James Tobin Esq.
To be Preventive Officer,
St. George's Bay.

Given, etc. 10th May, 1850.
By His Excellency's command.

Signed JAMES CROWDY.

**PRENDERGAST'S REPORT ON COLLECTION OF
REVENUE (PROTESTS; LONG REPORT).**

COLONIAL OFFICE RECORDS 197/21. JOURNAL OF THE ASSEMBLY.
Appendix.

H.M. Hired Brigantine "Charles,"
1st September, 1856.

SIR,

I have the honour to acquaint you, for the information of His Excellency the Governor, that on my arrival on the Coast of Labrador, I proceeded to Battle Harbour, and requested the agent of Messrs. T. & D. Slade to report and enter the several vessels consigned to their establishment the past season—as well as the Brig "John & Thomas," which just arrived from Poole. I handed him the Proclamation of His Excellency the Governor. In reply he stated that his present instructions did not warrant him either to give the information I required, or pay duties. . . . About fifteen years since a similar demand was made by the Governor of Newfoundland; the parties interested in the trade on the coast of Labrador, applied to the Imperial authorities by petition and otherwise on the subject, since which no demand was made by the Governor of Newfoundland. It was considered the right then asserted to collect duties on the coast was abandoned. It was therefore why he had no instructions relative to that subject; previous to my arrival, he became acquainted that it was the determination of the Government to collect the duties on the coast of Labrador, which he immediately communicated to his employers by way of New York, asking instructions to guide him in the matter. In reply to some questions put to me touching the representation of the coast of Labrador, in the Legislative Assembly of Newfoundland, and providing for the religious and moral education of the people, I simply stated that the object of my visit was to see, and enquire, and to report, and that I felt assured the Government was most anxious that the population residing on the coast should enjoy and participate in as full a manner, its benefits as any people under its government.

The schooner "Hibernia" of Halifax—Sullivan, master and owner of the vessel and cargo, put in the same evening; I acquainted him with the object of my calling and made the usual demand, he objected to comply on the grounds that the Proclamation was issued after he had disposed of the greater part of his cargo; he has been engaged in that trade for the last

p. 1515

seven years; there was notice at the Customs of Halifax of an intention of the Government of Newfoundland to exact duties on the coast of Labrador; he was desirous to give no opposition, but until it became general, he considered the demand unreasonable.

At Henly Harbor, Mr. Kennedy has an establishment chiefly engaged in the salmon fishery; a schooner also belonging to him was there loaded with goods of every description, which lie intended to send bartering on the coast. I desired him to report her cargo and pay the duties. His refusal was nearly in the same terms as the one before stated.

L'Anse Sablon. I waited on the agent of Messrs. De Quetville, acquainted him with the nature of my visit and required that he would report the several vessels and cargoes which were consigned to that firm; his objections were couched in terms most respectful, similar to that of the agent at Battle Harbor; he assured me he would lay the Proclamation of His Excellency the Governor, with the Revenue Act, before his employers; there are two branches of that establishment, one at Isle au Bois, the other at Forteau, both of which are subject to and under the control of the agent at L'Anse Sablon.

The same evening the schooner "Belle Isle"—Taylor, Master, vessel and cargo owned by Daniel Cronan, Esq., of Halifax, came in; I went aboard, made the necessary demand of the master, he said he understood when at Halifax no duties were required on the Coast of Labrador; he had no instructions from the owners relative to it, he could not comply, but would not give any opposition, so that I may act as I may deem proper, stating that the chief part of his cargo was delivered on the coast above; on examination I found that nearly all the cargo was landed. I seized and marked one puncheon of molasses, two boxes manufactured tobacco, and two chests of tea, desiring to note my proceedings on his log; he said Mr. Cronan would be on the coast shortly in the schooner "Labrador," I did not then remove the articles.

Isle au Bois. I went to the agent of Messrs. Boutiller Bros. and requested he would make entry of the shipments he received during the Spring, as well as the vessel just arrived from Liverpool; he made similar objections to the agent of Messrs. De Quitville, and informed me that their chief establishment was at Gaspe, and that there was another branch of the establishment at Forteau under the management of a nephew of the owners; he promised to communicate the object

of my visit to his employers.

Forteau. I called on the agent of Messrs. De Quitville and on the agent of Messrs. Boutiller Bros., presented each a copy of the Governor's Proclamation; who said that either did not receive this season a direct importation; the same evening the schooner belonging to Mr. Cronan of Halifax came in. I went on board, stated the object of my calling to the supercargo, Mr. Pitts, a nephew of Mr. Cronan—his answer was similar to the reply of Captain Taylor of the “Belle Isle.”

L'Anse a Loup. I waited on the agent of a large establishment there, acquainted him with the particular object of my calling; he referred me for

p. 1516

the information and other matters I required, to Messrs. Stabb, Row & Holmwood of St. John's, Newfoundland, who were the sole owners and suppliers of the establishment.

Carroll's Cove. The expected schooner “Labrador,” of Halifax, owned by Mr. Cronan, was there at anchor. I found that Mr. Cronan was not on board, and that a change of masters took place; Captain Taylor, late of the “Belle Isle,” was then in charge of the “Labrador”; he informed me that the “Belle Isle” was then loaded with oil, skins and fur, the collection of himself and Mr. Pitts; that she went off for Halifax . . . the “Labrador” was loaded with a variety of articles; he said Mr. Cronan did not come down in the “Labrador” as he expected . . . he was not then in a better position to comply with my request than before.

Red Bay. The schooner “Endeavour” of Halifax—Capt. Flick, came in the day after I arrived; I went on board and demanded the duties on the cargo; he said he was told by his suppliers, Messrs. Allison & Co., that there were no Customs established on that coast, that no duties would be required; being under that impression, he could not at present comply, wishing me to understand that he gave no opposition, and that two other schooner. were on the coast supplied by the same merchants.

Cape Charles. I waited on Mr. Neil, to whom a vessel from Halifax had arrived; I made the customary demand, to which he replied that it was his desire and wish to comply, but as others on the coast he saw refused for one reason or the other, it could not be expected that he only should pay, more especially when all his supplies, except that cargo, was received in Newfoundland and paid the duties required; he hoped the question would shortly be settled and that all parties trading or supplying on the coast would stand equal.

Spear Harbor. The schooner “Margaret Ann” of Halifax,

Drake, master, supplied by J. B. Hay, Esq., of Halifax, was in that port when I arrived. The master, in reply to my demands, said he was not bound to discharge cargo; I then said I would lock up his hatches under seal; he then made his objections, which were similar to those already stated, and that he sailed under the impression that duties would not be demanded; he was rather confirmed in that impression from the circumstances of the Officers of Customs at Halifax giving him blank certificates to be filled up and signed by persons on the coast, as no persons authorised by the Government of Newfoundland was known to them. The certificate was for the purpose of obtaining drawback, etc., etc.

St. Francis Harbor. I went over to the agent of Hunt & Henly, and required he would furnish me with a detail of the importations of that establishment during the Spring; he declined to furnish either, as he did not feel authorised by his instructions, without further communicating with his employers.

Venison Island. I called on the agent of T. & D. Slade, he said he was acting under instructions of the agent at Battle Harbor, to whom he respectfully referred me.

p. 1517

Indian Island. I waited on Mr. Warren, who said he knew that no one on the coast would pay the duties; he respectfully declined to do so for the present.

Gready. I called on Mr. Lanmore, making the usual demands, who said he purchased the chief part of his supplies at St. John's, Newfoundland, which paid duty; he did so in preference to importing, to guard against disappointment; he had no objection to the demand for what he had imported, and would readily pay when, or at such times, as it may become general, saying it would cause him to put it on each article in addition to his present charge.

I called on the agent of Hunt & Henly, who said he received all his supplies from the chief establishment at Cartwright, and was under the direction of the agent there.

Lont Island. I called on the agent of Messrs. Hunt & Henly, who made a similar statement as the agent at Gready.

I expected to meet Mr. Goodridge, the agent of Messrs. Hunt & Henly's establishment at Cartwright; he left the morning of my arrival. I was anxious to meet him, being informed that Mr. Goodridge was notified by the agent of the Hudson's Bay Company, when he expected the appointment by a magistrate from the Governor of Newfoundland, requesting that he may not act thereon, and that the Company was prepared to appoint under a Commission Magistrate of Labrador. I requested Mr. Larmore to obtain from Mr.

Goodridge, a copy of the said notice, for the service of the Government, believing the Company must have misunderstood the wording of the charter; the Government Commission is simply of the coast of Labrador and the islands adjacent, also Her Majesty by treaty, gave the right to the subjects of the United States to fish and go on shore and dry it on the coast.

On every application, I presented His Excellency the Governr's Proclamation, notifying each to consider and receive the Proclamation, a direct notice from the Government of Newfoundland, and its determination to collect the revenue on all goods and merchandise imported to the coast of Labrador.

Whilst on the French shore I was informed that a person named Buck, from Halifax resorts White Bay, trading; he says he enters his vessel and cargo at Green Spand, and pays the duties there. I had no opportunity of enquiring of the collector of the fact. Another named Charles Higgins of Halifax, resorts White Bay, French Shore, and each side of the coast in the Straits of Belle Isle.

I have, etc.,

**EXTRACT FROM THOMAS FRASER'S LETTER FROM
LONDON TO D. A. SMITH AT ESQUIMAUX BAY.**

(HUDSON'S BAY COMPANY PRIVATE CORRESPONDENCE LETTER BOOK.
638, pp. 177-179.)

May 6th, 1863.

. . . . "Messrs. Hunt and Henley have directed the attention of the Board to the following notice which has been recently issued apparently by the Government of Newfoundland as it is dated from the Secretarys office St. Johns [sic].

"Notice is hereby given to all whom it may concern that after the expiration of the present fishing season the duties imposed by the Annual Revenue acts will be collected on that part of the Labrador Coast lying within the Government of Newfoundland and the proceeds applied so far as may be necessary to the expense of protecting the fisheries on that Coast and of the maintenance there of a court of Limited Civil and criminal Jurisdiction.

(signed) R. CARTER,
Acting Colonial Secretary.

"Secys. Office,
St. Johns, Newfoundland,
10th June, 1862."

With respect to this Notice, the Board direct me to say that they have joined the Merchants connected with Jersey, Messrs. Hunt & Henley and other parties interested in the trade of the Labrador Coast, in a memorial which has been addressed to His Grace the Secretary of State for the Colonial Department in which attention is called to the injustice which any attempt on the part of the Newfoundland Government to enforce the duties in question will do the few traders regularly settled in that Country while it will leave the American free trader exempt from the tax. This is not the first attempt made by the Newfoundland authorities to enforce this so called right. Hitherto they have found it impracticable to do so, and in point of fact it is believed that they have no right nor jurisdiction to enforce the levying of duties of any kind on the Labrador Coast. It is the wish of the Governor and Committee therefore that if you should see no strong reason for adopting a different

course you should act in concert with the other Settlers and traders in your district in resisting the imposition of the duties in question by all peaceful means. The Board understand that in the event of any Collector being sent round to demand the duties they are to refuse payment, and the Board will approve of your adopting a similar course. It is also the intention of the other parties concerned to decline to attend to any Summons to a Court or any other proceeding that may be adopted by the Collector for insisting on payment and in this respect also it will be as well to act in concert with the others if you should not consider that course as positively objectionable. In short as I have already stated the demand is an injustice which ought to be resisted by all legal means.

The Ship by which you will receive this letter is to leave Dartmouth on Saturday Morning the 9th instant.

4th June 1863.

SIR,

Referring to the instructions which you will receive from the Acting Colonial Secretary by order of the Governor and Council, His Excellency has to direct your attention to the printed copy above of his Commission defining the Jurisdiction of Newfoundland, and to which you will strictly adhere in the performance of the duties which you are entrusted to carry into effect.

The Governor will direct that several Charts shall be placed on board the Schooner.

No. 1. The Gulf including the Strait of Belle Isle on this Chart the Western limit of Newfoundland is laid down, which is Latitude 51° 25' North, Longitude 57° 9' West, and from that parallel there is a line drawn by Captain Chief of the Surveying Department, due North and which you will observe includes within the Governor's Jurisdiction "Blanc Sablon" and the "Woody Islands" The term "due North" in a matter of boundary means a true North line, that is "from such a place to such a place" includes both; or for instance from the 1st May to the 1st June includes the whole of the two days.

No. 2 Chart is one of St. Lewis Inlet just published and No. 3 Straits of Belle Isle to Cape Chudleigh In this Chart the Northern limit of the Governors Jurisdiction is Latitude 60° 37' North Longitude 65° West but no accurate survey of the Cape has been made for many years.

These Charts with any others which the Governor may send for the use of the Schooner, must be delivered to the Colonial Secretary on her return.

The limits it seems may be safely taken as extending to

three miles, or a marine league from the beach seawards Bays, or other inlets lying between headlands, and other points of the mainland being territorial are subject to the ordinary jurisdiction to which the main land owes its obedience; and while asserting the authority of Colonial Law in Colonial waters, the Imperial Government desire the Governor to enforce upon you, that you will take care to do so in a manner which is likely to be least offensive to any foreigners who may fall within the scope of your instructions.

p. 1522

As it is many years since duties were collected on the Labrador the law for imposing them having fallen into abeyance in consequence of the too expensive Court which was then conjoined with it, you will no doubt find that the Traders, Merchants &c will be averse to their collection now

You will therefore act with prudence and moderation in performing your duty, referring any parties who may complain to the Government, assuring them that His Excellency and the Council have been repeatedly urged in Justice to Her Majesty's Subjects within this Island, to adopt the measures which they have at last resorted to, and to place Labrador on the same footing as Newfoundland by extending to the Trade of that dependency the payment of the same duties as are collected from the residents here.

You will be furnished with a copy of the interesting Report of the late Mr. Rendell, who two and twenty years ago, left St. John's on the 4th of July in a boat the crew of which consisted of four men and proceeded to Labrador to receive the Revenue and to collect information respecting that Coast for the use of the Legislature. It will be seen that Mr. Rendell travelled over a distance of 1200 miles, at an expense of £63 and collected at that time Revenue amounting to £205.

One of H.M. Ships will be cruising on the Coast for the protection of Commerce and the Fisheries, most probably the Vesuvius and you will take care to observe and attend to any instructions which Captain Hamilton or the Commanding Officer of any other of H.M. Ships may think it expedient to give you in regard to the service you are employed in.

It is likely you that may find opportunities to communicate with the Government during your stay at Labrador and they will expect to hear from you. At the same until you make your final report it will be advisable that you avoid sending partial statements to other parties *relative to the performance of the duties you are entrusted with*. On all other matters of course you will communicate with your friends as you may consider necessary.

I have &c.
(Signed) A. BANNERMAN,
Governor, Newfoundland.

James Winter, Esq.,
Collector.

No. 581.**EXTRACT FROM MR. D. A. SMITH'S LETTER**[22 July,
1863.]DATED AT CARTWRIGHT, SANDWICH BAY, 22ND JULY, 1863; TO
THOMAS FRASER AT LONDON.

(HUDSON'S BAY COMPANY CORRESPONDENCE.)

With respect to the Notice issued by the Government of Newfoundland which appears in your letter of 6th May, I fully agree in opinion with the Board, that it would be, if not illegal, at least unjust to levy duties on the Labrador for the purposes mentioned in the Document referred to, and I shall follow in the matter the course pointed out by the Board. I would however take the liberty of remarking, that as American traders will be equally subjected to the payment of duties on all articles not exempted by the Reciprocity Treaty, they will stand precisely on the same footing as resident merchants and Traders. The act of the Newfoundland Legislature adopting the Reciprocity Treaty expressly declaring that "similar articles being the growth, produce and manufacture of the United Kingdom, British North American Provinces, or of the Island of Prince Edward, or the Channel Islands shall be admitted Duty Free, notwithstanding any law to the contrary."

TO THE ADMIRAL AND GOVERNOR, RELATIVE
TO THE FISHERIES, 1863.**

(EXTRACT FROM JOURNAL OF HOUSE OF ASSEMBLY, 1864,
Appendix, page 470.)

H.M. Ship *Vesuvius*,
St. John's, Newfoundland.
September 30th, 1863.

SIR,

The season for the fisheries being over, it is with much pleasure I am able to announce to Your Excellency that there has been a great improvement over the past two summers. I have visited the Labrador Coast from Bradore to North West River, at the head of Hamilton Inlet, or Gros Water Bay, as it is more commonly called by the fishermen, and I think the catch of cod will average 100 quintals a man. The catch of salmon has been very large, particularly at Chateau and Sandwich Bays: in the latter 1500 tierces were caught, principally in Eagle River, where 34,000 lbs. have been preserved fresh. Messrs. Hunt have also established two other posts for preserving, at Paradise and Divers Islands; and next year they intend commencing at Cape St. Francis. It is a valuable branch of the fisheries, giving much more employment than simply catching and pickling the fish, as during the winter the tinmen are employed making the tinware, and other men making boxes, and preparing firewood for the boilers; they also make at Eagle River large quantities of tinware, which is much sought after by Newfoundlanders who fish in the vicinity, as being far superior to anything of the sort they can get at St. John's. Messrs. Hunt have a branch establishment in Davis's Inlet, about 120 miles beyond Cape Harrison, and the Hudson's Bay Company one at Kypecocke, 70 miles beyond it, where they trade with the Esquimaux for skins, oil and salmon. The Hudson's Bay Company have posts at Rigolette and North, West River, in Hamilton Inlet, and also posts in the interior, about 300 miles; from these they bring the furs collected from the Nescopi Indians down to North West River every year. Numbers of seals are caught every spring, at the upper part of the Inlet, by the residents and Mountaineer

p. 1525

Indians; the latter at other times live in the mountains on each

side of the Inlet, occasionally visiting the ports to barter skins for ammunition, &c.

I have, etc.,

(Signed) R. VESEY HAMILTON.
Captain and Sr. Officer, Newfoundland.

His Excellency

Sir A. BANNERMAN,
Governor, Newfoundland.

P.S.—In reply to Your Excellency's question I beg to inform you that I heard of no forcible opposition to the Collection of Revenue. The Agents, under instruction from the Merchants, made considerable difficulty, taking care, however, to keep within the Law. Considering it was the first attempt, for many years, to raise a revenue on the Labrador coast—it has been very successful, both with Merchants' establishments and trading vessels.

(Signed) R. VESEY HAMILTON.

MR. THOMAS FRASER AT LONDON.

(HUDSON'S BAY COMPANY CORRESPONDENCE.)

I learn from Messrs. Hunts people that the Collector of Customs appointed by the Government of Newfoundland called upon them in August last, and that after an attempt to resist his demand, they were at length compelled to pay duties on the goods imported by them this season. The collector did not proceed to Esquimaux Bay, but is said he intends doing so next year, with the view of exacting duties there also. I have however been informed by Captain Hamilton of H.M.S. "Vesuvius," stationed on the Labrador coast for the protection of the fisheries, who visited North West River on the 13th Sepr. that that post is not within the portion of the Labrador under the Government of Newfoundland, and that it is very doubtful whether Rigolet is subject to that Colony—indeed he appeared to be of opinion that both stations must be held to be within the limits of the Company's Charter but of this the board will be better able to judge in which case duties cannot be levied on goods imported at these posts. The only other trading post the Company have on this Coast is Kibokok, where the amount of business transacted is very trifling.

Colonies, with reference to the Imposition and Collection
of Duties on the Coast of Labrador.

Downing Street,
5th December, 1863.

Sir,

With reference to my dispatch No. 46, of the 1st inst., transmitting to you an order of Her Majesty in Council, leaving to their operation, Chapters 1, 2 & 3 of the Act, of the Legislature of Newfoundland during the year 1683, I have the honour to transmit to you a copy of the answer which has been returned, by my directions, to various remonstrances against that portion of the first named act, which relates to the imposition and collection of duties on the coast of Labrador.

I take this opportunity of suggesting that the net proceeds of this source of revenue should be applied to the administration of justice and the protection of fisheries in the district in which they are raised.

No. 586.[5 Dec,
1863.][*Enclosure.*]**LETTER FROM F. ROGER TO SIR E. HEAD AND
OTHERS.**

Downing Street,
5th December, 1863.

Sir,
Gentlemen,

I am directed by the Duke of Newcastle to acquaint you that His Grace has had under his consideration the Act of the Legislature of Newfoundland Cap. 1 of 1863, against which you have remonstrated, so far as it provides for the imposition and collection of duties on the Coast of Labrador.

His Grace did not see anything in the various representations which he has received in opposition to this Act, which would have justified the unusual and expensive course of discussion before Her Majesty's Privy Council.

On the constitutional objections made to this Act, His Grace consulted the law officers of the Crown, who are of opinion that it is competent to the Legislature of Newfoundland to pass laws binding on the coast of Labrador, and His Grace thinks it by no means unjust, but to the contrary, that a revenue should be levied there sufficient to defray the expense incurred or which ought to be incurred by the Government on that coast.

With respect to the machinery of the Act, the Commissioners of Customs, to whom that point was referred, are of opinion that the provisions of the law are not necessarily oppressive.

Consequently, His Grace has not felt at liberty to advise that Her Majesty's Council should dissolve this Act, which accordingly has been left to his operation. At the same time he considers that if taxes are to be imposed by the Newfoundland Legislature on persons inhabiting the Labrador coast, these persons should be enabled to send representatives to the Newfoundland Assembly, and His Grace has accordingly recommended to the Governor, that the Act regulating the Representation should be so altered as to effect this object, so far as it can be effected by some alteration to the law.

I am, etc.,
(Signed) FREDERICK ROGER.

**REPORT OF THE COLLECTOR OF REVENUE ON
THE COAST OF LABRADOR, 1864.**[26 Oct.,
1864.]

COLONIAL, OFFICE RECORDS 197/39. JOURNAL OF THE ASSEMBLY.
Appendix.

Report of the Collector of Revenue on the Coast of
Labrador, within the limits of this colony.

Receiver General's Office,
St. John's,
October 26, 1864.

SIR,—

In handing you herewith for the information of His Excellency the Governor, the report of the Collector of Revenue at Labrador for the present year, I take the liberty of calling special attention to some circumstances connected with Messrs. W. Fruing & Co., at Woody Island, Straits of Belle Isle, as regards their payment of duties last year.

After some considerable objection and delay, they consented to pay (under protest) by draft at 90 days on their firm at Jersey. This draft was returned to me protested. The reason assigned that the establishment was not within the jurisdiction of the Government of Newfoundland. The Attorney general took the case in hand and instituted proceedings against them, the result of which was (although the case did not come into Court) payment of the amount of the original bill and all costs under written protest. Copy of which I enclose. The duties for the present year were likewise paid "under protest."

I will be glad to be instructed by His Excellency how I am to act in the future in collecting duties at Woody Island. Is it within the jurisdiction of this Government? And in the event of Messrs. Fruing & Co. taking proceedings against me can they sustain their action?

I have, etc.,
(Signed) J. BEMISTER.
Receiver General.

Hon. Robert Carter,
Acting Colonial Secretary.

[26 Oct.,
1864.]**REPORT OF THE COLLECTOR OF REVENUE ON
THE COAST OF LABRADOR.**St. John's,
October 26th, 1864.

SIR,

I beg to submit the following report on the proceedings connected with the collection of duties on the coast of Labrador during the past season.

Forteau, 23rd June. On arrival I found that the Nova Scotia fishing vessels had not begun to make their appearance but were daily expected to arrive. Three vessels had arrived from Jersey (having come down the Straits) one to each of the mercantile firms at the place, viz.:—

Messrs. De Haume,
,, Le Boutiller Bros. and
,, De Quetteville & Co.

These houses reported their vessels—the two former paid duties on their cargo; on applying to the third for duties, I was referred to the agent at Blanc Sablon. While at anchor in the harbour a vessel arrived, which on boarding, I found to be a Nova Scotia trader, and put a man on board. The next day the master entered his vessel and paid duties; by a bill on Jersey procured from one of the firms here. Two American vessels also arrived while we were at this place, the captains came on board the “Volant” and reported their vessels, at the same time expressing their satisfaction in complying with the demand for duties, saying that they would gladly pay the few shillings demanded from them, while they enjoyed the advantage offered to them by the Newfoundland Government: viz.: the protection of fisheries by a commissioner and a man of war, and the presence of a judge to administer justice and to settle differences among them. Here I had much pleasure in noticing that during the past two years in which the revenue vessel had visited the Labrador coast, where hundreds of Nova Scotia and American vessels have been constantly mixing with those of fishermen, not a single case of dispute or complaint among those fishermen has come before the court. The vessels here having all entered we proceeded to

Blanc Sablon, 27th. Here we found several vessels which had arrived to the several Jersey mercantile and fishing establishments, also 5 Nova Scotia fishing vessels, all of which I boarded and requested the masters to

report. The next day it blew a gale, which prevented us from doing any business. On the following day, 29th, I visited Woody Island (Isle au Bois) and went to the establishment of Messrs. Boutiller Bros. and saw Mr. Boutiller and informed him of my business. He readily complied with my request, sent the masters of the vessels on board with manifests, bills of lading and invoices, and paid duties on all goods. The amount received from this firm this year is much less than last year, owing to short importation of spirits, viz.:—gin, and whiskey, which they imported largely last year, but which they have now abandoned altogether, on account of the imposition of duties.

I then called upon Messrs. Fruing & Co. Mr. Fall the agent, objected to pay on the same grounds as last year, viz.: that their place of business was not within the jurisdiction of Newfoundland, the boundary line being a small brook which ran a short distance to the eastward of their premises. This, however, I showed him was an error on his part, and he afterwards entered his vessel and gave a bill for the duties (under protest).

30th. Visited the establishment of Messrs. De Quetville & Co. The agent Mr. Lesellem received me in a most friendly manner and expressed his readiness to pay the full amount of duties on his importations.

I have great pleasure in noticing the honourable and straightforward manner in which this firm, by their agent, transacted their business, the entire satisfaction I experienced in dealing with them, and the readiness with which the agent paid me the large amount of duties on their goods. which was nearly double that which was paid by the same firm last year. The masters of the Nova Scotia fishing vessels, after having been repeatedly called upon to report, at length came on board, but with great reluctance, assigning as their reason for not having complied when called upon, that at the Custom House at Halifax and elsewhere, they had been led to understand that the payment of duties could not be demanded by the Collector of Labrador; and therefore they considered that they were justified in resisting, and it was not until a great deal of time and trouble had been taken to explain matters to them that they consented to pay the few shillings demanded.

July 1st. Passed by Forteau, saw no ships has arrived except a steamer which we were informed was a French man-of-war. Arrive at L'Anse a Loup.

July 2nd. Went to Pinware, where the judge held court.

6th. Went to Red Bay. Here the judge held Court 7th.

11th.

On board this vessel [Arien] I found that they had met for the purpose of deliberating on the subject of the duties, and had come to a united deter-

p. 1537

mination to resist payment. Being anxious to arrive at an amicable settlement (the number I had to contend with being so great) I produced and read the Royal Gazette containing the correspondence between His Excellency the Governor and His Excellency the Administrator of the Government of Nova Scotia on the subject of the collection of duties. This had the effect of convincing a few, who complied without further opposition. The majority, however, still refused, and it was not until after repeated applications and threats as to consequences of further opposition, that they were prevailed on to report their vessels, and paid the small amounts demanded of them.

18th. The master came on board and entered his vessel [the Margaret]. On requesting payment of the duties, Mr. Kennedy said he had no money, but had written to Halifax to be advised how to act. I told him that as the order given by me last year had not been paid, in due course, I had now no alternative but to take a sufficient quantity of goods to pay the duties and expenses incurred, but offered to take his note of hand, payable on my return from the northward. This he would not consent to, when, having given him sufficient time to consider, and he still refusing, I ordered the "Volant" alongside and had two puncheons of molasses taken on board, when he came and begged of me not to take the molasses, offering to give me half the amount of duties in cash, and his note of hand for the remainder, which I accepted.

A vessel from Canada came in, which on boarding, I found had been entered and duties paid at Blanc Sablon to Mr. Knight.

21st.

At Battle Harbor we found two vessels which had arrived at Messrs. T. & D. Slade, and a number of Newfoundland fishing vessels. The next day I called on the agent of Messrs. Slade, Mr. Bendell, who sent the masters on board to enter, produce invoices, etc. and to pay the duties on the goods by a bill on Poole. The importations to this firm show a great falling off from those of last year, which I remarked to the agent; he accounted for it by saying that in consequence of the death of Mr. Slade, sen., changes in the Newfoundland freight were spoken of as likely to take place, that the supplies usually sent to their establishment at Venison Tickle had been altogether stopped, and that a large quantity of dutiable goods had been imported into Battle Harbor this year from their establishment at Twillingate and Fogo, where duties had been paid.

23rd. Visited Spear Harbour,

Salt Point,

Murray's Harbor,

Petty Harbor, and
Seal Bight,

and finding in these places none but Newfoundland fishing vessels, proceeded to

p. 1538

Francis Harbor, 24th. The next day I visited the house of Messrs. Hunt & Henly. The agent Mr. Hunt, gave me an account of the goods imported by them (the vessels having left Francis Harbor when we arrived and paid duties by bills on London. The amount was less than paid by this establishment last year, owing to the importation of molasses and other articles from St. John's, duty paid).

At Cariboo, Williams Harbor and Francis Harbor Bight, saw none but fishing vessels from Newfoundland.

2nd [August]. At Rocky Bay, we got an Indian pilot.

3rd. Arrived at Indian Tickle.

4th. At Round Island, Messrs. Hunt & Henly have an establishment. I called on the agent, Mr. Goodridge, who reported the vessels that had arrived, and paid duties on the goods. There is a considerable decrease in the amount collected here this year as compared with last, which Mr. Goodridge explained by stating that they had imported nearly all their supplies from St. John's this year, and stated further that owing to the failing in the salmon and cod fisheries, the importations next year would be shorter still. He produced no manifests, bills of lading or invoices (saying he had none) of goods imported in the vessels that had left, he gave me only an account of his own, which I was obliged to accept; and I regret to say that the manner in which he acted in this particular, contrasted most unfavourably with that of other merchants whom I had visited, and who were similarly situated.

Here we entered 6 Nova Scotia fishing vessels.

At Cartwright we found the schooner St. Andre from Quebec, consigned to Messrs. Hunt & Henly, with part cargo for the Hudson's Bay Company to be landed at Rigoulette. Hunt & Henly having paid the duties on their part I allowed the vessel to proceed.

6th. Independent Harbor.— Found 12 Nova Scotia fishing vessels, some of which had entered at Blanc Sablon. I requested the masters of the rest to go on board and report, but it was not until I had detained the “Volant” for two days that they could be brought to comply. One of them, however, was determined to resist, if possible, seeing which I put a man on board. The crew threatened to throw him overboard, when I put a second man on board. The next day I boarded the vessel, the captain persisted in refusing to report, and the crews of the other vessels alongside, kept up a shout of “Throw him (meaning *me*) overboard!” I then proceeded to seize the salt, when the master at length consented to pay duties. Here I wish to bring under notice a statement made by a Mr. Smith, captain of one of the Nova Scotia vessels, confirmed by his brother, in

the course of conversation with them on the subject of the collection of duties, which was to the effect that Mr. John Freeman, Customs Officer at Liverpool, N.S., had directed them “not to pay the duties, to take no notice of the Collector and not allow him to go on board.” This announcement I took down in writing and read

p. 1539

over to them, which they assented to, and gave this as their reason for refusing to comply with my demands.

11th. Arrived at Rigoulette, where the Hudson's Bay Company have an establishment. A few hours afterwards the “St. Andrew” arrived. The agent here, Mr. McKensie, being subordinate to Mr. Smith, the head agent who resides at N.W. River, would not undertake responsibility of paying the duties, but immediately dispatched a boat to inform Mr. Smith of the arrival of the “St. Andrew,” and also of my being at Rigoulette awaiting his answer respecting the duties.

Having allowed sufficient time for the boat to go up and return, and Mr. Smith not arriving, I decided on proceeding to the N.W. River. This place is at the head of Esquimaux Bay, at a distance of about 90 miles from Rigoulette. Not being able to procure a pilot, and the captain being unwilling to take the vessel there, I was under the necessity of going in the vessel's gig. On arriving I was met by Mr. Smith, who without hesitation, gave me a bill on the Company for the amount of duties, saying that it was not their intention to present any opposition to the payment of duties, the Act having received the Royal assent. I then left him and returned to Rigoulette, after being absent six days.

31st. At Indian Harbor, is a place of business belonging to Mr. Norman, but the goods had been imported from St. John's. This is the most northern part which we can visit, and we accordingly started on our way back.

September *2nd.*—At Grady is the establishment of Messrs. King & Lamour. Called on Mr. Lamour, who said that they had imported their supplies from St. John's. The captain of their vessel, who was present, produced a clearance from St. John's. I told Mr. Lamour that I had been informed that goods had been imported for him in Messrs. Hunt & Henly's vessel (this vessel had landed her cargo and left Grady). This he admitted, but said that “the goods had been disposed of, that he did not expect to be paid for them, and that he would not pay a penny of duties.” There being no means of enforcing payment, I could do nothing. This was an open and avowed breach of the law and defiance of her officers on the part of one who is entrusted by Her Majesty with the administration of peace, and whose example will readily be made a plea by others for committing similar unlawful acts.

12th. At Sizes Harbor. I boarded a merchant vessel. and found on board, in addition to salt and fishing tackle, a cutting

machine, presses and boilers, to be used for manufacturing herring oil. The master reported and paid duty. Also collected duties, from the master of a vessel from Canada, on herring barrels. The master of a Nova Scotia fishing vessel which we found here, at first resisted, but on seeing me determined, at length complied.

13th. Cape Charles. A vessel from Canada, consigned to Mr. F. Beminster, was entered and duties paid. At this place I gave a commission to Mr. Joseph R. Taylor, as Preventive Officer.

29th. At 10 p.m. saw a vessel coming in, which on boarding, I found to be the "Emblem," Green, master, a trader from Halifax, which had evaded us when down south.

I remained on board all night and in the morning, put an officer on board, when the captain came and entered and paid duties.

5th. [October]. Left Henly Harbor, and arrived at St. John's, on the 11th.

The duties of this officer were therefore arduous and responsible, and I have much pleasure in being able to report on the satisfactory manner in which he discharged them, and to testifying, not only to his competency and ability as an officer, but also to his energy and perseverance in carrying out the work entrusted to him.

I have, etc.,
(Signed) J. WINTER,
Collector,
Labrador.

(HUDSON'S BAY COMPANY'S CORRESPONDENCE.)

. . . . “The Collector of Customs for Labrador we found waiting our arrival in this Bay, and I beg to say that I have drawn on the Company two bills of date 19th inst. in favour of the Receiver General of Newfoundland for £287.9.11 stg. and £6.10/stg. respectively, for duties on Cargo of Ocean Nymph, and a few days before my arrival another bill for £31.18/4 stg. had been given in favor of the same official by the officer having temporary charge at North West River, the latter amount being for duties on Cargo by Schooner “Jacques Cartier” from Quebec. The whole of the duties exacted have been paid under protest. . . .”

[Nov. 24
1865.]**REPORT OF J. WINTER ON THE LABRADOR
REVENUE SERVICE, 1865.**COLONIAL OFFICE RECORDS 197/41. JOURNAL OF THE ASSEMBLY,
NEWFOUNDLAND. Appendix.Report of J. Winter, Esq., on Labrador Revenue Service for
1865.Customs House,
St. John's,
24th November, 1865.

SIR,—

I have the honour to report as follows on the Labrador
Revenue Service, 1865.

[July 15th.] Arrived at Rigoulette. Here the Hudson Bay Company have a branch establishment and agent. We were obliged to wait here for the “Jaques Carter,” which we had left at Cartwright. She came into Rigoulette but landed no part of her cargo here, and proceeded for N.W. River. We left Rigoulette together and arrived in company at N.W. River, 30th—the Hudson Bay Company's chief establishment is here, and I called on the agent for the duties per “Jacques Cartier.” He at first refused to pay, stating that his principal Mr. Smith, had said that he considered N.W. River beyond the jurisdiction of Newfoundland. As my instructions were to the contrary, I told him I could not allow the goods to go out of my possession until the duties were paid, which he at length consented to do under protest.

August 2. Returned to Rigoulette. Here we found the barque “Ocean Nymph” had arrived to the Hudson Bay Company from London with a general cargo. Mr. Smith, the head agent, came in her as a passenger, he had left Rigoulette for N.W. River in a boat and passed us in the night. I immediately put an officer on board the vessel, and the captain and a clerk came on board and reported the vessel and cargo and gave me an account of the goods already landed.

I then called on the agent Mr. Groves, and requested him to allow me to examine the goods landed, and to pay the duties. He refused to do either. I told him that I would allow nothing to be landed from the vessel until the duties were paid. He said his instructions were to have the goods for

Rigoulette landed and put into the stores, to be locked up and to

keep the keys, and that the goods for N.W. River were to be put on board a schooner and sent there. I then gave orders to the officer on board to allow nothing to leave the vessel. This had the effect of bringing the captain on board with a view to making an arrangement. The captain fully understood his position and the justice of the course I had taken, but represented the serious consequence of delaying the vessel. I accordingly made an offer, which, considering all the circumstances of the case, I thought most advisable, viz:—to make a warehouse of the stores for the goods landed and to be landed at Rigoulette, an account to be taken of all the goods put there, and two locks to be put on the doors, the agent having one key and I the other. The goods for the N.W. River to be put on board the schooner and left in my charge until released by payment of duties.

This arrangement was at once accepted, and the discharging proceeded without any interruption by us. We were obliged to stay here while the vessel was discharging. While here the “Lalla Rookh” Capt. Dodge, from Boston, arrived, and was entered and paid duties. She proceeded to N.W. River and in a few days returned to Rigoulette with Mr. Smith on board. After he landed, I called upon him. He said he expected me up in the “Lively” with the goods on board. I told him that the goods having been landed at Rigoulette, and shipped into another vessel, which was an importation at that place, I could not run the risk of allowing the goods to leave Rigoulette before the entries were passed and the duties paid or secured. He then stated that the greater part of the goods for N.W. River were intended to be sent 200 or 300 miles into the interior for the Indians and the remainder, except a small quantity, were to be sent to Hudson Bay. These articles, being intended for consumption out of our jurisdiction, he asked me to allow them to pass through overland, by way of N.W. River, without payment of duty. This, I told him, the law would not permit me to do, there being no provision to meet such cases. He then produced invoices of the goods, corresponding in all respects, with what had been landed from the vessel, and gave me a bill for the amount of the duty, but under protest as regards three-fifths, this being, as he alleged, the proportion intended to be sent out of our jurisdiction.

The amount received from the Hudson Bay Company this year was large, and the first, except a small amount last year, that has been collected from them. The large importation this year may be accounted for partly by an increase in their trade, but chiefly from their importing two or three years' stock of many articles at once. This will, of course, lead to a comparatively small collection from that Company the ensuing year or two.

Having now reached our northern limit, we left Rigoulette on the 21st August, having been detained here till this time, waiting for the discharge of the “Ocean Nymph” and in getting the duties on the cargo.

22nd Mullin's Cove.

p. 1544

29th. Hawk's Harbor.

I called on Mr. George Dike for the purpose of ascertaining his answer with regard to the duty on the cargo of salt by the "Test" last year, which I had given him time to consider. His only answer was that he would not pay the duties. As he then rendered himself liable to a penalty under the Act, of which he was well aware, I laid a complaint before the Judge, who summoned him to appear before him. The case having been heard by the Judge, he was told he would have either to pay the penalty or go to goal. He chose the latter, and was accordingly sentenced to a month's imprisonment in Harbor Grace.

I have the honour to be, Sir,

Your most obedient humble servant,

J. WINTER,

Collector, Labrador.

Hon. John Kent,

Receiver General, etc.

DATED 17TH AUGUST, 1868, FROM S.S. "LABRADOR," INDIAN
HARBOUR, LABRADOR, TO MR. W. G. SMITH AT LONDON.

(HUDSON'S BAY COMPANY'S CORRESPONDENCE.)

. . . . "I addressed you on the 23rd July intimating the arrival of the "Labrador" at Rigolet and advising draft on the Governor and Committee in favour of the Receiver General of Newfoundland for £151.4/8 stg. for duties on this season's imports. These duties, by an Act passed on the 14th March last, have become very onerous, having on most articles been advanced 100 P. Cent. beyond the rates formerly exacted. The amount of our draft is little more than one fourth of the sum we would have had to pay, had the entire cargo of the Labrador been subjected to duty, but I deemed it quite justifiable to enter only that portion of the goods and provisions likely to be disposed of in the immediate neighbourhood of Esquimaux Bay, as our competitors to the Northward, the Moravian Brethren, under the plea of being Missionaries, have so far been allowed to bring in their goods duty free, notwithstanding

that they are in every sense of the word ordinary traders. . . .”

HENRY CONNOLLY TO D. A. SMITH.

HUDSON'S BAY CO. CORR. (RIGOLET) LETTER BOOK 1869-1872.

Rigolet, 23rd August, 1869.

D. A. Smith, Esquire,
H. Bay Coy., Montreal.

Dear Sir:

* * * *

The Collector of H.M. Customs arrived here sometime before the Labrador. He demanded the Invoices. I had to produce the English one and that of Canada for Hamilon Inlet only, and had a bill under protest on the Governor and Committee for the same. The warrants &c. I herewith enclose, as well as Mr. Pearce's account, and also the Invoice and Bill of Lading by the Ocean Nymph, which vessel I hope will get up in safety. With best wishes for your health, I remain, dear Sir.

Your most obedient humble servant,

HENRY CONNOLLY.

[4 Nov.
1869.]**REPORT OF COLLECTOR OF REVENUE ON THE
EASTERN COAST OF LABRADOR, 1869.**

COLONIAL OFFICE RECORDS 197/49. JOURNAL OF THE ASSEMBLY.
Appendix.

Report of the Collector of Revenue on the Eastern Coast of
Labrador for the year 1869.

Custom House, St. John's.
4th November, 1869.

SIR,

July 23rd. Proceeded by Hamilton Inlet towards Rigolette, and at dark anchored in Mullin's Cove. Here I was informed that the S.S. "Labrador" had not yet arrived to the Hon. the Hudson Bay Company, but the schooner "Repeal" of Halifax, was at Mullihawk, some 6 miles from Rigolette, trading for salmon.

July 24th. At 7 a.m. wind easterly, left Mullin's Cove and went on to Mullinhawk. Here I found the "Rood" of Halifax and a schooner from Carbonear, both trading; the former entered his vessels and paid the duties demanded of him.

July 26st. At Rigolette, no sign of the steamer "Labrador." The following day went to Mullin's Cove, expecting to find in that neighbourhood the schooner "S.G. Irwin" of Halifax; the next day returned to Rigolette, entered the barque "Ocean Nymph," which vessel had arrived to the Honble. Hudson Bay Company with coals to be supplied to the steamer "Labrador."

July 31st. Took passage in a boat in Mullin's Cove. At this place I learned that the schooner "S.G. Irwin" was anchored at Nat's Discovery, about three miles distant; proceeded on and got on board at 6 p.m. The master made an entry of his inward cargo and paid duties by bill on his merchant at Halifax. Remained on board this vessel all night and next afternoon returned to Rigolette.

August 11th. No appearance of the steamer "Labrador." Left Rigolette for Black Island and Ice Tickle; at which place the judge had some Court business to transact; anchored at Ice Tickle the same day.

August 12th. Walked to Indian Harbor.

I am, Sir,

Your obedient servant,

W. T. KNIGHT,
Collector H.M.C. Labrador.

John Canning, Esq.,
Assistant Collector,
St. John's.

No. 603.

[5 Nov., 1869.]

EXTRACT FROM MR. D. A. SMITH'S LETTERDATED 5TH NOVEMBER, 1869, FROM MONTREAL TO MR. WM. G.
SMITH AT LONDON.

(HUDSON'S BAY COMPANY'S CORRESPONDENCE.)

“In explanation of the amount paid for duties on imports to the Labrador this year being so much higher than formerly, Chief Trader Connolly writes on 23rd August: ‘The Collector of the Customs arrived here (Rigolet) sometime before the Labrador, he demanded for the Invoices. I had to produce the English one and that of Canada for Hamilton Inlet only and had to draw bill under protest on the Governor and Committee for the same.’ I would have referred to this earlier but as Mr. Connolly intimates that he will report more particularly regarding this and other matters of business, by the ‘Labrador,’ I thought it best to defer until fully in possession of his views, any remarks it might appear necessary to make to the Board on the subject. I shall bear the matter in mind and should it appear desirable to represent the matter to Mr. Kent, Receiver General and Principal Collector of Customs of Newfoundland, will not fail to do so. . . .”

[1870.]

REVENUE REPORT, 1870.

COLONIAL OFFICE RECORDS 197/51.

JOURNAL OF THE ASSEMBLY, NEWFOUNDLAND. Appendix.

Report of Mr. M. T. Knight of Labrador Revenue Service for
1870.Custom House,
St. John's,
31st December, 1870.

SIR,

I beg respectfully to submit the following report of the proceedings connected with the collection of revenue on the eastern coast of Labrador, for the past season.

* * * *

July 26th. Arrived at Rigolette, in Esquimaux Bay. At this place the Hudson Bay Company have a branch establishment and an agent.

* * * *

The following morning went up the bay in search of a trader, and came to anchor at Mullyhawk, alongside the schooner "Mayflower," Rood, master from Halifax.

* * * *

The next day again anchored at Rigolette. August the third: went to double Mare Inlet in ship's boat, and found schooner "Repeal," of Halifax; received duties accompanied with a letter of credit from his merchant guaranteeing payment of a draft when presented.

August 8th. Went to Mullin's Cove. Here Judge held Court. Returned to Rigolette next day.

August 11th. The mail steamer "Hawk" arrived at Rigolette. Hear that the steamer "Labrador" had left London on 1st June, for Mingan. The agent at Rigolette was getting anxious on account of the non-arrival of his supplies. Having waited some days longer I proceeded north as far as Indian Harbor, at which place I arrived on the 27th August.

* * * *

September 1st. Again arrived at Rigolette.

September 4th. Received information this morning from Cartwright to the effect that steamer "Labrador," so long expected at this place, was on

of the Straits of Belle Isle.

This disaster caused considerable loss and inconvenience to the Honble. Hudson Bay Company, and disappointment to myself, not only the loss of time occasioned by anticipating that vessel's arrival, but also the loss of duties on such an amount of supplies as was expected to be cleared.

* * * *

September 9th. Arrived at Cartwright, received duties on importations to date; at noon left for Gready; that evening anchored off Long Island; next morning was obliged to go to S.E. Cove, wind blowing furiously from North. Here I was detained until the 13th September; in the meantime the Judge transacted some Court business.

September 19th. At Bolton's Rocks. At this palce the Judge transacted some business.

September 20th. At Venison Tickle.

* * * *

At this place, as at every other harbor to Cape Harrison, I found the cod and herring fisheries almost a total failure.

September 24th. At Salt Pond, walked to Murray and Spear Harbors. At Murray's Harbor was an arichat vessel chartered by Mr. D. Green of Harbor Grace, and at Mechlenburg was a Quebec vessel chartered by Mr. Edwin Duder; the one had arrived from St. John's, the others from Twillingate.

I am, Sir,
Your obedient servant,
M. T. KNIGHT,
Collector H.M.C. Labrador.

The Honble. Thomas Glen,
Receiver General,
NEWFOUNDLAND.

[12 Aug.,
1881.]**EXTRACT FROM MR. M. FORTESCUE'S LETTER**DATED FROM RIGOLET, LABRADOR, 12TH AUGUST, 1881, TO MR. W.
ARMIT AT LONDON.

(HUDSON'S BAY COMPANY'S CORRESPONDENCE.)

“ . . . To add to failure of the Fishery, I am sorry to say, some vessels have been permitted to leave Newfoundland with the Measles on board, which of course spread amongst the people, here, and whole families have been and are now completely prostrated with it, and in some cases totally incapacitated from attending their salmon nets, which of course had tended to reduce our returns, I have had two of our men laid up also, but they are now nearly convalescent, several deaths have however occurred amongst the Newfoundland fishermen, and one or two amongst our planters.

“I have written the Colonial Secretary for Newfoundland but I do not suppose they will pay much attention to my letter, as the only thing they seem to care for, is to squeeze as much money as they can out of the Labrador Coast, and give no returns for it, I have serious doubts in my mind whether they have really a legal right to collect duties from us here, but of course I shall continue paying them under protest, till I have authority from you to discontinue doing so . . . ”

[20 May, 1882.]

**NEWFOUNDLAND ACT 45 VICT. CAP. 6
(COLLECTION OF CUSTOMS IN LABRADOR).**

Enacting Clause.

Customs Officers.

Labrador Duties.

C.O. 196/8. NEWFOUNDLAND ACT, 45 Victoria, Cap VI.

An Act to amend and consolidate the laws relating to the Customs.

[Passed 20th May, 1882].

Forfeiture.

Be it enacted by the Administrator of the Government, Council and Assembly, in Legislative Session convened, as follows:—

Power of Officers.

II. The Governor in Council may appoint proper persons to execute the duties of the several officers necessary to the due collection and management of the Revenue now levied, or which may hereafter be levied on goods, wares, and merchandize imported into this land and its Dependencies, that is to say:

Proviso.

XCII. All goods landed at Labrador shall be subject to the duties imposed upon the like goods imported into any part of this island or its dependencies, and to the same laws, rules and regulations, as though they were on board the importing ships on arrival, before such landing; and unless the owners or their agents shall duly account for all such goods to any Officer of the Revenue appointed to collect Duties at Labrador, to his satisfaction, pass entries for the same, and pay the duties thereon, such goods shall be forfeited; and any such officer may, at any time between sunrise and sunset, enter into any building or place of any person, dealing or having in his possession dutiable goods, and take an account thereof; and if such owner or agent shall refuse to open the doors, or shall in any wise obstruct such officer, he shall forfeit the sum of four hundred dollars; and such officer may, if he think fit at any time so to do, take with him a writ of assistance, and proceed therewith in manner by law in that behalf directed in similar cases: Provided, that nothing in this Section shall exempt from duty, under other provisions of the law, goods imported at Labrador, but not landed.

Entry.

Default Seizure.

Sale

Revenue ship to be deemed office.

Place of sale.

XCIII. Every importer of any goods at Labrador shall, within two days after importation, make due entry of such goods, and pay the duties thereon, and, if required by the Collector or Sub-Collector, land the said goods; and

Breach of Revenue
Laws, Labrador.
Penalty.

in default of such entry and payment of duties, the Collector or Sub-Collector may seize and sell the said goods, or so much as may be necessary for the payment of all duties, the Collector or Sub-Collector may seize and sell the said goods, or so much as may be necessary for the payment of all duties on such importation, paying over the surplus of the proceeds, after the payment of such Duties and expenses of seizure and sale, to the Proprietor of such goods or to any person authorized to receive the same.

XCIV. For the purpose of the collection of the Revenue at Labrador, the office of Collector or Sub-Collector, where there is no office on shore, shall be held to be in the ship or vessel in which such Collector or Sub-Collector shall be conveyed.

XCV. Goods seized as forfeited at Labrador may be sold by the Collector or Sub-Collector, under the provisions of the laws relating to the Revenue, at any Port or Place such Collector or Sub-Collector may deem expedient.

XCVII. Every person who shall be concerned in landing or unshipping at Labrador, any goods, wares, or merchandize liable to duty, the Duties on which have not been paid or secured, shall forfeit and pay a penalty of four hundred dollars.

NEWFOUNDLAND (SIR WILLIAM
MACGREGOR), 1908.**

(JOURNAL OF ASSEMBLY, NEWFOUNDLAND, 1909, p. 325.)

“Two Newfoundland Customs' Officers are stationed at Rigoulette. The Hudson Bay Company does not pay duty on goods it passes away into the hinterland, but pays on goods for consumption on the coast.”

[16 Aug.
1909.]**AFFIDAVIT OF HENRY WEBB.**

IN THE MATTER OF the Enquiry into the Newfoundland Territorial Rights on the Labrador.

District of Labrador, Nain, to wit:

I, HENRY WEBB, of Nain aforesaid, Fisherman and Hunter, make oath and say as follows:—

1. I was born in Sandwich Bay in 1856 and lived there for about twenty years. My father was an Englishman and lived on the Coast for about thirty years, and during that time he hunted and trapped in the interior in the winter time, sometimes going 100 miles inland. As far as I know he was subject to the laws of Newfoundland, paid duty to the Government of Newfoundland and recognized its laws. I can remember that about forty years ago the Newfoundland Court was held here. I came to Davis Inlet in 1877 and was there about four years when I came on to Nain. Since then I have been trapping and hunting inland, sometimes going inland about three hundred miles. I have exercised citizenship on the coast under the Newfoundland laws. As far as I know we were never subject to any Canadian authority whatever, never paid any duties to Canadian Customs authorities and never obeyed any laws except those of the Newfoundland Government. I have paid revenue to the Newfoundland Government since the Collector of Customs has come on the Coast and my father did before me.

(Sgd) HENRY WEBB.

SWORN before me at Nain aforesaid this
16th day of August A.D. 1909.

(Sgd) F. J. MORRIS,
Judge, Labrador Court.

[25 Aug.,
1909.]**AFFIDAVIT OF S. J. BROMFIELD.**

IN THE MATTER OF the Enquiry into the Newfoundland Territorial Rights on the Labrador.

Labrador, Jack Lane's Bay, to wit:

I, SAMUEL JAMES BROMFIELD, of Jack Lane's Bay aforesaid, make oath and say as follows:—

I was born in Grois Water Bay in 1852. My father was an Englishman from Dartmouth, England. I came to Jack Lane's Bay 34 years ago. I have been fishing and trapping ever since. I have gone into the interior trapping every winter, a distance of about 50 miles. I have paid revenue to the Government of Newfoundland ever since revenue was collected on the Labrador, and have been obeying its laws and recognized myself as a citizen of Newfoundland and under the jurisdiction of its Government. I have never had anything to do with any Canadian officers and have traded with Newfoundland traders and the Mission traders and no one else, and nobody has ever interfered with me in my rights as a resident of Labrador. I have never heard that Canada had any claim or made any claim to the interior of the Labrador.

(Sgd) SAMUEL J. BROMFIELD.

SWORN before me at Jack Lane's Bay aforesaid this 25th day of August A.D. 1909.

(Sgd) F. J. MORRIS,

Judge of Court of Labrador.

[26 Aug.
1909.]**AFFIDAVIT OF EDWARD MITCHELL.**

IN THE MATTER OF the Enquiry into the Newfoundland Territorial Rights on the Labrador.

Labrador, Hopedale, to wit:

I, EDWARD MITCHELL of Adlatuk Bay, near Hopedale aforesaid, make oath and say as follows:

My father belonged to Dartmouth, England. He came to this country about eighty years ago as a servant to the Messrs. Hunt, an English firm then doing business in Sandwich Bay, and he resided on the Labrador until his death in 1871. He always recognized Newfoundland jurisdiction and laws as being in existence on the Labrador. I am sixty years of age. I am a fisherman, hunter and trapper. I have been into the interior about thirty miles trapping. I have been trading with schooners for years and paying revenue to the Customs of Newfoundland. I have always recognized the laws of Newfoundland as governing me and the people on this Coast. I have always been a resident of the Labrador, but a citizen under the jurisdiction of the Government of Newfoundland. I never heard of any Canadian officer or anybody from the Canadian Government ever seeking to establish a right down here. I have never obeyed any Canadian laws, fishery or otherwise.

(Sgd) EDWARD MITCHELL.

SWORN before me at Hopedale aforesaid
this 26th day of August, A.D. 1909.

(Sgd) F. J. MORRIS,
Judge of Court of Labrador.

[10 Sept.,
1909]

No. 611.
AFFIDAVIT OF THOMAS BLAKE.

IN THE MATTER OF the Enquiry into the New-
foundland Territorial Rights on the Labrador.

Labrador, Snooks Cove, to wit:

I, THOMAS BLAKE make oath and say as follows:—I live at Mulligan, about 20 miles below North West River, and about 120 miles from the sea coast. I was born in Hamilton Inlet about 66 years ago. My father, William Blake, was born and lived and died here in the Inlet. He was 52 years old when he died. His father, William Blake, came from Devonshire, England, as a young man in the pioneer days of the fishing vessels sent out from England to fish on the coast during the summer season. My grandfather, my father and myself have lived in Hamilton Inlet about 140 years. I have gone into the interior about 184 miles from my home and lived there during the winter season trapping and hunting. I come out in the spring and fish for trout and salmon. I have been doing that for over fifty years. We have owned and occupied the land where I now reside during my father's lifetime and my own. Although living so far up the Inlet and in the interior of the country (being about 220 miles from the coast) I have always considered myself a citizen of Newfoundland, as my father did before me. We have been subject to the laws of Newfoundland and have paid revenue to the Customs ever since the first Revenue Collector came on the Labrador. I remember when the Court was held here at Rigolet by Judge Sweetland and afterwards by Judge Pinsent. I paid revenue to the Collector of Customs, or Customs official, that came with these Judges. I have never had anything to do with the Government of Canada, and I have never obeyed or been asked to comply with any of its laws or rules or directions in connection with the interior of the country, the game laws or fishery laws, nor paid any tax or revenue to any official of the Government of Canada. I have always believed that the land that I have resided on, trapped over and used in the interior, was the Dominion of the Government of Newfoundland and always looked to the Governor and Government of Newfoundland as the rulers of the country. I never heard of any claim of Canada until four or five years ago, when there was a dispute between some of the trappers amongst our people and the Indians residing in the interior in connection with the fur ground, which the Indians claimed to have been their fathers and grandfathers and they now wish to exclude us. For the last year or so it has been getting more pronounced and this year I heard that they are threatening to shoot some of our settlers if they go

in on their (the Indians) hunting grounds.

(Sgd) THOMAS L. BLAKE.

SWORN before me at Snooks Cove aforesaid

(Sgd) F. J. MORRIS,

Judge of the Court of Labrador

[10 Sept.,
1909.]**AFFIDAVIT OF JOSEPH GOUDY.**

IN THE MATTER OF the Enquiry into the New-
foundland Territorial Rights on the Labrador.

Labrador, North West River, to wit:

I, JOSEPH GOUDY of North West River aforesaid, make oath
and say as follows:

I am 73 years of age, 70 of which I have lived in this Bay, about 140 miles from the sea coast. I have been a fisherman, hunter and trapper all my lifetime. I have gone into the interior hunting and trapping when I was a young man, but not so far in as my sons go now. There was no necessity then, as fur bearing animals were much nearer. My sons, Allan aged 36 and Charles aged 34, go in regularly every winter a distance of between two and three hundred miles. They have got a house in there, and stay there all the Winter season and come out in the spring; nearly all the young men residing about here, and farther on, do the same to my certain knowledge. I own a range of houses and traps for a distance of about 30 miles inland. My house, outhouses and gardens, in all about a couple of acres, I have occupied for over 60 years. I have always paid Customs duties to the Government of Newfoundland on all that I bought or purchased. I remember when Judge Sweetland visited Rigolet and held Court there. I also knew Judge Pinsent, and also Mr. Winter, the Collector of Customs, who came with the Court. I have paid duties to the Government of Newfoundland ever since duties have been collected. Although residing up here in the interior of the Labrador, I have always considered myself a citizen of Newfoundland, and subject to its laws and government. It is Newfoundland laws we have to go by. I have never had anything to do with Canada, nor any persons representing the Government of Canada, have never paid any duty to them, and have never obeyed any of their laws or rules and regulations.

his
(Sgd) JOSEPH x GOUDY.
mark.

SWORN before me at North West River aforesaid,
this 10th day of Sept. A.D. 1909. Having been
first read over and explained.

Judge, Court Labrador.

No. 613.[19 June,
1923.]**LETTER FROM A. BRABANT,**FUR TRADE COMMISSIONER, HUDSON'S BAY COMPANY, WINNIPEG,
MAN., TO E. L. NEWCOMBE, DEPUTY MINISTER OF JUSTICE, OTTAWA.

Winnipeg, Man. 13th June, 1923.
In your reply refer to No. 869.

Sir,

With reference to conversation which your Mr. Plaxton had with our Mr. Conn when the latter was recently in Ottawa, Mr. Plaxton asked that we ascertain whether the Company had any record of giving instructions to the late Mr. Fortesque who was in charge of our Rigolet Post about the year 1881, to discontinue paying customs duty under protest.

I wrote our London Office on this subject and am to-day in receipt of their reply as follows:

“We have had search made in the records of the London Office but have not been able to find any correspondence from London to Canada instructing Mr. Fortesque to discontinue paying Customs Duties under protest.”

I am, Sir,

Your obedient servant,

(Signed) A. BRABANT,
Fur Trade Commissioner.

E. L. Newcombe, Esq.,

Ottawa, Ont.

[4 March,
1926.]**AFFIDAVIT OF RALPH PARSONS.**[18 March,
1926.]**In the Privy Council.**

IN THE MATTER of the BOUNDARY between the DOMINION OF
CANADA and the COLONY of NEWFOUNDLAND in the LABRADOR
PENINSULA.

I, RALPH PARSONS of Montreal, Canada, make Oath and say
as follows:—

1. I spent 25 years on the Labrador Peninsula. I was 2 years at Cartwright and 5 at Rigolet. I then went to North West River and after that to Cartwright for 4 years. After that I went to the Ungava section of the Peninsula for 9 years, being for 2 years of that time travelling at intervals from Quebec to St. Augustine's. Then I resided at St. John's, Newfoundland and travelled in the Canadian and Newfoundland Labrador district which covers an area between Blanc Sablon and Port Harrison in Hudson Bay. During the last 4 or 5 years I have also travelled in the territory east of Montreal.

2. I was at North West River for the three years 1905-7. The permanent Settlers, who subsist principally on furring in the winter, used constantly to go inland hunting and trapping 150 miles or more and often as far as height of land. There were some 200 or 300 Montagnais Indians definitely attached to North West River and they also travelled far into the interior on their hunting expeditions.

3. Goods supplied to the Settlers and Indians round North West River Post were brought up via Hamilton Inlet and duty was paid on such goods to the Newfoundland Government.

4. The Newfoundland Game Laws were enforced against the Settlers and I remember a man residing on the Labrador Coast being fined \$100 for killing animals out of season.

5. When I was at North West River lumbermen operating there used to work as far inland as Mud Lake, 40 miles from Sandy Point, the entrance to Goose Bay, and Cruisers went much further up. I myself travelled up the Nascopie or North West River about 40 miles from the Settlement and also went up Goose Bay and some 20 miles along the Hamilton River. In addition I went some 5 or 6 miles up the Kinamon.

6. I should estimate that there were about 1,000 Settlers in Hamilton Inlet when I was there.

7. In the fall of the year the tide at North West River was very strong and the water gets brackish.

Sworn at 353 Strand in the Country
of London, this 4th Day of
March 1926. } RALPH PARSONS.

AFFIDAVIT OF THOMAS WINTER.[19 March,
1926.]In the Privy Council.

IN THE MATTER of the BOUNDARY
between the DOMINION of CANADA
and the COLONY of
NEWFOUNDLAND in the LABRADOR
PENINSULA.

I, THOMAS WINTER, of Water Street, St. John's, Newfoundland retired merchant, make Oath and say as follows:—

1. I am a son of James Winter, who was collector of Customs on Labrador for the Newfoundland Government between 1863 and 1868. As a boy of 17 or 18 I accompanied my father as his Customs House Broker on his trips up and down the Labrador Coast in 1865 and 1866, collecting duties.

2. IN each of these two years we left St. John's about the 1st June and made two journeys in the schooner Volant, commanded by Captain Pike, of Carbonear, up and down the coast between Blanc Sablon and North West River. We were accompanied by Mr. Benjamin Sweetland, Judge of the Labrador Court, and his bailiff, Mr. Jonas Purchase.

3. I remember that the cases with which Judge Sweetland had to deal were usually disputes about the ownership of cod-fishery posts on the outer shore and salmon fishing posts in the rivers. I never heard of his decisions being questioned in any way.

4. My father collected duties at the same time from different business houses carrying on the fishery on a large scale along the coast and “supplying” or “fitting out” the fishermen. These firms, as distinct from those domiciled in Newfoundland and having branches on the Labrador coast, included De Quetteville & Co., Falle and Co. Boutillier Bros. at Blanc Sablon, T. & D. Slade at Battle Harbor, Larmour & Co. at Grady Harbor,

and Hunt and Henley at Cartwright, with branches at Grady, Long Island, Venison Tickle, and Francis Harbor, and the Hudson's Bay Company at Rigolet and North West River.

5. We used to stay a few days at North West River, and the same at Rigolet on each of our trips. The North West River post was maintained by the Hudson's Bay Company for the trade of the interior. The Indians, both Montagnais and Nascopies, used to come out from the interior and stay at the posts, bringing out furs and taking back the supplies for which they traded them, e.g. powder, shot, clothing and traps. Mr. Donald Smith, afterwards Lord Strathcona, was in charge of the North West River post at that time and also of the district for the Hudson's Bay Company. So far as I know he never raised any objection to pay duties.

6. To the best of my recollection the Hudson's Bay Company paid between £5000 and £1,000 in duties on the Labrador.

8. The Hudson's Bay Company did a large trade in furs with white and half-breed trappers and the Indians. My recollection is that the Company had posts in the interior to which supplies were sent from North West River, the furs at these interior posts being sent out to North West River for export.

SWORN at St. John's, Newfoundland,
this 19th day of March 1926,

THOS. WINTER.

AFFIDAVIT OF SIR P. T. McGRATH, K.B.E.[30 March,
1926]In the Privy Council.

IN THE MATTER of the BOUNDARY
between the DOMINION of CANADA
and the COLONY of
NEWFOUNDLAND in the LABRADOR
PENINSULA.

I, SIR PATRICK THOMAS McGRATH, K.B.E., of 6, Gower Street, St. John's, Newfoundland, President of the Legislative Council of Newfoundland, make Oath and say as follows:—

On behalf of the Newfoundland Government in 1922 and 1923 I interviewed Captain James G. Joy of St. John's aforesaid, sometime Marine Superintendent for Messrs. Job Brothers & Co. engaged in the catching and export of fish from Newfoundland and Labrador; and William Collingwood of St. John's aforesaid, a storekeeper, sometime in the employ of Messrs. Baine, Johnston & Co. of St. John's aforesaid, another firm which has been for many years engaged in the catching and exporting of fish from Newfoundland and Labrador; and Harry P. Winter of 64, Wall Street, New York City, a sugar merchant.

2. I took down in my own hand statements made voluntarily to me by each of the said persons in Paragraph 1 hereof referred to, had these statements typewritten and submitted the said statements to them respectively for revision. They thereupon signed the said statements respectively in my presence and declared the same to be true.

3. The said statements so taken down submitted and signed as aforesaid are now produced and shown to me marked P.T.M. 1, 2, 3 respectively.

4. It is within my own knowledge that each of the said persons are now dead.

P. T. McGRATH.

SWORN at St. John's, in the Island of
Newfoundland this 30th day of March 1926.

Before me

ROBERT ALSOP

A Commissioner for Oaths.

VOLUNTARY STATEMENT OF CAPT. JAMES G. JOY, OF
ST. JOHN'S.[2 April,
1922.]

Capt. Joy, a native of St. John's, now in his 77th year, was during his active life connected with the fishery industries of this country and conducted a business at Salmon River, Canadian Labrador, and latterly has been Marine Superintendent for Messrs. Job Bros. & Company of St. John's, a firm engaged in the catching and exporting of the fishery products of Newfoundland for over a hundred years with establishments on Labrador since 1861. His statement is as follows:—

I, James G. Joy have had my attention drawn to a statement by Mr. Ralph Parsons, Manager of the Hudson's Bay Company's Labrador Department with headquarters in St. John's, to the effect that Newfoundland does not care for her people on Labrador as well as Canada does for hers. In my opinion this view is not at all warranted. I have been connected with the fishery business on Canadian Labrador, in Belle Isle Strait, west of the boundary line at Blanc Sablon for over 50 years, and have had good opportunities of seeing how the Canadian authorities cared for their people there. As a matter of fact they did not give anything like the attention to them that the Newfoundland Government gave to its people east of the boundary line. There was no proper mail or passenger service on the Canadian side, and no mail steamer calling there, and for the whole 300 miles east of Natashquan the people had to put up with as their sole means of communication, open boats or skiffs, which carried both mails and passengers, while Newfoundland provided steamers for this purpose. The only evidence of jurisdiction I ever saw or heard of, on the Canadian area, was the fishery officer who made a visit there once each summer or sometimes twice, in a revenue cruiser, and being a doctor, gave a little attention to the medical needs of the people.

I carried on a fishery business at Salmon River, Canadian Labrador, near Blanc Sablon, from 1861 until 1905, and am quite satisfied that the Canadian people residing along that coast never got the consideration or care that Newfoundland gave her people east of the Boundary line. There were no authorities to enforce the law and the collection of debts was impossible. Nearly all the mail and passenger traffic was done by way of Newfoundland, there were hardly any school facilities provided, and except for the officer on the revenue cruiser there was no medical care at all given to the people east of Natashquan, a stretch of coast 300 miles long. The interior of Canadian Labrador was just as unexplored as that of Newfoundland Labrador, all the people were fishermen and

never went inland any farther than was necessary to hunt for their subsistence. They were supplied with the necessaries of life by traders like myself and their Government showed no interest in them whatever. The only people who carried on the fisheries in a large way were from Newfoundland, and but for them the people would

p. 1568

have fared badly. I have kept in pretty close touch with this region since I gave up active business there, visiting it nearly every year, and I believe that, in the main, conditions are much the same there now as they were then. I know that they have no regular steamer service like the Newfoundlanders have and that most of their trade is done via the West Coast of Newfoundland, because of the facilities the weekly mail boat there gives them, and I know that last Fall there was a great outcry in the newspapers about distress on that part of the Labrador coast and that the Quebec Government had to send a steamer with supplies to feed the people, just as the Newfoundland Government sometimes has to send supplies for its people east of the boundary.

I make the foregoing statement voluntarily, verily believing it to be true to the best of my knowledge and belief.

[27 March,
1922.]

JAMES G. JOY.

Witness P. T. McGRATH.

Dated Apr. 2/22.

VOLUNTARY STATEMENT OF WILLIAM
COLLINGWOOD, OF ST. JOHN'S.

Mr. Collingwood, who is now in his 81st year was born in Poole, Dorset, England, in 1842, and came to Labrador in 1855, as a clerk with T. and D. Slade, of Poole, Dorset, England, who had a fishing premises at Battle Harbor. Here he remained for twenty years, staying all the year round except on rare occasions, when he got a holiday. The first 16 years he was with the Slade firm, and for the remainder with Baine Johnstone & Co., of St. John's, a firm connected with the fisheries of Newfoundland for nearly a century, and who bought out the Slades. Then he was transferred to the main business of Baine Johnstone & Co., at St. John's, and last year after spending fifty years in the firm was retired on a pension. His statement is as follows:—

I, William Collingwood, of St. John's, Storekeeper, say that I was born in Poole, Dorset, England, in 1842 and came to Battle Harbor in 1855 as a clerk in the employ of Slade and Company, who had fishing premises at Battle Harbor and Venison Island. I came out in the schooner "Lord Nelson,"

commanded by my father Capt. T. Collingwood. I stayed with the firm of Slade until they sold out to Baine Johnstone & Co., of St. John's in 1871 and then I went with that firm. I remained on the coast until 1883. I was then transferred to their establishment at St. John's. In the early days at Battle Harbor and Venison Island our vessels brought supplies partly from England, and partly from Hamburg, and then made trips to New York to bring us pork, beef, flour, molasses, and rum. Another firm

p. 1569

of Slades had houses at Twillingate, and Fogo, on the east coast of Newfoundland, and the people from these places often came to Battle Harbor and vicinity to fish, although the French, who claimed rights at different points, and also the American and Nova Scotians, who fished along the coast, made it very uncomfortable for them.

When first I went to the coast we paid no duties whatever, but about 1857, I think, Mr. J. L. Pendergast, a member of the Newfoundland Legislature came down to the coast in a brig with painted ports, the name I cannot recall, with some authority to collect duties, but everybody refused to pay and he took no drastic measures to compel them to do so. About 1863, I think, Mr. James Winter came down as Collector of Customs in the schooner Volant, with Capt. Pike as Master; and Mr. Bendell, our agent at Battle Harbor paid duties under protest, and Mr. Brockway, our agent at Venison Island, did the same. The next year our Principals instructed us to refuse absolutely to pay, which we did, until Mr. Winter threatened to seize our property and then we gave in. After that we paid the duties every year. At the outset of this controversy the Slades were so incensed that they sold the Venison Island property to Ridley's of Harbor Grace, and Liverpool, who failed a few years later, and the property was then purchased by John Rorke & Son, of Carbonear, who also had a premises at St. Francis Harbor, on the Labrador coast.

During this period we had some resident English clergymen at Battle Harbor. Before I came there was a Rev. Mr. Disney, and in my own recollection Rev. Mr. Hutchinson, Rev. Mr. Botwood, Rev. Mr. Wilson, Rev. Mr. Bishop, and Rev. Mr. Weary. Rev. Hutchinson, in the winter of 1861, made a trip up the coast to Sandwich Bay, I got him a good team of dogs and accompanied him as far as Venison Island. He made the trip successfully, he was the first to do it, and after that it became a regular thing every winter. In those days the population in the Straits from Bonne Esperance east was quite large, compared with what it is now. There were lots of settlers from England and Ireland, but mostly English. Battle Harbor and vicinity had in those times about 600 people. But in the '70's, owing to bad times and other causes a great number of the people moved away, a lot of them to Bay of Island, on the West Coast of Newfoundland, as the farming possibilities appealed to them; and a great many others to Canada and

United States.

After Mr. Winter came as Customs collector for the Newfoundland Government, we had the late Mr. Michael Knight, then Mr. Berteau, and in recent times they have had permanent customs officers on the coast. After the first refusal was overcome there, no one refused to pay duties. I never saw or heard of any Canadian officer, nor did I hear of Canada claiming any jurisdiction or authority on the coast, and no Canadian revenue cruiser or officer ever made any attempt to collect duties from us. Mr. Winter began the practice, which his successors continued, of forcing the Canadian and American vessels, who came to the coast to trade with the people, to pay duties, just as he did the mercantile firms that were settled on the coast.

The staple industry of the people along Labrador in the area where my

p. 1570

work carried me, was fishing with hunting for furs as an auxiliary; and the residents went inland as far as was necessary for the latter purpose.

These conditions continue, I think, practically unaltered down to the present day.

I make the foregoing statement voluntarily, verily believing it to be true, according to the best of my knowledge, information and belief.

WM. COLLINGWOOD.

Dated at St. John's, Newfoundland,
Mar. 27/1922.

Witness: P. T. McGRATH.

AFFIDAVIT OF E. R. BURGESS.

[1 April,
1926.]

In the Privy Council.

IN THE MATTER of the BOUNDARY
between the DOMINION of CANADA
and the COLONY of
NEWFOUNDLAND in the LABRADOR
PENINSULA.

I, EDWARD ROBERT BURGESS of Balsam Place, Barnes Road
St. John's Newfoundland make Oath and say as follows:

1. I am a native of Halifax, Nova Scotia, have resided in
Newfoundland since 1882, and was a member of the
Newfoundland Legislature for Twillingate District from
November 1889 to 1893.

2. In the spring of 1891 I was appointed Collector of
Customs for Labrador, which position I held for 12 years and
each summer cruised up and down the coast in a schooner,
which was hired for the purpose, collecting duties on behalf of
the Colony.

3. I collected duties on all imports into the region,
principally from the Hudson's Bay Company, which in those
days was the only business concern importing largely from
foreign countries, though smaller imports were made by other
people.

4. The Hudson's Bay Company paid duties through its post
at Rigolet or Cartwright (whichever at the time was its
headquarters in Labrador) for all the stations it maintained
there—Cartwright, Northwest River, Rigolet, Nachvak, and
Davis' Inlet.

5. I visited Northwest River on several occasions and saw
the Indians there, who used to come out from the interior and

trade at the post. In

p. 1572

those days the only permanent residents were those attached to the Company's post, until Alfred Dickie of Stewiacke, started his lumber mill near there about 20 years ago.

6. Nobody during the years I was on the coast ever questioned the right of the Newfoundland Government to levy duties on imports into Labrador or disputed the duties I assessed upon the goods, nor did I ever hear of any dissatisfaction with the Newfoundland Government or any desire by the resident people to be transferred to Canadian jurisdiction.

7. Whenever distress existed among the residents on the coast I arranged for relief for them. Before leaving each fall I took care to ensure that sufficient stores were available at the chief centres to enable all the needs in this respect to be met.

8. If I thought necessary I authorized the Hudson's Bay Company to furnish relief on account of the Newfoundland Government, and I am not aware of the Company ever having provided relief from its own stores without charging the Newfoundland Government for the same.

**NEWFOUNDLAND ACT 31 VICT. CAP. 16 (RELIEF
PROVIDED FOR SUFFERERS BY GALE AT
LABRADOR).**

Preamble.

C.O. 196/6. NEWFOUNDLAND ACT, 31 VICTORIA CAP. XVI.

An Act to indemnify the Governor of Newfoundland for certain sums of money advanced by him from the Colonial Treasury, for the service of the Colony.

[Passed 29th April 1808].

Whereas it is expedient to indemnify His Excellency the Governor of Newfoundland for certain sums of money advanced by him for the Colonial Treasury, for the Service of the Colony:

Sufferers by the gale
at Labrador.

Be it therefore enacted, by the Governor, Legislative Council, and Assembly, in Legislative Session convened:

That from and out of such moneys as may, from time to time, remain in the hands of the Receiver General, and unappropriated, there be granted to Her Majesty, Her Heirs and Successors, the sum of Fifty-four thousand seven hundred and twenty-three dollars and nine cents.

The sum of one thousand nine hundred and forty-four dollars and forty-five cents, on account of sufferers by the gale at Labrador.

HUDSON'S BAY COMPANY'S CORRESPONDENCE (RIGOLET)
LETTER BOOK 1875-1882, p. 298.
Rigolet, 30th Sept. 1878.

Messrs. R. Prowse & Sons,
St. John's.

GENTLEMEN,

Your favor of the 14th inst. has just arrived. I have not much news to give you. The "Labrador" arrived from the North on the 18th inst. and sailed on the 24th for England.....

I mentioned in a former letter that I was going to address you more fully on certain points, but unfortunately I have not had the time. However, they were relative to their being no representative for the coast at all in Parliament, therefore, to whom can we apply for a redress for grievances or to look to our interests. We have a Collector of Customs to examine our Invoices and take money, but if on the other hand people are indebted, and even give a note of hand, which not being met, we have no court to award judgment, it must go to Newfoundland. This is hardly fair. In winter people also apply to us for relief, the Government, though taking money from here, makes no provision for its poor.

.....In haste, I remain,

Gentlemen,

Yours truly,

M. FORTESCUE.

[28 Aug.,
1879.]**COLONIAL SECRETARY E. D. SHEA TO MATTHEW
FORTESCUE.**

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 57, page
216.

Secretary's Office,
28th August, 1879.

SIR,

I have the honor to acknowledge your letter of the 14th inst., to His Excellency the Governor relating to Labrador matters generally and in particular to apprehended distress in your own immediate neighbourhood.

His Excellency is now about embarking in H.M. Steamer "Druid" to visit Labrador and will go direct to Rigoulet.

In view of your request for assistance for the poor at Rigoulet, we are sending by the "Druid" Fifty Barrels Flour and two puncheons of Molasses, to be placed in your charge and management for the relief of the necessitous in such measure as you may deem proper, according to their wants.

The practice is in cases of what are termed able bodied recipients of relief from Public funds, to require from them a return in labor, or value of some sort for the benefits of roads or other public works. If you dispense to any persons of this able bodied class, it would be well to seek from them such a compliance with this condition as you may see practicable and useful. The principal object of the condition is to prevent injuries that arise from gratuitous pauper relief.

It may be that with you the applicants will be chiefly those who are unable to give any return for aid received, in which cases of course it would be idle to propose it.

Capt. Kennedy of the "Druid" has a dedimus authorizing to administer to you the oaths of J.P.

I have, & c.,
E. D. SHEA, Col. Sec.

Matthew Fortescue, Esqr., J.P.,
Rigoulet, Labrador.

N

**MINUTE RESPECTING APPREHENDED DISTRESS IN
RIGOLET.**

 Page 220, No. 6 RECORD BOOK, 1874 to 1883.

Sept. 15th, 1879.

The following proceedings were confirmed. His Excellency having on the 27th August last received a letter from Mr. Fortescue, Rigolet, on matters concerning Labrador, but more particularly with reference to apprehended distress in Rigolet and its neighbourhood from the total failure of the Salmon Fishery, stated that, not having yet visited Labrador he was desirous of doing so and proposed to proceed there in H.M.S. *Druid*, which would take provisions if it was decided to forward them for purposes of relief on the representations of Mr. Fortescue. It was then ordered that Fifty Brs. Flour & two punchs. Molasses be sent to the charge of Mr. Fortescue for Rigolet and twenty five brls. Flour for other parts of Labrador where relief might be found to be most required. Mr. Fortescue to obtain some return for Gov. account, wherever it might be practicable from recipients of relief.

HUDSON'S BAY COMPANY'S CORRESPONDENCE

(RIGOLET) LETTER BOOK 1875-1882, p. 489.

Rigolet, 30th July, 1881.

Hon. E. D. Shea,
Colonial Secretary,
St. John's, Newfoundland.

SIR,

I have the honor to acknowledge receipt of your letter dated the 10th November, 1880, in which you complain of my having represented to Captain Hall of H.M.S. "Flamingo" that a certain person residing in this Bay stood in need of assistance. I certainly wrote a letter to Captain Hall somewhat to that effect, and am prepared to forward a copy of that letter if you wish it. At the same time, considering the large amount of duties collected in this Bay by the Government, I cannot see that I was exceeding my duty in that instance.

You also say that in future my expenditure must be vouched for by Official Authority &c. &c. I shall therefore feel particularly obliged if you will inform me who to apply to at your earliest convenience, as I know of no one residing on this coast who is so authorised. If there should, however, be any one, I can only say that they are very remiss in their duties, as no enquiries are made that I am aware of as to cases requiring relief. Furthermore I have to inform you that vessels have been permitted to leave Newfoundland this Spring bringing down the measles here, and several families have been and are now so prostrated with sickness as to be totally unable to attend to their Salmon Fisheries. So that I have to request an answer to this to enable me to make application in time to the Official Authorities should it be necessary to obtain relief.

* * * *

I have the honor to be, Sir,
Your obedient servant,
M. FORTESCUE, J.P.

No. 628.[10 Sept.,
1881.]**COLONIAL SECRETARY E. D. SHEA TO FRANCIS C.
BERTEAU.**

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 57, page 380.

Secretary's Office,
10th Sep. 1881.

SIR,

I have your letter of the 24th ulto, on the subject of present and probable future distress at Labrador, particularly at Sandwich Bay and Hamilton Inlet and suggesting that Mr. Fortescue of Rigoulet and Mr. Sawe of Sandwich Bay be authorized to expend limited amounts for relief on Govt. A/C.

The Government while much regretting the necessity, concur in your suggestion, and you will be good enough to communicate if possible with these gentlemen on the subject arranging that they may expend a sum not exceeding four hundred dollars in all for such relief. You will probably be able to judge best in what proportions this sum should be divided between them. Our opinion is that from \$240 to \$280 (two hundred and forty to two hundred and eighty dollars might be the amount to be expended by Mr. Fortescue and from \$100 to 120 dollars by Mr. Dawe, but this division is subject to your discretion if you have an opportunity of communicating with them. Lest you should be unable to do so I am writing to Mr. Fortescue and Mr. Dawe that if they do not hear from you on the matter they can disburse the above amounts, the provisions to be given as stated by you at cost price and actual charges.

I am, &c.,
(Signed) E. D. SHEA, C.S.Francis C. Berteau, Esqr.,
Sub Collector, Labrador.

[2 Oct.,
1882.]

SECRETARY TO MATTHEW FORTESCUE.

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 57, page 454.

Secretary's Office,
2nd October, 1882.

DEAR SIR,

The Collector of Revenue has represented to the Government, that there will most likely be some distress in your neighbourhood during the ensuing winter. you are therefore authorized to expend to extend of \$150.00.

Similar authorizing \$120 to be expended in his neighbourhood to Samuel Dawe, Esq., J.P., Cartwright, Sandwich Bay.

CURLING.**

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 59, page 10.

Secretary's Office,
8th Sept. 1886.

SIR,

I am requested by the Honble the Premier to acknowledge receipt of your letter to him of 30th August and in reply beg to say that in view of the destitution which you so strongly represent imminent at Sandwich and Gros Water Bays, the Government have determined to send to your care 60 Brls. Flour, to be placed as you suggest, 30 Barrels at Cartwright and 30 at Rigoulette. The necessity of storing this flour in a safe place will be obvious to you, and as Mr. MacKenzie has offered to take charge of any relief that might be sent, it may be desirable to avail of the Stores of the Hudson Bay Company, but the matter is left in your discretion and I have merely to add that the flour is to be held to meet the claims of those most needy, subject to your order or to the order of the Clergyman or reliable person.

I have, &c.,
Sgd. M. FENELON, Col. Sec.

Rev. Mr. Curling.

QUINTON.**

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 59, page 148.

Secretary's Office,
12th Sept. 1887.

DEAR SIR,

The Government have had under consideration communications from Rev. F. W. Colley and Rev. Albert Holmes, representing the distressed condition of many families on the Labrador and the further destitution which appears to be imminent, and they have determined to send to your care 60 Barrels of flour for the relief of those most in need.

30 Barrels will be left in charge of the Hudson's Bay Company's Agent at Cartwright, Sandwich Bay and 30 Barrels with the Agent at Rigoulette.

The flour will be held subject to your order or to that of Rev. A. Holmes, and the Government trust that you will use every effort to prevent imposition and to minimize so far as possible the evils of an indiscriminate relief.

It would be desirable to obtain from recipients some return in labour of public advantage for relief afforded.

I am, Dear Sir,

Yours truly,
Sgd. M. FENELON, Col. Sec.Rev. J. P. Quinton,
Hamilton Inlet, Labrador.

Letter similar to above, date same to

Rev. Albert Holmes,

EXTRACTS FROM TOILERS OF THE DEEP, 1896.
pp. 305 and 306.

[July, 1896.]

No. 636.**EXTRACT FROM LETTER BY DR. GRENFELL.**

July 1896.

We went on our journey again in the afternoon, and reached Shecatica Harbour. The residents here are few in number and very poor. But for the generosity again of Newfoundland fishermen these Canadian settlers would be starving; and what they will do next winter it is hard to say. The Canadian revenue steamer has not yet reached this part of the coast, and the people have long been out of flour and other foods.

The Canadian Government made some years ago what they considered a final settlement of the poor relief question for the coast. They offered all who would leave a passage away; any who stayed would get no further relief. The Newfoundland Government, with all their difficulties, have done better than that for their people, for they at least recognize that the poor are always with us, and there is no such thing as a final settlement of the question. I don't think Government relief good; it is, however, a necessary evil, and unless the Canadian Government either relieve or give these families a passage off the coast this year, it will be an indelible disgrace to them, for they live a life of chronic starvation.

FROM TOILERS OF THE DEEP, 1897, p. 52.

[2 Nov.,
1896.]**No. 637.****EXTRACTS FROM LETTER BY DR. GRENFELL.**

SS. "Sir Donald," Cartwright,
November 2, 1896.

I had now decided to remain at Rigoulette over Sunday, and to then return to Indian Harbour with a further load of spruce poles to enable the poor residents who we decided to give relief work on the road to have wood to commence working with. I had forgotten to mention that Dr. Willway had been empowered by Mr. Bond, the Colonial Secretary (of Newfoundland) to confer with Mr. James Wilson, of the Hudson Bay Company, as to what way could best be adopted to relieve the starving residents this winter. Mr. Wilson was empowered to prevent starvation, and in every possible case to insist on some public work being done by recipients of Government pauper relief. Mr. Wilson, who spent a few days this summer at Indian Harbour, decided that the way would be to build the road I have above referred to, and also one at the Mission station at Lester's Point, where the Rev. F. Hollett has been working for the past three years.

* * * *

It was with much deep gratitude to those who put in our power, and also to the Government of Newfoundland, who have, in view of the present emergency, put some flour and molasses on the coast for those who must otherwise starve, that Dr. Willway and I arranged a little winter work for a number of these families. Each place we call at now we find some families "borrowing a pan of flour," already, and with no other foodstuff of any kind in the house, except perhaps a few dry caplin, or, if they happen to have powder and shot, a few sea birds. While some here and there have enough for themselves, and traps and powder to hunt for more with, it is almost invariably the case that those who have nothing to eat have no means of getting any. A number returned with us to the ship at night, and we were able to help them with a few small things they absolutely needed.

FROM TOILERS OF THE DEEP, 1897, p. 250.

[1897.]

No. 638.**OUR MISSION WORK IN LABRADOR.**

EXTRACTS FROM DELAYED PORTIONS OF THE LOG OF THE S.S. "SIR DONALD." By Dr. W. T. GRENFELL.

Mr. Bond, the Colonial Secretary, had sent us a kind and prompt telegraphic answer to our inquiries as to what the Government intended to do in the event of impending starvation. I must say, whether the Government are able to keep everyone contented or not, and knowing they discountenance as much as I do myself the indiscriminate distribution of outdoor relief, especially to able-bodied paupers, still they have uniformly extended to us a helping hand in that direction, and have always told us to let no one starve to death.

* * * *

We are glad to hear the Government have appointed Dr. Willway and Mr. Wilson, the Hudson Bay chief factor, their agents to prevent absolute starvation, but it will mean hunger and cold to a good number. No one can tell the value our supply of clothing will prove this winter. I have been in house after house where nakedness was apparent even in the breadwinners, and the children in some cases were in a state of Nature almost. Somehow or other we are always short of bed clothing on the Sir Donald, for though one can say "no" to an able-bodied man, it is not easy to see women and children in such need.

The Labrador people will this year be reduced to needed corroboration to arrest attention, and he told us that, as well as Mr. Wilson of Rigolet, and Mr. Hollett and others, he had found that the total failure of the salmon and cod fishing in the bay necessitated some special effort on the part of the Government if actual starvation was to be avoided.

Breakfast next day found us at Venison Tickle. Here an outbreak of fever was raging. The cases treated in the spring by Dr. Willway had recovered. Dr. Aspland had been less fortunate at Red Point, near Cape Francis, for in spite of all his efforts three of his patients had died there from it. Mr. Hawker had bad news to tell us, for he said that unless the Newfoundland Government gave authority to relieve destitute families, the stores at both Francis Harbour and Venison Tickle would have to be closed down during the winter. This,

however, had been avoided.

AFFIDAVIT OF W. J. CARSON.[18 June,
1926]In the Privy Council.

IN THE MATTER of the BOUNDARY
between the DOMINION of CANADA
and the COLONY of
NEWFOUNDLAND in the LABRADOR
PENINSULA.

I, WILLIAM JAMES CARSON, Manager of the Hudson's Bay Company's Office at St. John's, Newfoundland, make oath and say as follows:

1. I spent eight years in Labrador, as a Junior official of the Company, beginning about 22 years ago—four years at Northwest River, and four years at Rigolet.

2. I was at Northwest River about the time the Quebec Government claimed the timber areas there. The Canadian steamer Montcalm came there one summer with a party of surveyors, etc., who stayed all the next winter and marked all the logs they found with the letters "P.Q.," to signify they belonged to Quebec.

3. Dickie and Company, a Nova Scotia concern, was then operating at Mud Lake, or Grand Village. At this place there were about eight or ten white or half-breed families, mostly trappers, while other trappers were settled around Northwest River. Trapping was the principal industry, but some of the men worked at lumbering after this began. The mail from Rigolet to Northwest River and Grand Village was brought by a motor boat, the Newfoundland Government paid for the same. I was the first postmaster for the Newfoundland Government at Northwest River, serving two years in that capacity.

4. Indians came out to Northwest River from the interior every winter, usually about Christmas time and stayed for a

time, trading their

p. 1590

furs for supplies of foodstuffs, clothing, ammunition, etc. There were about 30 or 40 families of these Indians. They roamed the interior, usually visiting St. Augustine, on the north shore of the Gulf of St. Lawrence, in the summer, and Northwest River in the winter. These were Montagnais, the Nascopies, as a rule, coming out at Davis Inlet, farther North.

5. So far as I know the only people who went Inland were the Indians and the trappers. The latter would go long distances in, possibly 150 miles. They sometimes went almost to the height of land. They considered themselves, so far as I know, in Newfoundland territory wherever they went, and subject to the Newfoundland Game Laws.

6. The Hudson's Bay Company's posts in Labrador acted as Agencies for the Newfoundland Government in relieving distress among the residents whenever this existed. Such cases would be in winter mostly, and the chief officer at the post would give supplies of food to the needy at his discretion, requiring them to give labor in return for it, by cutting timber in the woods nearby and using it to build boats or "flats" (a sort of scow), or saw it into lumber, and the next summer the Relieving Officer for the Newfoundland Government, who travelled up and down the coast in the mail boat, would examine our accounts and certify them for payment and then sell the boats, flats and lumber to those requiring the same, thereby partly, if not entirely, reimbursing the Government for the relief outlay.

7. The tide comes right up to the post at Northwest River where it rises and falls about four feet at that place, but it runs up into Grand Lake for about 15 miles farther up, and its changes are plainly seen there.

W. J. CARSON.

SWORN at St. John's, Newfoundland,
this 18th day of June, 1926.

JOHN McCARTHY, J.P.,
Clerk of the Peace

[18 Feb.,

No. 646.

CENSUS FIGURES ON LABRADOR FROM 1857 TO
1884.

6 Gower Street,
St. John's, Nfld.,
February 18th, 1922.

Arthur Mews, Esq.,
Deputy Colonial Secretary,

Sir,

Re LABRADOR BOUNDARY.

The Minister of Justice is desirous of securing, for use in the above case, a statement of the Census Returns for each period as far back as your records go.

I shall be glad if you will let me have this statement at your earliest convenience.

I have the honor to be,
Sir,
Your obedient servant,
(Sgd). P. T. McGRATH.

p. 1592

Department of the Colonial Secretary.
St. John's, Newfoundland
March 13th, 1922.

Sir,

I have the honour to forward you herewith, as requested in yours of February 18th, a statement of the Census Returns for each period as far back as our records go, namely for 1857. I have attached some explanatory notes where these would appear to be necessary and have included such miscellaneous information as is shown in the variable sheets.

The Returns for 1921 are not yet completed, but as soon as they are available I will forward you a copy.

I have the honor to be,
Sir,
Your obedient servant,

(Sgd). ARTHUR MEWS,
Deputy Colonial Secretary.

The Hon. Sir P. T. McGRATH, K.B.E.,
City.

CENSUS OF LABRADOR, 1857.

Copied from Record.

Note.—The Census of the Labrador was cursorily taken by the Superintendent of Fisheries (James L. Prendergast, Esquire) in 1856 and 1857, but it is not sufficiently correct or full to form a part of the foregoing Returns. The number of permanent residents, as given by that gentleman, from L'Anse Sablon to Sandwich Bay, both inclusive, including Belle Isle, is 1650, of whom 1331 are Protestants, and 319 Roman Catholics.

(Sgd.) ARTHUR MEWS,
Deputy Colonial Secretary.
p. 1593

CENSUS OF LABRADOR, 1869.

Names of Settlements.	No. of Inhabitants.
Blanc Sablon	39
Lance St. Clair	41
Forteau	62
Lance au Loup and Fox Cove	47
Lance au Diable	21
Capstan Island	28
West St. Modeste	63

Sloop Cove	11
St. Francis Bight	48
Fishing Ship Harbor	4
George's Cove	37
Square Islands	<u>44</u>
	<u>1,420</u>

On recapitulation page the total population of Labrador is given as 2,479.

These are set out as—

Males	1,483
Females	<u>996</u>
	<u>2,479</u>

p. 1594

and, again, as

Names of Settlements.	No. of Inhabitants.
Born in Nfld.	668
„ „ England	124
„ „ Ireland	9
„ „ Scotland	21
„ „ Brit. Cols.	1,635
„ „ other coun.	<u>22</u>
	<u>2,479</u>

and, still again, as—

Church of England	1,803
„ „ Rome	483
„ „ Wesleyan	165
Others	<u>28</u>
	<u>2,479</u>

I can only explain the disparity between the 1,420 persons as shown in the detail above, and the 2,479 given in the recapitulation, as the total population, on the assumption that another page of detail, covering settlements north of Square Islands, is omitted from our copy of the Census, the only one extant, to my knowledge.

Apparently the Eskimo population of Labrador was not taken in this year, as the tables of origin and religion given above prove that the 2,479 people embraced therein are of the white extraction.

At Battle Harbour one school was maintained during the winter and summer seasons, and one during the summer only.

CENSUS OF LABRADOR, 1874.

MISCELLANEOUS.

The establishments of Messrs. De Quetteville Bros., Boutellier Bros., and Williams, Frewing and Co., fit out in Jersey and Paspebiac for the fishery, bringing nearly all their men from these places, whence they return again at the close of the season; none, therefore, can be considered as permanent residents of the Labrador. A few, however, are left on the Coast for the purpose of looking after the premises.

A School opened here this summer. (Capstan Id.).

15 in family of Light House Keeper at Forteau.

School kept here summer and winter. (Pinware).

Ditto Ditto (Red Bay).

An establishment for preserving salmon kept by Capt. S. Gaden. (Chimney Tickle).

School kept; 20 scholars winter and summer. (Cape Charles).

School kept here for Matthews and Trap Coves. (Matthews Cove).

At Battle Harbor Messrs. Baine, Johnston & Co., of St. John's, have a large supplying establishment. There is also at this place a large commodious church. The Rev. George Bishop of the Church of England is the resident Missionary.

School in operation during the winter and summer.

The establishment at St. Francis Harbor, formerly owned by Messrs. Hunt & Henley, of Dartmouth, England, was, two years ago, purchased by Mr. John Rorke, of Carbonear. There is an extensive salmon fishery at this place. Mr. Rorke has now an establishment for preserving salmon.

The establishment at Venison Is'd, formerly belonging to Messrs. John Slade & Co., and recently to Messrs. Ridley & Sons, was, two years ago, purchased by Messrs. John and George Rorke, of Carbonear. At this place there is also an establishment for preserving salmon.

At Grady there are two mercantile establishments, occupied during the summer and autumn months only, one belonging to the Hudson Bay Co., and the other to Messrs. King & Larmour, of Dartmouth, England.

p. 1598

The establishment at Cartwright, Sandwich Bay, formerly belonging to Messrs. Hunt and Co., was purchased, one year ago, by the Hudson Bay Company. The residents of Sandwich Bay are engaged almost exclusively in the salmon fishery, and during the winter trapping and hunting. Most of the people use the Company's nets, and fish on the "shares."

At Eagle River and Earl Island, both places in this Bay, are establishments for preserving salmon, which annually export about 40,000 tins.

There are four establishments in Hamilton Inlet for preserving salmon. The Hudson Bay Company have an establishment at Kennemish, at Snook's Cove, and at Rigoulette. Captain W. Norman, of Brigus, Conception Bay,

has an establishment at Mullin's Cove for the same purpose. The Hudson's Bay Co. exported last year 33,000 tins, and Captain Norman about 6,000 tins. As in Sandwich Bay, the people of Hamilton Inlet fish the Company's nets on the "shares," and are engaged during the winter months trapping and hunting.

(Sgd.) ARTHUR MEWS,
Deputy Colonial Secretary.

* The resident population of the Coast North of Indian Harbor is, with the exception of about 40 or 50 people, composed entirely of Esquimaux, of whom there are 66 in Hamilton Inlet.

Figures of origin are not given in 1884, so far as Labrador population is concerned.

Church of England	1,974
„ „ Rome	566
„ „ Wesleyan	305
„ „ Others	<u>1,366</u>
	<u>4,211</u>

The 1,366 of other denominations shown above are apparently all Eskimos, professing the Moravian faith except 17 Presbyterians, and 19 Congregationalists. The total for “Moravians” on page 213 is 1,223, leaving a discrepancy of 107. The 130 Indians are classed as belonging to the Church of Rome.

MISCELLANEOUS.

Eskimo Settlements.—No produce reported upon. All hunt and fish, except three settlers, who trade for the Hudson Bay Company, or on their own behalf. Most of the Eskimos live in winter on the stations, trading with the Mission Stores. Very few of the Settlers do so; most living scattered about and trading with Hudson Bay Company; or other traders. Creed that of the “United Brethren” or “Moravians.” There are sixteen adult males and fourteen adult female Missionaries, Germans.

It is a matter of doubt as to whether the Indians are Newfoundland or Canadian subjects. They hunt on Canadian and Newfoundland territory, but they obtain their supplies from the Hudson Bay Company's Posts in Newfoundland Labrador.

Labrador, Moravians, 1,223, Increase.

The increase of Moravians on Labrador arises from the Returns in 1884 embracing all the Eskimo settlements from Cape Harrison to Ramah, of which no Return was given in 1874.

(Sgd.) ARTHUR MEWS,
Deputy Colonial Secretary.

No. 647

**LICENCE TO DONALD A. SMITH J.P., FOR COAST OF
LABRADOR, WITHIN GOVERNMENT OF
NEWFOUNDLAND, TO CELEBRATE MARRIAGES.**

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 52, page 28.

By His Excellency Sir Alexandander Bannerman, Knight, &c.
&c.

Whereas by a certain Act of the General Assembly of the Island of Newfoundland made and passed in the third year of His late Majesty King William the Fourth entituled "An Act to repeal the laws now in force concerning the celebration of Marriages and to regulate the future celebration of Marriages in this Island it is (inter alia) enacted and provided that when the residence of any woman about to be married shall be distant ten miles from the residence of the nearest Clergyman or Teacher or Preacher of Religion licensed in the manner as in the said Act is provided and prescribed it shall and may be lawful for any Magistrate or Conservator of the Peace being first duly licensed for such purpose by the Governor or Commander in Chief for the time being to celebrate such Marriage or Marriages I the Governor do therefore by these presents license authorize and appoint you Donald A. Smith, Esqr one of Her Majesty's Justices of the Peace for the Coast of Labrador within the Government of Newfoundland to celebrate all such marriages as according to and under and by the provisions of the said Act such duly licensed Magistrate or Conservator of the Peace as aforesaid is authorized and empowered to celebrate.

And in the execution of your Office and authority herein you are hereby especially enjoined and required strictly to observe and fulfil all and singular the conditions, restrictions requisitions and forms prescribed by the said Act to be observed and performed by such Justice of the Peace in the exercise of the trust and authority hereby unto you delegated and confided.

Given &c. the eleventh day of August A.D. 1860.

By His Excellency's Command,

(Signed) J. KENT

To Donald A. Smith, Esqr.,

SIR,

I have received and laid before the Government of this Colony your letter of 28th ult. applying for three blocks of land at Black Bay, Labrador for the purpose of searching for minerals, and which are defined as follows upon the plan therewith sent, viz:

1. Hon. D. E. Price,
2. Alex. K. Fraser,
3. Simon J. Dawson,

and am directed to transmit to you in reply copy of a description of licence of search recently granted to Mr. George Duval and further to state that the Govt. will be happy to grant you licenses of search for so much of the land applied for on behalf of yourself and the other parties interested as will not interfere with that already included in Mr. Duval's license.

I have, &c.

(Signed) J. BEMISTER.

SIR,

The Government having determined for the benefit of the Commercial Body, to send the "Ariel" on her next cruize North (with the local mails) from the terminal port of Twillingate to the Coast of Labrador, had been pleased to appoint you to be the Mail Officer on board to have charge of all Letters &c. intended for that part of this Colony.

Your duty will be in addition to procure and furnish the Government with a careful statement of the quantities of fish taken at each Harbour at which you touch and also of the state and prospects of the fishery generally along the Coast of Labrador.

I enclose a printed notice for your information and guidance showing the different places at which you are to call, and the order to be observed in carrying out your duties.

You will stop at each of the terminal ports two hours, but the Govt. hope that at most of the other Harbours, one hour will be found sufficient but you will in no case exceed the two hours.

The Govt. would be glad, if time permit, for you to proceed to Rigolette, the nearest station of the Hudson's Bay Company, which contribute to our Revenue, but you will be better able to judge as to your doing so, when you arrive at Indian Harbour.

It will be necessary for the "Ariel" to be back in St. John's in time to take the presiding Judge of the Northern Circuit to Twillingate in time to open Court at that place on 9th September.

A number of notices in the enclosed form will be furnished to you by the Postmaster General, and you will leave one or more copies at each Harbour at which you call for the information of the Labrador Merchants and Agents.

The "Ariel" will call on returning at Twillingate and the other, ports as per contract.

(Signed) J. BEMISTER.

Thomas E. Gaden, Esq., etc., etc.

CIRCULAR.

Secretary's Office,
31st May, 1869.

GOVERNMENT RECORDS, ST. JOHN'S, NEWFOUNDLAND. Volume 54.

SIR,

I am directed by the Governor to acquaint you that His Excellency in Council has been pleased to appoint you take the Census of that portion of the District of _____ specified in the margin; and that this duty is entrusted to you in the confident expectation that by a zealous and careful discharge of it you will justify His Excellency's selection.

It is unnecessary to point out to you the great importance of the returns being made perfectly accurate, but I am more particularly to call your attention to the case of servants who may be employed during the fishing season in your District, but whose usual domicile may be in some other; you will therefore in every such case take pains to ascertain the probability of any such servant being included in the Return of the District in which he resides, and where any doubt may exist on this point you will note the same.

Under the head of "Miscellaneous" you will insert any circumstances of an interesting character which you may consider deserving of being recorded.

You will receive herewith a copy of the Act under which the Census is taken, with a sufficient quantity of the Tabular forms to enable you to prepare your returns, as well that which is to be transmitted to this office as to furnish copies to the Clergy of the several denominations to whom you will see they must be sent at least ten days previously to being submitted to the Court of Revision; the time and place of holding the Court you will also see you are to communicate to them.

You will perceive by the Act that before entering upon the duty in question you are to be duly sworn before a justice of the Peace faithfully to discharge the same, and that the Magistrates by whom the returns are to be revised are to be specially appointed by the Governor.

The service may be commenced some time in June and the Returns must be forwarded to me by the first of September next.

Your particular attention is called to the latter point.

I am, &c.

(Signed) J. BEMISTER.

To the persons appointed to take the Census

in the Outports except in Harbour Main,
Brigus, Port de Grave, Harbour Grace
and Carbonear.

Secretary's Office,
5th June, 1874.

SIR,

I am directed by the Governor to acquaint you that His Excellency in Council has appointed you to take the Census (under Act of last Session) for the Northern Division of Labrador extending from Red Bay exc.; and also on your way to the Labrador to take the Census on the Western Coast of this Island from St. John's Island to Quirpon end. and on your return to St. John's in October, from Quirpon, inc. to Cape John. Mr. Jonas Purchase has been appointed to assist you in the performance of the work in question.

You will perceive by the Act 20th, Vict; Cap 7, that you are to be sworn before a Justice before commencing the work in question, and that each Clergyman officiating within the limits assigned to you will have to receive a copy of your returns, or so much of the returns as may be included within his sphere of labour, before having them revised by the Revising Magistrate, Judge McNeil.

Your former employment in the same or similar work in 1869 will doubtless be of service to you in carrying out the instructions of the Government in this matter, and should Mr. Stephenson seek any information relative to taking the Census in the Straits you will please furnish him with your advice thereupon.

I have, &c.,

OF HOUSE OF ASSEMBLY, NEWFOUNDLAND, 1874,**

RELATIVE TO THE QUESTION OF THE LABRADOR STEAM SERVICE.

JOURNAL OF ASSEMBLY, NEWFOUNDLAND, 1874, p. 159.

The Hon. Mr. Shea, a member of the Select committee, 1874, to whom was referred the question of the Labrador steam service, presented the Report of the Committee to the House of Assembly, April 23, 1874, which reads, in part, as follows : —

“The Select Committee to whom was referred the question of the Labrador Steam Service, with a view to the increase of its efficiency, beg to report to your Honourable House that they have considered the matter in question, and are of opinion that the highly important interests involved in the Labrador Fisheries would be materially benefited by the rapid diffusion of intelligence along the coast during the fishing season. The short time, generally speaking, during which successful fishing continues, makes it most essential that the earliest information should be furnished to those interested, of the localities where the people may be most likely to have their labours rewarded; and when it is considered that some fifteen thousand of our fishermen are concerned in the Labrador fisheries, the importance of giving all practicable facilities to their operations can hardly be too highly estimated.”

**MEMORANDUM ON DISTURBANCES RESPECTING
RIGHTS OF PROPERTY LIKELY TO ARISE IN
HAMILTON INLET.**

Page 258, No. 6 RECORD BOOK, 1874 to 1883.

[4 Sept.,
1880.]Sept. 4th, 1880.
Government House,
Sept. 4th, 1880.

Present:

His Excellency the Governor.
Attorney General.
Col. Secretary.
Receiver General.
Mr. Winter.

His Excellency laid before Council a memorandum stating he had been informed of a letter received from Mr. Matthew Fortescue, J.P., Rigolet, saying that disturbances respecting rights of property were likely to arise in Hamilton Inlet from some expressions said to have been used by the Governor during his visit to that locality last year, and that the presence of a Ship of War would be required. It was ordered hereafter that Mr. Fortescue be informed that he was guilty of a dereliction of duty as Justice of Peace in having failed to acquaint the Government instead of others, and that he be requested to report on all the circumstances of the matter in question by first mail. The Council were of opinion that the information was not sufficiently authentic to warrant their advising that a Ship of War should be sent. But as in course of her cruise one of the Ships of War now here may call at Hamilton Inlet, the Captain should be instructed to impress on the people that all disputes respecting rights of property must be tried before the Supreme Court, and that neither he (the Captain) nor any other Justice of Peace had any authority whatever to interfere between the occupants and claimants of land or water privileges.

No. 663.

**COLONIAL SECRETARY E. D. SHEA TO MATTHEW
FORTESCUE, Esq.**

RECORD BOOK, ST. JOHN'S, NEWFOUNDLAND. Volume 57, page 299.

Secretary's Office,
9th Sept., 1880.

SIR,

His Excellency the Governor is informed that a letter has been received from you stating that disturbances regarding rights of property were likely to arise in Hamilton Inlet from certain expressions alleged to have used by the Governor during his visit to that locality last year; and that you thought that the presence of a Ship of War would be required there.

I am to acquaint you that His Excellency holds you guilty of dereliction of duty as a Justice of the Peace in having failed to communicate the information to the Government instead of to others; and I am to request you to forward me by first mail your Report on all the circumstances of the case.

Sir,

E. D. SHEA, C.S.

Matthew Fortescue,
Rigoulette, Labrador.

[22 Oct.,
1880.]**No. 664.****REPORT OF STAFF COMMANDER BOULTON ON
SURVEY OF UNGAVA BAY.**

Charlottetown, P.E.I. [sic]
October 22nd, 1880.

Sir,

In pursuance of instructions received from you on the 2nd August of this year, to the effect that I should on arrival of the Honourable Hudson Bay Company's steamer "Labrador," at Rigoulette from Quebec, proceed in her to Ungava Bay, and make such surveying observations as time and opportunity afforded during the voyage.

I have the honour to inform you that in the interval between the date of your instructions and the departure of the steamer "Labrador" for the north, I undertook and completed a plan of the anchorage at Rigoulette on scale M = 9".

On the 10th August, I embarked in the steamer "Labrador" and proceeded to Davis Inlet, the first port of calling, where we arrived on 11th August.

I also made a running survey of the southern approach to Hudson Bay Company's post at Davis Inlet, which is situated on the west side of Ukassiksalik Island.

Daylight of the 19th found us off Segleh Bay and thence to Nachvac — a sketch and patent log and compass was made from the entrance of Nachvac Bay to the Hudson Bay Company's post, some 13 miles further up, where the steamer "Labrador" moored on the same evening.

On the 26th August the steamer "Labrador" left Nachvac for Kokesok, where we arrived on the 28th.

From a sketch made and enclosed, taken in the vicinity of Cape Chudleigh, while steaming between it and the Buttam Islands, I found the contours of both differed from those depicted on the chart No. 1422. A straight course being steered from Chudleigh to Chosok, little of the coast

between them could be seen, and that so low and undefined as to render any attempt to cut it in useless. The steamer "Labrador" lay at Hudson Bay Company's Post Fort Chimo, 25 miles up from the mouth of the river, till the 8th September, when she left on her return to Rigoulette.

During her stay at Fort Chimo

The continuously thick weather prevented as many observations for latitude and meridian distance being taken as I could have wished. Sufficient, however, I think, were obtained, combined with those at Fort Chimo, and the triangulation at each place to give a good approximation of the position of the river, and also to keep in check the running survey made from the bar outside the entrance to Fort Chimo.

From Kai-Wai-Chi-Ak, an Eskimo chief living at Cape Chudleigh, whom I met at Nachvac, I learnt that there is a passage fit for a large vessel, through into the Ungava Bay, about 15 miles south of Cape Chudleigh; this man offered to pilot the steamer "Labrador" through it. If this passage is practicable, and inducements ever offer to small vessels to enter Ungava Bay, it would save them the labour of rounding the Cape where the "race" consequent on the strong current, is heavy and often dangerous.

The Eskimos congregate pretty thickly, I believe, about the missionary settlements on the Labrador coast, to the northward of which the coast is very sparsely inhabited by them, there being only 7 families between Nachvac and Cape Chudleigh.

I have the honour to be, Sir,

Your most obedient servant,

J. G. BOULTON.

Acting Staff Commd. and First
Class Assistant Surveyor, R.N.

Staff Commander W. F. MAXWELL, R.N.,
Commanding Admiralty Survey
of Newfoundland.

No. 665.
REPORT OF SCHOOLS ON LABRADOR.

[1880.]

(RECORDS OF THE DEPARTMENT OF EDUCATION, ST. JOHN'S, NFLD.)

 1880.

FRENCH SHORE AND LABRADOR.

XXXXXX. To this same gentleman, Rev. J. J. Curling, of Bay of Islands, I am indebted for information and suggestions respecting location and support of schools on Labrador, already being acted upon. I hope to report more fully upon these next year. At the end of Table D will be found a list of schools in operation on that coast for 1875-80. The reported attendance is 105 with a fair average number learning the three R's.

TABLE D. SCHOOLS ON LABRADOR.

LOCALITY.	TEACHER.	SALARY.	PUPILS.
Battle Harbor	Henry Mills	\$160.00	26
Red Bay	John Bailey	100.00	29
Forteau	Mrs. Rabbitts	84.00	14

Venison Island	Mrs. Taylor	96.00	<u>14</u>
			105

1881.

LABRADOR.

Table C gives list of schools on Labrador. Those at Battle Harbor, Cape Charles, and Venison Island, were open for a whole year; the one at Seal Island only for the summer months. This district, with its many small and widely-separated settlements will always be a difficult one to manage, educationally. The best that can be done is to help local efforts and agents, and as far as practicable, this has been done.

TABLE C. SCHOOLS ON LABRADOR.

LOCALITY.	TEACHER.	SALARY.	PUPILS.
Battle Harbor	Henry Mills	\$160.00	37
Seal Island	Mrs. Crocker	60.00	13
Venison Island	Mrs. Taylor	83.35	14
Cape Charles	Geo. L. Whitting	80.00	30

1882.
LABRADOR.

The small sum allocated for education on the Labrador is found to be inadequate to afford the many scattered places on this coast, any large share of instruction. Three schools have been maintained during the year, the statistics of which will be found in Table C, and help has been given in the important sections of Grosswater and Sandwich Bays. The time taken in reaching these places has hitherto prevented any personal inspection of these schools, and all arrangements have been left, as in the case of the West Coast, in the hands of the Clergy of the Church.

TABLE C. SCHOOLS ON LABRADOR.

1883.
LABRADOR.

There have been five schools in operation on this coast during the year, with an attendance of 132 children. Those at Battle Harbor and Cape Charles were open for a whole year; the other three during the fishing season only, and conducted by fairly competent teachers, who accompany friends to this Coast. The increased allowance to this desolate Coast has enabled us to open other schools during the present winter, at Indian Cove, and Sandwich Bay, and two young men from our training school volunteered and are now at work, one at the place last mentioned, and the other at Battle Harbor. Two new schools have been erected, one at Battle Harbor, mainly by the firm of Messrs. Baine Johnstone & Co., and the other at Venison Island, by the people themselves, with small help from other sources.

LABRADOR.

The difficulties involved in providing for the education of 1,500 people in numerous settlements, situated at irregular intervals along a coast of over 400 miles in extent, are almost too obvious to require mentioning. A personal visit to this remote shore made in the summer of last year, convinced me that all that could be reasonably expected from our limited grant for this purpose had been done, and the money spent to the largest advantage. No less than 288 children have benefitted from the schools mentioned in Table C. In three settlements, viz., Battle Harbor, Indian Cove, and Cape Charles, schools were kept open throughout the year; at Venison Island for the fishing season only, when many people came out of the Bays to prosecute the fishery from this point, while in Sandwich Bay an itinerant schoolmaster has for the fishing season kept school on the most important centres of the coast, and in the winter followed the settlers and kept school in their winter quarters up the Bay.

Granting of Licenses.

Be it enacted by the Administrator of the Government, Council and Assembly, in Legislative Session convened, as follows: —

Requisites of application.

1. The Licence Act of 1875, and the Act entitled “An Act to amend the “License Act, 1875,” passed in the present session of the Legislature, are declared subject to the provisions of this Act to extend and apply to the Coast of Labrador, with the exception of the following sections, that is to say: III, IV, V, VI, and VIII, of the first recited Act.

Fees.

2. A Stipendiary Magistrate within his District may, at any time during the month of May or June in any year, grant a license to any person approved by him, resident within his jurisdiction, to sell intoxicant liquors on the coast of Labrador, which license shall be in force until the end of the then current fishing season, and no longer.

Selling liquor afloat.

3. Every application for a license shall specify the particular premises upon which the business, in respect of which the License is sought, is to be carried on, and the License issued thereon, shall in all cases specifically limit the operation thereof to such described premises, and no license shall be issued authorizing the sale of liquors by the same person in any more than one harbor or place, or for more than one premises in any harbor or place.

Sale to Esquimaux.

Jurisdiction.

4. License Fees, for the Coast of Labrador, shall be fixed by the Licensing Magistrate, and shall not be less than fifty dollars.

5. If any person shall be convicted of selling intoxicating liquors upon the Coast aforesaid, elsewhere than on shore, he shall incur a penalty of not less than One Hundred Dollars.

6. No intoxicating liquors shall be sold, given or delivered to any Esquimaux Indian, under a penalty of Two Hundred Dollars.

7. Any Stipendiary Magistrate, anywhere, or any Justice of the Peace upon the Coast of Labrador, shall have cognizance of any offence under this Act.

[1887.]

EXTRACTS FROM NEWFOUNDLAND STATUTES.

EDUCATION (AMENDMENT ACT) 1887 50 VICT. C. 8

* * * *

XLIII. The Church of England Educational Districts shall be as follows: —

1 GEO. V. CAP. IV.

[29 March, 1911.]

An Act respecting the Esquimaux and Indians resident in Labrador.

(Passed March 29, 1911.)

1. Esquimaux Mountaineer other Indians not to leave Colony without permission.

Section

1. Esquimaux Mountaineer, and other Indians not to leave Colony without permission.

Section

2. Penalty.
3. Interpretation.

Enacting Clause { Be it enacted by the Governor, the Legislative Council and the House of Assembly in the Legislative Session convened, as follows: —

2. Penalty.

3. Interpretation.

Without the permission of the Governor in Council first obtained, it shall be unlawful for any person to enter into any agreement with an Esquimaux Nascopie, or Mountaineer Indian to leave this Colony or its Dependencies for the purpose of performing any services in any place outside this Colony or its dependencies, or to pay or promise to pay any money, or give or promise to give any article to any Esquimaux, Nascopie, or Mountaineer Indian as a reward or inducement for leaving this Colony, or transport or furnish the means of transporting any Esquimaux, Nascopie or Mountaineer Indian from this Colony to any place outside this Colony; provided that nothing in this section shall prevent the employment of Esquimaux, Nascopie, or Mountaineer Indians by any person for the purpose of fishing, hunting or exploring upon any part of the coast or territories of the Canadian Labrador.

Any person violating any one of the provisions of the first section of this Act shall be liable to a penalty not exceeding \$500, or in default of payment, to imprisonment not exceeding six months, to be recovered or imposed upon the complaint of any person in a summary manner before a stipendiary Magistrate.

In this Act "Esquimaux" shall mean native residents of the Coast of Labrador who are commonly known as Esquimaux.

[16 March,
1926]**AFFIDAVIT OF W. F. PENNY.**In the Privy Council.

IN THE MATTER of the BOUNDARY
between the DOMINION of CANADA
and the COLONY of
NEWFOUNDLAND in the LABRADOR
PENINSULA.

I, WILLIAM FREDERICK PENNY of Carbonear,
Newfoundland, Stipendiary Magistrate, make Oath and say as
follows: —

1. For 30 years I was engaged in the fishery business on
the Labrador, at Woody Island near Blanc Sablon, and at
Bradore which is on Canadian Labrador. At both these places
my firm, E. Penney & Sons had establishments for 40 years. I
was also for 25 years Lloyd's agent in the Straits of Belle Isle
and in that capacity dealt with many shipwrecks.

2. From my long experience in the Straits of Belle Isle on
both sides of the boundary at Blanc Sablon I say that the
people on the Labrador under Newfoundland jurisdiction are
better cared for by the Newfoundland Government than those
under Canadian Government by the Canadian Government.
This is true both as to relief in cases of distress,
communication by steamer and by wireless, medical attention
and hospitals, facilities for education and the administration of
justice.

3. As to the boundary at Blanc Sablon, Woody Island is
generally regarded as Newfoundland territory while Greenly
Island is regarded as west of the boundary and Canadian
territory.

SWORN at Carbonear, Newfoundland,

W. F.

PENNY.

AFFIDAVIT OF E. G. GRANT.

[17 June,
1926]

In the Privy Council.

IN THE MATTER of the BOUNDARY
between the DOMINION of CANADA
and the COLONY of
NEWFOUNDLAND in the LABRADOR
PENINSULA

I, EDWIN GEORGE GRANT, of Trinity, Newfoundland, agent for Messrs. Job Bros. & Company at Blanc Sablon, Labrador, and former member of the Newfoundland House of Assembly for Trinity District, make oath and say as follows:

1. I am a native of Trinity, born there in 1865. I have been connected since boyhood with the Labrador fishery, and for the past 41 years have been at Blanc Sablon for Messrs. Job Bros. & Co., of St. John's, who have been fishery operators on a large scale in Newfoundland for over 100 years, and in Labrador for over 50 years. For 16 years I was assistant to the late Hon. Capt. Samuel Blandford, who was for a long period in charge of the business for Messrs. Job Bros. on the Labrador side of Belle Isle Strait. Since 1901 I have been manager there and have 11 establishments under my direction.

2. I have read very carefully the Report of Sir William McGregor to Sir Robert Bond, respecting the boundary at Blanc Sablon, which is annexed to this affidavit and marked "A"; * and the map annexed to this affidavit and marked "B" † has been prepared under my supervision as approxi-

* Exhibit "A" is not printed, since it does not refer to Relief of Distress, and the same letter is exhibited to the affidavit of John Butt, Part VIII—L. No.

† Exhibit "B" will be found in the Newfoundland Atlas as No. 52.

mately similar to that of Governor McGregor, which I am informed cannot be found.

3. I was at Blanc Sablon when he visited that place in 1906, and much of the information contained in his Report was given to him by me. The Report correctly describes the Boundary situation there.

All of those, except myself, whom he names in the Report—Captain Blandford, Mr. Morel, and Mr. Parsons, as well as himself—have died in the intervening period and I am, so far as I know, the only person living who is familiar with the collection of revenue at that time.

4. Blanc Sablon is the headquarters of Messrs. Job's business in Labrador and is also the boundary line between Canada and Newfoundland territory. The Newfoundlanders now recognize as the dividing line the river that runs into Blanc Sablon; but the Canadians regard as the boundary the Cape or projecting point known as "Lazy Point," the western extremity of the bay. Canadian officials do not exercise any authority east of that point, and as Newfoundland has not exercised authority west of the River for some twenty years, there is about half a mile of seaboard between, which we have called for these twenty years "No Man's Land."

5. About that time owing to friction between Newfoundland and the United States, Newfoundland denied American fishermen trading facilities in her waters. The late Benjamin Parsons, who was then Newfoundland Collector of Customs at Blanc Sablon, held that the river was the boundary, but prior to that Newfoundland always claimed authority as far as Lazy Point, for I remember that about thirty years ago, Captain Blais, a French-Canadian trader, who sold some brandy to a Halifax skipper in Blanc Sablon Bay, was prosecuted by the Newfoundland Authorities and fined \$400.

As Governor MacGregor states, the curious distinction was made prior to the time of the friction with the Americans, that the Frewing Company paid duties on all the goods which it imported for sale to the people in Blanc Sablon, or to those who came there from other places to trade, but did not pay duty on the articles which it brought in for consumption in its own establishment west of the River.

I think Governor MacGregor made a slight error with reference to Point au Peau. The whole of the area from Blanc Sablon River, west to Lazy Point, has been known to us for the past twenty years as "No Man's Land." The Canadians never claimed east of Lazy Point. I consider that the line drawn by Governor MacGregor, if intended to show the extent of Newfoundland's marine jurisdiction, ought to be drawn from Woody Island to Lazy Point, instead of from Woody Island to Point au Peau. The reason for his having drawn it from Woody Island to Point au Peau is, I think, that the marine area east of that line is regarded as the bay or harbor of Blanc Sablon; and the passage or channel west of that line is regarded as only an entrance to the harbor.

6. Our firm has establishments east and west of the boundary. We work cod fishing traps just west of Lazy Point and are required by the Canadian authorities to pay the usual license fees, which their own people have to pay, but east of that point we work other traps and are not obliged to pay any fees. At Bradore, six miles west of Lazy Point, we also have a place, and two stations on Greenly Island, which lies between; and on all three we have to pay trap licenses to the Canadian authorities.

Until about four years ago a Canadian Revenue Cruiser visited the coast every summer, first under Commander Wakeham, and later under Commander Bernier, both medical men, who rendered services in that capacity as well as collected revenue, until recent years, when the Canadian Government appointed a resident Customs officer who was first located at Bradore and later at Bonne Esperance. Neither Wakeham nor Bernier asserted any authority east of Lazy Point, though sometimes the Cruiser entered Blanc Sablon on a friendly visit. The resident Customs Office at Bonne Esperance, from time to time, visits Greenly Island and collects duty on anything our firm imports there, but he, too, has never claimed authority east of Lazy Point; in fact, he states clearly that his jurisdiction ends there. Fishery Wardens have also been appointed for different sections of the Canadian territory, west of Blanc Sablon, but the one at Bradore, whose jurisdiction extends to Canada's eastern boundary, disclaims any authority east of Lazy Point.

7. In my opinion, the Newfoundland settlers on this part of Labrador are better looked after by their Government than are the Canadian residents by theirs. I think this is partly because the connection between the Newfoundland Government and the fishermen is much closer than between the Canadian Government and its fishermen. The Newfoundland Government understands better the needs of its people and acts more promptly, as the fishing industry is all-important to Newfoundland, but it is a smaller industry in Canada and the Government there is not so concerned. On the Newfoundland territory—that is east of the boundary line—we have had for nearly thirty years a regular weekly mail service all summer, first by the steamer Fife and since by the steamer Home, of 450 tons, which calls at all the harbours in the Belle Isle Strait, brings and takes mail, and gives a direct and satisfactory freight service. On the Canadian side, on the contrary, they had until three years ago only a small twenty-foot open boat, driven by a motor engine, running along the coast between Blanc Sablon and Harrington, 160 miles west, with a fortnightly mail and one only, or at most two, passengers could be carried, these being exposed to every sort of weather. Since then a steamer makes fortnightly trips between Quebec and Bradore during the summer months carrying passengers, mails and freight.

For much of their food the people on Canadian Labrador

have to depend on Captain Blais of Quebec, who visited the coast in a schooner twice a year, until three years ago, thus affording the only means for most of them to get in supplies or to ship anything outward. Now he brings in and sends out everything by the mail steamer which plies along the coast each summer,

p. 1636

and very autumn latterly a special steamer has been sent from Quebec just before navigation closes with winter supplies to the settlers, and in the fall of 1922 another special steamer was sent with relief because the fishery was so poor that the residents were in dire need.

8. Canadian people from Blanc Sablon to Bradore depend on our firm for fishery supplies, salt for curing their fish, and vessels to take away the catch, and west of Bradore they depend upon Whiteleys at Bonne Esperance, another Newfoundland firm, in the same way.

9. In the matter of schools these are provided on the Newfoundland side, but on the Canadian side, apart from Long Point, where there is a Roman Catholic settlement, priest and a regular school, the facilities are very meagre and teachers in the places that have schools have to be got from Newfoundland, because the Canadians cannot get any of their own people to go to the coast as teachers.

10. In hospital accommodation the Newfoundlanders are also much better off. There is a cottage hospital at Forteau, a large one at Battle Harbor, 80 miles east of us, another large one at Indian Harbor, halfway up the Atlantic Coast, and a small one at Northwest River at the head of Hamilton Inlet. But on Canadian Labrador there was only one, that at Harrington, 160 miles west of Blanc Sablon, but this, after being in operation some 10 or 15 years, was shut down for some time because no help could be got from the Canadian Government; but was reopened about three years ago, having I understand, secured a small grant from the Canadian Government. The only other medical service that Canadian Labrador got was that furnished by the medical officer in command of the revenue cruiser. On the other hand, the Newfoundland Government keeps a doctor on the mail steamer that makes fortnightly trips along the east coast of Labrador all the summer. Dr. Grenfell also cruises along the coast during the same period in his hospital ship. His hospitals at Forteau and at Northwest River are kept open all the year round, and those at Battle Harbor, Indian Harbor, during the summer months while the fishery is in progress. Dr. Grenfell first began his work on Labrador more than thirty years ago, when he opened Battle Harbor hospital, which has been operating ever since; the other hospitals were opened within a few years afterwards.

11. As to relief in time of need, I have found that the Newfoundland Government deals with this very promptly and I think on a more liberal scale than the Canadian authorities. As I have already said, the Newfoundland authorities are in more direct touch with their people than are the Canadian authorities.

Some thirty years ago the Canadian authorities issued notices to the people of Canadian Labrador that they would no longer supply them with relief but offering to remove them from the coast and settle them elsewhere, in pursuance of which policy they did transfer a number of people from the

p. 1637

coast to the Canadian West, but they gradually drifted back again. Twice since then at intervals of some years apart, similar notices were given but they were not acted upon, as the Canadian authorities realized that they could not permit the people to perish of starvation and they had no means of forcing them to leave the coast.

12. As to representation, while it is true the residents of Newfoundland Labrador have no member of Parliament, I think that is also true of Canadian Labrador. Certainly, if there is a member for that area he never visits it and the people never vote. In my forty years at Blanc Sablon I have never heard or known of the residents of Canadian Labrador taking part in any election either Federal or Provincial.

13. I have never known or heard of any claims by Canada to exercise jurisdiction on the coast, east of Lazy Point, or to dispute the right of the Newfoundlanders to go inland as far as they wish; nor have I ever heard any desire expressed by our people to be transferred to Canadian jurisdiction. In my opinion, they are better off under Newfoundland control than they would be under Canadian.

14. The chief occupation of the residents, or liverymen, of Blanc Sablon and other settlements on that section of Newfoundland Labrador fronting the Straits of Belle Isle, is fishing, but they are also trappers and engage in "furring" or trapping every fall and winter. For this purpose they go inland from two to three days' journey, counting about 15 miles to a day. Before the lakes and rivers freeze over, they use boats which they keep near cabins or "tilts" built by them at convenient places about a day's journey from each other. In these cabins they spend the nights. Trapping is done mainly in the forest section which stretches northeastward through the interior from Bonne Esperance to Hamilton Inlet. After the frosts set in and the rivers and lakes are frozen over, they make their way along with dog-teams in the same way. Usually they make four or five furring trips into the interior each season at intervals of about a fortnight. Also in the winter they go in again to hunt caribou, usually about the same distance,

employing dog-teams and occupying the same cabins; and bring out the meat on the dog-teams. They have also to go inland at many places for firewood. About Blanc Sablon it is now very scarce, and they have to up-root the stumps and roots of old trees and also the small bushes that grow within a few miles of the settlement. They have to go in about six miles to get wood to build wharves of "cribbing." This wood is too stunted for building boats or houses and they must get lumber for this from Pinware and other rivers along the coast, or from Newfoundland. At places like Red Bay and West St. Modiste they go up the rivers 15 to 20 miles to get firewood and timber to build boats and fishing rooms.

We have always regarded the whole of the country extending inland indefinitely as part of the territory of Newfoundland and if the rights of the Colony were restricted to a strip of seaboard a mile or two deep, it would.

have very serious consequences for the residents of this section, who would be deprived of the right of trapping, hunting and wood-cutting as heretofore.

5. The occupations of the residents of Canadian Labrador are much the same: We consider Canadian Labrador as extending from the boundary at Blanc Sablon to Esquimaux Point, about 400 miles west, and these people live also by fishing and furring and obtain game and wood in the same way as our people do.

EDWIN G. GRANT.

G. Mackinson, Esqr.,
Harbor Grace.

No. 680.[11 November,
1897.]**MINUTE OF NEWFOUNDLAND EXECUTIVE
COUNCIL.**

November 11th, 1897.

A timber limit of one hundred square miles of land situate on Labrador commencing at Kendryakah Point, Lake Melville, thence running in a southerly direction ten miles, thence in a westerly direction twenty-five miles and thence by the Shore of Goose Bay and Lake Melville to the point of commencement, to issue to F. C. Berteau, Esq. Also the right to use the waters of the stream of South Brook, Lake Melville, for milling purposes, together with sufficient land for a Mill site.

[24 January,
1898.]**No. 681.**

N

MINUTE OF NEWFOUNDLAND EXECUIVE COUNCIL

January 24th, 1898.

The following applications for licenses to cut timber were approved subject to definition as to boundaries on rivers and lakes, viz.:—

1. Of William G. Hopgood, for land at Mokkaic Bay, Tessingakok River and Table Bay, Labrador
2. Of William G. Hopgood, for land at Deep Inlet, Camairktok, and on Fraser River and Lake, Labrador.
3. Of M. P. Gibbs for land situate on the Kenemichic and Kenamon Rivers, Hamilton Inlet, Labrador.
4. Of M. P. Gibbs for land situate between the Kenemichic and Kenamon Rivers, Labrador.

[7 May,
1898.]**MINUTES OF NEWFOUNDLAND EXECUTIVE
COUNCIL.**

May 7th, 1898.

At a meeting in the Office of the Surveyor General concerning Labrador timber limits, the following applications were approved:—

M. P. Gibbs, over 200 square miles, situate on Merry Field River and Merry Field Bay, commencing at a point about 25 miles inland from Kasungatak Island, embracing all sides of Merry Field Bay and Merry Field River for a distance of 50 miles inland.

A. Le C. Berteau, over 150 square miles on the Southern side of the Grand Lac of the North West River, Lake Melville, Hamilton Inlet, Labrador.

E. H. Berteau, over 250 square miles on the Northern side of Lake Melville, Hamilton Inlet, Labrador, commencing at the mouth of the Sebascachew River, thence along the left bank of said river to a point ten miles from its mouth, thence twelve miles in a north-easterly direction, thence twenty-two miles more or less in an easterly direction to the waters of Lake Melville, thence along the shore of the said Lake to the point of commencement.

John H. Birkett, over 250 square miles more or less; situate on the North shore of Lake Melville, Hamilton Inlet, Labrador, commencing on the east side of Valley's Bight, thence running along the shore of Lake Melville for a distance of 25 miles or thereabouts to the Eastern boundary line of land applied for by E. H. Berteau. The area to extend inland ten miles from the Coast line above defined.

[7 May,
1898.]

Edwin H. Berteau, over 150 square miles more or less situate on the south side of the Western end of Lake Melville, Hamilton Inlet.

M. Fortescue, of Ipplepen, Devon, England, over 250 square miles more or less, situate on the South side of Lake Melville, Hamilton Inlet, commencing at Elaganlett Bay, thence continuing on a south-westerly direction 14 miles more or less, thence in a north-westerly direction 12 miles more or less, thence northwardly to Kendryakuk Point, Lake Melville, thence along the shore of said lake to point of commencement.

James T. Hamilton, over 100 square miles situate on the South Arm and tributaries of the Gilbert River, Labrador.

May 7th, 1898.

James T. Hamilton, over 300 square miles situated on both sides of the St. Charles River, Labrador, subject to a

reservation of five miles from the salt water.

W. B. Grieve, over 400 square miles, situate at St. Lewis Bay, the said land extending up St. Lewis River 20 miles and for a distance of 10 miles on

p. 1642

each side of said river, and being in the rear of land under license to the W. C. Edwards Co.

James A. Crease, over 100 square miles, situate at Jack Lane Bay (Kongikstatok). Labrador, and the river flowing into said Bay, for a distance of 25 miles.

T. S. Lawrence, over 150 square miles situate at Hawke and Caplin Bay, Labrador.

T. S. Lawrence, over 100 square miles situate near the mouth of White Bear Arm, Labrador, and extending a distance of 5 miles on each side of a river known as North West River, thence for a distance of 20 miles up said river.

T. S. Lawrence, over 50 square miles, situate on both sides North River, near Sandy Point, at the North West side of the entrance to Sandwich Bay, Labrador, and extending two and a half miles on each side of said river, thence 10 miles up said river; provided that no right to cut timber within 5 miles of the waters of Sandwich Bay shall be permitted.

T. S. Lawrence, over 200 miles on the South Side of Sandwich Bay, between the Hopgood and W. C. Edwards Co.'s areas, provided that no right to cut timber within five miles of the waters of Sandwich Bay shall be permitted.

T. S. Lawrence, over 300 miles square in latitude 55° North, extending along the shore 35 miles in a S.E. Direction inside Dog Islands, and back from the shore 10 miles.

Duncan A. Storey, over an area of 500 square miles situate at St. Michael's Bay, Labrador, subject to the rights of T. S. Lawrence whose application includes a part of the land herein asked for.

Duncan A. Storey, over 500 square miles, situate on both sides of the Nasacaupie River, Labrador, and also on the shores of the North West River.

The Surveyor General to be instructed to reserve all timber rights within a radius of five miles from the Moravian station at Makkovik or Makavick, Labrador.

The following applications for timber limits on the Labrador were not approved:—

[16 Sept.,
1901.]

A. le C. Berteau, over 100 square miles at Sandwich Bay.

A. Le C. Berteau, over 200 square miles on both sides of the Back-way, south shore of Lake Melville, Hamilton Inlet.

C. C. Carlyle, over 500 square miles at St. Michael's Bay.

Use of the waters of the Sebascachew River, Labrador, for milling purposes, and also land for a mill site to be granted to E. H. Berteau, St. John's.

Sept. 16th, 1901.

The following applications were approved:—

No. 16. John M. Jackman for the right to cut timber over 120 sq. miles of land situate at Giles Brook and Corner Brook, Sopp's Arm; subject however to a reservation of 3 miles from sea shore; Reg. Vol. 2, Fol. 19.

p. 1643

No. 18. C. E. Willis for the right to cut timber over 8 sq. miles of land situate at Fog Island River, Port au Port, subject to a reservation of 3 miles from the Salt water; Reg. Vol. 3, Fol. 52.

July 17th, 1903.

The Committee of Council had under consideration Despatch No. 24 of date the 8th April, received from the Right Honourable the Secretary of State for the Colonies, and the accompanying copy of a despatch from the Governor General of Canada, on the subject of the issue by the Government of this Colony of a License to cut timber on lands now for the first time claimed to be within the jurisdiction of the Province of Quebec. The Committee are unable to admit the claim set up by the Canadian Government, and deny that there has been any encroachment by this Government upon the territory of the Province of Quebec.

By the Royal Proclamation of 1763 the River St. John was made the Eastern limit of the Province of Quebec on the North Shore of the St. Lawrence, and all the rest of that shore, and of the Atlantic Coast of Labrador to Hudson's

Straits with Anticosti and the other Islands in the Gulf of St. Lawrence, were annexed to Newfoundland. Eleven years later (1774) the Labrador, the North shore of the River and Gulf of St. Lawrence, and the islands in the Gulf, were all transferred to Quebec by the Quebec Act. They remained part of Quebec until 1791, and part of Lower Canada until 1809, in which year the Imperial Parliament passed an Act (49 Geo. III. Cap. 27) which re-annexed to Newfoundland all that had been added to it by the Proclamation of 1763, with the exception of the Madalaine Islands. In the year 1825 the Imperial Parliament passed an Act (6 George IV. Cap. 59) which restored to Lower Canada part of what had been taken from it in 1809, namely: So much of the Coast of Labrador as “lies to the Westward of a line to be drawn due North and South from the Bay or Harbour of Ance Sablon, inclusive, as far as the fifty-second degree of North Latitude with the Island of Anticosti and all other Islands adjacent to such part, as last aforesaid, of the Coast of Labrador.”

It is clear then from the foregoing that it was a *portion of the Coast* of Labrador that was transferred to Canada and *only that portion* as “lies to the Westward of a line to be drawn due North and South from the Bay or Harbour of Ance Sablon, inclusive, as far as the Fifty Second degree of North Latitude.” This left the whole peninsula of the Labrador under the jurisdiction of the Government of this Colony. The License to cut Timber referred to in the report of the Honourable the Privy Council of Canada, now under consideration, is many miles to the Eastward of line which was laid down by the Imperial Statute, above quoted, as the boundary between the Province of Quebec and the Newfoundland Labrador.

On the 31st July, 1880, an Imperial Order in Council was passed in the following terms namely: “From and after the first day of September, 1880, all British territories and provinces in North America, not already mentioned within the Dominion of Canada, and all Islands adjacent to any of such territories or possessions, shall *with the exception of Newfoundland and its Dependencies* become, and be annexed to, and form part of, the said Dominion of Canada, and become and be subject to the Laws for the time being in force in the said Dominion, in so far as such laws may be applicable thereto.” This in no way affected the Labrador peninsula which was within the jurisdiction of the Government of Newfoundland.

Minute Book.
Oct. 1902 to April 1904.
Pages 173, 178-9-80.

[19 June,
1906.]**MEMO. TO BE ATTACHED TO MINUTES OF
COUNCIL OF 9th JUNE, 1906.**

I have approved of these Minutes in the usual way, though I have grave doubts as to the desirability of granting Leases to cut timber over large areas on the Labrador Coast without a Report on the locality to make sure that such leases can with regard to both the present and the future of fishing, shipbuilding, etc., be granted.

A reservation of 5 miles on the coast is I fear not of so much value at some places. From certain stations people have already to go twenty-even forty miles for firewood.

I do not think any further grants should be made on the Labrador Coast till the Timber Areas have been reported on The Honble. Captain Eli Dawe has seen the coast, and is therefore in a position to inform the Committee of Council what he thinks prudence requires in this matter in the interests of the future of the fishery.

(Signed) MACGREGOR.
Governor.

JOHN'S, NEWFOUNDLAND.**

Tuesday, June 17th, 1846.

[8 July,
1846.]

H.M. Steam Sloop, Argus, Capt. Purvis having been placed by Vice Admiral Fanshawe, the Naval Commander in Chief, at the disposal of His Excellency the Governor, in order that His Excellency might be enabled to visit the settlements on the coast of this Island and Labrador. His Excellency embarked yesterday morning. They will first proceed to St. George's Bay, and Bay of Islands, afterwards the Harbors and Settlements of Labrador as far as Sandwich Bay and will return to St. John's by the east coast of this Island, calling at Croque, Fogo, Bonavista and Trinity.

Tuesday, July 8th, 1846.

H.M. Steamer Argus arrived Thursday the 3rd, from the Westward of this Island and Labrador. His Excellency came on shore immediately after her arrival. After leaving St. John's they proceeded directly to St. George's Bay where the Governor landed and remained a short time. He then went on to the coast of Labrador, and visited every Harbor from Forteau to Cape Charles and Battle Harbor. Thence endeavoured to reach Sandwich Bay, but ice prevented, and obliged return to Cape Charles.

During his cruise His Excellency took pains to make himself acquainted with the trade and interests of his government, the habits of the people etc., and inspected the principal establishments on the route.

AUGUST 30, 1879.**[10 Sept.
1879.]**STEAMER NOTES.**

H.M.S. "Druid" left port last evening for Labrador with the Governor, his Secretary and the Receiver-Genl. on board. The first port to be visited is Rigolet.

Sept. 10, 1879.

THE DAILY LEDGER.

H.M.S. "Druid," with His Excellency the Governor and the Hon. Receiver-General on board arrived here from Labrador yesterday morning. From the 1st September to the 6th the weather was very fine for fish curing on the northern coast of Labrador, from Round Head Island to the northward. Heard from S.S. "Kite" that little had been done with hook and line after the 16th August, and the weather from that day to the 31st, had been very bad for fish curing. Three vessels had sailed from White Bears, Ragged Islands and Turnavick; got no report from other parts of the coast, but doubtless several had sailed for market. A large fleet of schooners were seen passing from northward to southward last week. The salmon fishery is not one-fourth of last year's catch; the failure being attributed to the prevalence of north-east winds during the entire salmon season. Herrings were small and only in sufficient quantity for bait, up to the 5th current. Former reports of the good fishery with codseins and traps are fully confirmed. Hook and line an average catch. The "Druid" visited Grady, Rigoulette, Mullin's Cove, Turner Cove and Cartwright; and on her return south met with foggy weather which continued until her arrival here yesterday.

Labrador.

“Governor, Commander in Chief, and Vice Admiral over Our said Islands adjacent and all the Coast of Labrador from the entrance of Hudson's Straits to a line to be drawn due North and South from Anse Sablon the said Coast to the 52nd degree of North latitude, and all of the islands adjacent to that part of the said coast of Labrador, as also all forts and garrisons erected and established within the said Island etc.

“The Western limit of the Government of Newfoundland is latitude 51° 25′ North, Longitude 57° 9′ West, and includes ‘Blanc Sablon’ and the ‘Woody Islands.’ The Northern boundary is Cape Chudleigh, in latitude 60° 37′ North, longitude 65° West.”

No. 697.

**REPORT OF THE COMMISSIONER FOR THE
PROTECTION OF THE FISHERIES AT LABRADOR
FOR THE SUMMER OF 1864.**

[1864.]

On the 25 (July) we arrived at Blanc Sablon, and amongst a large number of other vessels, found there the yacht of Mr. Fontain, the Canadian Commissioner of Fisheries, with whom I had several conversations on the subject of the boundary between the two provinces, he contending for some time that the Isle a Bois or Woody Island was beyond the jurisdiction of the Newfoundland Government. Mr. Fontain's vessel was a very fine one, fitted up in naval style with a crew of 18 men. On the 26th July, I discovered six French fishing vessels lying at anchor between Isle a Bois and Green Island, just beyond what I understood to be our boundary line and in Canadian waters. I gave notice at once to Mr. Fontain, who immediately made sail, bore down upon them and drove them away.

July 28th.—Called at the Isle a Bois, where I found the agents of the mercantile establishments complain as did some others, of their being obliged to clear and enter from a port in Canada-Gaspe—the Canadian authorities contending, as they said, that contrary to what we claim, the boundary between the provinces was a brook falling into the head of the harbor of Blanc Sablon.

Respectfully submitted

EXHIBITING LETTER FROM GOVERNOR MCGREGOR TO SIR ROBERT
BOND.

[31 May 1926.]

In the Privy Council

IN THE MATTER of the BOUNDARY
between the DOMINION of CANADA
and the COLONY of
NEWFOUNDLAND in the LABRADOR
PENINSULA

I, JOHN BUTT of Harbour Grace, Newfoundland, Collector
of Customs, make oath and say as follows:—

1. Since 1910 I have been Collector of Customs at Blanc
Sablon, Newfoundland, Labrador, where I reside during the
fishing season from May until December, succeeding the late
Benjamin Parsons.

2. I have read, very carefully, the letter from Governor
McGregor to Sir Robert Bond, dated St. John's, 27th August,
1906, a copy of which is attached hereto and marked "A."

3. That letter correctly describes the situation with regard
to the Boundary between Newfoundland and Canada at Blanc
Sablon.

4. In the discharge of my duties as Collector, I have
always regarded as the land boundary of Newfoundland's
jurisdiction the River mentioned by by [sic] Sir William
McGregor in Paragraph 5 of his letter annexed; as our
maritime boundary the line from Point au Peau to Woody
Island mentioned by Sir William McGregor in Paragraph 6 of
his letter annexed, and have collected duties only on goods
imported for doing business on the east side of the River, as
mentioned in Paragraphs 9 and 10 of his letter annexed.

5. Since I was appointed Collector in 1910 I have not required any American, Canadian or Newfoundland fishing vessels to pay light dues, but I have exacted light dues from Canadian trading vessels entering Blanc Sablon Harbor and from Newfoundland vessels coming there with cargoes to discharge or to load cargoes for foreign ports. If any American vessels, other than fishing vessels, came I would require them to pay, but none ever come.

6. As Relieving Officer for the Newfoundland Government I supply relief to the people in the settlement, including the two families living west of Blanc Sablon River, as we regard them as Newfoundlanders who have settled there temporarily.

7. I also built for the Newfoundland Government in 1924 the bridge across the River and the Quebec Government made us a small contribution towards completing the western end of it, because it was a convenience for the people living at Long Point; enabling them more easily to reach Blanc Sablon for their mail, all of which they get through the Newfoundland Post Office there as they have no postal facilities at their own place.

JOHN BUTT,
Collector H. M. Customs.

Sworn at St. John's, Newfoundland, this
31st day of May in the year 1926.
Before me

SIMON BUTLER,
Commissioner.

[27 Aug.,
1906.]

(A)

[Copy.]

Government House,
St. John's, Newfoundland,
27th August, 1906.

The Right Honourable
Sir Robert Bond, P.C., K.C.M.G.,
Prime Minister.

Dear Sir Robert Bond,

On receiving from Sir Edward Morris his letter of 29th June, covering a telegram from the Sub-Collector at Blanc Sablon of date 28th June, reporting that the "American Banker 'Mabel D. Hines,' ninety-two tons. S. B. Hines of Gloucester Master and Owner, positively refuses to pay light dues (at Anse Sablon) left port, others paid to date," I informed that gentleman that it was my intention to visit Anse Sablon, and that if I did so I should have much pleasure in putting before

I now have the honor to inform you that as the S.S. "Fiona" was taking Mr. O'Rielly to the Labrador Coast to hold an enquiry there, I availed myself of that opportunity, and visited Anse Sablon from the 12th to the 16th July, and am consequently in a position to throw some light on the question of Newfoundland jurisdiction at that place, which is the starting point of the boundary between the Dominion of Canada and the Colony of Newfoundland on the Labrador Peninsula.

2. I went to Anse Sablon provided with the instruments necessary to make a complete triangulation of the Bay and its vicinity. I found that the greater part of what was required had already been done by Staff Commander Maxwell, R.N., in 1890, and by Captain Tooker, at present in charge of the Admiralty survey in these waters. I enclose herewith a sketch map prepared from the work of these surveyors and from the observations made by myself and my staff, which will serve to illustrate what follows herein.

3. The true starting point of the north and south Boundary line from Anse Sablon to the 52nd degree of Latitude is by no means clear. Apparently it could with reason be located at any one of these different points:—

- (a) At Point St. Charles,
- (b) At the mouth of the Anse Sablon River,
- (c) At Point a Peau.

4. The considerations on which the starting point might be held to be Point St. Charles are those contained in the Imperial Statute 6 George IV, Chapter LIX. of 22nd June, 1825, which runs as follows:—

"Be it therefore enacted that so much of the said coast lies to the westward of a line to be drawn due north and south from the bay or harbor of Ance Sablon, inclusive, as far as the fifty second degree of north latitude . . . shall be and the same are hereby re-annexed to and made part of the said Province of Lower Canada."

If this section is to be construed as giving, in virtue of the word "inclusive" the whole of the bay to Canada, then it would appear that the boundary line should start from Point St. Charles, the eastern extremity of the bay, as shewn by the true north and south line in yellow on the accompanying map. It does not appear, however, that this interpretation of the Statute has ever been accepted or acted upon. The difference in distance between Point St. Charles and the mouth of the Anse Sablon River is one and half nautical miles; and between Point

St. Charles and Point a Peau, two and three-tenth nautical miles.

The starting point cannot be accepted as laid down at Point St. Charles without considering fully the alternative starting points that have in actual practice been regarded for two or three generations as the boundary.

5. Were it possible to accept the Statute referred to above as giving Anse Sablon as the starting point of the north and south line without further

p. 1660

qualification, then the point that would be fixed on by a geodetic surveyor would most probably be the mouth of the Blanc Sablon River. It will be seen from the map that the establishment Frewin is situated on the west side of this river; and the station Job on the east side. The Manager of the former is M. Morel of Jersey; the Manager of the latter is Mr. E. Grant. Each of these gentlemen has assured me that the River has always been regarded by residents and officials alike as the boundary ashore between Canada and Newfoundland. Both Mr. Morel and Mr. Grant have been upwards of a score of years residents of Anse Sablon. Their statements are confirmed by Mr. Parsons, Sub-Collector of Customs for this Colony at that port.

According to this practice the boundary would not be on a north and south line, but be the middle of the River from the sea to the lake shewn on the map, a distance in a straight line of nearly two nautical miles.

It appears, therefore, that this River Boundary has long been held in actual practice to regulate all relations between the two jurisdictions on land, but only on land.

6. Very attentive consideration should be given to the Point au Peau Boundary. The Map shewn that this is the name of the part of the Mainland of Labrador that lies nearest to Woody Island. It is at present, and it would appear to have been for a great many years, the practice of the Officers of both countries to regard a line connecting the western extremity of Woody Island with the nearest point of the mainland as the boundary between the maritime jurisdiction of the two Governments. Consequently all vessels that enter Anse Sablon Bay to the east line shewn in black, joining Woody Island to the nearest point of the mainland, are held by the Newfoundland Customs officers as being subject to the jurisdiction of this Colony. In other words the whole of the bay or harbor of Ance Sablon is held in practice to be, as far as maritime jurisdiction is concerned, part of the Colony of Newfoundland; and all vessels entering that bay, either from the east or from the west, are required to submit to the laws of this Colony. But on the western side of the bay of Anse Sablon, from the mouth of the River to Point a Peau, the Newfoundland jurisdiction is in practice held to end at high-

water mark. The Frewin Company has a sealing station at Point a Peau, and both that station and their establishment near the Blanc Sablon River are, though they extend to the beach, and though at the latter place there is a wharf stretching some distance into the sea, regarded as being in Canada. This part of the shore is marked in green on the map and it will be noticed that the boundary line laid down by Commander Maxwell lies to the east of a line through Point a Peau. The distance between these lines is, I am informed by Captain Tooker, 550 yards. Maxwell's line was probably drawn there with reference to the top of the hill it is shown to cross; but it may have been placed there to exclude the Frewin Sealing Station

p. 1661

7. That the practice of thus regarding the whole Bay or harbor so far as the water area is concerned, is by no means new, can be abundantly and easily proved:

(a) In my report on Labrador paragraph 66, I have shewn that the first Court established for the administration of Justice on Labrador, visited Anse Sablon on Circuit. Captain William Paterson, C.B., was Judge of that Court from 1826 till 1833, and exercised his jurisdiction there.

(b) In the Report of the Proceedings of Mr. Elias Rendell, Collector of Customs, for 1841, the following occurs:—"The encroachment of the French on the rights of our Fisheries on the coast of Labrador is also a subject of just complaint. From Blanc Sablon, in the Straits of Belle Isle, to Henley Harbor, the shore is literally lined with French boats."

(c) In his Report dated 1st September, 1856, James L. Prendergast states that he visited Anse Sablon as Collector of Customs and demanded of the establishments of De Queteville and of Boutilier on Woody Island, that they should report vessels and cargo. He also prepared a Census of his District, from Anse Sablon to Sandwich Bay, from which we learn that the Resident Population of Anse Sablon was 16, and of Isle au Bois, 14. Mr. Prendergast did not, it appears, visit Greenly Island.

(d) The same officer in his Report of 24th September, 1858, says that he arrived at Anse Sablon on the 9th July, and visited there the Quetteville establishment, who employed 150 men and 50 boats; in the previous year they had exported 12,000 quintals of fish, 70 puncheons of oil, and 500 barrels of herring. He gives all the particulars of 48 vessels that he found fishing then at Anse Sablon.

(e) In his Report dated 13th September, 1860, Mr. Prendergast states that on the 7th July, “three French schooners belonging to St. Pierre were fishing at Greenly Island, being beyond the limits of the Government of Newfoundland.”

(f) In his Report dated 2nd September, 1861, Mr. Stephen March, General Superintendent of Fisheries, relates that he remained at Blanc Sablon from the 16th to the 19th of July and “found a great number of Nova Scotia schooners fishing there. No account of any French boats crossing over on our grounds up to this date.”

The above references are only a few of the examples that may be found in the records of this Colony to show that Newfoundland has exercised jurisdiction in the waters of the bay of Anse Sablon, and on Woody Island for at least three generations.

8. These records can be supported by oral evidence from such witnesses as the Honourable Captain Blandford, M. Morel, and Mr. Grant and many

others. From the information supplied to me at Anse Sablon it seems quite clear that the Jersey firm of Frewin and Company have paid duty to Newfoundland at their establishment in Anse Sablon for at least fifty or sixty years. But there is, and has been, it would appear, more or less this curious limitation: that at times, if not always, this firm has paid duty only on what it sells for consumption on land east of the mouth of the Blanc Sablon River, or east of the line from Woody Island to Point a Peau; but not on what the firm consumes on its own premises which, as mentioned above, are held to be in Canada.

9. Some light is also thrown on the problem by the occupation, past and present, of Anse Sablon. All that live to the East of the River are natives or residents of Newfoundland territory, generally so in fact, and always so in the exercise of jurisdiction. On Woody Island there are three establishments.

(a) That of Mr. Penny of Carbonear, near the west end of Woody Island, who employs about 30 persons there during the summer.

(b) That of Messrs. Job Brothers of St. John's, who employ there in summer some 70 or 80 persons.

(c) That of Mr. Peddrick, who has sufficient hands to work one cod-trap on his own account. He had two schooners at the time of my visit fishing at Brad d'Or in Canadian Waters. These Woody Island establishments and their predecessors have always been held to belong to Newfoundland.

(d) On the west side of the harbor itself, but admittedly on Canadian territory, is the long established station of Frewin and Company at which some 13 hands are engaged.

(e) The largest establishment at Anse Sablon is that of the Messrs Job on the east side of the River, where they employ 160 hands. There never has, so far as I have been able to ascertain, been any doubt raised as to this station being in Newfoundland jurisdiction. It is a very old settlement and is the headquarters of the stations of the same firm on Woody and Greenly Islands and at Anse au Clair. Near to Messrs. Job's stations, but further east, is the Newfoundland Custom House, which was built in 1890. Up to that date Newfoundland collected Customs duties in Anse Sablon from a vessel in which the Collector used to travel from one part to another in the execution of his duties, often accompanied by the Judge, as was the case, for example, in 1868, when Judge Sweetland and

Collector Winter came here on duty in the same vessel. The duties collected last year at the Custom House of Anse Sablon were about \$2,000. I was assured that American vessels do not carry goods that could be sold by them without entry at the Customs. They carry no spirits or tobacco, and only the necessary supplies and apparatus.

p. 1663

(f) Near the Custom House are some seven or eight families, of Franco-Canadian descent originally, who occupy so many houses, with a total of about 38 persons, 15 to 20 of whom are children. There is also a small Catholic place of worship there, but neither school nor teacher, so that the children are not taught to read. These families are permanent residents. These settlers have some inferior traps, and sell what they catch to the large firms. They are very poor, but seem to be temperate and honest. They live by fishing and trapping. Mr. Grant holds a strong opinion that a hospital should be opened at Anse Sablon. He is of opinion that the new hospital at Harrington will be too far away for Anse Sablon.

(g) Greenly Island has always been regarded, as shewn above, as outside the jurisdiction of Newfoundland. There is only one fishing station on it, and that belongs to the enterprising firm of Job Brothers of Newfoundland. It is a very old station, and formerly belonged to a Jersey firm. It has evidently been constructed on a large scale and at great expense. At present it employs 65 hands.

The only other settlement on Greenly Island is that of the Lighthouse and Fog Signal Station, both maintained by the Dominion of Canada since 1873. The light was one that was visible for fifteen miles, and the Fog Alarm was also a powerful one; but the light is being improved, and a splendid new Fog Alarm is nearing completion. This establishment will in future, I was informed, be provided with two keepers. The need for the Fog Alarm can be well seen from the fact that in July, 1905, for example, it was in operation 272 hours. Some thirty to forty schooners were at anchor in front of the Island, as far as one could see in the fog, at the time of my visit.

It does not appear that the Newfoundland Officers exercise any jurisdiction in the waters between the south side of Woody Island and Greenly, even if vessels come there close to Woody Island. Licenses are paid to Canada for cod-traps laid down on the coast at any spot from Lazy Point westward. The current is too strong for these traps on the coast between Lazy Point and Point a Peau.

10. The Anse Sablon district has been completely

denuded of trees. Formerly Woody Island was, it would seem, covered by forest. There is not a tree visible in the district now; and nothing larger than small bushes on Woody Island. Firewood has to be imported to Anse Sablon from Hawke's Bay in Newfoundland.

No cultivation is possible. But a good deal of grass grows at different places, especially on Greenly Island.

The nature of the surface is due entirely to erosion, and not at all to dislocation. The erosion is due to weather and water.

The formation is silurian schist, which seems to rest on a bed rock of red granite, which crops out at Frewin's, Job's, and at other points near or at the beach.

The hills present at most parts a more or less greyish color, which was

p. 1664

found to depend principally on an abundant crop of those lichens that form the favorite food of the reindeer and of the local caribou. Formerly the native caribou were plentiful in the district, but they are becoming fewer in number. Last year there were none. It appears to be a good district for foxes, of the red and dark variety. A collection of the mosses and lichens was made, and will be transmitted to Kew for exact scientific determination. But even a very superficial examination of the neighbourhood leaves no doubt that the principal industry of that part of the coast should be the raising of reindeer. It would be difficult to exaggerate the importance of this question.

The harbor of Anse Sablon is not a very good or safe anchorage. So far as depth of water is concerned vessels can anchor anywhere in the bay, if not too close inshore. They can also anchor between Woody and Greenly Islands; but Anse Sablon Bay is open to the south-east and to the south-west. The place is, however, and always has been, much frequented by fishing vessels. Just before my arrival, there had been some fifty schooners or more there, about one-fourth of which were from the United States. I understood that only two sail came from Canada; and that the remainder were from Newfoundland. It appears that all American vessels that came into the Bay, in Newfoundland jurisdiction as described above, paid Light Dues with one exception of the "Mabel D. Hines." The same dues were collected from the two Canadian vessels "Ben Bolt" and "Percy Roy." Light Dues are not paid by the Newfoundland vessels. It should be mentioned that fishing craft cannot be supplied with water at Greenly Island, where there is difficulty in supplying even the permanent residents. Vessels therefore have to water at the establishment of the Messrs. Job near the River, or from the River itself. If foreign vessels stay outside the bay and send their boats in for water they can thus escape light dues; but if the vessel comes into the bay, then she becomes liable to light dues. Newfoundland has no lights on the coast, so that as regards the collection of light dues from Canadian vessels the position is this: That Dominion

craft entering the bay pay light dues to Newfoundland while the lights all along that part of the coast are entirely maintained by Canada; and the many Newfoundland vessels that fish on the Canadian coast between Anse Sablon and Harrington do not pay light dues to Canada.

As regards vessels of the United States in the bay, these that paid did so under protest, alleging that they paid no light dues in Bay of Islands last year; and pointing out that this Colony has no lights on the coast near Anse Sablon. American vessels both fish on the coast there and also come there for bait for open sea fishing.

12. On the 16th July, we ran into Anse au Clair in a dense fog. There were a few vessels there procuring a supply of caplin for bait. Some of these vessels were American. They had brought caplin seines with them which they hauled close to the shore, immediately in front of the houses of the permanent residents, whose services were in no way employed in procuring the supplies of bait.

p. 1665

There are about 150 permanent residents at Anse au Clair, nearly all adherents of the Church of England. They have a small school building but no teacher. One could not but observe an unusually large number of children at that place, good-looking, healthy and intelligent. A few exceedingly small garden patches were seen, sufficient to show the hopelessness of growing any part of their own food there. Fowls, I was told by some of the housewives, cannot be kept on account of the dogs of the place; and they must have the dogs to bring home firewood in winter, for they have to go many miles for firewood. One could see from the stumps of trees that had been a foot or two in diameter that the hills at Anse au Clair were formerly covered by forest, where now there is only scrub or nothing. Up to that date the fishing had been a complete failure, but fortunately, for these poor people, the seal fishery of last season was above the average. They find caribou in winter about 10 miles inland, but in diminishing numbers; and last year they had sometimes to go 30 miles to find one. It is a good fox district. They cannot depend on ptarmigan for food supply; and look forward to the winter with much apprehension, if the cod-fishery does not very greatly improve.

Some time before our visit to Anse au Clair the people of that place objected in a very emphatic manner to an American vessel taking bait there on Sunday. This was done for the reason that the residents maintained that "God has given the Sabbath Day for repose." There is no reason to believe that this action was not taken on sincere and conscientious sentiment. I understood that the American Master concerned admitted that little or no damage had been inflicted. One could not but sympathise with those poor people on the peculiar hardship of all their surroundings.

13. On the 16th we also visited Forteau. There are nearly

200 people resident there, scattered all round the margin of the broad bay. There also the fishery had been very poor. The people of Forteau have, however, one advantage over those residing at Anse Sablon, and at Anse au Clair; they can still procure firewood in their own district, for there is some forest left, small trees, indeed, on the Forteau River. This stream is not navigable to boats.

The same geological peculiarity was evident there at Anse Sablon that the sedimentary formation rests on a bed rock of red granite, which crops out beneath the schistose rocks at the water's edge.

14. The political position of that part of the coast of Labrador was urged on me at Forteau. I was assured that the majority of the permanent residents from Anse Sablon to Battle Harbor desire to be incorporated with Canada. The reasons alleged for this were that they cannot possibly grow the vegetables they require as food, and they that must import these from Canada and pay duty to Newfoundland on their potatoes, cabbage, turnips, onions, butter, cheese, etc. They declare that it is a specially great hardship to have to pay thirty cents a barrel on potatoes. It was stated that they can obtain lard from St. John's free of duty, but complaint was made as to its quality.

On the other hand, attention was drawn to the fact that the money they

p. 1666

spent in wages on the coast, in light-houses, telegraph stations, Marconi stations, post office, etc., is all Canadian.

And to this was added that though they pay taxes to Newfoundland they have there no representation.

15. It is unquestionable that the life led by the permanent settlers on that part of the coast is a very hard one. It would appear to be becoming harder with time, owing to the destruction of the forest that formerly existed, and in consequence of the fast diminishing numbers of caribou. The want of education for their children will also tend to heavily handicap the coming generation in the struggle for life among those that will have had greater advantage.

Nothing can be done for those people in the way of ordinary form of agriculture to permanently improve their condition. Temporary relief will in all probability be required by some of them during the coming winter to enable them to live through it. Such relief will, no doubt, be given where absolutely necessary, but it is only a temporary and recurrent, though inevitable, expedient.

It would certainly be well worth the trouble to consider carefully whether the status of the permanent residents on that part of the coast could not be permanently rendered tolerable by the introduction of reindeer there. It would appear that there are immense areas of moss-covered hills and plateaus on the coast suitable for vast herds of these animals, the possession of which would raise the quiet and temperate population of

Labrador into a condition of comparative affluence.

On the hill behind Anse au Clair one can see a large area of grassy country that would nourish sheep or goats. These animals cannot be thought of now, any more than fowls, on account of the at present indispensable dog. With sheep would come the material for some home industries.

It would thus apparently be found that the reindeer would not only be of great direct advantage, but would also effect much indirect good.

It is not apparent what else can be done to ameliorate the condition of the resident population there unless, indeed, some system could be introduced under which Government could advance to heads of families sufficient money to enable them to procure cod-traps and fishing vessels, on some such terms as those on which Australasian Governments advance money to farmers, at a rate of interest which recoups the state without making a profit. The generally honest and temperate disposition of the people would favor such a scheme.

If such a plan could be combined with the introduction of the reindeer on a scale sufficiently large, then the condition of the permanent residents on that hard coast would in all probability be immensely improved.

I have the honor to remain,
Your very obedient humble servant,

(Sgd.) WM. MACGREGGOR.

No. 704.**SKETCH OF THE HISTORY OF NEWFOUNDLAND
UNTIL 1809**BASED ON THE DOCUMENTS HEREINAFTER PRINTED.

Newfoundland was brought to the attention of Europe in 1497, and at once sprang into fame as a great fishing resort. John Cabot left Bristol on May 2 of that year, under a general commission for the discovery of unknown regions. He touched land and planted the King's standard at some point between Cape Breton and the Northern limits of Labrador, and on his return to England on August 6 of the same year gave currency to extraordinary stories as to the abundance of fish in the waters of the shores he had visited. News of his discoveries were conveyed to Milan and Venice, the ambassador from the latter state reporting to his master that Cabot and his companions were giving it out that the seas in those parts were covered with fish, which could be taken in baskets as well as nets, and that it would be no longer necessary to go to Iceland for codfish.

Newfoundland was known to continental Europe as Codfishland (Baccalaos). Sebastien Cabot, son of John, allowed himself greater liberty than his father had taken in describing the wonders of the seas in the new world. Peter Martyr, in his *De orbe novo Decades* which was published in 1516 with a dedication to Pope Leo X, relates that Sebastien Cabot, whom he mentions as his "very friend, whom I use familiarly," declared that it was he who named the island Baccalaos, as the fish in the waters thereabouts sometimes "stayed his shippes." Martyr's credulity encouraged Sebastien to greater flights. He told Martyr that the bears, which infested the shores, obtained their food by seeking out the places where the fish lay thickest, and plunging in on the throng obtained sufficient to satisfy their hunger. "So that (as he saith) the beares being thus satisfied, they are not noysom to men."

Bacallaos is the name by which the island is designated in a compendium of geography published at Seville in 1519 by Martin Fernandez de Encisco under the title "Suma de Geographia"; and in "La Geographia" of Ptolemy published in Venice in 1547, it is mentioned as Terra Nova del Bacallaos (the land of codfish).

With the rapid diffusion of news about the great fishing grounds in the west, it is not surprising that the fishermen of the western ports of Europe turned their attention early in this direction. Exact statistics as to the exploitation of these waters are not to be obtained, but legislative enactments and the correspondence of officials and others make it clear, that the number of those engaged in the fisheries in Newfoundland waters reached considerable proportions in a short time.

Between 1520 and 1530, from 60 to 80 French vessels came annually to Newfoundland, chiefly from the ports of Normandy and Brittany.¹ There are no figures available showing the number of English ships engaged in this fishery at the same period, but the fact that several men of war were sent to the mouth of the English Channel to protect their homecoming leaves no doubt they were not few.

The English fishery in Newfoundland during the first half of the sixteenth century had reached a magnitude to engage the attention of the Government, since in an act passed in 1542 concerning the buying of fish upon the sea, exemption from its penalties was extended to the buying of fish in Newland² (Newfoundland). A few years later (1548) another act was passed, protecting the fishermen of Iceland, Newfoundland, Ireland and other places from the exactions of licensing officials.³

During the last quarter of this century, there seems to have been a yearly average of between 300 and 350 vessels employed in taking fish from the waters about Newfoundland.⁴

In the early part of the century the nationalities of the fishermen engaged in these fisheries were English, Portuguese, Norman and Breton. The Spaniards do not seem to have come over until the end of the first half century. Thereafter they took a large share in the fisheries. The importance of the Newfoundland fisheries to England may be judged from the statement of Sir Walter Raleigh in 1594 that, if any harm should happen to the Newfoundland fleet it would be the greatest calamity that could befall the country.⁵

Until the approach to the seventeenth century, Newfoundland was subject to no sovereignty. Fishermen of the several nations all worked in the same field, though the English seem usually to have dominated the combined groups.

Anthony Parkhurst who made four voyages to Newfoundland, wrote to Hakluyt in 1578 that "the English are commonly lords of the harbour

⁵

where they fish, and use all strangers' help in fishing if need require";¹ and Hayes, who accompanied Sir Humphrey Gilbert, in his narrative written in 1583, says: "The English merchants that were, and always will be, admirals by turns interchangeably over the fleets of fishermen within the same harbour, for our English merchants command all here."²

These merchants were men of consideration. They had their houses in St. Johns, and lived on a scale that enabled them to entertain Sir Humphrey Gilbert during his stay of three weeks. They had their walk which they called "the Garden", in which the visitors noted the profusion of wild roses; and also "the like plenty of raspberries, which do grow in every place." As to their business, Judge Prowse says: "The principal traffic consisted in selling for cash—or bartering for fish and oil—Mediterranean products, salt, olive oil, fruits, wines, also West of England cordage, cloth hats, caps, hosiery, Sheffield wares, and general English merchandise. The master and his crew fished, the merchant had his store and traded; considering the large number of fishermen of all nations, probably not less than fifteen thousand, resorting to Newfoundland, it must have been an extensive and, I need not add, a lucrative trade."³ On the question of settlement in Newfoundland during the first century after its discovery, there is little, if any, precise information. Such as it is, it is all summed up by Prowse. He quotes a statement by Sabine, that there were 40 to 50 houses in the island as early as 1552; and argues from the necessity for maintaining winter crews to prepare for the following season's fishery, that there must have been a considerable permanent population, nearly all from Devon.

The period in which Newfoundland was an everyman's land came to an end in 1583. Under the terms of a patent⁴ granted to him in 1578 by Queen Elizabeth, Sir Humphrey Gilbert appeared at the entrance of the Narrows with a small fleet on August 3, and, having produced his commission from the Queen was welcomed by the English merchants. Two days later, in the presence of the masters and chief officers of the assembled fishing fleet, which comprised besides English, Spanish, Portuguese and other nations' vessels, read his commission, which constituted him proprietor of all the territories within a radius of 200 leagues from where he stood. Thereafter, as he signified to the company, they were to live in that land as territories appertaining to the Crown of England, and to be governed by such laws as should be set down, and should be as agreeable as might be to the laws of England. He established the Church of England, and provided punishments for disloyalty.⁵

Gilbert perished with the wreck of the "Squirrel" the same summer, and his schemes remained unrealized. In 1610, the question of settling Newfoundland was raised again, by a petition from a body of nobles and merchants of whom the most prominent were the Earl of Northampton, and

p. 1670

Sir Francis Bacon. The body was incorporated and known generally as the London and Bristol Company. On May 8 of that year a charter was issued to this company, granting them an extensive tract in eastern and southern Labrador. The territory comprised within the grant had an inner and an outer boundary. The inner limits were described by a line of longitude drawn north from Cape St. Mary, and by a line of latitude drawn west from Cape Bonavista. The outer limits were coterminous with the boundaries of the island. The territory included “all those countryes, lands and islands commonlie called Newfoundland w'ch are situate between forty and sixe degrees of Northerlie latitude and two and fiftie degrees of the like latitude.” The territory described was to be held in fee simple, subject to an important reservation. There was “saved and reserved unto all manner of persons of whatever nation soever and also unto all our loving subjectes w'ch do at this p'rt or hereafter shall trade or voyadge to the ports aforesaid for fishing all liberties powers easements and all other benefits as well concerning their fishing as well all other circumstances and incidents thereto in as ample manner as they have heretofore used and enjoyed the same without any impediments disturbance or oposition anything in these p'rts to the contrary notwithstanding.”

The company were permitted to take out with them for the purposes of settlement all English subjects or any others that were willing to become subjects and live under the allegiance of the King of England.

John Guy was appointed by the company its governor in the colony, and he set sail with 40 persons to found the settlement. In accordance with the instructions which were given to him before his departure to make a start in Conception Bay, he ran up to the end of the bay and landed his people at Port de Grave, at a place now known as Cupids.¹ The instructions which provided for all the various things necessary to people going to a new settlement, show that the establishment of a colony was the intention of the company. With a view to meeting the anticipated opposition of the season fishermen, Guy was required to assemble the fishermen and read to them the grant, which would assure them of the safeguarding of their rights.²

When Guy had had time to look about him, he observed several matters that required amendment, and drew up a set of regulations which he published in the form of a proclamation.³ They prohibited the throwing of ballast into harbours; the destruction of structures necessary for the fisheries; the occupation of unnecessary space on the shore; the appropriation of fishing boats belonging to others; the setting

fires in the woods; and the decoying of colonists on board the fishing vessels.

The season fishermen resented this attempt to control them, and presented a petition to the Government, alleging certain injuries they suffered at the hands of the colonists or planters, as they were called in those days. The planters appropriated the best fishing places to themselves; and interfered in several ways mentioned with the freedom of the fishermen from

¹ Prowse, op. cit. p. 94.

² Page 1712.

³ Page 1715.

p. 1671

England. The fishermen knew their business better than the planters did, and were unwilling to take orders from the latter.¹

This is the beginning of a secular struggle between residents and fishermen from England, which constitutes a large part of the history of the Island. At the moment the Star Chamber thought that the quarrel could be composed by a simple reminder to both sides that the rights of each were amply protected by the terms of the charter, and that all that was necessary was ordinary good faith on each side. A complaint was made in November 1618, by the merchants and shipowners trading to Newfoundland of encroachments and other transgressions committed by planters. When the Company were heard, it would seem that the planters had been quite blameless, for the Star Chamber after pointing out the provisions made for the colony by the princely care and providence of His Majesty, called to their minds the reservations made on behalf of the season fishermen, admonished them that "It is held very just and expedient and accordingly ordered that the said proviso be duly and punctually observed." On their part, the fishermen were required, through the mayors of the principal fishing towns in the south and west of England, that they "not only forbear all acts of hostility and such other disorders as heretofore have been committed there: but also to entertain all friendly correspondence with those of the plantation." Many things happened and much time passed before these felicitous relations were achieved.

The Company, which held under the charter the tract bounded on the north and west by the latitude of Cape Bonavista and on the west by the longitude of Cape St. Mary, sold all the southern portions, from Petty Harbour downward in 1616 to Sir William Vaughan. Vaughan resold to Lord Falkland the upper part, a six mile belt from the Atlantic Ocean to Placentia Bay between Renew's northward to a point between Fermeuse and Aquaforte; and the section north of the Falkland purchase to an irregular line from Petty Harbour to Placentia, to Lord Baltimore. Falkland also acquired part of the peninsula of which Cape Bonavista is the headland.

There were thus for a short period six colonies in the

Island: two in Conception Bay (the one at Port de Grave and an off shoot at Harbour Grace; one each at St. Johns, Avalon (as Baltimore's tract was named), Falkland (North and South), and Vaughan, with headquarters on Trepassey Bay.²

In spite of what had the appearance of overgovernment, disorder held sway. The Star Chamber was scarcely ever free of complaints from either planters or season fishermen. In 1634, on a presentation of grievances from the merchants and shipowners of Plymouth, Dartmouth and Barnstaple and other creeks adjoining, Noye the Solicitor General laid before the Chamber a short code for the government of both residents and visiting fishermen. In his preamble he observed that planters reside and inhabit there “upon conceit, that for wrongs or injuries done there, either on the shore or in the sea adjoining they cannot be here impeached” the more so since no laws

¹ Calendar State Papers, Colonial, 1574-1660, pp. 1717, 1718.

² Prowse op. cit. p. 110.

had up till that time been given to the inhabitants. The laws or regulations he proposed differed little from those issued by Guy, but they contained one singular provision. If offences were committed on the sea, they fell within the cognizance of the Vice Admirals in the counties of Southampton, Dorset, Devon and Cornwall; if committed on the land, they were to be dealt with, by the mayor of one of the towns of Southampton, Weymouth, Melcombe Regis, Lyme, Plymouth, Dartmouth, Eastlow, Foy and Barnstaple.¹

In 1637, all prior grants were annulled and superseded by one to the Duke of Hamilton, Sir David Kirke and others, on the ground that the earlier grantees had abandoned the country “leaving divers of our poor subjects in the said province living without government.” The grant covered the whole Island between the 46th and the 53rd degrees, and included some of the provisions, which tended to discourage settlement. No buildings were to be erected within six miles of the sea between Cape Race and Cape Bonavista, and the planters were put on the same footing as the ship-fishermen with respect to the use of the shore. The inhabitants were forbidden to take up before the arrival of the fishermen all the best beaches, or to destroy any stage or other necessaries, which the fishermen leave behind, or to commit any act which would alter or interrupt the accustomed modes of fishing.

Power to make laws with the assent of the freeholders was granted, but these local laws were not to extend to any fishermen “who are to be forever free from the jurisdiction of the Government of Newfoundland.” The fishermen were to be subject to the laws of England, and to laws made in the 9th year of the King's reign.²

Sir David Kirke, the captor of Quebec, was made governor for the new company. He made his headquarters at Ferryland, where he seems to have ruled with a heavy hand. The company were authorized by their charter to collect 5% from all foreigners buying fish and oil in Newfoundland. As this impost trammelled the fishermen in the sale of their fish, the Company agreed to purchase the fish themselves, the quantity being determined by the sales to foreigners during the preceding seven years. The vigor with which Kirke made his collections led to a protest from the French ambassador. Many complaints were made against Kirke's administration. These became so numerous and originated in so many quarters that he was recalled, and John Downing, a London merchant, was sent out to reign in his stead.³

This was in 1640, on the eve of the Civil War. The war appears to have affected conditions in Newfoundland but little.

During the interregnum and Commonwealth, however, considerable changes in the policy of the governing of the Island were made. On the death of the Duke of Hamilton, Kirke, who was in Newfoundland in 1651 was ordered to return to England, and commissions were issued to six

persons, three of them merchants, and three captains of vessels, authorizing them to administer the affairs of the colony,

¹ Chancery Warrants, Series II, File 2106, No. 525, p. 1719.

³ Prowse, *op. cit.* p. 150.

p. 1673

for the adventurers.¹ In 1653, the government was confided to one of these commissioners alone—John Treworgie.²

His instructions,³ which were issued on June 3, 1653, directed him to take care for the government and well ordering of the said country of Newfoundland and the people there inhabiting, and likewise the fishery according to such laws and ordinances as are here to annexed. He was given command of all the vessels on the coast or in any of the harbours, and authorized to call upon captains of convoys for such assistance as he might require in the execution of his instructions.

The regulations were in effect the same as those which had been in force, with the notable exception that for the prohibition as to settlement within 6 miles of the shore, the following was substituted:

“That noe planter be permitted to build any dwelling house, storehouse, courtledge, or garden or keepe any Piggs or other cattle upon or near ye ground where fish is saved or dried.”

The policy here indicated of encouraging a colony, by removing the inconvenience suffered by the settlers under the order prohibiting them from making permanent dwellings or places of business within 6 miles of the shores was reversed on the restoration of Charles II, and the Star Chamber regulations of 1633 were again put in effect, with an addition aimed directly at the increase of the number of settlers. The additional regulation is as follows:—

“Moreover, and further than was ordained by the laws of our said late father, and for the encouragement of our subjects in Newfoundland, and in the seas adjoining, and for the benefit of the said trade there, We do hereby straitly charge, prohibit and forbid all and every the owners of ships trading in the aforesaid Newfoundland, that they or any of them do carry or transport, or permit or suffer any person or persons to be carried or transported, in their or any of their ships, to the said Newfoundland, other than such as are of his or their own ship's company, or belonging thereunto, and are upon the said ship's hire or employment, or such as are to plant and do intend to settle there.”⁴

This regulation was, however, disregarded. In November 1663, the mayors of the principal towns in the west of England which traded to Newfoundland petitioned the King that it might be enforced, since it was the practice of so many to go out in the ships as passengers, who took up the most convenient fishing ports, that men could be found for only one quarter of the ships formerly sent out.⁵ This petition led to an

order to the mayors of certain towns to put the regulation into force.⁶

In 1667, an agitation arose against the appointment of a Governor. The Mayor and some citizens of Dartmouth, and a number of merchants trading to Newfoundland, from Plymouth and surrounding places sent

p. 1674

petitions in August, praying that no attention be paid to the requests of those who for their own sinister ends have endeavored to establish a governor, "which hath hitherto been very destructive to the trade."¹

The question as to the influence of former governors on the trade of the island was referred to a committee for report.²

In January 1668, a memorial was addressed to the King respecting French encroachments on the fisheries.³ It sets forth, among other things, that Kirke was sent out to prevent the French from engaging in these fisheries, and that he did this by charging a duty of 5% or 10% on their trade.

By the occupation of Placentia, which is well fortified, the French carry on their operations where they please. They must be expelled from the island. A second petition to the same effect was received in April of that year. In addition to the expulsion of the French it called for the establishment of a government, the expenses of which might be defrayed by taxing every boat one quintal of fish, which is insignificant since every boat catches 300 or 400 quintals.⁴

Other pleas for a settled government were made during the same year. The arguments for a government in the Island are as follows: The island is the greatest nursery of fishermen. When trade flourished it bred 10,000 annually. It produced £50,000 customs annually by the product of fish sent to foreign countries, besides 5% paid to the governor for the privilege of fishing. The French now occupy three of the best harbours, 30 or 40 guns being mounted in each place, and they debauch the English fishermen.

When the trade flourished under a government it brought in to the nation £500,000 per annum; since then it is not 1/3 as much; traders are liable to be pillaged, stages, boats and other necessaries are destroyed by planters, or first coming fishermen; the woods fired; tippling houses are corrupting the fishermen; and houses and gardens are built on land proper for drying fish.

The late act reserving the coast for 6 miles inland has driven the principal planters to New England, and others will go over to the French

Finally, the inhabitants would be protected from lawless seamen, and pirates, and will have the ministrations of religion,

“whereas now they live like brutes.”⁵

Captain Robinson the chief advocate of a settled government pointed out that, if the French took the Island, whereas now they employ 400 sail and 18000 seamen, and the English 300 sail and 15000 seamen, the French would have all the trade which would cause the English a loss of £700,000, besides the advantages of having so productive a nursery for seamen.⁶

The merchants and masters of trading ships engaged in the Newfoundland fisheries made answer to the foregoing.⁷ They asserted that for many years

p. 1675

past few made 10% on this fishery, and in the last year the merchants of Dartmouth and Plymouth lost considerably. Sir David Kirke's courses afford little encouragement for another governor, as was shown by the complaints and action taken against him. Placentia Bay was never possessed by the English, but was fortified by the French as protection against the savages. As the country is barren and rocky, and productive of no commodities like other plantations, the inhabitants would be better if removed from the Island.

The trade of the island would pass entirely into the hands of New Englanders, if it were settled.

The stretch of coast from Bonavista to Trepassey—300 miles— is all that ever was possessed by the English. On this coast are 48 fishing places, which it would be impossible for any governor resident at St. John's to control.

Lastly the proposal to maintain the governor by levying a tax of 1% on fish and 2% on oil would prove very vexatious to the merchants, and hinder the revival of the trade. They asserted that, through Kirke's indulgence, contrary to his company's patent, the trade was in large part carried on by the inhabitants and boatkeepers and was following the course of the New England fishing which was now entirely lost to England.

In December 1670, the merchants and shipowners returned to the attack. They prayed that the fishery might be maintained by fishing ships and that the mayors might depute persons to execute the laws for the fishery. This was signed by the mayors of Exeter, Dartmouth, Lyme Regis, Barnstaple and Poole.¹

The Council for Foreign Plantations, having heard all parties advised that His Majesty grant, by way of addition to his former charter and regulations, certain other regulations. The more important of these were, that all His Majesty's subjects might enjoy the liberty of taking fish in any of the

rivers of Newfoundland, provided they submitted to the orders established for the fishery; that masters of ships be required to bring back all seamen, fishermen, and others, and none be suffered to remain in Newfoundland; that penalties be imposed for offences; and encouragement given to the inhabitants to go to Jamaica and other foreign plantations. The foregoing was confirmed by order in council.²

Captain Robinson replied to the terms of the merchants' petition,³ dwelling chiefly on the danger from the French. He was not concerned to defend Kirke. If any governor administered badly, remove him, not abolish the government. He insisted that Kirke was governor of a great part of the Island, and that Gilbert took it Elizabeth's possession of under patent.

On September 9, 1671, Captain Davis made his report on the fisheries. The blame for the irregularities in Newfoundland he attributed to the masters of the fishing ships, who brought out laborers for the year, and "then to save

provisions and freight pack them away to New England." The order for the removal of the inhabitants would probably drive them to the French, who were very kind to the English who came to them, the King of France being ready to send them a protection and with it a year's salary.¹

At the beginning of 1672, the Government determined to fortify St. Johns and other places in Newfoundland. The ships for the fishery were required to take out munitions for that purpose; and to engage not to carry out more than their proportion of men, all of whom, if alive, were to be brought back at the end of the season.²

In February, 1675, a petition with several other papers setting forth the reasons for the appointment of a governor and the regulation of the fishery led the Council to reconsider the whole subject. They asked that all the papers be laid before them, as they were inclined to accept the view that a governor was necessary in the Island.

During the several weeks that followed, the question in its every aspect was thoroughly examined. A number of witnesses were interrogated and a great deal of useful information obtained, particularly as to the number of the planters and their distribution throughout the several harbours.

On the conclusion of the hearings, the Committee of Trade and Plantations, after full consideration, reported in favour of the contentions of the Western fishermen. They were convinced that, owing to the activity of the French and the New Englanders, as well as to the contumacy of the inhabitants in disregarding the regulation as to the six mile limit, in engrossing the most convenient places in the harbours, and in debauching the fishermen with wine and brandy, the trade of

Newfoundland had greatly diminished. They had no faith in the establishment of a resident governor as a remedy for the evils indicated. The dispersion of the fishermen and planters in so many isolated harbours, difficult to reach at all times, and impossible during the winter when supervision was most required, and the cost of maintaining an establishment were effective arguments with the committee against the appointment of a governor.

The committee, after a review of the whole matter, were persuaded that the cardinal evil from which all others flowed, was the presence of the planters on the Island. They therefore recommended that the regulation forbidding habitation within six miles of the shores be strictly enforced; and that those who, after warning, persisted in remaining within the prohibited area, should be sent home “as offenders, to answer their contempts.” Such inhabitants as were willing to return to England, or move on to any of the other colonies were to have every assistance.

This report was adopted by the Privy Council on May 5, 1675, and orders were issued to have its terms executed.³

If the Privy Council were really convinced that the presence of the planters was the root of all the ills from which the Newfoundland trade was

¹ C. S. P. Am. & W. I. Colonial, 1669-1674, p. 1766.

³ Acts P. O. 1613-1680, p. 1768.

suffering, they were unfortunate in the choice of an agent to carry out their policy of extirpation. Sir John Berry, who commanded the convoy to Newfoundland, was ordered to execute the directions of the Council. On his arrival he sent two capable persons to visit the several fishing resorts between Cape Bonavista and Cape Race, in order to obtain the information desired by the Council, and to convey to the people the orders for their removal. But Sir John soon became convinced that, though the evils complained of were genuine, the transgressors were not the planters but the fishermen, and particularly the admirals in the several harbours. Stages, flakes and store-houses were pulled down at the end of the season, not by the inhabitants, but under direction of the masters of the ships. Remembering the evidence given before the Council, he “stands in admiration how people could appear before His Majesty with so many untruths against the inhabitants.” It was to the admirals and ship commanders that he had to give peremptory orders, not to the planters.

The planters, he stated, were prepared to obey the direction of the Council, but they were too poor to remove without assistance; furthermore, while they made at least a frugal living in Newfoundland, they would be cast on the parish if taken home. Inviting attention to an account which he submitted, showing the result of the operations of the merchants adventurers and of the planters, he pointed out that of the total value of the catch £163,000—nearly £47,000 or a little less than 30% was the product of the planters' industry; and predicted, that if driven out the planters would go to the French, who were already stretching out welcoming hands.

The merchant adventurers, who clamored for convoys, were now flouting their protection and going off in companies of twos and threes.¹

Sir John Berry's unequivocal statement did something to shake the confidence of the Council in the wisdom of their decision. To a representation of some of the merchant adventurers that Sir John Berry was encouraging the planters in their resistance, Mr. Secretary Williamson appended a note that their design “was to exclude the poor from being sharers in anything.”²

This, doubtless, is as far as we could expect an august body like the Privy Council to go in the direction of a complete summersault, at this early stage. But the leaven was working. In the following April, Mr. Pepys acquainted the Lords of Trade and Plantations that the convoys were about to depart, and asked whether, with Sir John Berry's representations before them, they would consider that their Lordship's instructions about removing the planters were “now fit to be pursued.” The Council were not then ready to make a retraction, and contented themselves with orders to the commander in chief of the ships going to Newfoundland to collect information respecting the trade with the French and

New England, the number of planters, destruction of woods and stages, the boat-keepers, number of ships &c.³

Sir John Berry's statement was confirmed by Captain Davies who

¹ C. S. P. Am. & W. I. Colonial, 1675-1676, p. 1772.

p. 1678

appeared before the Lords of Trade and Plantations in August of the same year. The abuses, he declared, were wholly occasioned by the West Country adventurers. The masters of ships at their departure pull down their stages for firewood on board their ships, and leave their men in Newfoundland merely to save the expense of carrying them back to England. If the planters were withdrawn, the French would either take possession of the harbours and fishing places or entice the planters to settle amongst them.¹

While this discussion was in progress, the Council were distressed by a great outcry from those, whose property was being destroyed in Newfoundland under its orders, and it was decided that the next ships would not be allowed to depart in the spring following, until a reconsideration of the whole question had taken place.

With the coming of spring, the subject was reopened. On February 21, 1677, an order in council was passed referring all the papers to the Lords of Trade and Plantations with a request that they should report what they conceived was yet further to be done. A full hearing took place before the Lords of Trade and Plantations on March 3 and 4. Both sides agreed that that many trees had been wantonly destroyed, that flakes and stages had been pulled down, and that the fishermen had been debauched by strong liquors, but each maintained that it was the other side that was to blame for all the trespasses and crimes committed. A point on which there was disagreement was as to designs of the French. The merchant adventurers endeavored to assure the Council that there was nothing to be apprehended from the French, who were fully occupied with their lawful concerns. The planters and their friends insisted that it was only their presence that prevented the French from overrunning the whole island, and that, unless fortifications were erected at the principal places, there was grave danger that they would do so at the first opportunity. An interesting fact mentioned by John Downing, who had spent a large part of his life in Newfoundland, was that "all the houses are near the water, and none farther off than a quarter of a mile."² Sir William Poole, who commanded the convoy in 1677, says that it is true that the planters' houses and stages are scattered too much about the harbour, that they (that is, the planters and fishermen) cannot avoid mixing one with another."

The planters succeeded with their plea. Lord Anglesey, Lord Privy Seal, wrote a rather panicky note to Secretary Williamson urging him to move for directions to be sent to

Newfoundland by the first shipping for all things to continue as they were until His Majesty had decided what was best to be done. Several ships, he said, had set out already, and others were going daily, who might disturb affairs there. He feared that if orders were not sent to prevent mischief, they would run great hazard of losing the country with its trade, and give it up to the French.³ After some further proceedings, an order in council was passed on May 18, 1677, noting the opinion of the Lords of Trade and Plantations that the planters should be continued in the

p. 1679

possession of their houses and stages according to the usage of last years until His Majesty's further order, and directing that the captains of the convoys then preparing for their voyage to Newfoundland should not only make publication of His Majesty's pleasure, but must take care that nothing be attempted contrary thereto.

The efforts to remove them from the colony having failed, the planters gave their attention to securing a stable government. The reports of the captains of the convoys show that lawlessness was not greatly abated, and that it was to the adventurers and their own crews that the disorders were to be attributed. Captain Charles Talbot in his report for 1679, gives a very full account of the conditions of the island. The planters observe the rules of the charter better than the adventurers, and require the protection of a government. The country he describes as barren and cumbered with wood. Newfoundland as it appears to him is a colony not of husbandmen but fishermen.¹

In their desire for a stable government, the inhabitants were prepared to accept great inconveniences. The chief argument employed by those opposed to the appointment of a governor was that, owing to the wide dispersion of the scanty population in the harbours between Cape Bonavista and Cape Race, it was physically impossible for a governor residing at St. John's to exercise an effective control over a large number of the people. The inhabitants recognised the force of the argument, and in order to meet it, offered to concentrate themselves in four harbours. It was the violence of the Western adventurers, which led to their dispersion to twenty different places; but they would be willing to gather together in St. John's, Trinity Harbour, Ferryland and Trepassey, or indeed in any others that might be considered more convenient. With St. John's fortified, the colony would be safe from foreign aggression, and would be easily governed. The inhabitants were also prepared to be satisfied with their present numbers, if they were permitted to provide for their children.²

The inhabitants had by this time gained the entire sympathy of the Lords of Trade and Plantations, and the

charter was amended in several particulars, to meet their interests. It was first determined to allow the planters to dwell as near the shore as they chose, but as this was seen to involve an encroachment on the rights of the fishermen, the regulation was changed a few days later to a prohibition against keeping buildings, except such as were required for the fishery, orchards or gardens, within a quarter of a mile of the shore.³ The inhabitants were permitted to retain possession of their stages, but must build no more until the adventurers were all arrived, after which they might build stages, which they should possess. They were, furthermore, given permission to hire servants in England and transport them to Newfoundland.⁴

⁴ C. S. P. Am. & W. I. Colonial, 1677-1680, p. 1791.

p. 1680

It was also resolved to send out a governor, whose power was to be confined to punishing delinquencies of the planters and their servants. Seamen and fishermen when found violating the law were to be secured and sent on board the vessels, whose masters either punished them themselves, or carried them to England. The fortification of St. Johns was to be undertaken and the King advised to send out guns and ammunition. On the question of the maintenance of the Governor, Mr. Downing, who represented the inhabitants, was consulted, and he advised the laying of a tax upon the boats, kept by each inhabitant. The Board approved, provided that the money be raised voluntarily and not under the authority of the King in Council.

Nothing, however, was done in this direction, presumably from the failure of the inhabitants to satisfy the condition on which a governor was to be appointed. For a number of years hereafter, nothing was heard from either planters or adventurers, with the exception of a petition of the familiar sort presented by Downing in 1682. Indeed, apart from a momentary flutter of interest aroused by the outbreak of war with France, when the Council considered the question of harassing the enemy by attacking Placentia, and putting St. Johns and other harbours in a state of defence, Newfoundland remained entirely unregarded until 1696.

This was a memorable year. Two circumstances combined to make it so. The French, who had been trifling with the question of overrunning the undefended English settlements, were galvanized into activity by the appearance of D'Iberville, a famous Canadian *coureur de bois*, who was fresh from his devastating foray against the forts in Hudson's Bay. D'Iberville laid out a plan for a combined land and sea attack, which resulted in the destruction of all the English settlements, except those at Carbonear and Bonavista. Consternation followed by vigorous measures was the effect of the news as it reached England.

The second, and scarcely less important circumstance

affecting the affairs of Newfoundland was the reconstruction of the administrative body, which controlled the colonies. Until 1696, the colonies had been administered by a committee of the Privy Council, known as the Lords of Trade and Plantations. Its members had as a rule little experience in the matters with which they had to deal, and as a result of the dissatisfaction expressed by the merchants at the inefficient handling of their business, a permanent board was established under the title of the Board of Trade. It contained, in addition to certain high functionaries of state, a number of men experienced in trade and commerce.¹

The new board was scarcely installed when news began to arrive of the disasters caused by the French raids. In order to obtain the best information and advice, the board wrote to the mayors of Exeter, Bristol, Plymouth and other western towns, desiring to know the proposals of the merchants interested in Newfoundland as to the measures for recovering and securing the trade there, and asking them to appoint an agent to present their views to the board.

¹ Guide to Materials for American History in Public Records Office, C. M. Andrews, p. 1795.

p. 1681

The representatives were all agreed on one point: there must be a fleet of sufficient size to regain the harbours which had been lost, and a convoy for the fishing vessels. On the best mode of securing the island after it was retaken, opinions differed. Barnstaple, Bideford and Poole were of opinion that a couple of cruizers patrolling the coast would be the most effective measure. The merchants of the first two towns were of opinion that a governor would be not only of no utility, but would hamper the trade. Those of Poole, and of Exeter, on the contrary, were impressed with the advantage the French gained by the discipline imposed by a governor, and advised that a governor should be placed in St. Johns to remain there while the war lasted.

The Board, in January 1697, made a strong representation to the King. They pointed out the great importance of the Newfoundland trade, in the employment it gave to net-makers, and in the large volume of commerce arising therefrom. Planters were necessary to preserve the boats, stages, &c. and to protect the ports in time of war; but their number should be limited to one thousand, lest by the increase of their numbers they should engross the fishery to themselves.¹ The chief harbours should be protected by a military force, but, as some thought that a general governor would be too great an encouragement to the planters, they were of opinion that each captain should command separately in each place, and have no power over the fishermen and planters, except in case of actual invasion.

The proposals of the Board having been accepted, and adequate military and naval forces despatched to Newfoundland, the Board then turned its attention to the

government of the island itself. Until this time, the regulations of 1634 with subsequent accretions and modifications had been the only rules of law under which the fisheries about the shores of Newfoundland had been carried on. The Board determined to replace these various regulations by a statutory enactment, which would embody the results of the experience of the past 60 years.

They had before them the views of the merchant adventurers of the western towns, but as they knew that there had been in the past radical divergences between those views and the wishes of those who desired to have the island settled, the Board resolved to obtain information from sources which would be impartial as well as competent.

The first report of a general character received was from Colonel John Gibson, who commanded the land forces of Newfoundland.² The squadron which took out the troops sailed under the command of Commodore John Norris, with whom Gibson was violently at odds. As Norris' reports on conditions in Newfoundland which were called for later by the Board, differed widely in their conclusions from those of Norris, the quarrel between them is noticed.

Gibson strongly advocated a settled government in Newfoundland. By government he meant not only the military but the civil and church government, for the one could not stand without the other two. He would

¹ C. S. P. Am. & W. I. Colonial, 1696-1697, p. 1797.

² C. S. P. Am. & W. I. Colonial, 1696-1697, p. 1798.

meet the difficulty caused by the dispersion of the inhabitants by the adoption of the measure suggested by the planters themselves a few years before. If the inhabitants were confined to Trepassey, Ferryland, St. John's, Carbonear, Trinity Harbour and Bonavista, they could be easily governed, and would suffer no appreciable inconvenience in carrying on their fishing. All the planters, he declared, wanted a governor, and would contribute to his maintenance.

Norris, on the contrary, was persuaded that the fishery could not be better than under its old constitution.¹ He favoured the fortification of the harbour of St. John's but would have the batteries manned by the inhabitants. The military authority over the inhabitants should be strictly confined to the necessities of war, and the power of summoning the inhabitants to arms should be entrusted to the admiral of the fleet, because the masters of the merchant ships had probably seen more service than any of the planters, and the planters were in a sense servants to the merchantmen.

In sending his answers to the series of queries addressed by the Board to the Admiralty, he frankly avows himself a merchant-adventurers' man. He "thinks that if the merchant-adventurers have the preferable encouragement before the planters and boat-keepers it would make the trade most beneficial for England." He would revive the rules of the Western charter, to prevent any inheritance to the stages and room. As for Newfoundland, he avers that "the Colony cannot subsist itself, for it produces nothing."

If in the search for further information, the Board turned back to earlier though recent reports, they would have learned from Captain Story of the "Antelope" who made the official report for 1681, of the range of Irish trade in Newfoundland, the importation of women, who were sold as servants, and whose extravagance after they married, threatened the ruin of the settlement. There was a fur trade in the north worth perhaps £500 a year.

The report of 1682 mentions only the iniquities of the New Englanders, who "spirit away the inhabitants." Captain Talbot, who made the official report for 1683, dwells upon the hemming-in of the English fishermen by the French to the north and the south, and the ill-consequences of the English being confined to the over-fished tracts between Cape Bonavista and Cape Race.

Captain Wheler, with the series of questions prepared by the Board before him, gives some real information as to conditions in the Island in 1684. He says: "The Colony cannot support itself. The earth, or rather the rock, produces no more than enough to keep a few cattle in summer, which must be slaughtered in the winter for want of forage"; and "there is no sort of arable or pasture land in the Colony, nor any fur trade except towards Cape Bonavista." "There is hardly a planter in the country who is not a great deal worse than nothing, but

they are bound to go on fishing or the merchants will sell them no provisions for the winter.”²

During these years, Newfoundland was gaining an unenviable notoriety as a centre for smuggling operations. The Commissioners of Customs declared

¹ C. S. P. Am. & W. I. Colonial 1697-1698, p. 1801.

² C. S. P. Am. & W. I. Colonial, 1681-1685, p. 1806.

that “the Island is become a kind of magazine of contraband goods,” and he notified the Governor of New England in 1687 that all people should be given to understand that Newfoundland is not a plantation like other of the King's Plantations, and that all such goods would be seized.¹ In the year following, the general orders issued for the prevention of smuggling and illicit trade, contained the words “especially with Newfoundland.”

This, then, is the body of facts which the Board of Trade had before them, when they set about the drafting of the act of 1699. The impression made on the minds of the Board as the result of their studies is thus succinctly conveyed to the Ordnance by the Secretary of the Board: “there are no planters nor any manner of Government in that Island as there are in other Plantations, the trade thither being only by fishing-ships, and a few poor fishermen on the shore who cannot contribute anything towards the things now proposed for defence of the place.”²

As the act of 1699, known as “An act to encourage the Trade to Newfoundland”³ was the rule of law by which Newfoundland was governed when the coast of Labrador was placed by the Proclamation of October 1763, “under the care and inspection of our Governor of Newfoundland,” it seemed desirable to ascertain the circumstances amid which that act had its birth. The act was, in large part, a re-enactment in statutory form of the regulations laid down in 1634, with the later amendments. It prohibited the encumbering of the harbours with ballast; the destruction of stages; the obliteration of marks of boats or train-vats; the rinding of trees; interference with nets; and desecration of the Lord's Day. The regulations respecting harbour admirals and the allotment of shore space among the fishermen were repeated.

Permissively, the act granted liberty to all the King's subjects full liberty of trade and fishing in the seas, rivers, lakes, creeks and harbours in and about Newfoundland and the islands adjacent thereto, with all the necessaries and conveniences required for the curing and drying of fish, including the privilege of going on shore on any part of Newfoundland or the adjacent islands. Stages owned prior to 1685, or which had been built since that year, were to be secured to those in possession of them. All other stages were to be thrown open to the public use, and in the selection of these stages or fishing rooms, precedence of choice was to be given to the masters of fishing ships arriving from England.

Controversies arising between the inhabitants and the masters of fishing ships were to be determined by the fishing admirals, from whose decision an appeal lay to the commanders of any of the ships of war. Persons charged with robbery, murder or other capital crimes were triable in any shire or county in England.

No improvement in the conditions of the Island was apparent as a result of the enactment of this act. Disorder still reigned supreme. The administration of justice by the harbour admirals, supplemented though it was by

¹ C. S. P. Am. & W. I. Colonial, 1685-1688, p. 1809.

p. 1684

the right of appeal to commander of the fleet, continued to be farcical, when not tragic. The House of Commons intervened, and the Board of Trade became more urgent for ameliorative measures. Finally in consequence of disclosures of gross scandals in the conduct of the commandant of the fort at St. Johns, a decision was taken which settled the government of Newfoundland for upwards of a century.

On May 20, 1708, an Order in Council was made directing that a commission be prepared annually by the Board of Trade for the commodore of the Newfoundland convoys requiring him to exercise supreme command on land during his stay in those parts, with such further instructions for putting in execution the act of Parliament, as were set forth in the representation of the board.¹

Prowse, an ardent partisan of the settler against the West Countryman, has a word of commendation for the commodore. "Much abuse has been bestowed on our naval rulers; never was censure less deserved. No doubt they were often severe, sometimes narrow in their views. We must remember they were always hampered by instructions to repress settlement. On the whole I think they filled their very difficult positions admirably."²

If we may judge however from the records after the change in the government of the Island, the amelioration in general conditions was but slight. At best, it was a shift from the superlative to the comparative degree of badness. The reports of the commanders were a continuous tale of tyranny and oppression on the part of the ship masters, and particularly of the harbour admirals, whose duty it was to preserve order. The discouragement which prevailed among the inhabitants was in the opinion of one commodore "not to be reckoned amongst the least causes of the decay of the fishery." The illegal trading of the New Englanders was not only connived at, but participated in by the admirals.

The chief evil to which all drew attention was that due to the withdrawal of even the appearance of authority with the departure of the fleet in the autumn, and the ensuing lawlessness which held sway during the several months of

winter. “The sober and industrious are every day liable to be insulted and robbed by the idle and profligate.” “At that time theft, murder, rapes, or disorders of any kind whatsoever, may be committed, and most of them are committed without control.”³

The remedy for this anarchical state of things proposed by the officers of the fleet was the obvious one, viz:—a civil government. The merchant adventurers, on their side, had their own grievances—the smuggling, and abducting of seamen by New Englanders, the incroachments of inhabitants on the fishing rooms, the interloping of aliens in the fisheries, the usurpation of legal authority by the commodores—but there is no suggestion that civil government was thought desirable.

Nor did they desire it. They wished the Island restored to its original

¹ History of the Government of Newfoundland, John Reeves, 1793, p. 1884.

² History of Newfoundland, 1896, p. 254.

³ Reeves op. cit. pp. 81, 84.

p. 1685

state of uninhabitancy. The interests of the Kingdom, which they identified with their own interests, required that England should be the domicile of all who fished in Newfoundland waters; and that the coasts of the Island should be used only for the necessary land operations of those engaged in the fishery.

This was precisely the view of the Board of Trade at this time. In it they were fortified by George Larkin, who was sent out in 1701 by the Board on an inspecting tour throughout the colonies. Larkin overflowed with indignation against the fishing admirals and with sympathy for the luckless inhabitants; but he describes the latter as poor, indigent and profuse, and states it was the opinion of all with whom he had conversed in Newfoundland, that it would have been much better if all plantations had been absolutely discouraged, for the Island had become a sanctuary or place of refuge for people that break in England.¹

The Board reached its conclusions from another standpoint. A historical survey of the fisheries from the earliest times convinced it that “the fishery at Newfoundland, from its first establishment, has either flourished or languished according as the inhabitants have been discouraged or encouraged”; and that the most effective means of restoring prosperity would be “to remove the inhabitants or planters to Nova Scotia, or to some other of Your Majesty's plantations in America.”²

They were not prepared, however, to recommend so drastic a measure, and asked leave to submit other proposals. No further action was taken until 1728.

In that year, the Board was moved by the representations of Lord Vere Beauclerck to take up the question of Newfoundland again. As a preliminary to the consideration, a question was submitted to a legal adviser, Mr. Fane, on the 7th

clause of the Statute 10 & 11 William III. They desired to know whether the possessors of property under the terms of that clause had an inheritance therein or only an estate for life. Mr. Fane was of opinion for the reasons, which he gives, that an estate for life only passed to the possessors and consequently a right of alienation only of that interest.³

The Board as usual consulted the Western Merchants, but this time received nothing of a practical nature from them. They thereupon proceeded with their report to the King. After traversing the familiar ground of abuses in the Island, and inviting attention to their earlier recommendations, they express the hope that the subject might be submitted to Parliament. Pending action by that body, there were certain matters lying within the competence of the King, which they would give their advice upon. The first of these was the refusal of the governor of Placentia, which had been annexed to the Crown by the treaty of Utrecht, to recognize any authority but that of the King. By a curious arrangement, when the French portion of the Island was taken over by Great Britain, it was attached not to Newfoundland,

¹ C. S. P. Am. & W. I. Colonial, 1701, p. 1811.

² Papers relating to Newfoundland, 1718-1793. Report of 1718, p. 1815.

³ Reeves, *op. cit.* p. 1889.

p. 1686

but to Nova Scotia. The Board proposed that the recently acquired territory should be detached from Nova Scotia and placed under the jurisdiction of the governor of Newfoundland. As for the establishment of law in the Island, the Board were of opinion that the inhabitants should be encouraged to go to Nova Scotia, where settlers were wanted; but that their misery, which was great enough without additional evils from the anarchy in which they lived, might be alleviated by empowering the commodore to appoint judges, and justices of the peace to decide disputes between the inhabitants, and distribute justice amongst them during the winter season.

As the Board anticipated litigation as to the property in stages and other conveniences necessary for carrying on the fisheries, they proposed that some person skilled in the laws should accompany the commodore. He might be of use in framing regulations for the preservation of order during the winter season, so long as the inhabitants remain there.¹

The Home Government did not follow the recommendations of the Board on all points. They revoked so much of the commission of the Governor of Nova Scotia as related to Placentia, and in appointing Captain Osborn of the Squirrel, gave him a commission as Governor and Commander-in-Chief "in and over our said island of Newfoundland, our fort and garrison of Placentia, and all other forts and garrisons erected and to be erected in that Island."^{2,3} He was given authority to appoint justices of the peace and other officers necessary for the administration of justice. But neither he nor the justices were to do anything contrary to the

statute 10 & 11 Wm. III, nor obstruct the powers thereby given to the admirals of harbours, or captains of the ships of war. The governor was to erect a court house and prison.

Instead of sending out a gentleman learned in the law, the Government contented themselves by sending a copy of Shaw's Practical Justice of the Peace to each of the justices.

Osborn, on his arrival in St. Johns, at once proceeded to give effect to the terms of his commission. He divided the island into convenient districts, and appointed, from the best inhabitants of each, the necessary number of justices of the peace and constables. He also erected prisons in St. Johns and Ferryland, though the legality of the means employed for raising the money required for these buildings was more than doubtful.⁴

But his plans for the establishment and preservation of order encountered and were in a large measure neutralized by the opposition of the merchant adventurers, whose aims seem to have been to maintain the free hand they had long used for the domination of the island. The fishing admirals and other shipmasters threw every obstacle in the way of the exercise of the powers of the justices. They had the incontestable advantage that their authority was derived from a statute (10 & 11 Wm. III), while the powers of the justices rested on the less secure foundation of the King's commission.

¹ Reeves, op. cit. p. 1890.

² Patent Roll 2 Geo. II, pt. 3, Vol. II, p. 1838.

³ Reeves, p. 1892.

⁴ Ibid. p. 1894.

The conflict between the fishing admirals and the justices was brought to the attention of the Board of Trade who sought the opinion of the Attorney General. That officer reported that the whole authority of the fishing admirals was limited to the determination of differences arising between the masters of fishing boats, and the inhabitants, or any bye-boat-keepers, which was a sort of civil jurisdiction as far as it extended; whereas the authority of justices touched only breaches of the peace.

But the struggle between the rival forces was not terminated by this expression of opinion. The will on the one hand and the necessary capacity on the other were both wanting, and the clash of powers disturbed the peace until the merchant adventurers became at last convinced that the Government meant to have its way, and to maintain the modicum of civil jurisdiction introduced by the Government's commission.

A further step was taken towards the facilitating the trial of the more serious crimes by the insertion in the commission of Governor Drake in 1750, of a clause empowering him to appoint commissioners of Oyer and Terminer. Under the Statute of William III., persons charged with murder and all other capital offences had to be taken to England for trial. The inconvenience and frequent defeat of justice resulting from this provision impressed the Board at an earlier date, but the fear of the Privy Council that the powers of such a commission might be abused in the Island led them to withhold this authority for some years.¹ Other innovations during this period included the establishment of a court of vice-admiralty (1737); the appointment of a naval officer to collect fees upon clearance of vessels employed in the fishery (1741), and the opening of a custom house (1762).

The situation of Newfoundland at this period in relation to the other British possessions is succinctly stated by James Abercromby. In a work bearing the title of "An Examination of the Acts of Parliament relative to the Trade and Government of the American Colonies" and dated May 1752, he says, after an elaborate description of the constitutions and governments of the several colonies, "Having thus stated the different and particular constitutions in all these colonies. For as to that of Newfoundland, though ranked amongst the best, and first, in point of property belonging to this Kingdom, from the discovery thereof by Cabot, for Henry VII in the year 1497, yet the object of that Government relates to a kind of police amongst fishermen, and to them only."²

It is clear that at the time Labrador was placed under the care and inspection of the Governor of Newfoundland, the Island was neither more nor less than what Abercrombie declared it to be—simply a fishery; and that the inhabitants were regarded as mere obstacles to progress, which being human had to be tolerated, and that the preservation of such measure of order as existed among them was part of the general scheme under which the fisheries was conducted.

Nor will the conditions prevailing in 1763 be found to have changed in

¹ Reeves, op cit. p. 1898.

² Shelburne Correspondence, Vol. 47.

any essential respect, save one, in 1809. The commission and instructions issued to Governor Duckworth were similar to those under which Graves carried on his duties from 1763 till 1765. The period of his stay each year in Newfoundland and Labrador waters coincided, as did Graves', with the season in which British fishermen worked those waters. The reports of each show that both were occupied exclusively with the fisheries. Duckworth displays the same hostility to an increase of inhabitancy or to anything that would give the Island the character of a colony, as forms a principal feature in the reports of the earlier governor.

No indefeasible title existed to real property in any part of the Island in 1810. Though real property was frequently alienated or mortgaged, the purchasers or mortgagees could found their acquired titles on nothing more secure than on such interests as inhered in the holder at the time of the alienation or mortgage. All transactions in real property were subject to the rule of caveat emptor.

Employing the figure used by Knox¹ and Reeves² when they likened Newfoundland to a great ship, it might be said that the holders of real property were passengers on the ship who had made the voyage so often and had occupied the same sleeping quarters so long, that the captain and their fellow passengers alike came to recognize that they had a sort of title to those quarters. The titles were recognized to such an extent, that the holders took for themselves the right of disposing of their quarters, but always subject to the supreme right of the captain to resume possession, whenever for any reason it seemed to him necessary.

The only important change that took place during the forty-seven years that intervened between the governorships of Graves and Duckworth was in the mode of administering justice.

The reluctantly exercised powers of the fishing admirals were first reinforced, and afterwards usurped by the commanders of the King's ships. These commanders held under the statute an appellate jurisdiction from the decisions of the fishing admirals, and this appellate jurisdiction became, under the necessities of the situation, an original jurisdiction, which was recognized by the Governors, who conferred on the commanders the title of Surrogates. The surrogates did not confine their attention to the class of cases to which the fishing admirals were limited. They included within their range the cognizance of debts, and all other causes of complaint; seeking guidance from the Statute of Wm. III, the instructions of the Governors, and their own good sense.³

The Governor, himself, took an important hand in the administration of justice. He presided in the Court of Sessions, and heard and determined every class of action, civil and criminal.⁴

In the absence of the Governor and Surrogates,—for it must be remembered

¹ Extract from Evidence, April 24, 1793. p. 1903.

² Extract from Evidence, June 17, 1793, p. 1916.

³ Reeves, op cit. p. 1903.

⁴ Ibid, p. 1903.

that they were in Newfoundland only during the fishing season—the Court of Vice-Admiralty and the Sessions were the resort of all who had complaints of a civil nature, requiring remedy. The Vice-Admiralty Court, being solely a court of revenue, had no jurisdiction beyond its limited sphere; and the Sessions were, as was stated by the Attorney General, courts of criminal jurisdiction only. But both supplied an elementary need, and that was their justification.¹

But these devices to supply the deficiencies of a judiciary system, rested on no legal foundation, and therein lurked a danger. So long as there was an absolute acquiescence in the decisions of these courts, all was well. The danger was that some person would be dissatisfied with a decision and the execution ensuing, and upset the whole system. This happened during the governorship of Rear-Admiral Edwards (1779-1782).² Some persons, discontented with a judgment made by him in court at St. Johns, and carried into execution by the sheriff, brought an action for trespass against the Governor at Exeter. The case was settled before it got before the jury, but it paralyzed the powers which the Governors had assumed the right to exercise.

But the Governors, whose sense of their duty forbade them to leave the community without some regulative authority to preserve it from anarchy, hit upon the plan of receiving petitions from complainants, and, after having had enquiry made by their secretaries, wrote their opinion at the bottom of the petitions with such advice, as, if followed, would have the effect of complete justice.³

This mode of dealing out justice was satisfactory in many cases. Those who did not find it acceptable, repaired to the courts of session, and vice-admiralty. These courts rested on no better foundation than the Governor's court, as regards many of the cases brought before them, but it is not recorded that their authority was challenged.

In 1789, Governor Milbanke determined to put the dispensation of justice on a surer foundation, and by a straining, indeed an overstraining, of the terms of his commission, conceived he had the power to establish a regular court, and he erected a Court of Common Pleas, appointing Judges thereto.⁴ As this court had to encounter the hostility of the adventurers and merchants, it was considered necessary that there should be no legal doubts as to its authority, and in 1791, Parliament took the matter in hand and empowered the King to institute a court of civil jurisdiction to consist of a chief justice and two assessors, who would hear and determine all civil causes, with an appeal in certain cases to the King in Council.⁵

In 1793, this Court was replaced by one of enlarged scope. Authority was given to the King to institute a Supreme Court, with full criminal as well as civil jurisdiction. This Court would be presided over by the Chief Justice,

¹ Reeves, *op. cit.* p. 1904.

² *Ibid.*, p. 1905.

³ *Ibid.*, p. 1905.

⁴ *Ibid.*, p. 1906.

alone. Authority was given to the Governor, with the advice of the Chief Justice, to establish Surrogate Courts to hear all civil causes. Appeals in certain cases were allowed from the Surrogate Courts to the Supreme Court, and in certain others from the Supreme Court to the King in Council. This act was continued by renewals until 1809, when its scope was widened to include the Coast of Labrador.

In appearance, an advance had been made in the situation on the Island; actually, matters remained, in all essential respects, as they were. It was still a government, which had its sources in the fishery carried on from the West of England. It came into life with the arrival of the fishing fleet in the spring, and expired with the departure of the fleet in the autumn. With the Governor at their back, the justices were as effective as the hostility of the harbour admirals permitted them to be. When the Governor returned to England in October, the power which lay behind the commissions of the justices disappeared with him.

That this change in the mode of administering justice, which was anticipated by the Government at home, would not in its opinion alter the character of the Island as simply a fishery, is clear from the report of the Board of Trade of June 8, 1763, which was the foundation of the Royal Proclamation of October 7th of the same year. This Proclamation was the charter under which civil government was introduced into Canada and other territories acquired by Great Britain in the Treaty of Paris of the same year. In this report, the Board of Trade, after recommending the establishment of civil government in those parts of the new possessions where planting and settlement, as well as trade and commerce were intended, go on to say:

“But as no such regular civil government is either necessary or can be established where no perpetual residence or planting is intended: It will therefore be sufficient to provide for the free trade of all Your Majesty's subjects under such regulations and under such administration of Justice as is best suited to that end. Such we apprehend to be the case of Newfoundland, where a temporary fishery is the only object.”¹

The Letters Patents graunted by her Majestie to Sir Humfrey Gilbert knight, for the inhabiting and planting of our people in America.

Elizabeth by the grace of God Queene of England, &c. To all people to whom these presents shall come, greeting. Know ye that of our especiall grace, certaine science and meere motion, we have given and granted, and by these presents for us, our heires and successours, doe give and graunt to our trustie and welbeloved servaunt Sir Humfrey Gilbert of Compton, in our Countie of Devonshire knight, and to his heires and assignes for ever, free libertie and licence from time to time and at all times for ever hereafter, to discover, finde, search out, and view such remote, heathen and barbarous lands, countreys and territories not actually possessed of any Christian prince or people, as to him, his heires & assignes, and to every or any of them, shall seeme good: and the same to have, hold, occupie and enjoy to him, his heires and assignes for ever, with all commodities, jurisdictions and royalties both by sea and land: and the sayd sir Humfrey and all such as from time to time by licence of us, our heires and successours, shall goe and travell thither, to inhabite or remaine there, to build and fortifie at the discretion of the sayde sir Humfrey, and of his heires and assignes, the statutes or actes of Parliament made against Fugitives, or against such as shall depart, remaine, or continue out of our Realme of England without licence, or any other acte, statute, lawe, or matter whatsoever to the contrary in any wise notwithstanding. And wee doe likewise by these presents, for us, our heirs and successours, give full authoritie and power to the saide Sir Humfrey, his heires and assignes, and every of them, that hee and they, and every, or any of them, shall and may at all and every time and times hereafter, have, take, and lead in the same voyages, to travell thitherward, and to inhabite there with him, and every or any of them, such and so many of our subjects as shall willingly accompany him and them, and every or any of them, with sufficient shipping, and furniture for their transportations, so that none of the same persons, nor any of them be such as hereafter shall be specially restrained by us, our heires and successors. And further, that he the said Humfrey, his heires and assignes, and every or any of them shall have, hold,

occupy & enjoy to him, his heires or assignes, and every of them for ever, all the soyle of all such lands,

p. 1692

countries, & territories so to be discovered or possessed as aforesaid, and of all Cities, Castles, Townes and Villages, and places in the same, with the rites, royalties and jurisdictions, as well marine as other, within the sayd lands or countreys of the seas thereunto adjoyning, to be had or used with ful power to dispose thereof, & of every part thereof in fee simple or otherwise, according to the order of the laws of England, as nere as the same conveniently may be, at his, and their will & pleasure, to any person then being, or that shall remaine within the allegiance of us, our heires and successours, paying unto us for all services, dueties and demaunds, the fift part of all the oare of gold and silver, that from time to time, and at all times after such discoverie, subduing and possessing shall be there gotten: all which lands, countreys and territories, shall for ever bee holden by the sayd Sir Humfrey, his heires and assignes of us, our heires and successours by homage, and by the sayd payment of the sayd flit part before reserved onely for all services.

And moreover, we doe by these presents for us, our heires and successours, give and graunt licence to the sayde Sir Humfrey Gilbert, his heires or assignes, and to every of them, that hee and they, and every or any of them shall, and may from time to time, and all times for ever hereafter, for his and their defence, encounter, expulse, repell, and resist, as well by Sea as by land, and by all other wayes whatsoever, all, and every such person and persons whatsoever, as without the speciall licence and liking of the sayd Sir Humfrey, and of his heires and assignes, shall attempt to inhabite within the sayd countreys, or any of them, or within the space of two hundreth leagues neere to the place or places within such countreys as aforesayd, if they shall not bee before planted or inhabited within the limites aforesayd, with the subjects of any Christian prince, being in amitie with her Majesty, where the said sir Humfrey, his heires or assignes, or any of them, or his or their, or any of their associates or companies, shall within sixe yeeres next ensuing, make their dwellings and abidings, or that shall enterprise or attempt at any time hereafter unlawfully to annoy either by Sea or land, the said sir Humfrey, his heires or assignes, or any of them, or his or their, or any of their companies: giving and graunting by these presents, further power and authoritie to the sayd sir Humfrey, his heires and assignes, and every of them from time to time, and at all times for ever hereafter to take and surprise by all maner of meanes whatsoever, all and every person and persons, with their shippes, vessels, and other goods and furniture, which without the licence of the sayd sir Humfrey, or his heires or assignes as aforesayd, shall bee found traffiquing into any harborough or harboroughs, creeke or creekes within the limites aforesayde, (the subjects of our Realmes and dominions, and all other

persons in amitie with us, being driven by force of tempest or shipwracke onely excepted) and those persons and every of them with their ships, vessels, goods, and furniture, to detaine and possesse, as of good and lawfull prize, according to the discretion of him the sayd sir Humfrey, his heires and assignes, and of every or any of them. And for uniting in more perfect league and amitie of such countreys, landes and territories so to bee possessed and inhabited as aforesayde, with our Realmes of England and Ireland, and for the better

p. 1693

encouragement of men to this enterprise: wee doe by these presents graunt, and declare, that all such countreys so hereafter to bee possessed and inhabited as aforesayd, from thencefoorth shall bee of the allegiance of us, our heires, and successours. And wee doe graunt to the sayd sir Humfrey, his heires and assignes, and to all and every of them, and to all and every other person and persons, being of our allegiance, whose names shall be noted or entred in some of our courts of Record, within this our Realme of England, and that with the assent of the sayd sir Humfrey, his heires or assignes, shall nowe in this journey for discoverie, or in the second journey for conquest hereafter, travel to such lands, countries and territories as aforesaid, and to their and every of their heires: that they and every or any of them being either borne within our sayd Realmes of England or Ireland, or within any other place within our allegiance, and which hereafter shall be inhabiting within any the lands, countreys and territories, with such licence as aforesayd, shall, and may have, and enjoy all the privileges of free denizens and persons native of England, and within our allegiance: any law, custome, or usage to the contrary not withstanding.

And forasmuch, as upon the finding out, discovering and inhabiting of such remote lands, countreys and territories, as aforesayd, it shall be necessarie for the safetie of all men that shall adventure themselves in those journeys or voiages, to determine to live together in Christian peace and civill quietnesse each with other, whereby every one may with more pleasure and profit, enjoy that whereunto they shall attaine with great paine and perill: wee for us, our heires and successours are likewise pleased and contented, and by these presents doe give and graunt to the sayd sir Humfrey and his heires and assignes for ever, that he and they, and every or any of them, shall and may from time to time for ever hereafter within the sayd mentioned remote lands and countreys, and in the way by the Seas thither, and from thence, have full and meere power and authoritie to correct, punish, pardon, governe and rule by their, and every or any of their good discretions and pollicies, as well in causes capitall or criminall, as civill, both marine and other, all such our subjects and others, as shall from time to time hereafter adventure themselves in the sayd journeys or voyages habitative or possessive, or that shall at any time hereafter inhabite any such lands, countreys or

territories as aforesayd, or that shall abide within two hundred leagues of any the sayd place or places, where the sayd sir Humfrey or his heires, or assignes, or any of them, or any of his or their associats or companies, shall inhabite within sixe yeeres next ensuing the date hereof, according to such statutes, lawes and ordinances, as shall be by him the said sir Humfrey, his heires and assignes, or every, or any of them devised or established for the better governement of the said people as aforesayd: so alwayes that the sayd statutes, lawes and ordinances may be as neere as conveniently may, agreeable to the forme of the lawes & pollicy of England: and also, that they be not against the true Christian faith or religion now professed in the church of England, nor in any wise to withdraw any of the subjects or people of those lands or places from the

p. 1694

allegiance of us, our heires or successours, as their immediate Sovereignes under God. And further we doe by these presents for us, our heires and successours, give and graunt full power and authority to our trustie and welbeloved counsellor, sir William Cecil knight, lord Burleigh, our high treasurer of England, and to the lord treasurer of England of us, for the time being, and to the privie counsell of us, our heires and successours, or any foure of them for the time being, that he, they, or any foure of them, shall, and may from time to time and at all times hereafter, under his or their handes or seales by vertue of these presents, authorize and licence the sayd Sir Humfrey Gilbert, his heires and assignes, and every or any of them by him and themselves, or by their or any of their sufficient attorneys, deputies officers, ministers, factors and servants, to imbarke and transport out of our Realmes of England and Ireland, all, or any of his or their goods, and all or any the goods of his or their associates and companies, and every or any of them, with such other necessaries and commodities of any our Realmes, as to the said lord treasurer or foure of the privie counsell of us, our heires, or successours for the time being, as aforesayd, shall be from time to time by his or their wisdoms or discretions thought meete and convenient for the better reliefe and supportation of him the sayd sir Humfrey, his heires and assignes, and every or any of them, and his and their, and every or any of their said associates and companies, any act, statute, lawe, or other thing to the contrary in any wise notwithstanding.

Provided alwayes, and our will and pleasure is, and wee doe hereby declare to all Christian Kings, princes and states, that if the said sir Humfrey, his heires or assignes, or any of them, or any other by their licence or appointment, shall at any time or times hereafter robbe or spoile by Sea or by land, or doe any act of unjust and unlawfull hostilitie to any of the Subjects of us, our heires, or successours, or any of the Subjects of any King, prince, ruler, governour or state being then in perfect league and amitie with us, our heires or

successours: and that upon such injurie, or upon just complaint of any such prince, ruler, governour or state, or their subjects, wee our heires or successors shall make open proclamation within any the portes of our Realme of England commodious, that the said Sir Humfrey, his heires or assignes, or any other to whom these our Letters patents may extend, shall within the terme to be limited by such proclamations, make full restitution and satisfaction of all such injuries done, so as both we and the saide Princes, or others so complayning, may holde us and themselves fully contended: And that if the saide Sir Humfrey, his heires and assignes, shall not make or cause to bee made satisfaction accordingly, within such time so to be limited: that then it shall bee lawfull to us, our heires and successors, to put the said Sir Humfrey, his heires and assignes, and adherents, and all the inhabitants of the said places to be discovered as is aforesaide, or any of them out of our allegiance and protection, and that from and after such time of putting out of protection the saide Sir Humfrey, and his heires, assignes, adherents and others so to be put out, and the said places within their habitation, possession

p. 1695

and rule, shal be out of our protection and allegiance, and free for all Princes and others to pursue with hostilitie as being not our Subjects, nor by us any way to bee advowed, maintained or defended, nor to be holden as any of ours, nor to our protection, dominion or allegiance any way belonging, for that expresse mention, &c. In witesse whereof, &c. Witesse our selfe at Westminster the 11. day of June, the twentieth yeere of our raigne. Anno Dom. 1578.

Per ipsam Reginam, &c.

HAKLUYT'S PRINCIPAL NAVIGATIONS, VOL. VIII., pp. 9, 10, 11, 16.

Master Hakluyt, after most heartie commendations, with like thanks for your manifold kindnesse to me shewed, not for any merits that hitherto have beene mine, but wholly proceeding, I must needs confesse, of your owne good nature, which is so ready prest to benefit your countrey and all such poore men as have any sparke in them of good desires, that you do not onely become their friend, but also humble your selfe as servant in their affaires:

* * * *

Now to answer some part of your letter touching the sundry navies that come to Newfoundland, or Terra nova, for fish: you shal understand that some fish not neere the other by 200. leagues, and therefore the certaintie is not knowen; and some yeres come many more then other some, as I see the like among us: who since my first travell being but 4. yeeres, are increased from 30. sayle to 50. which commeth to passe chiefly by the imagination of the Western men, who thinke their neighbours have had greater gaines then in very deed they have, for that they see me to take such paines yeerely to go in proper person: they also suppose that I find some secret commoditie by reason that I doe search the harbors, creekes and havens, and also the land much more then ever any Englishman hath done. Surely I am glad that it so increaseth, whereof soever it springeth. But to let this passe, you shall understand that I am informed that there are above 100. saile of Spaniards that come to take Cod (who make all wet, and do drie it when they come home) besides 20. or 30. more that come from Biskaie to kill Whale for Traine. These be better appoynted for shipping and furniture of munition, then any nation saving the Englishmen, who commonly are lords of the harbors where they fish, and do use all strangers helpe in fishing if need require, according to an old custome of the countrey, which thing they do willingly, so that you take nothing from them more then a boat or twaine of salt, in respect of your protection of them against rovers or other violent intruders, who do often put them from good harbor,

&c. As touching their tunnage, I thinke it
p. 1697

may be neere five or sixe thousand tunne. But of Portugals there are not lightly above 50 saile, and they make all wet in like sorte, whose tunnage may amount to three thousand tuns, and not upwarde. Of the French nation and Britons, are about one hundred and fiftie sailes, the most of their shipping is very small, not past fortie tunnes, among which some are great and reasonably well appointed, better then the Portugals, and not so well as the Spaniards, and the burden of them may be some 7000. tunne. Their shipping is from all parts of France and Britaine, and the Spaniards from most parts of Spaine, the Portugals from Aviero and Viana, and from 2. or 3. ports more. The trade that our nation hath to Island maketh, that the English are not there in such numbers as other nations.

* * * *

And thus I end, committing you to God. From Bristow the
13. of November, 1578.

Yours to use and command,

ANTHONY PARCKHURST.

No. 707.
